## UNAUDITED PILLAR 3 DISCLOSURE 30 SEPTEMBER 2023

#### 1. Overview

The Pillar 3 Disclosure for financial reporting beginning 1 January 2010 was introduced under the Bank Negara Malaysia's Risk-Weighted Capital Adequacy Framework ("RWCAF"), which is the equivalent to Basel II issued by the Basel Committee on Banking Supervision. Basel II consists of 3 Pillars as follows:

- (a) Pillar 1 outlines the minimum amount of regulatory capital that banking institutions must hold against credit, market and operational risks assumed.
- (b) Pillar 2 focuses on strengthening the supervisory review process in developing more rigorous risk management framework and techniques. The purpose is for banking institutions to implement an effective and rigorous internal capital adequacy assessment process that commensurate with the risk profile and business plans of the Bank.
- (c) Pillar 3 sets out the minimum disclosure requirements of information on the risk management practices and capital adequacy of banking institution, aimed to enhance comparability amongst banking institutions.

The approaches adopted by Sumitomo Mitsui Banking Corporation Malaysia Berhad ("the Bank"), are shown in the table below:

| Risk type   | Approach adopted      | Capital requirement assessment   |
|-------------|-----------------------|--|
| Credit      | Standardised Approach | Standard risk weights  |
| Market      | Standardised Approach | Standard risk weights  |
| Operational |                       | Fixed percentage over average gross income for a fixed number of years |

#### 2. Capital Management

The objective of the Bank's capital management policy is to maintain an adequate level of capital to support business growth strategies under an acceptable risk framework, and to meet its regulatory minimum capital requirements. The Bank's capital management process includes analysis of the risk appetite and the capital requirement for the business growth and periodical monitoring of capital adequacy ratios.

## UNAUDITED PILLAR 3 DISCLOSURE 30 SEPTEMBER 2023

#### 3. Capital Management Framework

The Bank has exposure to the following risks from its use of financial instruments:

- Credit risk
- Liquidity risk
- Market risk
- Operational risk
- Shariah non-compliance risk

The Board of Directors has overall responsibility for the establishment and oversight of the Bank's risk management framework. The Board has established a Board Risk Management Committee ("BRMC"), which is responsible for developing the risk management policies and assessing the implementation of risk management by the management of the Bank. The Bank has also established a Risk Management Committee ("RMC") as one of the management committees to formulate the policies, procedures and risk limits and conduct periodical monitoring on risk exposure, risk portfolio and risk management activities.

#### 3.1 Credit Risk

Credit risk is the risk of a financial loss to the Bank if a customer or counterparty to a financial instrument fails to meet its contractual obligations. The Bank's exposure to credit risk arises principally from loans and advances to customers, placements with other banks, investment in debt securities, derivative financial assets and other receivables.

#### **Credit Risk Management**

Integral to the management of credit risk, the Bank has credit policies and procedures in place to identify, measure and manage credit risk. Whilst, the Bank continually monitors the exposure to credit risk on an on going basis and identify emerging risks to formulate appropriate mitigation actions.

The Bank monitors its credit concentration risk from a single counterparty exposure, large exposure or from other portfolio concentrations by setting an exposure limits on customers, customer group, industries, products, asset quality etc.

Credit evaluations are required to be performed on customers requiring credit by the business managers and credit analyst in the first line of defence function with independent risk assessment and approval roles in the second line of defence function which are clearly defined and segregated.

[Company No. 201001042446 (926374-U)] (Incorporated in Malaysia)

## UNAUDITED PILLAR 3 DISCLOSURE 30 SEPTEMBER 2023

#### 3.1 Credit Risk (continued)

#### **Credit Risk Governance**

The Bank has established Credit Committee as one of the management committees with the following objectives:

- (i) to review, analyse and endorse or approve credit proposal by ensuring approvals are granted within the Bank's risk appetite as well as effective credit limit control and monitoring; and
- (ii) the review and approvals are guided by credit policies and procedures which are reviewed periodically to ensure their continued relevance to the Bank's business strategy and the business environment.

The RMC conducts periodical monitoring on credit exposure trend, asset quality by obligor grading and its credit cost ratio in relation to the probability of default as well as default or impaired loans ratio, portfolio concentration analysis and credit related limits control such as single counterparty exposure limit, large loan limit, exposure to connected parties, product concentration limits and sectorial limits.

As at the end of the reporting period, the maximum exposure to credit risk arising from loans, advances and receivables are represented by the carrying amounts of cash and short-term funds, deposits and placements with banks and other financial institutions, debt instruments measured at FVOCI and loans, advances and financing and other receivables as shown in the statement of financial position.

The Bank has taken reasonable steps to ensure that loans, advances, investments and receivables that are neither past due nor impaired are stated at their realisable values. A significant portion of these loans, advances, investments and receivables are regular customers or counterparties that have been transacting with the Bank.

|                   | 9,464,627  | 3,122,859     | 1,432,406   | 15,005,710 | 650       | 889,582    | 9,261     | 98,865  | 30,023,960 |

<sup>\*</sup> Exclude allowance for ECL

The residual contractual maturity for off-balance sheet exposures is not presented as the total off-balance sheet exposures do not represent future receivables since the Bank expects many of these commitments (such as undrawn credit facilities) to expire or unconditionally cancelled by the Bank without them being called or drawn upon.

|               | 5,911,756                      | 1,968,874                             | 703,693                        | 15,279,927                  | 45,000                         | 586,949                       | 7,795                      | 44,434                     | 24,548,428                   |

<sup>\*</sup> Exclude allowance for ECL

The residual contractual maturity for off-balance sheet exposures is not presented as the total off-balance sheet exposures do not represent future receivables since the Bank expects many of these commitments (such as undrawn credit facilities) to expire or unconditionally cancelled by the Bank without them being called or drawn upon.

[Company No. 201001042446 (926374-U)] (Incorporated in Malaysia)

## UNAUDITED PILLAR 3 DISCLOSURE 30 SEPTEMBER 2023

#### 3.1 Credit Risk (continued)

#### Credit quality of gross loans, advances and financing

The Bank's ECL model takes account of the on and off-balance sheet credit exposures to sovereign, financial institutions and corporates. The credit exposures are categorised into three stages, defined as follows:

Stage 1: Ordinary / Performing Credit Exposure (12-month ECL)

Stage 2: Exposure with Significant Increase in Credit Risk (Lifetime ECL)

Stage 3: Impaired Credit Exposure (Lifetime ECL)

The general and impairment provision of the credit exposures are equivalent to 12-month ECL or Lifetime ECL, depending on the stage of credit exposures applicable to each financial asset.

All gross loans, advances and financing are neither past due nor impaired as at the following reporting dates:

|   | 30 September<br>2023 | 31 March<br>2023 |
|---|----------------------|------------------|
|   | RM'000               | RM'000           |
| At amortised cost:  |                      |                  |

## UNAUDITED PILLAR 3 DISCLOSURE 30 SEPTEMBER 2023

#### 3.1 Credit Risk (continued)

#### Disclosure for portfolio under Standardised Approach

The Bank refers to the credit ratings assigned by credit rating agencies in its calculation of credit risk-weighted assets. The following are the External Credit Assessment Institutions ("ECAI") ratings used by the Bank and are recognised by BNM in the RWCAF:

- (a) Standard & Poor's Rating Services ("S & P")
- (b) Moody's Investors Service ("Moody's")
- (c) Fitch Ratings ("Fitch")
- (d) RAM Rating Services Berhad ("RAM")
- (e) Malaysian Rating Corporation Berhad ("MARC")
- (f) Rating and Investment Information, Inc. ("R&I")

The ECAI ratings accorded to the following counterparty exposure classes are used in the calculation of risk-weighted assets for capital adequacy purposes:

- (a) Sovereigns and Central Bank
- (b) Banking Institutions
- (c) Corporates

#### Rated and Unrated Counterparties

In general, the issue rating i.e. the rating specific to the credit exposure is used. When there is no specific rating available, the credit rating assigned to the issuer or counterparty of the particular credit exposure is used. In cases where an exposure has neither an issue or issuer rating, it is deemed as unrated.

Where a counterparty or an exposure is rated by more than one ECAI, all available external ratings of the counterparty will be captured and the following rules will be observed:

- Where 2 recognised external ratings are available, the lower rating is to be applied; or
- Where 3 or more recognised external ratings are available, the lower of the highest 2 ratings will be used for the capital adequacy calculation purposes.

## UNAUDITED PILLAR 3 DISCLOSURE 30 SEPTEMBER 2023

#### 3.1 Credit Risk (continued)

#### **Credit Risk Mitigation**

When extending credit, the Bank shall make reasonable credit judgment after confirming the credit standing and repayment/payment ability of the borrower/customer and does not grant credit facilities solely on the basis of the collateral provided. Credit facilities may be provided on an unsecured basis or with some credit supports depending on few common factors such as the strength of customer's credit standing, product type and/or the total counterparty exposures. Credit risk mitigation nevertheless is an important aspect of effective risk management in the Bank.

Collaterals taken by the Bank generally are cash, properties and corporate guarantees. At present, the Bank does not make use of credit derivative instruments and on and off-balance sheet netting in the bank's credit risk mitigation process. Hence, there is no implication to the collateral value to be posted in the events of credit ratings downgrade, and as such, no credit reserves are created for exposures which are secured in such manner.

The netting arrangement will be considered on an as-and-when basis to minimise the Bank's risk exposures. Exposures arising from forex and derivatives are typically mitigated through agreements such as the International Swaps and Derivatives Association (ISDA) Master Agreements and the Credit Support Annex (CSA). Such agreements help to minimise credit exposure by allowing the Bank to offset what it owes to a counterparty against what is due from that counterparty in the event of default. The Bank has procedures to ensure that appropriate information is available to support the collateral process and to highlight counterparties that have not met their requirement for additional collateral to satisfy specified initial margin amount and variation margin threshold.

For calculating and assessing Net Credit Risk-Weighted Assets (RWA), the Bank takes into account eligible collaterals pledged with the Bank, that are primarily cash deposits. Collateral haircuts are applied when there is a currency mismatch between customer exposure and collaterals.

For collateral valuation and management, the Bank is guided by its credit policy and procedures. The collaterals legal enforceability are reviewed on yearly basis or as and when there are any changes to the relevant regulations.

## UNAUDITED PILLAR 3 DISCLOSURE 30 SEPTEMBER 2023

#### 3.1 Credit Risk (continued)

#### **Counterparty Credit Risk (CCR)**

The CCR on derivative financial instruments is the risk that the Bank's counterparty in a foreign exchange, interest rate, options or credit derivative contract defaults prior to maturity date of the contract and the Bank has a claim on the counterparty at a relevant time. The Bank's financial loss is not the entire contracted principal value of the derivatives, but the Bank will only suffer a replacement cost if the contract carries a fair value gain at time of default.

The CCR is managed via the establishment of counterparty limits and also managed as part of the overall lending limits to banks and customers based on BNM's Single Counterparty Exposure Limit ("SCEL"). As the counterparty credit risk exposure fluctuates with market variables, counterparty credit risk is measured as the sum of mark-to-market (MTM) plus appropriate addon factor for Potential Exposure (PE). The PE factor is an estimate of the maximum credit exposure over the remaining life of the foreign exchange (FX)/ derivative transactions and is used for limit setting estimation and internal risk management.

[Company No. 201001042446 (926374-U)] (Incorporated in Malaysia)

## UNAUDITED PILLAR 3 DISCLOSURE 30 SEPTEMBER 2023

#### 3.2 Liquidity Risk

Liquidity risk is the risk when the Bank fails to raise funds to meet the present or future demand of customers or counterparties at a reasonable cost. The potential liquidity risks of the Bank mainly include customers' premature and collective withdrawal, overdue payment of the debtors, mismatched asset-liability maturity structure and difficulties in realisation of assets.

The primary tool used for monitoring liquidity is the Bank Negara Malaysia's Liquidity Coverage Ratio ("LCR"). The LCR measured the adequacy of high quality liquid assets to withstand acute liquidity stress scenario over 30-day horizon. It is further supplemented with the internal liquidity risk management policies set by the Board of Directors and incorporated in the Market / Liquidity Risk Management policies and procedures. These policies ensure that the liquidity surpluses are within the limit. The Assets and Liabilities Management Committee ("ALCO") is responsible for the liquidity risk management. The liquidity risk management activities are carried out through active management of maturity profiles of assets and liabilities, diversification of the funding base and proactive management of the Bank's customer deposits.

#### 3.3 Market Risk

Market risk is the risk that changes in market prices, such as foreign exchange rates, interest rates and other prices that will affect the Bank's financial position or cash flows due to the revaluation of financial instruments categorised as trading items. The objective of market risk management is to manage and control market risk exposures within the predetermined limits which are in line with the risk appetite of the Bank.

The BRMC approves the Bank's market risk appetite taking account of market volatility, the range of traded products and assets classes, the business volumes and transaction sizes. Market risk appetite has remained broadly stable since 2011 and to date.

The BRMC is responsible for the limit setting at a business level. The BRMC is also responsible for policies and other standards for the control of market risk and overseeing their effective implementation. These policies cover both trading and non-trading books of the Bank.

All permanent limits are approved by the Board / BRMC prior to implementation. Exceptions are escalated to the Board / BRMC.

## UNAUDITED PILLAR 3 DISCLOSURE 30 SEPTEMBER 2023

#### 3.3 Market Risk (continued)

#### Interest rate risk management

Interest rate risk in market risk management refers to the changes in the present values of fixed income securities in the trading book and derivative instrument such as interest rate swap, currency swap and forward exchange rate contracts, as a result of changes in the levels of market interest rates. Bank's ALCO regularly reviews the interest rate outlook, assessed the vulnerability of present values of the trading book items and develops strategies to mitigate interest rate risk.

#### Foreign exchange risk management

Foreign exchange risk arises from exchange rate movements, which affects the profit of the Bank from its foreign exchange open positions taken from time to time. This risk is principally managed by setting predetermined limits on open foreign exchange positions against these limits and the setting and monitoring of cut-loss mechanisms. To mitigate this risk the Bank's foreign exchange positions with customers are normally hedged with counter deals in the market and the Bank does not keep any large open currency positions. The Bank enters into foreign exchange related derivatives, namely spot and forward contracts, as part of its strategies to manage foreign exchange risk.

## UNAUDITED PILLAR 3 DISCLOSURE 30 SEPTEMBER 2023

#### 3.3 Market Risk (continued)

#### **Interest Rate Risk in Banking Book**

Interest rate risk is defined as the potential impact on the Bank's earnings (i.e. the net interest income) and the net assets value resulting from a change in interest rates.

Interest rate risk in banking book is managed through the Bank's ALCO, which meets on a monthly basis. The committee is responsible to study the sensitivity of the net interest income against the change in interest rates and subsequently, to determine the Bank's policy on balance sheet management. The committee also monitors the impact of the change in interest rates on the net assets value.

The primary tool used for monitoring the interest rate risk impact on the earnings is the repricing gap analysis. In this analysis, the re-price dates of rate sensitive assets are compared against the re-price dates of rate sensitive liabilities. A positive gap position indicates that more assets are available to be re-priced than liabilities; hence, an increase in the interest rates will positively impact the Bank's net interest income.

In addition to monitoring the assets and liabilities gap, the Bank also uses interest rate derivatives (i.e. interest rate swaps) to mitigate the interest rate risk impact on the earnings.

The primary tool used to monitor the interest rate risk impact on the net assets value is the basis point value ("BPV") analysis and economic value of equity ("EVE") analysis. The Bank's BPV positions are monitored on daily basis against the approved BPV limits as set by the Head Office based on recommendation by ALCO, whereas, the EVE is monitored and reported to ALCO on a monthly basis.

## UNAUDITED PILLAR 3 DISCLOSURE 30 SEPTEMBER 2023

### 3.3 Market Risk (continued)

#### **Interest Rate Risk in Banking Book (continued)**

The table below details the disclosure for interest rate risk in the banking book, the increase or decline in earnings and equity for upward and downward rate shocks which are consistent with shocks applied in simulation for measuring interest rate risk, broken down by various currencies, where relevant. Simulation is measured based on the banking book positions as at reporting date and does not take into account loans / financing and deposit owing to prepayments/ premature withdrawals.

## UNAUDITED PILLAR 3 DISCLOSURE 30 SEPTEMBER 2023

#### 3.4 Operational Risk

Operational risk is the risk of loss resulting from inadequate or failed internal processes, human behaviour and systems, or from external events. Operational risk is inherent in each of the Bank's business activities. It includes risks such as fraud, physical damage, business interruption, transaction failures, legal and regulatory breaches, shariah non-compliance and employee health and safety hazards. Operational risk may result in direct financial loss as well as indirect financial losses to the Bank.

Operational risks are managed and controlled within the individual business lines. The RMC monitors the predetermined items to assess the trend of operational risks.

#### The Calculation of Value Equivalent to Operational Risk-weighted Asset

The Bank currently uses Basic Indicator Approach ("BIA") to calculate its value equivalent to operational risk-weighted assets as at 30 September 2023.

The following tables present the minimum disclosure on regulatory capital requirements on operational risk.

| 30 September 2023 | Risk-Weighted Assets<br>RM'000 | Minimum Capital<br>Requirements at 8%<br>RM'000 |
|-------------------|--------------------------------|---|
| Operational Risk  | 753,543                        | 60,283  |
| 31 March 2023     | Risk-Weighted Assets<br>RM'000 | Minimum Capital<br>Requirements at 8%<br>RM'000 |
| Operational Risk  | 716,237                        | 57,299  |

## UNAUDITED PILLAR 3 DISCLOSURE 30 SEPTEMBER 2023

#### 3.5 Shariah non-compliance risk

Shariah non-compliance risk refers to the risk of legal or regulatory sanctions, financial loss or non-financial implications including reputational damage, which SMBCMY may suffer arising from failure to comply with the rulings of the Shariah Advisory Council of Bank Negara Malaysia (SAC), standards on Shariah principles issued by the BNM and SMBCMY Shariah Committee (Shariah Committee) or failures to comply with the Shariah related processes when handling Islamic banking business transactions.

SMBCMY has established an appropriate Shariah governance framework to strenghen and enhance the responsibilities and accountabilities of the Board, Shariah Committee, Management and key stakeholders to promote shariah compliance and ensure the islamic transactions are executed in accordance to Shariah requirements, which are duly provided for in the relevant policies and procedures implemented within SMBCMY.

The aforesaid Shariah Governance framework is further reinforced with the incorporation of key shariah compliant controls within SMBCMY's existing three (3) lines of defense framework. The first line of defense is the Business and Supports departments who are responsible to manage day-to-day shariah risks that are inherent in their business operations. The second line of defense comprises of shariah risk management function and shariah review function. Shariah risk management function is responsible to systematically identify, assess, monitor and review the shariah non-compliance risks, as may be embedded in SMBCMY's Risk and Control Self Assessment process that is undertaken, at least, annually. Meanwhile, the Shariah Review function performs regular reviews of SMBCMY's Shariah compliant products, services and business operations to ensure adherence to Shariah requirements, as may be prescribed by BNM from time to time.

The third line of defense is the Shariah Audit function who provides independent review in ensuring a sound and effective shariah internal control system.

As of now, there is no shariah non-compliance transactions recorded by SMBCMY.

## UNAUDITED PILLAR 3 DISCLOSURE 30 SEPTEMBER 2023

### 4. Capital Adequacy

(a) The capital adequacy ratios of the Bank are as follows:

|                             | 30 September<br>2023 | 31 March<br>2023 |
|-----------------------------|----------------------|------------------|
| Core capital ratio          | 22.968%              | 23.563%          |
| Risk-weighted capital ratio | 24.132%              | 24.731%          |

The capital adequacy ratios consist of capital base and risk-weighted assets derived from balances of the Bank. Beginning 1 January 2016, the minimum regulatory capital adequacy requirement has been increased to include capital requirement for capital conservation buffer and countercyclical capital buffer. As at 30 September 2023, the minimum regulatory capital adequacy and capital buffer requirement is 10.50% (March 2023: 10.50%) for the risk-weighted capital ratio.

## UNAUDITED PILLAR 3 DISCLOSURE 30 SEPTEMBER 2023

#### CHIEF EXECUTIVE OFFICER ATTESTATION

In accordance with Bank Negara Malaysia's Risk Weighted Capital Adequacy Framework (Basel II) - Disclosure Requirements (Pillar 3), I hereby attest that to the best of my knowledge, the disclosures contained in Sumitomo Mitsui Banking Corporation Malaysia Berhad's Pillar 3 Disclosure report for the financial year ended 30 September 2023 are consistent with the manner the Bank assesses and manages its risk, accurate, complete and not misleading in any particular way.

[Signed]

Hiroshi Okawa Chief Executive Officer

Date: 31 October 2023
