

# Sumitomo Mitsui Banking Corporation

*(incorporated under the laws of Japan with limited liability)*

**U.S.\$850,000,000**

## **8.15 per cent. Perpetual Subordinated Bonds**

The U.S.\$850,000,000 Perpetual Subordinated Bonds (the “Bonds”) of Sumitomo Mitsui Banking Corporation (“SMBC”) will be issued in the denomination of U.S.\$1,000 subject to the terms and conditions attached thereto (the “Conditions”).

The Bonds are undated and accordingly have no final maturity date and will only be redeemed or repaid in accordance with Conditions 4 or 8. The Bonds are subject to redemption in whole, at their nominal amount, together with accrued interest, at the option of SMBC or in the event of certain changes affecting taxes of Japan, in each case, after having obtained the prior consent of the Japanese Financial Services Agency (the “FSA”). See “Terms and Conditions of the Bonds — Redemption and Purchase”.

Subject to Condition 2(e), the Bonds bear interest from August 1, 2003 at the rate of 8.15 per cent. per annum, payable quarterly in arrear on November 1, February 1, May 1 and August 1 in each year, as described in Condition 3.

Payment of principal and interest by SMBC in respect of the Bonds and the Coupons (as defined in the Conditions) shall be made without withholding or deduction for, or on account of, any present or future taxes, duties, assessments or governmental charges of whatever nature imposed or levied by or on behalf of Japan or any authority therein or thereof having power to tax, unless such withholding or deduction is required by law, as further described in Condition 6.

The Bonds will initially be represented by a Temporary Global Bond, without interest coupons, which will be deposited with a common depository on behalf of Euroclear Bank S.A./N.V. as operator of the Euroclear System (“Euroclear”) and Clearstream Banking, société anonyme (“Clearstream, Luxembourg”) on or about August 1, 2003. The Temporary Global Bond will be exchangeable for interests in a Global Bond, without interest coupons, on or after a date which is expected to be September 11, 2003 upon certification as to non-U.S. beneficial ownership. The Global Bond will be exchangeable for definitive Bonds in bearer form in the denomination of U.S.\$1,000 in certain limited circumstances set out therein. See “Summary of Provisions relating to the Bonds while in Global Form”.

Application has been made to the Financial Services Authority (the “UK Listing Authority”) in its capacity as competent authority under the Financial Services and Markets Act 2000 (the “FSMA”) for the Bonds to be admitted to the official list of the UK Listing Authority (the “Official List”) and to the London Stock Exchange plc (the “London Stock Exchange”) for such Bonds to be admitted to trading on the London Stock Exchange’s market for listed securities. Admission to the Official List of the UK Listing Authority together with admission to trading on the London Stock Exchange’s market for listed securities constitute official listing on a stock exchange.

A copy of this document, which comprises listing particulars, has been delivered to the Registrar of Companies in England and Wales as required by Section 83 of the FSMA.

This Offering Circular does not constitute an offer of, or solicitation of an offer to buy or subscribe for the Bonds in any jurisdiction in which such offer or solicitation is unlawful. In particular, the Bonds have not been and will not be registered under the U.S. Securities Act of 1933 (the “Securities Act”) and Bonds in bearer form are subject to U.S. tax law requirements. Subject to certain exceptions, Bonds may not be offered, sold or delivered within the United States or to U.S. persons. For a description of certain further restrictions on offers and sales of Bonds and distribution of this Offering Circular see “Subscription and Sale”.

**See “Investment Considerations” for a discussion of certain factors that should be considered in connection with an investment in the Bonds.**

*Joint Lead Managers and Joint Bookrunners*

**Goldman Sachs International    JPMorgan    Daiwa Securities SMBC Europe**  
**Citigroup    Morgan Stanley    UBS Investment Bank**

This Offering Circular comprises listing particulars given in compliance with the listing rules made under Section 74 of the FSMA by the UK Listing Authority for the purpose of giving information with regard to SMBC, SMBC and its subsidiaries and affiliates taken as a whole (the “SMBC Group”) and the Bonds.

SMBC accepts responsibility for the information contained in this document. To the best of the knowledge and belief of SMBC (which has taken all reasonable care to ensure that such is the case), the information contained in this document is in accordance with the facts and does not omit anything likely to affect the import of such information.

Any reference in this Offering Circular to listing particulars means this Offering Circular excluding all information incorporated by reference. SMBC has confirmed that any information incorporated by reference, including any such information to which readers of this Offering Circular are expressly referred, has not been and does not need to be included in the listing particulars to satisfy the requirements of the FSMA or the listing rules made under Section 74 of the FSMA by the UK Listing Authority. SMBC believes that none of the information incorporated therein by reference conflicts in any material respect with the information included in the listing particulars.

SMBC, having made all reasonable enquiries, confirms that this Offering Circular contains all information with respect to SMBC, the SMBC Group and the Bonds which is material in the context of the issue and offering of the Bonds, the statements contained in it relating to SMBC, the SMBC Group, Sumitomo Mitsui Financial Group, Inc. (“SMFG”) and SMFG and its subsidiaries and affiliates taken as a whole (the “SMFG group”) are in every material particular true and accurate and not misleading, the opinions and intentions expressed in this document with regard to SMBC, the SMBC Group, SMFG and the SMFG group are honestly held, have been reached after considering all relevant circumstances and are based on reasonable assumptions, there are no other facts in relation to SMBC, the SMBC Group, SMFG, the SMFG group or the Bonds the omission of which would, in the context of the issue and offering of the Bonds, make any statement in this document misleading in any material respect and all reasonable enquiries have been made by SMBC to ascertain such facts and to verify the accuracy of all such information and statements.

This Offering Circular does not constitute an offer of, or an invitation by or on behalf of SMBC or the Managers (as defined in “Subscription and Sale”) to subscribe or purchase, any of the Bonds. The distribution of this Offering Circular and the offering of the Bonds in certain jurisdictions may be restricted by law. Persons into whose possession this Offering Circular comes are required by SMBC and the Managers to inform themselves about and to observe any such restrictions. For a description of certain further restrictions on offers and sales of Bonds and the distribution of this Offering Circular, see “Subscription and Sale”.

No person is authorised to give any information or to make any representation not contained in this Offering Circular and any information or representation not so contained must not be relied upon as having been authorised by or on behalf of SMBC or the Managers. The delivery of this Offering Circular at any time does not imply that the information contained in it is correct as at any time subsequent to its date.

The Bonds have not been and will not be registered under the Securities Act and Bonds in bearer form are subject to U.S. tax law requirements. Subject to certain exceptions, Bonds may not be offered, sold or delivered within the United States or to U.S. persons.

The Bonds have not been and will not be registered under the Securities and Exchange Law (as defined in “Subscription and Sale”) and are subject to the Special Taxation Measures Law (as defined in “Subscription and Sale”). The Bonds may not be offered, sold or delivered in Japan or to, or for the benefit of, residents of Japan or Japanese corporations, except pursuant to an exemption from the registration requirements of, and otherwise in compliance with, the Securities and Exchange Law and any other applicable laws, regulations and ministerial guidelines of Japan (see “Subscription and Sale”). Interest payments on the Bonds generally will be subject to Japanese withholding tax unless the holder establishes that the Bonds are held by or for the account of a holder that is not an individual resident of Japan or a Japanese corporation for Japanese tax purposes or is a Japanese designated financial institution described in Article 6 of the Special Taxation Measures Law (see “Taxation — Japan”).

In addition there are further restrictions on offers and sales of the Bonds in other jurisdictions, including the United Kingdom, Singapore and the Netherlands, see “Subscription and Sale”.

Unless otherwise specified or the context requires, references to “dollars”, “U.S. dollars” and “U.S.\$” are to United States dollars and references to “yen” and “¥” are to Japanese yen. Unless otherwise specified, where financial information in relation to SMBC has been translated into U.S. dollars, it has been so translated, for convenience only, at the rate of ¥120.20 equals U.S.\$1, the rate applicable as at March 31, 2003. Such translation

should not be construed as a representation that the amounts in question have been, could have been or could be converted into U.S. dollars at that or any other rate. The median exchange rate quotations by SMBC for buying and selling spot dollars by telegraphic transfer against yen on July 24, 2003 was ¥118.90 equals U.S.\$1.

In this Offering Circular, where information is presented in thousands, millions, billions or trillions of yen or in thousands, millions or billions of dollars, amounts of less than one thousand, one million, one billion or one trillion, as the case may be, have been omitted or rounded. Accordingly, the total of each column of figures may not equal to the total of the individual items.

Any reference in this Offering Circular to the “FSA” is to the Japanese Financial Services Agency.

References in this Offering Circular to “SMBC” are to the former Sumitomo Mitsui Banking Corporation (the “Former-SMBC”) in respect of dates, or periods, prior to March 17, 2003 and to THE WAKASHIO BANK, LTD. (“Wakashio Bank”) together with the Former-SMBC (which was merged into Wakashio Bank) in respect of dates, or periods, on or after March 17, 2003, see “Note Regarding Financial Information”.

Unless otherwise stated, all information relating to SMBC and its predecessors in this Offering Circular is presented on a consolidated basis. In this Offering Circular, financial information for SMBC included for the year ended March 31, 2002 has been extracted from the consolidated and non-consolidated (as the case may be) financial information for the Former-SMBC, while the financial information included for the year ended March 31, 2003 has been extracted from the consolidated and non-consolidated (as the case may be) financial information for SMBC.

**In connection with this issue, Goldman Sachs International or any person acting for Goldman Sachs International may over-allot or effect transactions with a view to supporting the market price of the Bonds at a level higher than that which might otherwise prevail for a limited period. However, there may be no obligation on Goldman Sachs International or any agent of Goldman Sachs International to do this. Such stabilising, if commenced, may be discontinued at any time, and must be brought to an end after a limited period.**

## FORWARD LOOKING STATEMENTS

This Offering Circular contains statements that constitute forward looking statements. These statements appear in a number of places in this Offering Circular and include statements regarding the intent, belief or current expectations of SMBC with respect to the results of operations and financial condition of SMBC, the SMBC Group, SMFG and the SMFG group including, without limitation, future loan loss provisions and financial support to customers. In those and other portions of this document, the words “anticipate”, “believe”, “estimate”, “expect”, “intend”, and similar expressions, as they relate to SMBC or its management, are intended to identify forward looking statements. These statements reflect the current views of SMBC with respect to future events and are subject to certain risks, uncertainties and assumptions, including the investment considerations described in this Offering Circular. Should one or more of these risks or uncertainties materialise, or should underlying assumptions prove incorrect, actual results may vary materially from those described herein as anticipated, believed, estimated, expected or intended.

Forward looking statements are not guarantees of future performance and involve risks and uncertainties, and actual results may differ materially from those in the forward looking statements as a result of various factors. The information contained in this Offering Circular, including without limitation the information under “Investment Considerations”, “Recent Business and Outlook” and “Business” identifies important factors that could cause such differences, including but not limited to a change in overall economic conditions, changes in market rates of interest, declines in the value of equity securities or real estate in Japan, further deterioration of the quality of loans to certain industry sectors in Japan and the effect of new legislation or government directives.

## SUMMARY INFORMATION

The following summary is qualified in its entirety by, and is subject to, the detailed information and financial statements contained elsewhere in this Offering Circular. For a discussion of certain matters that should be considered by prospective investors in the Bonds, see "Investment Considerations".

- SMBC:** ..... SMBC is one of the world's leading commercial banks, with approximately ¥102.4 trillion in consolidated total assets as at March 31, 2003. SMBC provides an extensive range of wholesale and retail banking services in Japan and overseas to its customers. In Japan, SMBC accepts deposits, makes loans and extends guarantees to corporations, individuals, governments and governmental entities. SMBC also underwrites and deals in bonds issued by or under the guarantee of the Japanese government and local government authorities, and acts in various administrative and advisory capacities for certain types of corporate and government bonds. Internationally, SMBC operates through a network of branches, representative offices, subsidiaries and affiliates to provide syndicated lending, project finance and portfolio management services while participating in international securities markets.
- SMBC is a wholly owned subsidiary of Sumitomo Mitsui Financial Group, Inc. SMFG was formed as the holding company for the SMFG group through a statutory share transfer (*kabushiki iten*) under the Commercial Code of Japan (the "Commercial Code"), on December 2, 2002 as a joint stock corporation with limited liability under the laws of Japan (see "Formation of a Holding Company Structure and Merger").
- Securities offered:** ..... U.S.\$850,000,000 aggregate nominal amount of 8.15 per cent. Perpetual Subordinated Bonds of SMBC.
- Status of the Bonds:** ..... The Bonds and Coupons constitute direct, unsecured and (subject to Condition 2(e)) unconditional obligations of SMBC and shall at all times rank *pari passu* and without preference among themselves and at least equally and rateably with all indebtedness of SMBC which is subordinated to the Senior Indebtedness (see "Terms and Conditions of the Bonds").
- Interest:** ..... Subject to Condition 2(e), the Bonds bear interest from August 1, 2003 at the rate of 8.15 per cent. per annum, payable quarterly in arrear on November 1, February 1, May 1 and August 1 in each year, as described in Condition 3.
- Redemption and Purchase:** . The Bonds are undated and accordingly have no final maturity date and will only be redeemable or repayable in accordance with Conditions 4 and 8. The Bonds are subject to redemption in whole, at their nominal amount, together with accrued interest, at the option of SMBC or in the event of certain changes affecting taxes in Japan, in each case, after having obtained the prior consent of the FSA. SMBC, SMFG and any Subsidiary (as defined by reference to the Conditions) may, at any time but subject to the prior consent of the FSA, purchase Bonds in the open market or otherwise at any price.
- Use of proceeds:** ..... SMBC will use the net proceeds from the offering of the Bonds for general corporate purposes.
- Listing and trading:** ..... Application has been made to list the Bonds on the Official List and to admit them to trading on the London Stock Exchange's market for listed securities.
- Payment and settlement:** ... Payments of principal and interest will be made against presentation and surrender (or, in the case of a partial payment, endorsement) of the Bonds or the appropriate Coupons at the specified office of any Agent (subject to Condition 5(b)) outside the United States by U.S. dollar cheque drawn on, or at the option of the holder by transfer to a U.S. dollar account maintained by the payee with, a bank in New York City (subject to the provisions applicable to the Bonds while in global form, see "Summary of Provisions Relating to the Bonds While in Global Form").

## SELECTED FINANCIAL AND OTHER INFORMATION

The following table sets forth selected consolidated financial data for SMBC for the periods presented. The selected consolidated financial data as at and for the years ended March 31, 2002 and 2003 should be read in conjunction with the consolidated financial statements of the Former-SMBC and SMBC, respectively, as the case may be.

|  | Years ended and as at<br>March 31,  |          |
|--|-------------------------------------|----------|
|  | 2002                                | 2003     |
|  | (billions of yen,<br>except ratios) |          |
| <b>Income Statement Data:</b>                                  |                                     |          |
| Interest income .....  | ¥2,177                              | ¥1,818   |
| Interest expense .....   | (727)                               | (417)    |
| Net interest income .....                                      | 1,450                               | 1,400    |

| Total risk-adjusted capital ratio .....                        | 10.45%                              | 10.38%   |

(1) SMBC is not required to maintain records in Japan which would enable it to determine averages and related ratios on a consolidated basis and therefore such information is not included herein. Accordingly, the balance sheet data included herein has been prepared on a year-end basis only.

(2) Credit costs equal the aggregate of net additions to general reserves, direct write-offs, net additions to specific reserves, net additions to reserves for specific overseas loan losses, losses on sale of loans to CCPC, transfers to reserve for losses on loans sold and losses on sales of non-performing loans.

(3) Reserves for possible loan losses include general reserves, specific reserves and reserves for specific overseas countries.

## TERMS AND CONDITIONS OF THE BONDS

The Perpetual Subordinated Bonds (the “**Bonds**”) are constituted by a Trust Deed (the “**Trust Deed**”) dated August 1, 2003 between Sumitomo Mitsui Banking Corporation (“**SMBC**”) and J.P. Morgan Corporate Trustee Services Limited (the “**Trustee**” which expression includes any successor Trustee) as trustee for the holders of the Bonds. Certain provisions of these terms and conditions are summaries of, and are subject to, the detailed provisions of the Trust Deed. Payments under the Bonds will be made in accordance with the agency agreement (the “**Agency Agreement**”) dated August 1, 2003 between SMBC, JPMorgan Chase Bank, London Branch as principal paying agent (the “**Principal Paying Agent**”, which expression includes any successor Principal Paying Agent), the Trustee and the other paying agents from time to time appointed as such (the “**Paying Agents**”, which expression includes any successor or additional Paying Agent, and together with the Principal Paying Agent, the “**Agents**”, which expression includes any successor and additional Agents).

Copies of the Trust Deed, incorporating the forms of the Bonds and related coupons (the “**Coupons**”) and talons (the “**Talons**”), and copies of the Agency Agreement are available for inspection at the offices of each of the Trustee and the Agents. The Bondholders and the holders of the Coupons and Talons (whether or not attached to the relevant Bonds) (together the “**Couponholders**”) are bound by, are entitled to the benefit of, and are deemed to have notice of, all the provisions of the Trust Deed and any provisions of the Agency Agreement applicable to them.

### 1 Form, Denomination and Title

(a) *Form and denomination:* The Bonds are serially numbered and in bearer form in the denomination of U.S.\$1,000 each with Coupons and a Talon attached on issue.

(b) *Title:* Title to the Bonds, Coupons and Talons passes by delivery. Except as ordered by a court of competent jurisdiction or as required by law, the holder of any Bond, Coupon or Talon shall be deemed to be and may be treated as its absolute owner for all purposes (whether or not it is overdue and regardless of any notice of ownership, trust or any interest in it, any writing on it, or its theft or loss) and no person will be liable for so treating the holder.

In these Conditions, “**Bondholder**” means the bearer of any Bond, “**holder**” (in relation to a Bond, Coupon or Talon) means the bearer of any Bond, Coupon or Talon.

### 2 Status and Subordination

(a) *Status:* The Bonds and the Coupons constitute direct, unsecured and (subject to Condition 2(e)) unconditional obligations of SMBC and shall at all times rank *pari passu* without any preference among themselves and at least equally and rateably with all indebtedness of SMBC which is subordinated to the Senior Indebtedness.

(b) *Subordination Event:* Upon the occurrence of a Subordination Event and so long as such Subordination Event is continuing (in the case of civil rehabilitation proceedings so long as neither a Summary Rehabilitation Order nor Consent Rehabilitation Order shall have been issued nor the civil rehabilitation proceedings shall have been conclusively cancelled nor abolished by the court nor the civil rehabilitation plan shall have been conclusively disapproved or cancelled by the court), no payment in respect of principal of, or interest on the Bonds (except for amounts which shall have become due and payable, prior to the date on which the Subordination Event shall have occurred) shall be made by SMBC unless and until a Condition for Liquidation Payment shall have occurred, in which case the payments in respect of the principal of and interest on the Bonds shall not exceed the amount of the liquidation distributions which would have been paid from the assets of SMBC in respect of the amount of the principal of and interest on the Bonds (except for amounts which shall have become due and payable prior to the occurrence of such Condition for Liquidation Payment) had the Bonds and all Liquidation Parity Securities been preference shares of SMBC ranking most senior in priority of payment as to liquidation distributions.

The Trust Deed provides that no amendment or modification may be made to the subordination provisions contained in this Condition 2 unless such an amendment or modification is not prejudicial to any present or future creditor in respect of any Senior Indebtedness as specified in Condition 9 (subject to the approval of the Trustee or an Extraordinary Resolution of the Bondholders also as specified in Condition 9). No such amendment or modification prejudicial to any present or future creditor in respect of any Senior Indebtedness shall in any event be effective.

(c) *Definitions:* The following definitions apply to these Terms and Conditions:

**“Bankruptcy Law”** means the Japanese Bankruptcy Law (Law No. 71 of 1922) as amended or replaced from time to time;

**“Civil Rehabilitation Law”** means the Japanese Civil Rehabilitation Law (Law No. 225 of 1999) as amended or replaced from time to time;

**“Commercial Code”** means the Japanese Commercial Code (Law No. 48 of 1899) as amended or replaced from time to time;

**“Condition for Liquidation Payment”** means either of the following conditions:

(i) in the case of liquidation of SMBC, all Senior Indebtedness held by creditors of SMBC entitled to payment or satisfaction prior to commencement of distribution of residual assets to shareholders is paid or otherwise satisfied in full pursuant to the provisions of the Commercial Code;

(ii) in the case of reorganisation of SMBC where a decree of approbation of a corporate reorganisation plan for abolishment of all business (*jigyo no zenbu no haishi wo naiyotosuru kousei keikaku*) which provides for liquidation of SMBC becomes final and conclusive, all Senior Indebtedness appearing in such plan at the date such decree has become final and conclusive is paid or otherwise satisfied in full without giving effect to any modification or reduction stipulated in such plan; or

(iii) in the case of civil rehabilitation of SMBC where a decree of approbation of a civil rehabilitation plan for liquidation of SMBC becomes final and conclusive all Senior Indebtedness appearing in such plan at the date such decree has become final and conclusive, is paid or otherwise satisfied in full without giving effect to any modification or reduction stipulated in such plan;

**“Consent Rehabilitation Order”** means a decision of a court of competent jurisdiction under Article 217, paragraph 1 of the Civil Rehabilitation Law to the effect that the procedures for the investigation and confirmation of civil rehabilitation claims as prescribed in Articles 99 through 113 of the Civil Rehabilitation Law and the resolution of a civil rehabilitation plan shall be omitted;

**“Liquidation Parity Securities”** means (i) any preference shares of SMBC ranking most senior in priority of payment as to liquidation distributions; (ii) any other preferred or preference shares of any affiliate of SMBC which shall be entitled to the benefits of a guarantee of SMBC ranking *pari passu* in priority of payment as to liquidation distributions with the Bonds; and (iii) any other liabilities of SMBC with terms and conditions substantially equivalent or subordinate in priority of payment as to liquidation distributions to the liabilities of SMBC stipulated above in this Condition 2. For the purpose of (iii) above, such liabilities shall include any liabilities with terms and conditions substantially equivalent or subordinate in priority of payment as to liquidation distributions to such liabilities except for the absence of item (iii) of the definition of the “Subordination Event” below and item (iii) of the definition of the “Condition for Liquidation Payment” above;

**“Reorganisation Law”** means the Japanese Corporate Reorganisation Law (Law No. 154 of 2002) as amended or replaced from time to time;

**“Senior Indebtedness”** means all deposits and other liabilities, including dated subordinated obligations, (including those in respect of bonds, notes and debentures) of SMBC other than (i) liabilities under the Bonds, the payment of which is restricted by this Condition 2, and (ii) any other liabilities of SMBC with terms and conditions substantially equivalent or subordinate in priority of payment as to liquidation distributions to the liabilities of SMBC stipulated above in this Condition 2. For the purpose of (ii) above, such liabilities shall include any liabilities with terms and conditions substantially equivalent or subordinate in priority of payment as to liquidation distributions to such liabilities except for the absence of item (iii) of the definition of the “Subordination Event” below and item (iii) of the definition of the “Condition for Liquidation Payment” above;

**“Subordination Event”** means any of the following events:

(i) a court of competent jurisdiction shall have adjudicated SMBC bankrupt pursuant to the Bankruptcy Law; or

(ii) a court of competent jurisdiction shall have commenced corporate reorganisation proceedings with respect to SMBC pursuant to the Reorganisation Law; or

(iii) a court of competent jurisdiction shall have commenced civil rehabilitation proceedings with respect to SMBC pursuant to the Civil Rehabilitation Law; or

(iv) SMBC shall become subject to bankruptcy, corporate reorganisation, civil rehabilitation or other equivalent proceedings pursuant to any applicable law of any jurisdiction other than Japan, which proceedings have an equivalent effect to those set out in (i), (ii), or (iii), above; and

“**Summary Rehabilitation Order**” means a decision of a court of competent jurisdiction under Article 211 paragraph 1 of the Civil Rehabilitation Law to the effect that the procedures for the investigation and confirmation of the civil rehabilitation claims as prescribed in Articles 99 through 113 of the Civil Rehabilitation Law shall be omitted.

(d) *Payment following the occurrence of a Subordination Event:* A Bondholder by his acceptance of such Bond shall thereby agree that (i) if any payment on such Bond is made to the Bondholder after the occurrence of a Subordination Event and the amount of such payment shall exceed the amount, if any, that should have been paid to such holder in accordance with this Condition 2, the payment of such excess amount shall be deemed null and void and such holder shall be obliged to return the amount of the excess payment within ten days after receiving notice in accordance with Condition 12 of the excess payment and (ii) so long as a Subordination Event shall have occurred and be continuing (in the case of civil rehabilitation proceedings so long as neither a Summary Rehabilitation Order nor Consent Rehabilitation Order shall have been issued nor the civil rehabilitation proceedings shall have been conclusively cancelled nor abolished by the court nor the civil rehabilitation plan shall have been conclusively disapproved or cancelled by the court), such holder shall not be entitled to exercise any right to set off any liabilities of SMBC (except for amounts which have become due and payable prior to the date on which the Subordination Event shall have occurred) against any liabilities of such holder owed to SMBC.

(e) *Conditional Payment of Interest*

Each Bond bears interest on its outstanding nominal amount from August 1, 2003 at the rate of 8.15 per cent. per annum, such interest being payable quarterly in arrear on each Interest Payment Date (as defined in Condition 3); provided, however, that, in the case that any of the following conditions are not met on any Interest Payment Date:

(x) the amount of the Distributable Profits, based on SMBC’s financial statements approved or reported at a general meeting of the shareholders of SMBC held immediately prior to such Interest Payment Date, exceeds zero;

(y) the Regulatory Event has not occurred as of the Interest Payment Date; or

(z) the Interest Payment Insolvency Event has not occurred as of the Interest Payment Date;

the interest payment to be made on such Interest Payment Date may at the option of SMBC be deferred to the earlier of (a) the first Interest Payment Date after all of such conditions are met or (b) the date set for any redemption pursuant to Condition 8 or to paragraph (b) or (c) of Condition 4. Such deferral shall be made by giving written notice of such deferral to the Trustee and the Bondholders in accordance with Condition 12. If such notice is not given to the Trustee and the Bondholders on or prior to such Interest Payment Date, such interest payment to be made on such Interest Payment Date shall be deemed not so deferred and shall become due on such Interest Payment Date. If such notice is given to the Trustee and the Bondholders on or prior to such Interest Payment Date, SMBC shall not have any obligation to make such payment on such Interest Payment Date and any failure to pay on such Interest Payment Date shall not constitute a default by SMBC for any purpose. Any interest on the Bonds accrued but not becoming due on an Interest Payment Date by operation of this paragraph shall, so long as the same remains unpaid, constitute “**Arrears of Interest**”.

Arrears of Interest shall bear no interest. However, where default is made in the payment of any interest due and payable on an Interest Payment Date or other date upon which the same becomes due and payable and such default continues for a period of 30 days or more, interest shall accrue on any such amount in respect of which default has been made (before as well as after any judgment) from and including the due date for payment thereof at the interest rate applicable to the Bonds until either (i) such amount together with accrued interest payable pursuant to this paragraph is paid to the holders of the Bonds or (ii) the date on which notice has been given to the holders of the Bonds to the effect that the funds for the payment thereof have been received by the Principal Paying Agent, whichever is the earlier.

“**Distributable Profits**” means, with respect to any fiscal year of SMBC, SMBC’s profits (including earned surplus from prior years) permitted to be distributed to shareholders pursuant to Article 290 of the Commercial Code and Japanese banking regulations as derived from SMBC’s audited non-consolidated financial statements prepared in accordance with Japanese law, including the requirements and guidelines of the Japanese Ministry of Finance (“**MOF**”) or the Japanese Financial Services Agency (the “**FSA**”).

**“Interest Payment Insolvency Event”** means either of the following events:

- (i) SMBC is insolvent at the time of payment of the interest on the Bonds; or
- (ii) payment of the interest on the Bonds would cause SMBC to become insolvent if SMBC made such payment of interest.

For the purpose of this definition, SMBC shall be insolvent if SMBC’s Liabilities exceed its Assets. For the purpose of this paragraph, **“Assets”** means the total assets of SMBC and **“Liabilities”** means the total liabilities of SMBC (calculated on a non-consolidated basis), each as shown by the latest audited non-consolidated balance sheet of SMBC but adjusted for subsequent events, all valued in such manner as a Representative Director or the liquidator (as the case may be) of SMBC may determine.

*For further details on SMBC’s assets and liabilities calculated on a non-consolidated basis, see Note 32 of the Notes to the Consolidated Financial Statements as of and for the year ended March 31, 2003.*

**“Latest Operation Report”** means, in relation to a day, an operation report submitted to the Commissioner of the FSA pursuant to the Banking Law (Law No. 59 of 1981, as amended) (the **“Banking Law”**) immediately prior to such day. Currently, under the Enforcement Rule of the Banking Law, the operation report in respect of the conditions of the bank’s assets and business for the period from the commencement of the bank’s fiscal year (*i.e.* 1st April) to 30th September is required to be submitted to the Commissioner of the FSA within three months from the end of such period and the operation report in respect of the bank’s fiscal year is required to be submitted within three months from the end of such fiscal year (*i.e.* 31st March).

**“Regulatory Event”** means SMBC’s total risk-adjusted capital ratio calculated either on a consolidated or non-consolidated basis entered in the Latest Operation Report falls below a half of the Required Capital Ratio.

**“Required Capital Ratio”** means the minimum total risk-based capital ratio calculated either on a consolidated or non-consolidated basis which SMBC is required under the Banking Law to have as of the last day of the business period in relation to the Latest Operation Report. Currently, SMBC is required to have total risk-adjusted capital ratio calculated either on a consolidated basis or non-consolidated basis of 8 per cent. or more under the Notice Concerning Determination of the Criteria of Capital Ratio under the Banking Law (MOF ordinance No. 55 of 1993, as amended).

For the purposes of these Conditions, the term “interest” includes, unless the context requires otherwise, Arrears of Interest.

### **3 Interest**

Each Bond bears interest on its outstanding nominal amount from August 1, 2003 (the **“Interest Commencement Date”**) at the rate of 8.15 per cent. per annum, payable quarterly in arrear on November 1, February 1, May 1 and August 1 in each year (each an **“Interest Payment Date”**). Interest shall cease to accrue on each Bond on the due date for redemption unless, upon due presentation, payment is improperly withheld or refused, in which event interest shall continue to accrue at such rate (both before and after judgment) in the manner provided in this Condition 3 to the Relevant Date (as defined in Condition 6).

If interest is required to be calculated for a period less than an Interest Period (as defined below), it will be calculated on the basis of a year of 360 days with 12 30-day months (unless (a) the last day of the Interest Period is the 31st day of a month but the first day of the Interest Period is a day other than the 30th or 31st day of a month, in which case the month that includes that last day shall not be considered to be shortened to a 30-day month, or (b) the last day of the Interest Period is the last day of the month of February, in which case the month of February shall not be considered to be lengthened to a 30-day month). The period beginning on (and including) the Interest Commencement Date and ending on (but excluding) the first Interest Payment Date and each successive period beginning on (and including) an Interest Payment Date and ending on (but excluding) the next succeeding Interest Payment Date is called an **“Interest Period”**.

### **4 Redemption and Purchase**

(a) *General:* The Bonds are undated and accordingly will have no final maturity date and will only be redeemable or repayable in accordance with this Condition 4 and Condition 8.

(b) *Optional Redemption:* SMBC may, having obtained the prior consent of the FSA, on giving not less than 14 nor more than 30 days’ notice to the Bondholders in accordance with Condition 12 (which notice shall be irrevocable) and the Trustee redeem all, but not some only, of the Bonds on any Interest Payment Date on or after August 1, 2008. Any such redemption of Bonds shall be at their nominal amount together with interest accrued to the date fixed for redemption.

All Bonds in respect of which any such notice is given shall be redeemed on the date specified in such notice in accordance with this Condition.

(c) *Redemption for taxation reasons:* If, on the occasion of the next payment in respect of the Bonds, SMBC satisfies the Trustee that SMBC would be unable to make such payment without having to pay Additional Amounts as defined in Condition 6, SMBC may, having obtained the prior consent of the FSA, and having given not less than 14 nor more than 30 days' notice to the Bondholders in accordance with Condition 12 (which notice shall be irrevocable), redeem all, but not some only, of the Bonds on any Interest Payment Date at their nominal amount together with accrued interest.

(d) *Purchase:* SMBC, Sumitomo Mitsui Financial Group, Inc. (“SMFG”) and any Subsidiary (as defined in the Trust Deed) may, at any time but subject to the prior consent of the FSA, purchase Bonds (provided that, if the Bonds are to be surrendered for cancellation, all unmaturing Coupons and unexercised Talons relating thereto are attached thereto or surrendered therewith, as the case may be) in the open market or otherwise at any price. Any such Bonds purchased by SMBC, SMFG or any Subsidiary may at the option of SMBC, SMFG or any Subsidiary be held, resold or surrendered by SMBC, SMFG or such Subsidiary, as the case may be, to the Principal Paying Agent or any other Paying Agent for cancellation (provided they are surrendered together with all unmaturing Coupons and unexercised Talons relating thereto). The Bonds so purchased, while held by or on behalf of SMBC, SMFG or any such Subsidiary, shall not entitle the holder to vote at any meetings of the Bondholders and shall not be deemed to be outstanding for the purposes of calculating quorums at meetings of the Bondholders or for the purposes of Condition 9(a).

(e) *Cancellation:* All Bonds redeemed by SMBC pursuant to paragraph (b) or (c) of this Condition or surrendered by SMBC, SMFG or any Subsidiary pursuant to paragraph (d) of this Condition will (together with all unmaturing Coupons and unexercised Talons attached thereto or surrendered therewith, as the case may be) be cancelled and may not be re-issued or resold.

## **5 Payments and Talons**

(a) *Method of Payment:* Payments of principal and interest will be made against presentation and surrender of Bonds or the appropriate Coupons (as the case may be) at the specified office of any Agent (subject to paragraph (b) below) outside the United States by U.S. dollar cheque drawn on, or at the option of the holder by transfer to a U.S. dollar account maintained by the payee with, a bank in New York City. Payments of interest due in respect of any Bond other than on presentation and surrender of matured Coupons shall be made only against presentation and surrender of the relevant Bond.

(b) *U.S. Paying Agent:* Payments of interest in respect of Bonds may be made at the specified office of a Paying Agent in New York City in the same manner as aforesaid if (i) SMBC shall have appointed Agents with specified offices outside the United States of America with the reasonable expectation that such Agents would be able to make payment at such offices of the amounts on the Bonds in U.S. dollars when due, (ii) payment in full of such amounts at all such offices is illegal or effectively precluded by exchange controls or other similar restrictions on payment or receipt of such amounts, and (iii) such payment is then permitted by applicable U.S. law, without involving, in the opinion of SMBC, any adverse tax consequence to SMBC. If a Bond is presented for payment of principal at the specified office of any Paying Agent in the United States of America in circumstances where interest (if any is payable against presentation of the Bond) is not to be paid there, the relevant Paying Agent will annotate the Bond with the record of the principal paid and return it to the holder for the obtaining of interest elsewhere.

(c) *Payments subject to fiscal laws:* All payments are subject in all cases to any applicable fiscal or other laws and regulations, but without prejudice to the provisions of Condition 6. No commissions or expenses shall be charged to the Bondholders or Couponholders in respect of such payments.

(d) *Appointment of Agents:* The initial Agents and their initial specified offices are listed below. The Principal Paying Agent and the other Agents act solely as agents of SMBC and do not assume any obligation or relationship of agency or trust for or with any holder. SMBC reserves the right at any time with the approval of the Trustee in writing to vary or terminate the appointment of any Agent and appoint additional or other Agents, provided that it will maintain at all times (i) a Principal Paying Agent, (ii) so long as the Bonds are listed on the official list of the Financial Services Authority in its capacity as competent authority under the Financial Services and Markets Act 2000 and admitted to trading on the London Stock Exchange's market for listed securities, an Agent in London and (iii) an Agent with a specified office in a European Union member state that will not be obliged to withhold or deduct tax pursuant to any European Union Directive on the taxation of savings implementing the conclusions of the ECOFIN Council meeting of November 26-27, 2000 or any law

implementing or complying with, or introduced in order to conform to, such Directive. In addition, SMBC shall forthwith appoint a Paying Agent in New York City in the circumstances described in paragraph 5(b) above (if there is no such Paying Agent at the time) and shall after such circumstances arise maintain such a Paying Agent. Notice of any change in the Agents or their specified offices will promptly be given to the Bondholders.

(e) *Unmatured Coupons and unexchanged Talons:*

(i) Upon the due date for redemption of any Bond, unmatured Coupons relating to such Bond (whether or not attached) shall become void and no payment shall be made in respect of them.

(ii) Upon the due date for redemption of any Bond, any unexchanged Talon relating to such Bond (whether or not attached) shall become void and no Coupon shall be delivered in respect of such Talon.

(iii) Where any Bond is presented for redemption without all unmatured Coupons and any unexchanged Talon relating to it, and where any Bond is presented for redemption without any unexchanged Talon relating to it, redemption shall be made only against the provision of such indemnity as SMBC may require.

(iv) If the due date for redemption of any Bond is not an Interest Payment Date, interest accrued from the preceding Interest Payment Date or the Interest Commencement Date, as the case may be, shall only be payable against presentation (and surrender if appropriate) of the relevant Bond representing it.

(f) *Talons:* On or after the Interest Payment Date for the final Coupon forming part of a Coupon sheet issued in respect of any Bond, the Talon forming part of such Coupon sheet may be surrendered at the specified office of the Principal Paying Agent in exchange for a further Coupon sheet (and another Talon for a further Coupon sheet) (but excluding any Coupons which may have become void pursuant to Condition 7).

(g) *Payments on non-business days:* If any date for payment determined in accordance with Condition 3 in respect of any Bond or Coupon is not a Business Day, the holder shall not be entitled to payment until the next following business day nor to any interest or other sum in respect of such postponed payment. In this paragraph “**Business Day**” means a day (other than a Saturday or a Sunday) on which commercial banks and foreign exchange markets are open for business in the relevant place of presentation and in London, Tokyo and New York.

## 6 Taxation

All payments of principal and interest in respect of the Bonds and the Coupons shall be made without withholding or deduction for or on account of, any present or future taxes, duties, assessments or governmental charges of whatever nature imposed or levied by or on behalf of Japan, or any authority therein or thereof having power to tax (the “**Taxes**”), unless such withholding or deduction of such Taxes is required by law. In that event SMBC shall pay such additional amounts (“**Additional Amounts**”) as will result in receipt by the Bondholders and the Couponholders of such amounts as would have been received by them had no such withholding or deduction been required, except that no Additional Amounts shall be payable in respect of any Bond or Coupon presented for payment:

(a) *Other connection:* by or on behalf of a holder (i) who is for Japanese tax purposes treated as an individual resident of Japan or Japanese corporation (other than a designated financial institution which does not fall under item (ii) below) or (ii) who fails to comply with the Japanese tax law requirements in respect of the exemption from such withholding or deduction or (iii) who is otherwise subject to such Taxes by reason of his having some connection with Japan other than the mere holding of the Bond or Coupon; or

(b) *Presentation more than 30 days after the Relevant Date:* more than 30 days after the Relevant Date except to the extent that the holder of it would have been entitled to such Additional Amounts on presenting the same for payment on such thirtieth day; or

(c) *Payment to individuals:* where such withholding or deduction is imposed on a payment to an individual and is required to be made pursuant to any European Union Directive on the taxation of savings implementing the conclusions of the ECOFIN Council meeting of November 26-27, 2000 or any law implementing or complying with, or introduced in order to conform to, such Directive; or

(d) *Payment by another Agent:* by or on behalf of a Bondholder or a Couponholder who would have been able to avoid such withholding or deduction by presenting the relevant Bond or Coupon to another Agent in a Member State of the European Union.

As used herein, a “**designated financial institution**” means a Japanese financial institution or a Japanese securities company designated by the Special Taxation Measures Law Enforcement Order pursuant to Article 6, paragraph 8 of the Special Taxation Measures Law of Japan (Law No. 26 of 1957, as amended).

“**Relevant Date**” means the date on which such payment first becomes due except that if the full amount of the moneys payable has not been duly received by the Principal Paying Agent or the Trustee on or prior to such due date, it means the date on which the full amount of such moneys having been so received, notice to that effect shall have been duly published in accordance with Condition 12. Any reference in these Conditions to principal or interest shall be deemed also to refer to any additional amounts which may be payable under this Condition or any undertakings or covenants given in addition to or substitution for it under the Trust Deed.

## **7 Prescription**

Claims against SMBC for payment in respect of the Bonds and Coupons (which for this purpose shall not include Talons) shall be prescribed and become void unless made within ten years in the case of principal and five years in the case of interest from the appropriate Relevant Date.

## **8 Limited Rights of Acceleration**

(a) The Bonds shall become immediately due and payable if a Condition for Liquidation Payment shall occur, in which case the payments in respect of the principal of and interest on the Bonds shall not exceed the amount of the liquidation distributions which would have been paid from the assets of SMBC in respect of the amount of the principal of and interest on the Bonds (except for amounts which shall become due and payable prior to the occurrence of such Condition for Liquidation Payment) had such principal and interest and all Liquidation Parity Securities been preference shares of SMBC ranking most senior in priority of payment as to liquidation distribution. Redemption shall be at the nominal amount thereof together with interest accrued to the date of redemption.

(b) Non-payment of principal or interest or breach of covenants in the Trust Deed will not constitute a default hereunder or cause any Bond to become due and payable hereunder.

## **9 Meetings of Bondholders and Modification**

(a) *Meetings of Bondholders:* The Trust Deed contains provisions for convening meetings of Bondholders to consider matters affecting their interests, including modifications by Extraordinary Resolution (as defined in the Trust Deed) of the Bondholders of the Bonds (including these Conditions or any provision of the Trust Deed) except that no amendment or modification shall be made to Condition 2 or the provisions as to subordination in Clause 2.2 of the Trust Deed which would be, in the opinion of SMBC, in any way prejudicial to any present or future creditor in respect of any Senior Indebtedness.

Any Extraordinary Resolution duly passed shall be binding on Bondholders (whether or not they were present at the meeting at which such resolution was passed) and on all Couponholders, except that any Extraordinary Resolution proposed, *inter alia*, (i) to amend any date for payment of interest on the Bonds, (ii) to reduce or cancel the nominal amount payable on redemption of the Bonds, (iii) to reduce the rate of interest in respect of the Bonds or to vary the method or basis of calculating the rate or amount of interest or the basis for calculating the interest in respect thereof, (iv) to vary the currency of payment or denomination of the Bonds, (v) to take any steps which as specified hereon may only be taken following approval by an Extraordinary Resolution to which the special quorum provisions apply or (vi) to modify the provisions concerning the quorum required at any meeting of Bondholders or the majority required to pass the Extraordinary Resolution (as provided in the Trust Deed), will only be binding if passed at a meeting of Bondholders (or at any adjournment thereof) at which a special quorum (provided for in the Trust Deed) is present.

(b) *Modification of Trust Deed:* The Trustee may, without the consent of the Bondholders or Couponholders, at any time and from time to time concur with SMBC in making any modification to these terms and conditions or the Trust Deed if, in the opinion of the Trustee, any of the provisions of these terms and conditions or the Trust Deed authorise the Trustee so to concur. Furthermore, the Trustee may, without the consent of the Bondholders or Couponholders, agree to any modification of the terms and conditions or the Trust Deed (except that no amendment or modification may be made to Condition 2 or the provisions as to subordination in Clause 2.2 of the Trust Deed which would be, in the opinion of SMBC, in any way prejudicial to any present or future creditor in respect of any Senior Indebtedness) or to any waiver or authorisation or any breach or proposed breach by SMBC of the provisions of the Bonds or Coupons or the Trust Deed which is, in the opinion of the Trustee, not materially prejudicial to the interests of the Bondholders, or to any modification of these terms and

conditions, or the Trust Deed (except as aforesaid) which, in the opinion of the Trustee, is of a formal, minor or technical nature or is made to correct a manifest error.

## **10 Enforcement**

At any time after the Bonds become due and payable, the Trustee may, at its discretion and without further notice, institute such proceedings against SMBC as it may think fit to enforce the terms of the Trust Deed, the Bonds and the Coupons, but it need not take any such proceedings unless (i) it shall have been so directed by an Extraordinary Resolution or so requested in writing by Bondholders holding at least one-fifth in nominal amount of the Bonds outstanding, and (ii) it shall have been indemnified to its satisfaction. No Bondholder or Couponholder may proceed directly against SMBC unless the Trustee, having become bound so to proceed, fails to do so within a reasonable time and such failure is continuing.

## **11 Replacement of Bonds, Coupons and Talons**

If any Bond, Coupon or Talon is lost, stolen, mutilated, defaced or destroyed it may be replaced at the specified office of the Principal Paying Agent in London subject to all applicable laws and stock exchange or other relevant authority requirements, upon payment by the claimant of the expenses incurred in connection with such replacement and on such terms as to evidence, security, indemnity and otherwise as SMBC may require (provided that the requirement is reasonable in the light of prevailing market practice). Mutilated or defaced Bonds, Coupons or Talons must be surrendered before replacements will be issued.

## **12 Notices**

Notices to Bondholders will be valid if published in a daily newspaper of general circulation in London (which is expected to be the *Financial Times*). Any such notice shall be deemed to have been given on the date of such publication or, if published more than once or on different dates, on the first date on which publication is made. Couponholders will be deemed for all purposes to have notice of the contents of any notice given to the Bondholders in accordance with this Condition.

## **13 The Trustee**

The Trust Deed contains provisions for the indemnification of the Trustee and for its relief from responsibility, including provisions relieving it from any obligation to take proceedings to enforce repayment of the Bonds unless indemnified to its satisfaction. The Trustee may, if it so decides, refrain from taking such action in the absence of instructions from Bondholders. The Trustee will be entitled to enter into business transactions with SMBC or any Subsidiary without accounting to the Bondholders or Couponholders for any profit resulting therefrom.

In connection with the exercise of its powers, trusts, authorities or discretions (including but not limited to those in relation to any proposed modification, waiver, authorisation, determination or substitution as aforesaid), the Trustee shall have regard to the interests of the Bondholders as a class and in particular, but without prejudice to the generality of the foregoing, shall not have regard to the consequence of such exercise for individual Bondholders resulting from their being for any purpose domiciled or resident in, or otherwise connected with, or subject to the jurisdiction of, any particular territory.

## **14 Contracts (Rights of Third Parties) Act 1999**

No person shall have any right to enforce any term or condition of the Bonds under the Contracts (Rights of Third Parties) Act 1999.

## **15 Governing Law**

(a) *Governing Law:* The Trust Deed, the Bonds, the Coupons and the Talons are governed by, and shall be construed in accordance with, English law.

(b) *Jurisdiction:* The courts of England are to have jurisdiction to settle any disputes which may arise out of or in connection with the Bonds, the Coupons or the Talons and accordingly any legal action or proceedings arising out of or in connection with the Bonds, the Coupons or the Talons (“**Proceedings**”) may be brought in such courts. SMBC has in the Trust Deed irrevocably submitted to the jurisdiction of such courts and waives any objection to Proceedings in such courts whether on the ground of venue or on the ground that the Proceedings have been brought in an inconvenient forum. This submission is made for the benefit of each of the Bondholders and Couponholders and shall not limit the right of any of them to take Proceedings in any other court of

competent jurisdiction nor shall the taking of Proceedings in one or more jurisdictions preclude the taking of Proceedings in any other jurisdiction (whether concurrently or not).

(c) *Agent for Service of Process:* SMBC has irrevocably appointed the General Manager for the time being of Sumitomo Mitsui Banking Corporation Europe Limited at Temple Court, 11 Queen Victoria Street, London EC4N 4TA, UK as agent in England to receive service of process in any Proceedings in England based on any of the Bonds, the Coupons or the Talons. If for any reason SMBC does not have such an agent in England, it will promptly appoint a substitute process agent and notify the Bondholders of such appointment. Nothing herein shall affect the right to serve process in any other manner permitted by law.

## SUMMARY OF PROVISIONS RELATING TO THE BONDS WHILE IN GLOBAL FORM

The Temporary Global Bond and the Global Bond contain provisions which apply to the Bonds while they are in global form, some of which modify the effect of the terms and conditions of the Bonds set out in this document. The following is a summary of certain of those provisions:

### 1 Exchange

The Temporary Global Bond is exchangeable in whole or in part (free of charge to the holder) for interests in the Global Bond on or after a date which is expected to be September 11, 2003 upon certification as to non-U.S. beneficial ownership in the form set out in the Temporary Global Bond. The Global Bond is exchangeable in whole but not in part (free of charge to the holder) for the Definitive Bonds if the Global Bond is held on behalf of a clearing system and such clearing system is closed for business for a continuous period of 14 days (other than by reason of holidays, statutory or otherwise) or announces an intention permanently to cease business or does in fact do so. Thereupon the holder may give notice to the Trustee and the Principal Paying Agent of its intention to exchange the Global Bond for Definitive Bonds on or after the Exchange Date specified in the notice.

On or after any Exchange Date (as defined below), the holder of the Global Bond may surrender the Global Bond to or to the order of the Principal Paying Agent. In exchange for the Global Bond, SMBC will deliver, or procure the delivery of, an equal aggregate nominal amount of duly executed and authenticated Definitive Bonds (having attached to them all Coupons in respect of interest which has not already been paid on the Global Bond and a Talon), security printed in accordance with any applicable legal and stock exchange requirements and in or substantially in the form set out in Schedule 2 to the Trust Deed. On exchange in full of the Global Bond, SMBC will, if the holder so requests, procure that it is cancelled and returned to the holder together with any relevant Definitive Bonds.

“Exchange Date” means a day falling not less than 60 days after that on which the notice requiring exchange is given and on which banks are open for business in the city in which the specified office of the Principal Paying Agent is located.

### 2 Payments

No payment will be made on the Temporary Global Bond unless exchange for an interest in the Global Bond is improperly withheld or refused. Payments of principal and interest in respect of Bonds represented by the Global Bond will be made against presentation for endorsement and, if no further payment falls to be made in respect of the Bonds, surrender of the Global Bond to or to the order of the Principal Paying Agent or such other Agent as shall have been notified to the Bondholders for such purpose. A record of each payment so made will be endorsed in the appropriate schedule to the Global Bond, which endorsement will be *prima facie* evidence that such payment has been made in respect of the Bonds. Condition 5(d)(iii) and Condition 6(d) will apply to the Definitive Bonds only.

### 3 Prescription

Claims against SMBC in respect of principal and interest on the Bonds while the Bonds are represented by the Global Bond will become void unless it is presented for payment within a period of ten years (in the case of principal) and five years (in the case of interest) from the appropriate Relevant Date (as defined in Condition 6).

### 4 Meetings

The holder of the Global Bond shall be treated as being two persons for the purposes of any quorum requirements of a meeting of Bondholders and, at any such meeting, the holder of the Global Bond shall be treated as having one vote in respect of each U.S.\$1,000 in nominal amount of Bonds for which the Global Bond may be exchanged.

### 5 Cancellation

Cancellation of any Bond required by the Conditions to be cancelled (other than for its redemption) will be effected by reduction in the nominal amount of the Global Bond.

## **6 Purchase**

Bonds represented by the Temporary Global Bond or by the Global Bond may only be purchased by SMBC, SMFG or any Subsidiary (as defined by reference to the Conditions), subject to the prior consent of the FSA, if they are purchased together with the rights to receive future payments of interest thereon.

## **7 SMBC's Option**

The option of SMBC provided for in Condition 4 of the Bonds shall be exercised by SMBC giving notice to the Bondholders within the time limits set out in and containing the information required by the Conditions.

## **8 Trustee's Powers**

In relation to the Bonds, in considering the interests of Bondholders while the Temporary Global Bond or the Global Bond is held on behalf of a clearing system the Trustee may have regard to any information provided to it by such clearing system or its operator as to the identity (either individually or by category) of its accountholders with entitlements to the Temporary Global Bond or the Global Bond and may consider such interests as if such accountholders were the holder of the Temporary Global Bond or the Global Bond.

## **9 Notices**

So long as the Bonds are represented by the Temporary Global Bond or the Global Bond and the Temporary Global Bond or the Global Bond is held on behalf of a clearing system, notices to Bondholders may be given by delivery of the relevant notice to that clearing system for communication by it to entitled accountholders in substitution for publication as required by the Conditions.

### **USE OF PROCEEDS**

The net proceeds from the offering of the Bonds are expected to be approximately U.S.\$833,000,000 and will be used by SMBC for general corporate purposes.

## INVESTMENT CONSIDERATIONS

*Prior to making an investment decision, prospective investors should carefully consider, along with other matters set forth in this offering circular, the following investment considerations. Except as otherwise indicated, the information herein is presented on a consolidated basis.*

### **Risks Related to SMBC**

#### ***SMBC Continues to Face Losses Relating to Non-Performing Loans***

SMBC has recognised very sizeable losses relating to non-performing loans relative to its operating profits and capital levels in recent years. Consequently, SMBC recognised credit costs (which consist of net additions to general and specific reserves and reserves for specific overseas loan losses, direct write-offs, losses on sales of loans to the Cooperative Credit Purchasing Company, Limited (“CCPC”), transfers to reserves for losses on loans sold and losses on sales of non-performing loans) of ¥1,703 billion and ¥1,202 billion in the years ended March 31, 2002 and 2003, respectively. SMBC’s non-performing loans are largely comprised of loans made after the “bubble” era to domestic and overseas corporate customers as well as to Japanese individuals. The effects of the continuing weak economic conditions in Japan, as well as recent financial difficulties faced by SMBC’s customers, have resulted in the recognition of substantial credit costs by SMBC. The prolonged economic downturn, which has affected large and small borrowers, has increased the number of corporate bankruptcies in Japan from approximately 6,500 in 1990 and approximately 14,500 in 1996 to more than 19,000 in 2002, according to information supplied by Teikoku Databank America, Inc.

Many of SMBC’s non-performing loans are directly or indirectly collateralised by real estate in Japan. The market price of real estate in Japan has declined substantially since 1990 and there is little liquidity in the domestic real estate market. As a consequence, Japanese financial institutions, including SMBC, have had difficulty in achieving timely and adequate recoveries on foreclosed real estate and in determining realisable values for real estate collateral. In some cases, SMBC has had to, and may have to in the future, bear significant discounts in recoveries on foreclosed assets sold through auctions or in individual or bulk sales to investors. SMBC may need to make additional reserves against loans if the collateral securing those loans further declines in value.

As at March 31, 2003, on a non-consolidated basis SMBC had ¥525 billion in bankrupt and quasi-bankrupt assets, ¥2,130 billion in doubtful assets and ¥2,607 billion in substandard loans. For a description of the various loan categories, see “Business — Loan Losses and Non-Performing Loans — Disclosure of Problem Assets Under the Financial Reconstruction Law”. In accordance with FSA guidelines, SMBC maintains general or specific reserves in each of these categories in proportion to the expected losses. As at March 31, 2003, on a non-consolidated basis SMBC’s general and specific reserves amounted to ¥1,113 billion and ¥950 billion, respectively. In the future, SMBC may recognise credit losses on existing assets in excess of reserves as a result of continuing weak economic conditions, further declines in real estate prices in Japan, an increase in corporate or personal bankruptcies in Japan, further deterioration of the financial condition of SMBC’s borrowers or changes in reserve and risk management requirements.

On October 30, 2002 the FSA announced its “Programme for Financial Revival” (the “FSA’s Programme”), focusing on the revival of the Japanese economy through the resolution of the non-performing loans issue affecting Japan’s major banks. The FSA’s Programme called for, among other things, a tighter assessment of bank assets (including the requirement to use a discounted cash flow method when calculating reserves on loans to large borrowers classified as substandard loans), a review of the criteria used to determine the average remaining periods for loans used to calculate provisioning, a harmonised classification method for large borrowers among banks, the valuation of debt for equity swaps at fair value and the rigorous examination of reconstruction plans and assessments of collateral. On November 25, 2002, SMBC announced that, with effect from March 31, 2003, SMBC would calculate loan loss reserves for substandard assets (for loans made to certain large borrowers) based on their estimated discounted cash flows. If SMBC or the FSA should apply stricter standards with respect to the assessment of non-performing loans, or broaden the scope of the borrowers to which the methodology applies, SMBC may need to recognise further credit losses. See “Recent Events — Recent Regulatory Developments”.

On April 25, 2003 the FSA announced that it had completed a further special inspection of SMBC together with the other 10 major Japanese banks. The special inspection focused on the classifications awarded by such banks to large borrowers whose stock prices, external ratings and other indicators had shown significant change. The special inspection was conducted in cooperation with such banks’ external auditors. Prior to the special inspection, the FSA revised its inspection manual in accordance with the guideline on the application of the

discount cash flow method of calculating the amount of provisions for loan losses released by the Japan Institute of Certified Public Accountants. SMBC calculated the amount of write-offs and provisions for loan losses for the year ended March 31, 2003 in line with the special inspection. This, among other factors, resulted in the recognition of credit costs of ¥1,202 billion for the year ended March 31, 2003. If the FSA had expanded the scope of large borrowers or conducted further special inspections, SMBC's credit costs would not have been at the same level as recorded and could have further adversely affected the financial condition and operating results of SMBC.

The FSA recently began requiring that banks dispose of loans made to borrowers categorised as potentially bankrupt borrowers, or lower, within a time period of between two or three years depending on when the loans were so classified and subject to specified disposition targets within these timeframes. Specifically, SMBC is required to dispose of 50 per cent., 80 per cent. and 100 per cent. of non-performing loans in the first, second and third years, respectively. SMBC had ¥2,654 billion of outstanding loans and other claims in these categories on a non-consolidated basis as at March 31, 2003. There can be no assurance that SMBC will succeed in disposing of these loans within the mandated timeframes, meet the specified targets within these timeframes or realise the values at which these loans are carried. Additionally, the migration of credits will cause the specified disposition targets to vary, and the requirements may also be revised making them more difficult to satisfy. The consequences of not being able to satisfy these or any future requirements for disposition of non-performing loans are uncertain at this time.

SMBC estimates that credit costs will be ¥650 billion (on a non-consolidated basis) for the year ending March 31, 2004. SMBC's actual credit costs for the year ending March 31, 2004 may substantially exceed the estimated amount due to various factors, including possible further action by the FSA to introduce more stringent rules on self-assessment, the protracted economic slump in Japan and continuing deflation which may result in an increase in non-performing loans and a drop in collateral values. SMBC has in the past recognised credit costs that exceeded its projected credit costs. For example, SMBC projected non-consolidated credit costs of ¥400 billion and ¥500 billion for the years ended March 31, 2002 and 2003, respectively, but recognised actual credit costs at higher levels than were originally anticipated for the respective periods.

See "Business — Loan Losses and Non-Performing Loans".

***Exposure to Japanese Real Estate, Wholesale and Retail, Service, Finance and Insurance and Construction Companies May Cause Additional Losses in the Future***

Japanese real estate, wholesale and retail, service, finance and insurance and construction companies have been severely and adversely affected by the continuing economic weakness in Japan. The losses of companies in these industries can be partly traced to direct and indirect investments in real estate and to the decline of major public and private sector development projects initiated during the "bubble" era. SMBC has significant exposure to a number of companies in these industries. As at March 31, 2003, to the domestic industries, SMBC had an exposure of ¥9,015.4 billion to the real estate industry (15.94 per cent. of total domestic loans), ¥6,235.9 billion to the wholesale and retail industry (11.02 per cent. of total domestic loans), ¥6,172.7 billion to the service industry (10.91 per cent. of total domestic loans), ¥4,543.9 billion to finance and insurance companies (8.03 per cent. of total domestic loans) and ¥2,630.1 billion to the construction industry (4.65 per cent. of total domestic loans). See "Business — Loans — Domestic Lending" and "— Loan Losses and Non-Performing Loans — Policies with Respect to Troubled Customers".

SMBC and its subsidiaries, affiliates and associated companies have agreed to restructure a substantial number of loans to companies in these sectors, including a substantial number of loans that are not (and are not required to be) considered non-performing or disclosed as non-performing loans. In the event that the financial condition of companies in these sectors deteriorates further, it is possible that some of the currently performing loans made by SMBC to customers in these sectors may become non-performing and it may become necessary for SMBC to provide further financial support to these customers. SMBC has provided financial assistance to certain financially distressed retail and construction companies in the form of debt forgiveness, debt for equity swaps and through the acquisition of new shares. SMBC may provide financial assistance to these companies in the future and may incur considerable additional credit costs as a result thereof.

***SMBC May Need to Provide Additional Support to Japanese Financial Institutions, Troubled Customers or Affiliated Companies***

Japanese financial institutions, including banks, non-bank lending and credit institutions, financial affiliates of securities companies and insurance companies are currently experiencing economic difficulties. In some cases, asset quality problems and other financial problems have led, or may lead, to severe liquidity and solvency

problems that have resulted, or may result, in the liquidation or restructuring of certain of the affected financial institutions. From time to time, the Japanese government has requested that one or more financial institutions, including SMBC, either provide financial and other assistance to support distressed financial institutions or directly or indirectly acquire some portion of the non-performing loans or other assets of such distressed financial institutions and such financial institutions, including SMBC, have complied with certain of these requests. No assurance can be provided that SMBC's regulators will not in the future make similar or broader requests to SMBC. Moreover, SMBC does business with, and in some instances is a shareholder of and/or lead lender to, other financial institutions and, as a result, in certain circumstances may find itself exposed to the credit, or other risks, associated with the financial difficulties encountered by these institutions. See "Business — Loan Losses and Non-Performing Loans".

Additionally, SMBC provides direct and indirect support to troubled customers, generally in cases where such support is economically justified. However, SMBC, like other banks in Japan, has provided support to troubled customers under circumstances, and based upon considerations, that may differ in kind or degree from those relevant in other countries, including Europe and the United States. These may include political and regulatory influences and a perceived responsibility for obligations of affiliated and associated companies due to the relationships between the various entities. A decision by SMBC not to provide support, or to withdraw its support to large borrowers may result in substantial and immediate credit costs. SMBC has supported in the past, and may support in the future, companies belonging to the Sumitomo group of companies (the "Sumitomo group") and the Mitsui group of companies (the "Mitsui group") and other affiliated entities. See "Business — Loan Losses and Non-Performing Loans — Policies with Respect to Troubled Customers".

#### ***Restructured Loans May Present Uncertainties for SMBC***

SMBC has recently announced the restructuring of a number of its loans to large borrowers, some of which include the use of debt for equity swaps. Valuation and classification of restructured loans or restructured equity positions can be difficult and may lead to additional credit costs if restructured loans are not properly classified or the restructuring plan fails. As part of the FSA's Programme, the FSA requested that equity securities received as part of a debt for equity swap should be valued at fair value, regardless of the timing of the relevant swap transaction, which could present difficult valuation issues for SMBC and expose it to future losses. Additionally, securities received in such restructurings may be illiquid making it more difficult for SMBC to achieve its intended reduction of its equity portfolio.

#### ***Recent Corporate Credibility Issues May Increase SMBC's Non-Performing Loans or Otherwise Negatively Affect SMBC's Results of Operations***

In recent months, several high-profile bankruptcy filings such as the filing by United Airlines and reports of past accounting irregularities, including fraud, in the United States, such as those relating to Enron Corporation, have raised corporate credibility issues, particularly with respect to public companies. In response to these developments and to U.S. regulatory responses to these developments, regulators, auditors and corporate managers generally have begun to review financial statements more thoroughly and conservatively. As a result, additional accounting irregularities may be uncovered and additional bankruptcy filings may be made in Europe, the United States and elsewhere. Such developments could increase SMBC's credit costs if they directly involve SMBC's borrowers or indirectly affect the credit of SMBC's borrowers.

#### ***Market Risks Affecting SMBC's Equity Portfolio Could Impair SMBC's Financial Condition and Results of Operations***

The reported value of SMBC's securities portfolio depends on the fair market values of these investments. Approximately 14 per cent. of SMBC's securities portfolio consists of equity securities which are primarily common stocks of publicly traded Japanese companies. Shares in these companies are relatively volatile and have declined substantially in recent years. A decline in the value of SMBC's securities portfolio has a negative effect on the level of SMBC's losses from devaluation of securities and sales of securities. As at March 31, 2003, SMBC's securities (including money held in trust) with a readily ascertainable market value contained ¥27.6 billion in unrealised losses, of which ¥21.6 billion appeared in its consolidated stockholders' equity. Although the Nikkei increased 13.9 per cent. from ¥7,972.71 as at March 31, 2003 to ¥9,083.11 as at June 30, 2003, and the TOPIX increased 14.6 per cent. from 788.00 as at March 31, 2003 to 903.44 as at June 30, 2003, any substantial decline in the Japanese equity market may have negative effects on SMBC's distributable profits and its capital position. Geopolitical risks, including hostilities involving North Korea, could, among other things, adversely affect equity markets and the valuation of SMBC's equity portfolio.

SMBC may also be negatively affected by the legal requirement that, by September 30, 2004, banks should reduce their equity holdings to the extent that the value of their equity holding exceeds Tier I capital (legislation to extend this deadline to September 30, 2006 is currently being deliberated by the Japanese parliament, see “Supervision and Regulation — Japan — Restriction on Bank’s Stockholding, the Bank-held Stock Acquisition Organisation and Direct Purchase by the Bank of Japan”). Since a large portion of SMBC’s equity holdings is comprised of shareholdings in its borrowers and cross shareholdings, the disposition of significant amounts of these shareholdings could negatively impact client relationships and cause secondary market sales of SMFG’s shares. While SMBC may seek the consent of an issuer to sell its shares, consent may not be obtained or could significantly delay the timing of the sale. Also, if SMBC tries to sell relatively illiquid shares, the price of these shares may decline rapidly. Therefore, SMBC’s ability to dispose of its equity holdings at the required pace may be limited. During the year ended March 31, 2003, SMBC completed sales of a significant amount of cross shareholdings. Together with the impairment of ¥526 billion and write-off of unrealised losses of ¥673 billion at the time of the merger between the Former-SMBC and Wakashio Bank (see “Formation of a Holding Company Structure and Merger”), the balance of SMBC’s consolidated equity portfolio as at March 31, 2003 decreased to ¥3.4 trillion, from ¥5.5 trillion as at March 31, 2002. As a result, the market value of SMBC’s consolidated equity portfolio classified as other securities with market value as at March 31, 2003 was lower than SMBC’s consolidated Tier I capital. Also on an adjusted basis defined under the legislation, the balance of SMBC’s equity portfolio is lower than Tier I capital. However, due to the possibilities for fluctuations in the value of SMBC’s equity portfolio and the level of Tier I capital, there can be no assurance that SMBC will be able to fulfill the requirement as at September 30, 2004 (or September 30, 2006 if the currently pending legislation is enacted by the Japanese parliament). It is uncertain what actions the FSA would take in such a case and there can be no assurance that the failure to achieve the targeted results would not have an adverse effect on SMBC.

#### ***Interest Rate Risk Could Impair SMBC’s Financial Condition and Results of Operations***

SMBC has substantial investments in yen-denominated debt securities, principally fixed-rate bonds. In particular, Japanese government Bonds (“JGBs”) represent a significant part of SMBC’s fixed income portfolio. As at March 31, 2003, on a non-consolidated basis, SMBC had ¥14.7 trillion of yen-denominated debt securities, of which ¥12.3 trillion were JGBs. SMBC also had ¥112 billion of net unrealised gains on investments in yen-denominated debt securities (classified as held-to-maturity securities and as other securities) as at March 31, 2003. In addition, SMBC owned ¥4.4 trillion of foreign debt securities as at March 31, 2003 which mainly consisted of U.S. Treasury securities. An increase in interest rates could substantially decrease the value of SMBC’s fixed income portfolio, and any unexpected change in interest rates could adversely affect SMBC’s bond and interest rate derivative positions. The duration of SMBC’s JGB portfolio was 3.5 years as at March 31, 2003, up from 2.7 years as at March 30, 2002. As such, a parallel shift of the whole yield curve by 1 basis point would result in approximately ¥4 billion of change to the value of SMBC’s JGB portfolio. In addition, a decline in the price of JGBs would substantially decrease the value of SMBC’s securities portfolio. More recently, JGB’s have been downgraded by the major rating agencies. If a further downgrade occurs, it may cause a decline in the price of JGBs. Moreover, in recent years SMBC earned substantial profits from its investment in fixed income securities, including JGBs and U.S. Treasury securities. If interest rates remain stable or increase, SMBC might not be able to maintain these earnings levels. Furthermore, following a continuous decrease, the long-term interest rate sharply increased from mid June 2003. According to information supplied by Bloomberg L.P., the 10-year JGB interest rate hit a yearly low of 0.448 per cent. on June 12, 2003 and hit the yearly high of 1.169 per cent. on July 8, 2003. As a result of the sharp rise in the long-term interest rate, the market value of SMBC’s fixed income portfolio has been reduced. If the long-term interest rate keeps increasing, the value of SMBC’s fixed income portfolio will further decline significantly. See “Business — Securities-Related Activities — Securities Portfolio”.

#### ***Exposure to Subsidiaries, Affiliates and Other Business Arrangements May Adversely Affect SMBC’s Financial Condition and Results of Operations***

SMBC operates parts of its business through subsidiaries and affiliates and has entered into various joint venture arrangements. For example, SMBC operates its consumer financing business through At-Loan Co., Ltd. and its asset management business through Sumitomo Mitsui Asset Management Company, Limited. See “Business — Operations”. It is uncertain whether SMBC will receive any benefit from its investments in these subsidiaries, affiliates and joint ventures, and SMBC may need to provide additional support to these entities in the future. Further, SMBC may lose the capital it contributed to those entities and may incur credit costs resulting from its credit exposure to these entities if they fail or do not perform as expected. Certain of these entities, including, for example, the investment banking and consumer finance entities, also engage in activities that are more volatile and have a higher risk profile than the core banking business of SMBC.

### ***Refinancing Risk Could Impair SMBC's Financial Condition and Results of Operations***

Substantial amounts of SMBC's debt obligations mature each year. SMBC depends on its ability to continue to attract deposits and to refinance its debt obligations at commercially acceptable rates, and continues to finance a certain portion of its operations with short term funds. As these obligations become due, SMBC may need to find alternative sources of financing during unstable market conditions. No assurance can be provided that sufficient funds will be available at acceptable terms, and failure to refinance these debts could adversely affect SMBC's financial condition and results of operations. Additionally, certain of SMBC's perpetual and subordinated debt obligations become callable during the next few fiscal years. SMBC may choose not to call some or all of these obligations due to the lack of refinancing opportunities or for other reasons. SMBC's reputation in the capital markets could be undermined and its future financing activities could become more difficult if this were the case.

### ***SMBC Will be Exposed to Increased Risks as it Expands its Range of Services and Products and Implements New Strategies***

As SMBC expands the range of its products and services beyond its traditional banking business to include other financial services, and as the sophistication of financial products, such as financial derivatives, and management systems grow, SMBC will be exposed to new and increasingly complex risks. In some cases these risks will be of a type with which SMBC has no or only limited prior experience. As a result, SMBC's risk management systems may prove to be inadequate, and may not work in all cases or to the degree required. For example, as SMBC implements its plan to expand its consumer finance lending business, which is generally considered to be a risky line of business, losses may be incurred. Consequently, SMBC remains subject to substantial market, credit and other risks in relation to these expanding products and services and trading activities, including its derivatives business, which could result in significant losses. In addition, SMBC's efforts to offer new services and products may not succeed if market opportunities develop more slowly than expected, or if the profitability of these opportunities is undermined by competitive pressures.

Additionally, the implementation of revised lending practices and the adjustment of interest rates charged by SMBC to better reflect risk may prove more difficult than anticipated. The implementation of these strategies may face several difficulties including the following: customers may be unable to pay interest rates that reflect their risk profile, competitors may continue to provide loans that do not reflect risk premiums and to offer loans with less onerous terms and conditions and SMBC may face cultural or other resistance to the implementation of these strategies.

SMBC has also begun to manage its risk on an entity-wide, rather than on an individual company, basis. This strategy remains relatively new at this time, may expose SMBC to unforeseen risk and may not be successful.

### ***Currency Risk Could Negatively Impact SMBC's Financial Condition and Results of Operations***

The Japanese yen has fluctuated in value relative to the U.S. dollar over the last several years. There can be no assurance that increasing volatility of the foreign exchange rates for yen will not have an adverse effect on the Japanese economy and SMBC's financial condition or results of operations.

### ***A Significant Downgrade of SMBC's Credit Ratings Could Have a Negative Effect on SMBC***

A significant downgrade of SMBC's credit ratings by one or more of the credit rating agencies could have a negative effect on SMBC's treasury operations and other aspects of its business. In the event of a downgrade of SMBC's credit ratings, its treasury unit may have to accept less favourable terms in its transactions with counterparties, including capital raising activities, or may be unable to enter into certain transactions. In addition, foreign regulatory bodies may impose restrictions on SMBC's overseas operations. This could have a negative impact on the profitability of SMBC's treasury and other operations and adversely affect its results of operations and financial condition.

In addition, on June 9, 2003, following the failure of Resona Holdings, Inc. ("Resona Holdings") to pay a dividend for preferred shares held by the Japanese government, Standard & Poor's downgraded the rating assigned to capital securities issued by the subsidiaries of major Japanese banks, including SMBC. The rating of preferred securities issued by SB Treasury Company, LLC (see Note 16 of the Notes to the Consolidated Financial Statements as of and for the year ended March 31, 2003) was downgraded by Standard & Poor's from BB- to B+. Further, on June 12, 2003, Moody's Investors Service (which currently assigns a rating of Baa2) placed the capital securities issued by SB Treasury Company, LLC under review for possible downgrade. Such a

downgrading of capital securities issued by a subsidiary of SMBC may also have negative impact on SMBC's capital raising activities.

#### ***Capital Requirements Could Constrain SMBC's Operations***

SMBC is subject to capital adequacy guidelines adopted by the FSA, which provide for a minimum target ratio of capital to risk-adjusted assets of 8.0 per cent. on a consolidated basis for an internationally operating bank, at least half of which must be maintained in the form of Tier I capital. Failure by SMBC to maintain its ratios may result in administrative action or sanctions against SMBC which may indirectly impact SMBC's ability to fulfil its obligations under the Bonds. See "Supervision and Regulation — Japan — Capital Adequacy".

SMBC's risk-adjusted capital ratios as at March 31, 2003 were 5.37 per cent. (in the case of consolidated unaudited Tier I capital) and 10.38 per cent. (in the case of consolidated unaudited total capital). SMBC expects that its risk-adjusted capital ratios at future balance sheet dates will principally reflect changes in the amount of SMBC's risk-adjusted assets, the amount of expected cash dividends to SMFG, the amount of SMBC's qualifying earnings or losses, credit costs, net deferred tax asset balances, the amount and type of additional capital raised and certain unrealised losses in its securities portfolio. There can be no assurance that SMBC will be able to maintain its capital at or above the 4.0 per cent. level (in the case of consolidated Tier I capital) and the 8.0 per cent. level (in the case of consolidated total capital) in the future.

Further, the risk-adjusted capital guidelines (the "Basle Accord") promulgated by the Basle Committee on Banking Supervision (the "Basle Committee"), which form the basis for the FSA's capital adequacy guidelines, are being revised and implementation is planned for 2006. At this time, SMBC is unable to predict how the revised guidelines will affect its calculations of capital and the impact of these revisions on other aspects of its operations.

#### ***Weaknesses in SMBC's Capital Base and Contemplated Regulatory Changes Could Adversely Affect SMBC***

As at March 31, 2003, SMBC recognised ¥1,815 billion of net deferred tax assets on its non-consolidated balance sheet, which is realised based on future projected taxable income for five years, multiplied by the effective tax rates applicable to SMBC. As at the same date, consolidated net deferred tax assets of ¥1,842 billion constituted approximately 60 per cent. of SMBC's consolidated Tier I capital. SMBC's capital ratio would be negatively affected if SMBC is unable to utilise its deferred tax assets or if the inclusion of deferred tax assets in capital is restricted in the future. The FSA is contemplating whether an upper limit should be imposed on the amount of deferred tax assets that may be included in the calculation of Tier I and/or total regulatory capital.

The calculation of net deferred tax assets under accounting principles and practices generally accepted in Japan ("Japanese GAAP") is based on taxable income projections. This calculation requires SMBC to make estimates and certain assumptions, and the results of these calculations may differ from the calculation of deferred tax assets under European or U.S. regulations. SMBC's ability to realise benefits from its deferred tax assets would be adversely affected to the extent that SMBC's actual taxable income is lower than the projected taxable income used to determine the amount of its deferred tax asset. Under guidelines issued by the Japan Institute of Certified Public Accountants in January 1999, a company will lose its ability to realise benefits from deferred tax assets if it has incurred substantial amounts of negative annual taxable income for each of three consecutive years or more and is expected to have significant negative taxable income in the following fiscal year. SMBC had positive taxable income in the year ended March 31, 2002 and negative taxable income in the year ended March 31, 2003.

The disposal of non-performing loans and transfers to taxable reserves could result in an increase of deferred tax assets. There can be no assurance that SMBC will be able to realise the tax benefits resulting from such loan disposals and transfers to taxable reserves.

The capital of SMBC is also partially comprised of capital contributions from insurance and other companies in which SMBC has made capital contributions. SMBC's capital ratio would be negatively affected if these cross-capitalisation arrangements were restricted or prohibited in the future.

#### ***Adverse Regulatory Developments or Changes in Government Policies or Economic Controls Could Have a Negative Impact on SMBC's Results of Operations***

SMBC conducts its business subject to ongoing regulation and associated regulatory risks, including the effects of changes in the laws, regulations, policies, voluntary codes of practice and interpretations in Japan and the other markets in which it operates. Future changes in regulation, fiscal or other policies and their effects are

unpredictable and beyond SMBC's control. Recently the FSA, the Bank of Japan and other elements of the government of Japan have taken steps designed to restore confidence in the Japanese financial system, address the asset quality problems faced by many Japanese financial institutions, strengthen the capital base and improve governance of major Japanese banks, and bring greater stability to the financial system. One of the goals announced in the FSA's Programme of October 2002 is the reduction of the aggregate ratio of non-performing loans to total outstanding loans of major Japanese banks by about half by March 31, 2005. The steps taken, announced or reported by the Japanese government include the following:

- Tightening the assessment of assets by requiring major banks' reserves on problem assets to large borrowers that are classified as "substandard loans" to be based upon the estimated discounted cash flows of the impaired loans, implementing mechanisms to harmonise the major banks' classification of troubled large borrowers, establishing a special team responsible for the examination of corporate restructuring plans and completing another round of special inspections to review banks' accounts, including those of SMBC, by the end of March 31, 2003;
- Reviewing capital ratios by reconsidering the banking regulations that allow all deferred tax assets established pursuant to Japanese GAAP to be included in regulatory capital, requesting external auditors to rigorously audit deferred tax assets and considering tax law changes intended to improve the capital adequacy of financial institutions;
- Improving corporate governance of financial institutions; and
- Providing government support to distressed financial institutions.

According to the recent media, the FSA is considering issuing administrative orders against banks that have received public funds and recorded substantially below their planned net income for the year ended March 31, 2003 in order to make sure that those banks will be able to attain their targeted net income in their rationalisation plans for the year ending March 31, 2004. Such administrative orders are being issued pursuant to the FSA's announcement titled "Tightening application of supervisory actions and clarifying criteria to convert government-held preferred stock" in April 2003. See "Recent Events — Recent Regulatory Developments — Improvement of Governance".

These measures, if implemented, could negatively affect SMBC's business, results of operations and capital ratios. For a detailed discussion of these and other steps designed to restore confidence on the Japanese financial system, see "Recent Events — Recent Regulatory Developments".

Other changes in the regulatory environment and new regulatory initiatives, such as new regulations designed to prevent money laundering or related to environmental matters, may also negatively impact SMBC's results of operations and financial condition. See "Supervision and Regulation".

#### ***Governmental Ownership of SMFG's Convertible Preferred Stock and New Governmental Policies Could Adversely Affect SMBC***

A Japanese governmental entity currently owns SMFG's Type 1, Type 2 and Type 3 preferred stocks that are either currently convertible or will become convertible into common stock of SMFG. Based on SMFG's stock price of ¥212,000 at March 31, 2003, the governmental entity would own approximately 39.2 per cent. of SMFG's common stock, assuming full conversion of such government-held preferred stocks and no conversion of the other preferred stocks issued by SMFG. However, the governmental entity could acquire more or less than a 39.2 per cent. interest depending on SMFG's share price at the time of conversion and certain minimum conversion price restrictions. Additionally, the preferred stock is mandatorily convertible in 2009 based on the prevailing market price, subject to certain minimum conversion price restrictions. If the preferred stock is converted at the minimum conversion prices applicable upon mandatory conversion, the governmental entity would own approximately 41.4 per cent. of SMFG's common stock (assuming March 31, 2003 capitalisation levels). As a result of these and other considerations, SMFG intends to repurchase or otherwise dispose of the preferred stock prior to the mandatory conversion date, which may be subject to certain restrictions and shareholders' approval regarding a repurchase of shares as prescribed under the Commercial Code.

The governmental entity holding these convertible preferred stock could also obtain approximately 14.0 per cent. of SMFG's total stockholder voting rights prior to conversion if SMFG does not pay annual dividends on the preferred stock. Consequently, failure to pay dividends on the convertible preferred stock or conversion of the preferred stock into common stock could result in significant influence over SMFG by a governmental entity. See "Business — Funding — Public Funding". In April 2003, the FSA announced its decision to tighten the application of supervisory actions and clarify the criteria governing the conversion of government-held preferred

stock in order to improve corporate governance of banks and bank holding companies (including SMFG) that have received public funds. See “Recent Events — Recent Regulatory Developments — Improvement of Governance”.

If the Japanese government injects more public funds into Japanese commercial banks or bank holding companies, such injection may result in SMFG issuing additional preferred or common stock to the government, which could ultimately result in the government obtaining additional voting rights of SMFG. Conversion of government-held preferred stock in SMFG or an additional injection of public funds into SMFG may result in indirect control by the Japanese government over SMBC (as the wholly-owned subsidiary of SMFG) and to SMBC’s losing autonomy.

#### ***Goldman Sachs May Become a Significant Shareholder of SMFG’s Common Stock***

The Goldman Sachs Group, Inc. (“Goldman Sachs”) holds 50,100 shares of SMFG’s First to Twelfth Series Type 4 preferred stock. These shares of preferred stock are convertible into SMFG’s common stock during the period beginning February 2005 and ending in February 2028. If the preferred stock were converted at their initial conversion price as adjusted (assuming March 31, 2003 capitalisation levels), Goldman Sachs would hold approximately 7.4 per cent. of SMFG’s common stock (assuming no conversion by the governmental entity holding SMFG preferred stock or by SMFG Finance (Cayman) Limited which is holding Thirteenth Series Type 4 preferred stock). The conversion price is subject to adjustment depending on the market price of SMFG’s common stock. If the preferred stock is converted at the minimum conversion price as adjusted, Goldman Sachs would own approximately 19.6 per cent. of SMFG’s common stock (assuming March 31, 2003 capitalisation levels and no conversion by the governmental entity holding SMFG preferred stock and by SMFG Finance (Cayman) Limited which is holding Thirteenth Series Type 4 preferred stock) and may exercise influence over SMBC (as the wholly-owned subsidiary of SMFG). See “Recent Events — Transactions with Goldman Sachs”.

#### ***Further Declines in SMBC’s Pension Assets or Revised Actuarial Assumptions Would Reduce Results of Operations***

SMBC has faced in the past, and may face in the future, losses relating to its pension plans from changes in the market value of plan assets, a decline in returns on SMBC’s pension plan assets or changes in the actuarial assumptions on which the calculation of the projected pension benefit obligation is based. For example, SMBC reduced the discount rate used to measure the projected pension benefit obligation from 3.5 per cent. to 3.0 per cent. in the year ended March 31, 2002 causing an unrecognised actuarial loss. Any future reduction of the discount rate may cause further unrecognised actuarial loss. SMBC may also experience unrecognised prior service costs in the future resulting from amendments to the plans. Changes in the interest rate environment and other factors may also adversely affect the amount of the unfunded pension obligation and the resulting annual amortisation expense. Additionally, no assurance can be provided that the assumptions for the computation of future pension expenses will remain constant.

#### ***Tokyo Regional Bank Tax and Other Similar Taxes May Hurt SMBC’s Financial Condition and Results of Operations***

On March 30, 2000, the Tokyo Metropolitan Government legislated an ordinance to introduce regional bank taxes based on banks’ gross banking profit for five years. SMBC has recognised ¥55 billion (subject to adjustment) in expense relating to the Tokyo regional bank tax since its inception. On March 26, 2002, the Tokyo District Court adjudicated that the regional bank tax ordinance of the Tokyo Metropolitan Government was founded on a misapplication of local tax law and is therefore invalid. On March 29, 2002, the Tokyo Metropolitan Government appealed to the High Court, and on January 30, 2003, the judgement of the District Court was affirmed by the Tokyo High Court. However, on February 10, 2003, the Tokyo Metropolitan Government appealed the ruling with the Supreme Court and there is no assurance that the judgement of the Tokyo High Court will not be reversed. The Osaka Prefecture has also introduced a similar bank tax, though the implementation of the tax has been deferred to the fiscal year commencing April 1, 2003, which, if determined to be valid and enforced, would adversely affect the profitability and financial health of SMBC. The introduction of other regional bank taxes similar to those introduced in Tokyo and Osaka, if determined to be valid and if enforced, would adversely affect SMBC. For fiscal years commencing on or after April 1, 2004, the Tokyo ordinance and the Osaka ordinance will have no legal basis and will not apply as a result of amendments to local tax laws.

### ***SMBC May Not Continue to Maintain the Current Level of Disclosure***

Upon the formation of SMFG and the completion of the statutory share transfer, the Former-SMBC became a direct wholly-owned subsidiary of SMFG as of December 2, 2002. As a result, the shares of the Former-SMBC were delisted from the Tokyo Stock Exchange, Inc. (the “Tokyo Stock Exchange”). The shares of SMBC are not listed on any stock exchanges in Japan or elsewhere and, therefore, SMBC is not subject to the listing rules of the Tokyo Stock Exchange. However, SMBC is still subject to continuing disclosure obligations under the Securities and Exchange Law and the listing rules of the UK Listing Authority because publicly offered debt securities of SMBC are outstanding and certain debt securities of SMBC are currently listed on the Official List and traded on the London Stock Exchange. SMBC filed its annual and semi-annual securities reports with the local finance bureau in Japanese in accordance with the Securities and Exchange Law, published its annual and semi-annual reports in Japanese and English for the year ended March 31, 2002 and published its disclosure book in Japanese in accordance with the Banking Law. Although SMBC intends to continue to maintain the current level of disclosure both in Japanese and English, there is no assurance that SMBC would continue to publish these disclosure materials.

### ***SMBC May Amend Projections at Any Time and For Any Reason***

On May 26, 2003, SMFG published SMBC’s projected non-consolidated results for the year ending March 31, 2004. SMBC’s projected non-consolidated results of gross banking profit, expenses, banking profit, ordinary profits and net income are included in this offering circular. On the same day, SMFG also published its projected consolidated results for the year ending March 31, 2004. SMFG’s projected consolidated results of ordinary income, ordinary profit and net income are also included in this offering circular. See “Recent Business and Outlook — Outlook”. Such projections involve known and unknown risks and uncertainties and actual results of SMBC may differ materially from projections. The rules of the Tokyo Stock Exchange require listed companies (including SMFG) to amend published projections if they consider that actual results could be different from those previously published by 30 per cent. or more in the case of net income and ordinary profit and 10 per cent. or more in the case of ordinary income. If SMBC expects that its projected results for the year ending March 31, 2004 would be materially different from those previously published, SMFG may need to amend its published projections.

## **Risks Related to the Industry**

### ***Continued Weakness in the Japanese Economy and Related Instability of the Japanese Financial System May Hurt SMBC’s Financial Condition and Results of Operations***

Sluggish economic conditions in Japan in recent years have had significantly adverse effects on Japanese financial institutions, including commercial banks. As a result of severe and protracted declines in the market prices of Japanese real estate and equity securities, an increasing number of bankruptcies and continuing deflation, Japanese financial institutions have been experiencing difficulties with non-accrual loans and asset devaluations. These difficulties have caused the failure of certain Japanese banks, insurance companies and other financial institutions. Changes in the regulatory environment, such as the introduction of limits to the deposit insurance system and the removal of regulatory barriers between different sectors of the financial industry, have also increased the competition facing financial institutions. These problems have led, and may lead in the future, to severe liquidity and solvency problems and may result in the liquidation or restructuring of certain financial institutions. The Japanese government has undertaken various measures in the past to support these institutions or otherwise to maintain depositor confidence generally. Certain of these measures have involved the use of public funds, for example, on June 10, 2003, the Japanese government determined to recapitalize Resona Bank, Ltd. (“Resona Bank”). In addition, in 1999, the Japanese government nationalised two banks, The Long Term Credit Bank and The Nippon Credit Bank. However, it is uncertain whether the Japanese government would undertake a similar restructuring or what measures it would undertake if faced with the probable failure of a major Japanese financial institution. In particular, in light of recent government policy changes, including a reduction in deposit insurance coverage, there can be no assurance that depositors or other creditors would be protected in such a situation. Furthermore, no assurance can be provided that the Japanese government will not request one or more financial institutions either to provide financial and other assistance to support distressed financial institutions or to directly or indirectly acquire some portion of the problem loans or other assets of such institutions. All of these measures may adversely affect SMBC. See “Supervision and Regulation — Japan”.

***SMBC's Business May be Adversely Affected by Negative Developments With Respect to Other Japanese Financial Institutions, Both Directly and by the Effect They May Have on the Overall Japanese Banking Environment and on Their Borrowers***

Many Japanese financial institutions, including banks, non-bank lending and credit institutions, affiliates of securities companies and insurance companies, are experiencing and expect to continue to experience declining asset quality and capital adequacy and other financial problems. This may lead to severe liquidity and solvency problems, and has previously resulted in the liquidation, government control or restructuring of affected institutions in the past. The continued financial difficulties of other financial institutions could adversely affect SMBC because:

- as at March 31, 2003, approximately 9.5 per cent. of SMBC's total loans (on a non-consolidated basis) were made to financial institutions in domestic offices and of those loans, 3.1 per cent. were classified as risk-monitored loans;
- SMBC is a shareholder of some other banks and financial institutions that are not its consolidated subsidiaries;
- SMBC may be requested to participate in providing assistance to support distressed financial institutions, including those within the Sumitomo group and the Mitsui group;
- troubled banks and financial institutions may discontinue or decrease their credit support to troubled customers to whom SMBC is also a lender, resulting in significant failures of those borrowers or a deterioration in the quality of SMBC's loan portfolio;
- financial institutions may become majority owned and/or controlled by the Japanese government as a result of the government's conversion of their preferred stock into common stock and/or injection of additional public funds pursuant to the Deposit Insurance Law or other newly introduced framework for the injection of public funds into financial institutions;
- if the Japanese government takes control of one or more major financial institutions, SMBC may become a direct competitor of government-controlled financial institutions;
- SMBC may be put at a competitive disadvantage if the Japanese government provides regulatory, tax, funding or other benefits to other financial institutions, to strengthen their capital, facilitate their sale or otherwise;
- deposit insurance premiums could rise if deposit insurance funds prove to be inadequate; and
- repeated or large-scale bankruptcies and/or government support or control of financial institutions could undermine depositor confidence generally or adversely affect the overall banking environment.

***SMBC Competes in the Highly Competitive Financial Services Industry***

Recent regulatory changes have subjected SMBC to significant competition from other Japanese banks, branches of international banks and financial institutions other than banks. Many of these banks and other institutions compete for substantially the same business as SMBC. Substantial restructuring of the Japanese banking industry has recently taken place, including deregulation, which is expected to substantially further increase competition in the Japanese financial services. As a consequence, there are now four highly competitive major banking groups in Japan, including the SMFG group. In addition, recent regulatory changes permit various financial and other institutions to enter into business sectors formerly reserved for Japanese banks. For example, Sony Corporation, an electronics manufacturer, and Ito-Yokado Co. Ltd., a supermarket operator, have recently begun to offer specialised banking services. SMBC also faces competition from governmental lending agencies such as the Japan Finance for Small Business, National Life Finance Corporation, Japan Finance Corporation for Municipal Enterprises and the Government Housing Loan Corporation. In addition, the establishment of the Japan Post in April 2003 could also result in an increase in competition in the financial services industry (see "The Japanese Banking System"). Increased competition may have an adverse effect on SMBC's financial condition or results of operations.

***Return of the "Japan Premium" or New Limitations on Credit Extended to Japanese Banks Could Adversely Affect SMBC***

As a result of concerns regarding asset quality and the failure of several large Japanese financial institutions, a so-called "Japan premium" had been imposed on Japanese financial institutions in the past. The "Japan premium" refers to the additional risk premium that Japanese financial institutions (including SMBC) and their

affiliates were required to pay in order to borrow short-term, interbank funds in international markets compared with their U.S. and European counterparts. There can be no assurance that a “Japan premium” will not be imposed again or that international lenders will not implement other limitations on the credit that they are willing to extend to Japanese banks, including SMBC.

### **Risks Related to the Offering**

#### ***Subordination of the Bonds Could Hinder Investors’ Ability to Receive Payment***

Upon the occurrence of a Subordination Event (as defined in the Conditions), any amounts payable under the Bonds (except for such amounts as shall have become due and payable, other than solely by way of acceleration, prior to the date on which a Subordination Event shall have occurred) will be subordinated and subject in right of payment to the prior payment of all Senior Indebtedness (as defined in the Conditions). SMBC expects from time to time to incur additional indebtedness and other obligations that will constitute Senior Indebtedness and the Trust Deed does not contain any provisions restricting their ability to incur Senior Indebtedness. In addition, interest payments may at the option of SMBC be deferred on the occurrence of certain events specified in the Conditions. See “Terms and Conditions of the Bonds”.

#### ***The Market for the Bonds Offered by this Offering Circular May have Limited Liquidity***

No assurances can be provided that an adequate trading market for the Bonds will develop or will be sustained.

#### ***The Ratings of the Bonds Could be Lowered***

SMBC’s long-term senior debt securities have been assigned a credit rating of A3 with a stable outlook by Moody’s Investor Service, Inc. Based on these ratings, the Bonds have received a provisional rating of Baa1 from Moody’s Investor Service, Inc. In addition, Moody’s Investor Service, Inc. has placed SMBC’s preferred securities ratings, currently rated Baa2, on review for possible downgrade. Currently, SMBC’s financial strength rating is E and the subordinated debt and junior subordinated debt are both rated Baa1. Ratings are based upon information furnished by SMBC or obtained by the rating organisation from other sources and are subject to revision, suspension or withdrawal by the rating organisation at any time. A downgrade in the ratings could reduce the number of potential investors in the Bonds and adversely affect the value of the Bonds.

## CAPITALISATION AND INDEBTEDNESS

The following table sets forth the consolidated capitalisation of SMBC as at March 31, 2003 which has been extracted without material adjustment from the audited annual consolidated financial statements of SMBC:

|  | <u>As at<br/>March 31, 2003</u><br>(millions of yen) |
|--|--|
| <b>Liabilities<sup>(1)</sup>:</b>  |  |
| Deposits .....   | ¥ 67,885,022   |
| Subordinated borrowings .....  | 877,609  |
| Subordinated bonds <sup>(2)</sup> .....  | 1,403,028  |
| Reserves:  |  |
| Reserve for employee bonuses .....   | 16,111   |
| Reserve for employee retirement benefits .....   | 92,802   |
| Reserve for possible losses on loans sold .....  | 20,665   |
| Other reserves .....   | 649  |
| Other liabilities <sup>(3)(4)</sup> .....  | <u>28,931,052</u>                                    |
| Total liabilities <sup>(5)</sup> .....   | <u>99,226,942</u>                                    |
| <b>Minority interests:</b>   |  |
| Minority interests .....   | <u>1,025,150</u>                                     |
| <b>Stockholders' equity:</b>   |  |
| Capital stock .....  | 559,985  |
| Preferred stock:   |  |
| Authorised — 1,767,000 shares, and issued and outstanding — 967,000 fully paid shares      |  |
| Common stock:  |  |
| Authorised — 100,000,000 shares, and issued and outstanding — 54,811,805 fully paid shares |  |
| Capital surplus .....  | 1,298,511  |
| Land revaluation excess .....  | 101,336  |
| Retained earnings .....  | 258,690  |
| Net unrealised losses on other securities .....  | (21,559)   |
| Foreign currency translation adjustments .....   | <u>(54,419)</u>                                      |
| Total stockholders' equity .....   | <u>2,142,544</u>                                     |
| <b>Total liabilities, minority interests and stockholders' equity .....</b>                | <b><u>¥102,394,637</u></b>                           |

(1) Liabilities include short-term and long-term liabilities.

(2) During the period between April 1, 2003 to July 24, 2003 SMBC issued subordinated bonds amounting to ¥68,600 million. In addition, on July 18, 2003, SMBC announced the intention to issue a further ¥50,000 million of domestic subordinated bonds, to take place on or around August 1, 2003.

(3) Includes ¥3,078,461 million of acceptances and guarantees. All contingent liabilities arising in connection with customers' foreign trade and other transactions are accounted for in "Acceptances and guarantees".

(4) As at March 31, 2003, SMBC had no contingent liabilities or guarantees except for those disclosed in (3) above.

- (5) SMBC has no liabilities guaranteed by unaffiliated entities. Details about the amount of certain secured/unsecured liabilities of SMBC are as follows:

|  | <b>Millions of yen</b> |                  |              |
|--|------------------------|------------------|--------------|
|  | <b>Secured</b>         | <b>Unsecured</b> | <b>Total</b> |
| Deposits . . . . .                                       | ¥ 21,038               | ¥67,863,984      | ¥67,885,022  |
| Call money and bills sold . . . . .                      | 7,952,599              | 1,000,484        | 8,953,084    |
| Payables under repurchase agreements . . . . .           | 4,107,615              | 37,120           | 4,144,735    |
| Payables under securities lending transactions . . . . . | 4,189,794              | 617,451          | 4,807,245    |
| Trading liabilities . . . . .                            | 136,975                | 2,714,416        | 2,851,391    |
| Borrowed money . . . . .                                 | 2,847                  | 1,424,152        | 1,427,000    |
| Other liabilities . . . . .                              | 18,548                 | 1,933,451        | 1,952,000    |
| Acceptances and guarantees . . . . .                     | 41,108                 | 3,037,352        | 3,078,461    |

All other liabilities of SMBC are unsecured.

- (6) Save as disclosed above, there has been no material change in the consolidated capitalisation and indebtedness or contingent liabilities or guarantees of SMBC since March 31, 2003.

## RECENT BUSINESS AND OUTLOOK

*The following discussion should be read in conjunction with “Note Regarding Financial Information”, “Selected Financial and Other Information” and the financial statements and notes to those financial statements included elsewhere in this Offering Circular. SMBC’s financial statements are prepared in accordance with Japanese GAAP, which differs in certain significant respects from accounting principles and practices generally accepted in the United States. See “Summary of Significant Differences between Japanese GAAP and U.S. GAAP”. Except as otherwise indicated, the information herein with respect to SMBC is presented on a consolidated basis. In addition, references to SMBC with regard to the period prior to the merger of March 17, 2003, refer principally to the operations, aims and achievements of the Former-SMBC. See “Note Regarding Financial Information”.*

### Overview

The Japanese economy continued to face significant difficulties in the period under review. SMBC’s recent results of operations and financial condition have been mainly affected by various factors including: (i) continuing deflation; (ii) rising unemployment; (iii) management of non-performing loans; (iv) unwinding of cross shareholdings; (v) depressed equity markets in Japan; (vi) the low interest rate environment persisting in Japan; and (vii) the continued depression of the Japanese real estate market. This has led to a decrease in the average rate of interest on loans, debt securities and deposits, a decrease in cross-shareholdings as a percentage of capital and high levels of provisions for loan losses and write-offs.

Given the worse than expected economic environment during the year ended March 31, 2003 and an initiative by the FSA to address non-performing loans on an increasingly aggressive basis, three of the four major banking groups (the Mizuho Financial Group, UFJ Holdings and SMFG) incurred higher than expected credit costs for the year ended March 31, 2003. For the years ended March 31, 2002 and 2003, SMBC incurred credit costs of ¥1,703 billion and ¥1,202 billion.

### Consolidated Results for the year ended March 31, 2003

Interest income comprises interest on loans and discounts, interest and dividends on securities, interest on receivables under resale agreements, interest on deposits with banks and other interest income. For the year ended March 31, 2003, SMBC’s total interest income decreased ¥359,159 million, or 16.5 per cent., to ¥1,817,526 million compared with the year ended March 31, 2002 mainly due to the lower interest applied, a reduction in the volume of loans and a reduction in dividend income from affiliates.

Interest expenses comprises interest on deposits, interest on borrowings and rediscounts, interest on payables under repurchase agreements, interest on bonds and bonds with subscription rights for shares and other interest expenses. For the year ended March 31, 2003, SMBC’s total interest expenses decreased ¥309,496 million, or 42.6 per cent., to ¥417,405 million compared with the year ended March 31, 2002 mainly due to lower average rate of deposits and other borrowings and a reduction in the volume of deposits and other borrowings.

As a result, SMBC’s net interest income (total interest income minus total interest expense) amounted to ¥1,400,121 million for the year ended March 31, 2003.

Fees and commissions comprise fees from money remittance and transfers and fees relating to deposits and loans (such as loan commitment fees, loan arrangement fees and derivatives sales fees), securities transactions (such as bond trustee fees and bond recording agency fees) and guarantees and acceptances. For the year ended March 31, 2003, SMBC’s income from fees and commissions increased ¥36,955 million, or 9.5 per cent., to ¥424,235 million compared with the year ended March 31, 2002 mainly due to an increase in fees for sales of investment trusts, arrangement of syndicated loans, money transfers for corporate clients and credit cards. Expenses related to fees and commissions increased ¥6,510 million, or 9.6 per cent., to ¥74,257 million compared with the year ended March 31, 2002 mainly due to an increase in fees related to housing loans.

As a result, SMBC’s net fees and commissions amounted to ¥349,977 million for the year ended March 31, 2003.

For the year ended March 31, 2003, SMBC’s net trading income (trading profits minus trading losses) increased ¥76,338 million, or 59.0 per cent., to ¥205,770 million compared with the year ended March 31, 2002 mainly due to an increase in derivatives transactions with corporate clients.

Other operating income includes bond related income, lease-related income and other operating income. Other operating expenses consist of bond related losses, instalment-related expenses and other operating expenses. For the year ended March 31, 2003, SMBC's other operating income increased ¥101,453 million, or 12.0 per cent., to ¥947,036 million compared with the year ended March 31, 2002 mainly due to an increase in bond related income and lease related income. Other operating expenses increased ¥54,542 million, or 8.2 per cent., to ¥721,193 million compared with the year ended March 31, 2002 mainly due to an increase in lease related costs. As a result, SMBC's net other operating income amounted to ¥225,842 million for the year ended March 31, 2003.

General and administrative expenses consist of salaries and related expenses, rent and lease expenses, welfare expenses, depreciation expenses and taxes other than income taxes. For the year ended March 31, 2003, SMBC's general and administrative expenses decreased ¥47,132 million, or 5.0 per cent., to ¥888,421 million compared with the year ended March 31, 2002, primarily as a result of SMBC's cost cutting efforts, in particular the accelerated reduction in the number of offices and branch offices as well as steady decline in the number of personnel.

Other income comprises gains on sales of stocks and other securities, gains on disposition of premises and equipment, collection of written-off claims, equity in earnings of affiliates and other income (including gains on return of the entrusted portion of employee pension fund). Other expenses consist of transfers to reserves for possible loan losses, write-off of loans, losses on devaluation of stocks, losses on sales of stock and other securities, losses on disposition of premises and equipment, and other expenses (including amortised cost of unrecognised net obligation from initial application of the new accounting standard for employee retirement benefits and losses on disposal of software). For the year ended March 31, 2003, SMBC's other income decreased ¥103,589 million, or 38.3 per cent., to ¥166,541 million compared with the year ended March 31, 2002 mainly due to a decrease in gains on the sales of stock. Other expenses increased ¥534,761 million, or 65.8 per cent., to ¥1,347,022 million compared with the year ended March 31, 2002 mainly due to an increase in losses on devaluation of stocks.

As a result, SMBC's net other expenses amounted to ¥1,180,481 million.

As a result of these factors, for the year ended March 31, 2003, SMBC's total income decreased ¥247,287 million, or 6.5 per cent., to ¥3,561,843 million and total expenses decreased ¥308,955 million, or 7.0 per cent., to ¥4,104,514 million compared with the year ended March 31, 2002. For the year ended March 31, 2003, loss before income taxes and minority interests amounted to ¥542,670 million. Income taxes amounted to a net benefit of ¥150,320 million which included a deferred tax credit of ¥216,233 million, as compared to a net income tax benefit of ¥187,445 million which included a deferred tax credit of ¥289,305 million for the year ended March 31, 2002. As a result of the above, for the year ended March 31, 2003, SMBC recorded a net loss of ¥429,387 million.

## **Outlook**

On May 26, 2003, SMFG published SMBC's projected non-consolidated results for the year ending March 31, 2004 as part of the supplementary information of the financial results for the year ended March 31, 2003, being: approximately ¥1,600 billion of gross banking profit, approximately ¥600 billion of expenses, approximately ¥1,000 billion of banking profit, approximately ¥170 billion of ordinary profit and approximately ¥100 billion of net income. On the same date, SMFG also published its projected consolidated results for the year ending March 31, 2004 of approximately ¥3,300 billion of ordinary income, approximately ¥320 billion of ordinary profit and approximately ¥150 billion of net income. These projections are based on the management plan to dispose of non-performing loans and reduce exposure to stock market risk.

These projections and other forward-looking statements represent management's views and beliefs as at May 26, 2003 (pursuant to the guidelines of the Tokyo Stock Exchange in respect of the publication of certain financial information for the current financial year). Such projections involve known and unknown risks and uncertainties and actual results may differ materially from the projections. The rules of the Tokyo Stock Exchange require SMFG to amend its published projections if SMFG considers that the actual results could be different by certain specified percentages from those previously published. Such amendments may be made at any time and for any reason including a revision of SMBC's projections. The financial position and results of operations of SMBC may be materially affected by various factors including macro-economic trends, share price fluctuations, changes in real estate values, the level of interest rates, exchange rate fluctuations and changes in applicable rules and regulations.

## FORMATION OF A HOLDING COMPANY STRUCTURE AND MERGER

On April 1, 2001, The Sakura Bank, Limited (“Sakura Bank”) and The Sumitomo Bank, Limited (“Sumitomo Bank”) merged to create the Former-SMBC. Sumitomo Bank was established in 1895 and incorporated as a joint stock corporation with limited liability in 1912. Sumitomo Bank later merged with the Osaka-based Hannan and Ikeda Jitsugyo Banks in 1945, the Kawachi Bank in 1965 and with the Heiwa Sogo Bank in 1986. In 1998, Sumitomo Bank formed an alliance with Daiwa Securities Co. Ltd. through which Sumitomo Bank established Daiwa Securities SMBC Co. Ltd., formerly Daiwa Securities SB Capital Markets Co., Ltd., (“Daiwa Securities SMBC”) as a securities and derivatives joint venture, and an asset management joint venture, Daiwa SB Investments Ltd. (“Daiwa SB Investments”). Sakura Bank was a joint stock corporation with limited liability that was formed in 1990 through the merger of The Mitsui Bank, Limited (“Mitsui Bank”) and The Taiyo Kobe Bank, Limited. The Mitsui Bank traced its origins to the Mitsui Exchange House that was founded in Edo (now Tokyo) in 1683. Prior to the April 2001 merger, Sakura Bank operated in Japan as a commercial bank under the Banking Law of Japan (the “Banking Law”) and provided a range of wholesale and retail banking services to customers in Japan and overseas.

In order to build upon the benefits realised from the creation of the Former-SMBC, it was determined that a new corporate structure should be adopted utilising a holding company structure. This objective had two aims:

- (i) the creation of a corporate structure that was able to fully exploit the strengths of the group; and
- (ii) substantial reinforcement of the strategic business lines on a group-wide basis.

Sumitomo Mitsui Financial Group, Inc. was established on December 2, 2002 as the holding company for the SMFG group through a statutory share transfer (*kabushiki iten*) of all of the outstanding equity securities of the Former-SMBC in exchange for SMFG’s newly issued securities. SMFG is a joint stock corporation with limited liability (*Kabushiki Kaisha*) incorporated under the Commercial Code. SMFG’s head office is located at 1-2, Yurakucho 1-chome, Chiyoda-ku, Tokyo, Japan. Upon formation of SMFG and completion of the statutory share transfer, the Former-SMBC became a direct wholly-owned subsidiary of SMFG.

As part of the strategy for adopting a holding company structure, following establishment, SMFG also acquired direct ownership of several additional subsidiaries and investment previously owned by the Former-SMBC:

- *Sumitomo Mitsui Card and SMBC Leasing.* Two non-bank subsidiaries for accounting purposes of the Former-SMBC — Sumitomo Mitsui Card Company, Limited (“Sumitomo Mitsui Card”) and SMBC Leasing Company Limited (“SMBC Leasing”) — were “spun off” to SMFG on February 3, 2003. Each of these transactions was structured as a corporate split under Japanese law, whereby SMBC transferred its shares in these two companies to SMFG at book value. SMFG also purchased the remaining issued and outstanding shares of these two companies from other group companies and unaffiliated shareholders at fair market value on February 3, 2003. As a result of these transactions, Sumitomo Mitsui Card and SMBC Leasing became direct wholly-owned subsidiaries of SMFG. Sumitomo Mitsui Card offers credit card settlement and financing services, and enjoys the widespread brand recognition of the former Sumitomo VISA Card. SMBC Leasing specialises in corporate leasing and rentals for customers’ large-scale capital investment needs, providing custom-made solutions and a broad spectrum of products such as equipment and information technology leasing.
- *Japan Research Institute.* On February 3, 2003, SMFG merged with Japan Research Institute Holdings in a statutory merger under Japanese law. In connection with the merger, SMFG issued 0.021 shares of its common stock for each share of common stock of Japan Research Institute Holdings, with SMFG as the entity surviving the merger. As a result of these transactions, Japan Research Institute, Limited (“Japan Research Institute”) became a direct wholly-owned subsidiary of SMFG on February 3, 2003. Japan Research Institute is a system integrator, consultant and think-tank that offers comprehensive information services.
- *Daiwa Securities SMBC and Daiwa SB Investments.* Equity stakes in two joint ventures with Daiwa Securities Group Inc. (“Daiwa Securities”), previously held by the Former-SMBC — Daiwa Securities SMBC and Daiwa SB Investments — were transferred to SMFG through a corporate split under Japanese law which became effective on February 3, 2003. Concurrently with the corporate split, SMFG purchased 13.6 per cent. of Daiwa SB Investments’ common stock that was previously held by subsidiaries of SMBC. As a result of these transactions, SMFG now holds a 40 per cent. equity stake in Daiwa Securities SMBC and a 44 per cent. equity stake in Daiwa SB Investments.

Following the establishment of SMFG, on March 17, 2003 the Former-SMBC merged with Wakashio Bank. On January 17, 2003, the entire share capital of Wakashio Bank was transferred to SMFG in preparation for the merger of the Former SMBC with Wakashio Bank. Prior to that date, Wakashio Bank had been a subsidiary of the Former-SMBC. As consideration for the merger, Wakashio Bank subsequently issued new shares at a ratio of 0.007 ordinary share of Wakashio Bank for each ordinary share of the Former-SMBC, and 0.001 preferred share of Wakashio Bank for each preferred share of the Former-SMBC. Upon merger, Wakashio Bank was the surviving legal entity in the merger with the Former-SMBC and was renamed as “Sumitomo Mitsui Banking Corporation (SMBC)”.

There were two principal reasons for the merger between the Former-SMBC and Wakashio Bank. Firstly, the merger was intended to enhance the banking services provided by SMBC to small businesses and individuals. Wakashio Bank was a regional bank based in the Tokyo Metropolitan area that concentrated on providing financing to small businesses and individuals in the local communities in which it operated. It had a distinctive business model based upon local-area-orientated financial services and know-how for low-cost operation. By combining Wakashio Bank’s business model with the established brand, high capability for developing sophisticated financial services, nation-wide network and infrastructure (such as the back office operations and systems) of the Former-SMBC, SMBC aimed to improve its responsiveness to the expectations of small businesses and individuals by providing financial services with further value added and convenience, especially in the Tokyo Metropolitan area.

Secondly, the merger aimed to substantially reduce unrealised losses on stocks and land held by the Former-SMBC. The merger accounting rules of Japan permit a merger surplus to be used to eliminate the unrealised losses of the dissolved entity.

As the ultimate holding company of the SMFG group, SMFG is now responsible for group strategy and management, group resource allocation, group financial accounting, investor relations, group IT strategy, HR management for group executives, group risk management and compliance, compensation schemes and, more generally, in harmonising the operations of SMFG on a group-wide basis in the most efficient way possible.

SMFG has established three sub-committees, namely, the Risk Management Committee, the Compensation Committee and the Nomination Committee, to ensure that adequate corporate governance is exercised.

The business of the SMFG group is carried on through the following directly held subsidiaries and affiliates and their respective subsidiaries:

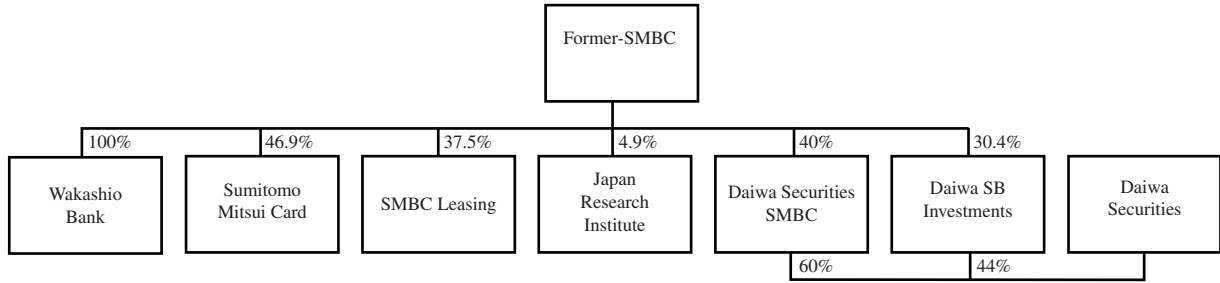

- SMBC
- Sumitomo Mitsui Card
- SMBC Leasing
- Japan Research Institute

In addition to which SMFG holds direct investments in:

- Daiwa Securities SMBC
- Daiwa SB Investments

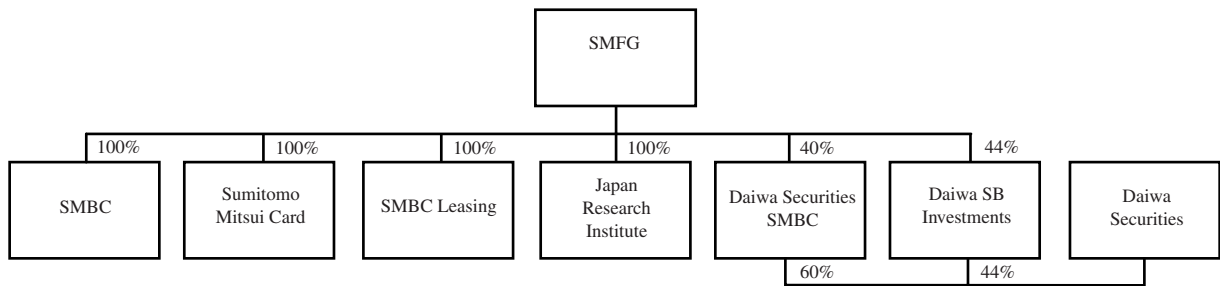

The following diagrams detail the structure of the Former-SMBC (prior to the formation of SMFG as the holding company for SMBC) and current structure of the SMFG group:

**Structure Prior To Formation of SMFG and Merger of the Former-SMBC and Wakashio Bank**

Note: The percentages shown in this diagram indicate the voting rights the Former-SMBC directly held in the companies prior to the formation of SMFG. The Former-SMBC's consolidated subsidiaries and affiliates held the following additional voting rights: 53.1 per cent. in Sumitomo Mitsui Card; 47.7 per cent. in SMBC Leasing; and 49.3 per cent. in Japan Research Institute.

**Current SMFG Group Structure**

## RECENT EVENTS

### Transactions with Goldman Sachs

On January 15, 2003, SMFG, SMBC and Goldman Sachs jointly announced a series of related transactions, which closed on February 7, 2003. None of the transactions would have been consummated unless all three transactions were consummated. The transactions have three primary components: (i) the purchase by Goldman Sachs of convertible preferred stock of SMFG having a liquidation preference equal to ¥150.3 billion; (ii) the provision by SMBC to Goldman Sachs' affiliates of first loss credit protection up to an aggregate of U.S.\$1 billion and, additional second loss credit protection of up to U.S.\$1.125 billion, to mitigate in part the credit risk to Goldman Sachs associated with certain credit extensions to its investment grade clients; and (iii) the enhancement and development of certain business co-operation understandings between SMBC and Goldman Sachs.

#### *Preferred Stock Purchase*

On February 8, 2003, Goldman Sachs purchased convertible preferred stock (the "GS Preferred Stock") of SMFG at a purchase price, and with a liquidation preference, equal to ¥150.3 billion. Annual noncumulative cash dividends will be paid at a rate of 4.5 per cent. of the liquidation preference. The GS Preferred Stock ranks on a parity with other preferred stock of SMFG and is senior to the SMFG common stock.

#### *Credit Loss Protection*

In connection with these agreements with SMFG and SMBC, Goldman Sachs has established certain wholly-owned subsidiaries (the "William Street Entities") to be available to make credit commitments and extensions. In order to hedge in part the credit risk to its investment in the William Street Entities arising from these credit-extension activities, Goldman Sachs has entered into credit loss protection arrangements with SMBC. SMBC, through its Cayman Islands branch, will issue letters of credit in exchange for fees in an amount equal to a portion of the fees and interest to be paid by the borrowers to the William Street Entities. One letter of credit (the first letter of credit, or "FLC"), which was issued on February 7, 2003 in a maximum available amount of U.S.\$1 billion and is available over a 20-year period, subject to early termination or extension. In addition, from time to time over a 20-year period, subject to early termination or extension and subject to the satisfaction of certain conditions, upon the request of Goldman Sachs, SMBC will issue one or more additional five-year letters of credit (each a second letter of credit, or "SLC Series") rated BBB/Baa2 or higher in an aggregate maximum available amount of U.S.\$1.125 billion. Goldman Sachs may draw on the letters of credit in the event that Goldman Sachs realises certain losses ("Losses") with respect to loan commitments or loans extended thereunder that Goldman Sachs has entered into with specified borrowers approved by SMBC and Goldman Sachs.

Under the FLC, Goldman Sachs will be entitled to draw from time to time amounts equal to approximately 95 per cent. of Losses, up to an aggregate stated amount of U.S.\$1 billion. Under the SLC Series, Goldman Sachs will be entitled, subject to certain conditions, to draw from time to time amounts equal to approximately 70 per cent. of Losses above specified loss thresholds, up to an aggregate stated amount of U.S.\$1.125 billion.

In connection with these credit arrangements, SMBC will pay Goldman Sachs an administration fee based on the aggregate amount of commitments covered by the FLC.

The credit loss protection arrangements contain a number of provisions that confer on SMBC certain controls over the determination of borrowers in respect of which it has potential exposure under the FLC and any SLC Series.

First, Goldman Sachs is authorised to make credit commitments covered by the arrangements to only those borrowers approved by SMBC.

Second, except as SMBC and Goldman Sachs may otherwise agree, the borrowers covered by the FLC and any SLC Series that are rated by both of the two major rating agencies must be rated investment grade by both such rating agencies, and borrowers that are rated only by one of the two major rating agencies must be rated investment grade by such rating agency. If neither of the two major rating agencies provide ratings for a borrower, such borrower shall no longer be covered by FLC or any SLC series, if such borrower has credit conditions determined by SMBC and Goldman Sachs to be lower than those rated investment grade.

Third, in the event the ratings of a borrower approved by SMBC fall below investment grade in the judgment of both major rating agencies (or, if a borrower is rated investment grade by only one agency, that agency

downgrades the borrower below investment grade), further extension of credit to such borrower will no longer be covered by these arrangements, unless SMBC and Goldman Sachs otherwise agree.

Fourth, at the fifth, tenth and fifteenth anniversaries of the transaction, SMBC will have the right to cause Goldman Sachs to suspend the extension of the new credit to borrowers deemed by SMBC to have become “unbankable”. “Unbankable” borrowers are those who, notwithstanding the investment grade ratings accorded them by the two major rating agencies, are deemed by SMBC to be below BB- and below Ba3 based on SMBC’s application of rating agency methodologies and criteria. If Goldman Sachs disagrees with a suspension decision made by SMBC, the matter is to be referred to arbitration, and the suspension is effective unless and until an arbitrator rules in favor of Goldman Sachs.

SMBC, through a separate bankruptcy-remote Cayman Islands subsidiary, has collateralised the obligations on the FLC and a portion of the SLC Series by purchasing U.S.\$1.375 billion of Goldman Sachs demand notes and pledging those demand notes to Goldman Sachs. In the event that Goldman Sachs activates an SLC Series that is not otherwise collateralised, SMBC, through its Cayman Islands subsidiary, will be required to purchase and pledge additional Goldman Sachs demand notes in a principal amount equal to the stated amount of such SLC Series. In certain circumstances and subject to certain conditions, SMBC will have the right to substitute as collateral high quality liquid securities for the Goldman Sachs demand notes.

These arrangements are designed to collateralise SMBC’s obligations in the event SMBC’s Cayman Island branch fails to perform on the FLC or any SLC Series, including as a result of the insolvency of SMFG, SMBC or SMBC’s Cayman Island branch.

In the event that the credit rating of Goldman Sachs, as determined by either of the two major credit rating agencies, falls below investment grade, Goldman Sachs shall be obligated to provide collateral to SMBC to support Goldman Sachs’ obligations under the afore-mentioned Goldman Sachs demand notes. After an initial 15-year period under the letters of credit, SMBC and Goldman Sachs will negotiate in good faith to extend the terms of the letter of credit arrangements for one additional five-year term following the expiration of the initial 20-year term. In certain circumstances, the letter of credit arrangements with SMBC may be terminated by SMBC or Goldman Sachs, in which event Goldman Sachs would be required to prepay any outstanding demand notes. In certain circumstances related primarily to the creditworthiness of SMBC or a breach of its representations or covenants, Goldman Sachs may draw on the letters of credit for “early termination amounts” of up to the remaining undrawn or available amount on the letters of credit. In connection with such draws of early termination amounts, Goldman Sachs would be required to prepay any outstanding demand notes. Goldman Sachs also would be obligated to pay to SMBC on the originally scheduled expiration date of the letter of credit arrangements an amount equal to the early termination amounts minus the Losses that would have been reimbursed under the letters of credit had they not terminated early.

As noted above, the consummation of each of the above-described transactions was conditioned on the consummation of the other transactions. SMBC believes that the sale to Goldman Sachs of the GS Preferred Stock would not have been made in such amounts if SMBC had not entered into the credit loss protection arrangements.

### ***Business Co-operation***

As part of the agreements, SMBC and Goldman Sachs are seeking to further develop their business relationship in Japan. Specifically, they have entered into a business co-operation agreement that will afford Goldman Sachs certain rights with respect to asset sales of SMBC and its affiliates and debtors, SMBC’s Japan-related equity offerings, investment banking services for SMBC and its affiliates and customers, investments in merchant banking transactions in Japan and access to SMBC’s retail distribution network in Japan for investment trust products. The agreement will afford SMBC certain rights with respect to the provision of commercial banking services by SMBC in Japan to customers of Goldman Sachs and participation by SMBC as a syndicate lender in Goldman Sachs-led syndicated loans for Japan-related credits. Various of Goldman Sachs’ rights under this agreement are subject to priorities of affiliates of SMBC and are generally applicable only where practically possible, legally permissible and economically reasonable. The agreement will be effective for five years, with automatic one-year extensions occurring for up to an additional 15 years so long as Goldman Sachs holds at least 50 per cent. of the GS Preferred Stock initially issued (or common stock issued on conversion of the GS Preferred Stock). The agreement can be terminated by either party if Goldman Sachs does not hold at least 20 per cent. of the GS Preferred Stock initially issued (or common stock issued on conversion of the GS Preferred Stock).

### ***Regulatory Capital Considerations***

Under the regulatory capital guidelines in place in Japan, the GS Preferred Stock is considered Tier I capital. Under current regulatory capital guidelines in place in Japan, SMFG would apply standard, *i.e.* 8 per cent., capital requirements in respect of the FLC. It is possible that, under proposed international regulatory capital guidelines, SMFG would be required to hold 100 per cent. capital against the FLC. One half of this capital would be required to be held as Tier I capital, and one half as Tier II capital.

### **Recent Regulatory Developments**

Recently, the FSA, the Bank of Japan and other elements of the government of Japan have taken steps designed to restore confidence in the Japanese financial system, address the asset quality problems faced by many Japanese financial institutions, strengthen the capital base and improve governance of major Japanese banks and bring greater stability to the financial system. One of the goals announced in the FSA's Programme of October 2002 is the reduction of the aggregate ratio of non-performing loans to total outstanding loans of major Japanese banks by about half by March 31, 2005. The steps announced or taken by the government include the following:

#### ***Tightening of Assessment of Assets***

The FSA has announced that it will provide for more rigorous assessment of assets, as follows:

- Japanese GAAP previously allowed for the calculation of reserves to be based upon estimated discounted cash flows of loans to “borrowers requiring caution” and “potentially bankrupt borrowers”. However, in October 2002, the FSA required the calculation of reserves on loans to large borrowers classified as “substandard loans” to be based upon projected future recoveries discounted at the loan's original interest rate. Many major Japanese banks previously recorded loan loss reserves for such loans based on historical loan loss experience and the change may affect their loan loss reserve level. SMBC elected to calculate loan loss reserves for certain large substandard borrowers based on their estimated discounted cash flows;
- in January 2003, the FSA began to implement a mechanism to harmonise the major banks' classification of troubled large borrowers;
- debt for equity swaps are valued based upon the fair value of stock received in the swap regardless of the timing or ordering of the swap transaction;
- the FSA requires the use of independent real estate appraisers to appraise real estate held by banks as collateral in certain cases;
- the FSA conducted a further round of special inspections prior to March 31, 2003, in order to review banks' accounts, including those of SMBC. These special inspections were intended, among other things, to uncover deficiencies that may exist in the assessment of non-performing loans and related reserves by banks. The FSA conducted an inspection of a total of 167 borrowers across 11 major Japanese banks, including SMBC, resulting in the downgrade of 27 borrowers (compared to classification given by such banks as at September 2002) and the reclassification of 7 borrowers as “potentially bankrupt borrowers”; and
- the FSA established a special team to undertake the examination of corporate restructuring plans.

#### ***Improvement of Capital Ratios***

*Deferred Tax Assets.* Under Japanese banking regulations, all deferred tax assets recognised on the balance sheet pursuant to Japanese GAAP are included in regulatory capital. The FSA, noting that deferred tax assets, which are currently included in the calculation of Tier I capital, are “a less solid component of capital”, announced that:

- it has requested major banks to assess (and external auditors to audit) deferred tax assets on a more rigorous basis; and
- it had considered whether an upper limit should be imposed on the amount of deferred tax assets that may be included in regulatory capital.

*Request for Tax Law Changes.* In November 2002, the FSA requested the Japanese Ministry of Finance and Cabinet Office to consider tax law changes intended to improve the capital adequacy of financial institutions. These changes would:

- allow banks to deduct as losses the amount of additional loan loss reserves established as a result of borrowers being classified as “potentially bankrupt borrowers” or lower under Japanese banking laws or banks’ self assessments under the supervision and inspection of the FSA and the amount of losses recognised, for accounting purposes, in connection with a partial write-off of a loan;
- allow the “carry-back” of losses to obtain a refund of prior years’ taxes, which has been prohibited since April 1, 1992 and prior to that was limited to one year; and
- increase the number of years that operating losses can be “carried forward” and deducted against future income from the current limitation of five years.

These proposed changes are controversial, may be reviewed for an extended period of time and may not be adopted. These changes would require amendments to current tax laws and regulations.

### ***Improvement of Governance***

The FSA announced in October 2002, as part of the FSA’s Programme, that it will:

- review the standards and measures applicable in the prompt corrective action system, which allows the FSA to require financial institutions to establish a self-assessment programme to assess their capital base using capital adequacy ratios; and
- establish new methods to monitor indicators such as profitability and liquidity to try to detect problems at banks at an earlier stage than at present.

In December 2002, the FSA amended the guidelines for supervision pursuant to which banks that are subject to a prompt corrective action order are required to improve their capital adequacy ratio within one year.

In December 2002, a prompt warning system was introduced to enable the FSA to take precautionary measures in order to maintain and promote sound operations of financial institutions. See “Supervision and Regulation — Japan — Prompt Warning System”.

The FSA has also announced that it intends to:

- improve the guidelines for the conversion of preferred stock held by the Japanese government (through the Resolution and Collection Corporation) in financial institutions to common stock if it concludes that the relevant financial institution’s business condition has deteriorated significantly and government control would be appropriate; and
- issue administrative orders to financial institutions that submit business improvement plans (due to government ownership) but fail to achieve those business improvement plans.

In April 2003, the FSA published “Tightening application of supervisory actions and clarifying criteria to lower government-held preferred shares” for further clarification on the application of supervisory actions by the FSA. In relation to supervisory actions, the FSA announced that where a bank or bank holding company failed to improve its business again in the next fiscal year of business, the FSA would take action to require the retirement of the bank or bank holding company’s representative executive and staff with equivalent management responsibility, clarify the segregation of the official duties of each board member, review the bank or bank holding company’s salary system and suspend bonus payments made to board members.

In relation to the conversion of government-held preferred stock, the FSA announced that conversion will be considered in the event that no dividend payment, or practically no dividend, is made on the preferred stock for two successive years, in the event that the bank or bank holding company’s earning performance is considered to have declined, in the event that adequate improvements have not been realised in profits, or in the event that the bank is not able to achieve adequate improvements and there is no prospect of improvement in the bank or bank holding company’s capital adequacy ratios. In addition, the FSA will consider the conversion of government-held preferred stock in banks or bank holding companies that are considered to have suffered a substantial decline in confidence and require recovery measures to be undertaken.

### ***Government Support of Distressed Financial Institutions***

The FSA announced in October 2002, as part of the FSA's Programme, that if a financial institution falls into financial distress and has inadequate capital to carry on its business, or faces similar prospects, and if it becomes necessary to avoid the threat of financial crisis, the FSA will immediately implement a "special support" framework in co-operation with the Bank of Japan, and inject public funds pursuant to the Deposit Insurance Law and/or request the Bank of Japan to extend emergency loans.

The FSA will obtain significant powers over the management of a financial institution that receives "special support", including the ability:

- to appoint inspectors to attend board of directors meetings and executive committee meetings;
- to strongly urge management to clarify its responsibilities;
- to require such institution to divide its loan accounts into a "new account" and a "revival account" for the purposes of separately monitoring both the ongoing business and the historical loan portfolio; and
- to review business plans submitted to the FSA by those institutions that have received "special support". The "Task Force on Financial Issues" established within the FSA on December 27, 2002 advises troubled financial institutions as to whether their plans are appropriate and will also advise the FSA on appropriate courses of action if a financial institution is expected to remain unprofitable even after adopting management reforms.

If needed, the Japanese government will inject public funds pursuant to the current Deposit Insurance Law. In addition, the FSA established a working group to discuss a new legislative framework to allow the Japanese government to invest new public funds into financial institutions in order to maintain stability in the Japanese financial system.

In May 2003 the government of Japan responded to a request from Resona Bank for an injection of approximately ¥1.96 trillion of public funds into Resona Bank. See "Supervision and Regulation — Japan — Prompt Corrective Action and Self-Assessment".

### ***Improvement of Financial Services Agency Monitoring System***

*Monitoring Non-Performing Loan Issues.* The Task Force on Financial Issues will also monitor the status of a troubled bank's resolution of non-performing loan issues with the goal of resolving such issues by March 31, 2005.

*Protection of Small-and Medium-sized Enterprises.* The FSA has also issued policy directives designed to prevent any marked deterioration of the financing environment for small- and medium-sized enterprises in Japan. In particular, the FSA has announced that:

- it will expedite the approval of banking licences for new financial institutions targeting loans to small- and medium-sized enterprises;
- it has strengthened its monitoring system over financing to small- and medium-sized enterprises to prevent what the FSA describes as "unjustified 'credit withdrawal' and other actions taken by financial institutions";
- it has established "hotline" mechanisms to allow small- and medium-sized enterprises to report an unjustified withdrawal of credit by financial institutions; and
- if serious problems are identified based on these "hotline" reports or otherwise, the FSA has indicated that it will take appropriate administrative measures, including issuing administrative orders, requiring the relevant financial institution to submit reports and subjecting the relevant financial institution to additional inspections.

### ***Extension of Deposit Guarantee***

On December 11, 2002, the Deposit Insurance Law (and related laws) were amended. Prior to the amendment, guarantees of liquid deposits, such as ordinary deposits and current deposits, were set to be capped at ¥10 million per customer at any one financial institution, beginning April 1, 2003. Under the amended deposit insurance system, the Deposit Insurance Corporation will now guarantee in full all current deposits, ordinary deposits and other specified deposits until March 31, 2005. From April 1, 2005, all deposits will be subject to the

¥10 million cap, which is currently applicable only to time deposits, except for non-interest bearing deposits that are redeemable on demand and used by depositors primarily for payment and settlement functions.

### *New Framework for Corporate Revival*

*Resolution and Collection Corporation.* In accordance with a change in regulations that became effective on January 11, 2002, the Resolution and Collection Corporation (the “RCC”) has greater authority to purchase non-performing loans at the loans’ fair value. Previously, the RCC was required to consider the possibility of collection of principal and the expenses relating to the collection of principal or disposal of loan assets in determining the purchase price for loan assets. Under the new law, the RCC is able to purchase loan assets at a fair market value calculated on a reasonable basis. The FSA has also announced that the RCC will seek:

- to strengthen its corporate revival section;
- to play a role in facilitating the corporate restructuring of borrowers capable of business revival;
- to work with other government-affiliated financial institutions to foster a secondary market for loan assets in Japan; and
- to raise further financing and transfer a portion of its increasingly large loan portfolio through asset securitisations and/or the issuance of asset-backed securities.

*Bank of Japan to Acquire Shares from Banks.* On October 11, 2002, the Policy Board of the Bank of Japan issued guidelines for the Bank of Japan’s purchase of listed stocks from commercial banks whose aggregate value of stockholdings exceed their Tier I capital. The Bank of Japan’s guidelines, as amended, contemplate that:

- it will acquire up to ¥3 trillion of stock from commercial banks’ portfolios, at prevailing market prices;
- it will only purchase stocks that meet minimum liquidity and issuer credit quality standards and certain other requirements;
- purchases from a single bank will not exceed the lesser of ¥750 billion and the amount by which the market value of a bank’s stockholdings exceeds its Tier I capital;
- it will not acquire stock of any single issuer in excess of the lesser of 5.0 per cent. of that issuer’s voting shares and value-based purchase limits set by a matrix of annual trading volume and issuer credit quality; and
- it will not sell the acquired securities until after September 2007, although it may sell shares back to the issuer at the higher of market price or purchase price.

The Bank of Japan has adopted this policy for the purpose of assisting commercial banks in reducing the size of their share portfolios without materially adversely affecting prevailing market prices.

Seeking to comply with the legislation prohibiting banks from holding stocks with aggregate market values (less unrealised gains) in excess of their Tier I capital after September 30, 2004 (legislation to extend this deadline to September 30, 2006 is currently being deliberated by the Japanese parliament), SMBC completed sales of a significant amount of cross shareholdings during the year ended March 31, 2003. Together with the impairment of ¥526 billion and write-off of unrealised losses of ¥673 billion at the time of the merger between the Former-SMBC and Wakashio Bank, the balance of SMBC’s consolidated equity portfolio as at March 31, 2003 decreased to ¥3.4 trillion, from ¥5.5 trillion as at March 31, 2002. As at March 31, 2003, the market value of SMBC’s consolidated equity holding classified as other securities with market value was ¥3.0 trillion and SMBC’s consolidated Tier I capital was ¥3.1 trillion, as such, as at March 31, 2003, SMBC was not eligible for the direct purchase scheme operated by the Bank of Japan. As at March 31, 2003, SMBC had tentatively achieved the target set for September 2004 as SMBC’s equity holding is lower than its Tier I capital on an adjusted basis as defined under the legislation, however, due to possible fluctuations in the value of SMBC’s equity portfolio and the level of Tier 1 capital, there can be no assurance that such achievement will be maintained as at September 30, 2004 (or September 30, 2006 if the currently pending legislation is enacted). See “Investment Considerations — Risks Relating to SMBC — Market Risks Affecting SMBC’s Equity Portfolio Could Impair SMBC’s Financial Condition and Results of Operations”.

*Establishment of Industrial Revitalisation Corp.* As at April 10, 2003 the “Industrial Revitalisation Corporation Law” came into effect. The Industrial Revitalisation Corporation Law aims to establish an organisation named the Industrial Revitalisation Corp. that will purchase from financial institutions loans to borrowers that owe substantial debts where it is believed that such borrowers have viable business plans. The Industrial Revitalisation Corp. is expected to assist the borrower in reorganising its business and operations.

## BUSINESS

Sumitomo Mitsui Banking Corporation (*Kabushiki Kaisha Mitsui Sumitomo Ginko*) is a joint stock corporation with limited liability (*Kabushiki Kaisha*) under the laws of Japan. The registered head office of SMBC is located at 1-2, Yurakucho 1-chome, Chiyoda-ku, Tokyo, Japan.

SMBC is one of the world's leading commercial banks, with approximately ¥102.4 trillion in consolidated total assets as at March 31, 2003. SMBC provides an extensive range of wholesale and retail banking services in Japan and overseas to its customers. In Japan, SMBC accepts deposits, makes loans and extends guarantees to corporations, individuals, governments and governmental entities. SMBC also underwrites and deals in bonds issued by or under the guarantee of the Japanese government and local government authorities, and acts in various administrative and advisory capacities for certain types of corporate and government bonds. Internationally, SMBC operates through a network of branches, representative offices, subsidiaries and affiliates to provide syndicated lending, project finance and portfolio management services while participating in international securities markets.

Except as indicated, the information herein with respect to SMBC is presented on a consolidated basis. In addition, references to SMBC with regard to the period prior to the merger of March 17, 2003, refer principally to the operations, aims and achievements of the Former-SMBC. See "Note Regarding Financial Information".

### History

SMBC was formed on March 17, 2003 through the merger of the Former-SMBC with Wakashio Bank. The Former-SMBC had been formed on April 1, 2001 through the merger of Sakura Bank and Sumitomo Bank. Wakashio Bank was established in June 1996 as a subsidiary of Sakura Bank.

On January 17, 2003, Wakashio Bank became a subsidiary of SMFG in preparation for the merger. Prior to that date, Wakashio Bank had been a subsidiary of the Former-SMBC. Wakashio Bank was operating as an urban community bank with operations in the Tokyo metropolitan area, which focused on providing financial services to small businesses and individuals while maintaining low cost operations. Wakashio Bank was the surviving legal entity in the merger with the Former-SMBC and, following the merger with the Former-SMBC, changed its corporate name (in English) to "Sumitomo Mitsui Banking Corporation (SMBC)". As part of the merger with the Former-SMBC, Wakashio Bank mostly retained the management team and structure of the Former-SMBC.

SMBC is a wholly owned subsidiary of Sumitomo Mitsui Financial Group, Inc. SMFG was formed as the holding company for the SMFG group through a statutory share transfer (*kabushiki iten*) under the Commercial Code, on December 2, 2002 as a joint stock corporation with limited liability under the laws of Japan. See "Formation of a Holding Company Structure and Merger".

### Strategy

SMBC's strategic objective is to strengthen its position as a leading domestic and international financial group by:

- improving its profitability in consumer banking through a more focused customer segmentation, broadening its range of profitable products and services and achieving a lower cost structure;
- achieving a higher return on its assets in transactions with domestic and overseas corporate borrowers;
- initiating new international banking initiatives based on a more selective regional focus;
- investing strategically in information technology in order to strengthen its competitiveness in database marketing and providing network platforms to serve small and medium-sized corporate customers; and
- establishing a leading position in the provision of internet-related financial services.

SMBC will seek to improve its banking profit by:

- adjusting the terms and conditions of its financial products and services, such as the interest rates on wholesale loans, to improve its risk-return profile;
- expanding its more profitable businesses, such as home mortgage lending and the distribution of investment trust products to retail customers; and
- instituting cost-cutting measures, such as reducing occupancy, personnel and other expenses.

SMBC has also been replacing many of its retail branch offices with specialised distribution facilities, incorporating advanced technologies, providing new services to retail customers, such as telephone banking and Internet banking, and reorganising its middle market corporate lending branch offices into corporate business offices.

SMBC's strategy is affected by a number of dynamic environmental considerations. Notable among these are the weak domestic economy, continuing financial deregulation in Japan, increasing competition from domestic and foreign competitors, consolidation in domestic and international financial sectors and the increasing interdependence of national economies and financial markets. SMBC's strategy reflects its judgement about the most effective means of confronting the challenges posed and exploiting the opportunities afforded by these considerations, in light of a careful assessment of SMBC's strengths and weaknesses.

SMBC's financial strategy reflects the adverse economic circumstances currently confronting it. The continuing weakness of the domestic economy and continuing decline in real estate prices have adversely affected the quality of SMBC's loan portfolio, forcing SMBC to divest assets and restrict lending and investment in order to maintain capital adequacy. Declines in domestic equity prices have decreased the value of SMBC's portfolio of equity securities. SMBC also recognises the temporary nature of the positive impact on earnings produced by low domestic interest rates as well as its favourable position with regard to international interest rates and foreign currency rates.

In particular, SMBC has identified two action plans to be undertaken amid the difficult economic conditions currently prevailing in order to develop a strong operating and financial base for the SMBC Group. Firstly, the further acceleration of the reinforcement and strengthening of SMBC's balance sheet and secondly, the acceleration of the enhancement of profitability, including improvement of cost competitiveness.

#### ***Strengthening of the Balance Sheet***

During the year ended March 31, 2003, SMBC strengthened its balance sheet by reducing the financial risks associated with non-performing loans and stockholdings.

In particular, SMBC will continue "off-balancing" problem assets classified as doubtful assets or lower through measures such as asset sales and corporate revitalisation. In addition, SMBC intends to apply stricter policies for corporate borrowers in relation to substandard assets and intends to accelerate its initiative for the revitalisation of borrowers and work-outs, including outright sales, through the Asset Restructuring Unit.

In the year ended March 31, 2003, SMBC reduced the book value of its stockholdings substantially through write-offs of unrealised losses and impairment, and outright sales, and currently intends to further reduce stock price fluctuation risk. For the year ended March 31, 2003, SMBC reduced its equity portfolio around the level of SMBC's consolidated Tier I capital and plans to continue this disposal process during the current fiscal year.

#### ***Enhancing profitability***

In order to further enhance profitability, SMBC intends to take steps such as optimising the risk-return profile of its loan portfolio by increasing loan spreads, expanding credit-risk-taking in small and middle market banking and loan syndications in corporate banking and developing business models for consulting services in consumer banking.

On the cost side, SMBC currently aims to achieve an earlier realisation of targeted cost reduction by further streamlining the workforce, consolidating branches, integrating computer systems and other new initiatives. SMBC currently intends to reduce expenses to ¥600 billion on a non-consolidated basis by the year ending March 31, 2004, a year ahead of the original schedule for such reduction.

SMBC entered into a holding company structure to establish SMFG, pursuing the following two objectives:

- the creation of a corporate structure fully exploiting the strengths of the SMFG group by establishing group-wide corporate governance, management structure and management systems; and
- the reinforcement of the strategic business lines on a group-wide basis by redefining corporate strategy and improving the autonomy to the businesses, clarifying the responsibility and enhancing delegation, enhancing the incentive system and allocating resources aggressively.

#### **Operations**

SMBC conducts its primary banking business through the following business units: (i) the Consumer Banking Unit, (ii) the Middle Market Banking Unit, (iii) the Corporate Banking Unit, (iv) the International

Banking Unit, (v) the Treasury Unit, (vi) the Investment Banking Unit, (vii) the Asset Restructuring Unit and (viii) the Community Banking Unit. Following the establishment of SMFG, part of the operations of SMBC are now undertaken by companies that were formerly directly owned by SMBC but are now directly owned by SMFG. For example, SMBC Leasing, which provides leasing services to small and medium-size businesses, and Daiwa Securities SMBC, which provides investment banking services, were formerly a subsidiary and an affiliate of SMBC, respectively. These companies will continue to provide the same services but are now under the direct supervision of SMFG.

SMBC's domestic marketing operation is managed by the Consumer Banking Unit, the Middle Market Banking Unit and the Corporate Banking Unit and incorporates two types of domestic offices: (i) branch offices serving consumer clients and (ii) corporate business offices serving small and medium size corporate clients. Domestic operations are also carried out through the Community Banking Unit.

SMBC had a domestic network consisting of 437 branch offices, 100 sub-branches and 2 agencies as at March 31, 2003, most of which are located in the Tokyo and the Osaka regions of Japan and managed by the Consumer Banking Unit and the Community Banking Unit. In addition to providing full-service banking operations at many of its branches, SMBC also operates satellite offices that provide specialised services such as housing loans, which are also managed by the Consumer Banking Unit.

As at March 31, 2003 SMBC had 193 corporate business offices managed by the Middle Market Banking Unit.

SMBC's international network is managed by the International Banking Unit and the Investment Banking Unit and consisted of 20 branches, 3 sub-branches, 14 representative offices, 26 subsidiaries and 34 affiliates and associated companies as at March 31, 2003, creating a presence for SMBC in more than 25 countries.

### ***Consumer Banking Unit***

The Consumer Banking Unit offers various retail banking products and services including private banking, asset management and long-term asset building. SMBC considers that it is currently a leader among Japanese banks in terms of investment trust sales, outstanding volume of housing loans and the number of customer accounts. The Consumer Banking Unit's central theme is "*One's Next*", which means that it aims to assist customers in achieving the next level of their financial objectives according to their stage in life. This includes, for example, assisting customers in their long-term planning for retirement or for down payments to secure housing loans, managing their assets and providing housing loans and loans for education.

The operations of the Consumer Banking Unit are largely conducted through a large and well-developed branch network. SMBC has been working to streamline and strengthen this network by consolidating overlapping branches and transforming them from transaction centres to marketing bases. The transformation process requires a review of each branch's infrastructure, based on location and market size to determine the most suitable functions and physical layout. SMBC has also established call centres to provide customers with an additional access channel.

SMBC also operates an extensive network of automated teller machines (ATM) in Japan which allow its customers to conduct self-service banking transactions during extended hours. As at March 31, 2003, SMBC's ATM network included 7,096 full-service ATMs and cash dispensers, including 1,139 24-hour ATMs that are located in "am/pm" convenience stores through its alliance with am/pm Japan Co., Ltd. In addition, SMBC offers its customers ready access to 12,710 ATMs and cash dispensers through arrangements with other ATM providers (including convenience stores). SMBC also offers payment and settlement services for consumer customers that can be accessed through ATMs located in convenience stores as well as through the telephone and the Internet.

The Consumer Banking Unit also offers internet banking services through "*One's Direct*". As at March 31, 2003 "*One's Direct*" was one of the largest online services operated by a Japanese bank with approximately 3.3 million registered users. Users of "*One's Direct*" are able to transfer funds, perform balance inquiries and time deposits, and conduct foreign currency, deposit and investment trust transactions over the telephone, Internet or i-mode mobile phone service. In September 2000 SMBC established Japan Net Bank, Ltd. as the first Internet bank in Japan for retail customers. Through this continuously-available Internet outlet, SMBC offers relatively high interest rates on deposits and low service charges to its customers in comparison to other domestic providers.

The Consumer Banking Unit also offers the following products and services:

- *Investment trust products.* The Consumer Banking Unit provides a variety of investment trust products with varying degrees and types of risk/return profiles which are developed and managed by experienced

investment management companies within Japan and overseas. The Consumer Banking Unit generally focuses on the distribution, rather than the development, of investment trust products. The aggregate face amount of investment trust balances outstanding as at March 31, 2003 on a non-consolidated basis was approximately ¥1,676 billion.

- *Consumer finance products and services.* Through Sumitomo Mitsui Card (which is now a direct subsidiary of SMFG and is a charter member of VISA International) and Sakura Card Co., Ltd., SMBC offers personal credit services including the issuance of various credit cards, consumer loans and guarantees. As at March 31, 2003 Sumitomo Mitsui Card had approximately 12 million cardholders (with aggregate expenditures totalling approximately ¥3 trillion annually). SMBC also provides small, unsecured consumer loans to individuals under the brand name “@Loan” through a joint venture with Sanyo Shinpan Finance Co., Ltd., Nippon Life Insurance Company and am/pm Japan Co., Ltd.

### ***Middle Market Banking Unit***

The Middle Market Banking Unit focuses on building a “solution business” capable of rapidly addressing the diversified needs of small and medium-sized businesses. The Middle Market Banking Unit serves its customers by providing products and services involving traditional lending, cash management, settlement, leasing, factoring, management information systems consulting, collection and investment banking, some of which are offered in co-operation with Daiwa Securities SMBC.

The Middle Market Banking Unit also provides the following services to its small and medium-sized business customers:

- *Cash management services.* Through “*SMBC Perfect*”, a patented reconciliation support service, the Middle Market Banking Unit provided cash management services electronically to 3,222 companies as at March 31, 2003. SMBC also has 49 business support plazas to function as service locations exclusively for small and medium-sized businesses and sole proprietorships throughout Japan.
- *Business promotion services.* The Middle Market Banking Unit, through its Business Promotion Department, focuses on customers in growth industries such as the semiconductor, biotechnology, information technology, environmental services and health care industries. The Business Promotion Department analyses and evaluates a customer’s technologies, marketability and growth prospects and introduces it to appropriate capital sources, such as the new business support fund which is an unsecured financing system. SMBC’s subsidiary, SMBC Capital Co., Ltd, also assists companies in the start-up stages with their capital requirements. SMBC Leasing, which is now a direct subsidiary of SMFG, provides small and medium-size businesses with leasing services. The Business Promotion Department also advises on initial public offerings and on the implementation of capital strategies.
- *Restructuring advisory services.* In October 2001, the Business Reengineering Department was formed within the Business Promotion Department to provide assistance to small and medium-sized business customers restructuring their business.
- *Lending.* The Middle Market Banking Unit offers unsecured loans through “*Business Select Loan*” at its business support plazas. SMBC initiated loans to a total amount of ¥455.3 billion during the year ended March 31, 2003. SMBC plans to continue to increase its lending to small and medium-sized companies using a lending strategy that involves increasing the spread on its loans over time to achieve a more appropriate risk-adjusted return on its corporate loan portfolio. SMBC is currently implementing revised lending practices that include modified terms and conditions of its loans as well as the adjustment of interest rates to better reflect the risk profile of borrowers, and is strengthening its capacity to strategically take more credit risk. In addition, SMBC has strengthened areas such as credit analysis, loan applications procedures (including the standardisation of check lists), cash flows analysis for loan applications and prescribing the use of loans.

The Middle Market Banking Unit also offers an internet-based product, “*SMBC Financial Link*”, to provide various products and services of SMBC and group companies in a single package. These products and services include settlement services, the extension of credit, authorisation services and bill collection services. Customers can also use “*Value Door*”, a product that allows customers using a personal computer to access services of SMBC’s subsidiaries and affiliates that meet their needs. SMBC has promoted “*Value Door*” as a flagship product to stimulate greater demand for SMBC’s “solution business” for small and medium-sized enterprises. The “*Value Door*” website was inaugurated in May 2001 and had approximately 43,300 corporate users as at June 30, 2003.

### ***Corporate Banking Unit***

The Corporate Banking Unit's primary mission is to function as a reliable source of sophisticated solutions for Japan's large corporations. The Corporate Banking Unit provides a full range of banking services to these clients including syndicated loans, credit line commitments and non-recourse loans. With respect to its large corporate customers, SMBC has focused its lending activities on Japan based customers while providing other fee-based services, such as cash management services, to its Japanese customers operating overseas. SMBC intends to promote the use of the capital markets for a greater proportion of these customers' funding and corporate restructuring needs, particularly through the involvement of Daiwa Securities SMBC.

### ***International Banking Unit***

The International Banking Unit assists Japanese corporate customers to develop in overseas markets and multinational companies to succeed in Japan. The International Banking Unit maintains a strong branch network in the Asian region as well as in the Americas and Europe, and leverages SMBC's strong relationships with major Japanese corporations. The International Banking Unit offers a variety of services and products, such as non-recourse syndicate financing, securitisation arrangements, global cash management systems and yen custody services, to its global clients.

### ***Treasury Unit***

The Treasury Unit operates in the domestic and international money, foreign exchange, securities and derivatives markets to serve the needs of SMBC's customers and SMBC's own asset liability management requirements, while maintaining market and liquidity risks at appropriate levels. To further expand SMBC's customer base and to respond to its customers' increasingly diverse and complex needs, SMBC has a Treasury Marketing Department to enhance the Treasury Unit's sales capabilities by providing a single department to specialise in customer transactions involving marketable products.

The Treasury Unit also offers the following services:

- *Government bond underwriting.* Through the Treasury Unit SMBC acts as an underwriter in Japan for national government bonds, government-guaranteed bonds and local government bonds.
- *Commercial paper placement.* Through the Treasury Unit SMBC acts as a placement agent for commercial paper programmes for qualified corporate issuers.

### ***Investment Banking Unit***

The Investment Banking Unit provides a broad range of sophisticated financial products and services in connection with capital markets financings, management buyouts, real estate and lease financing, asset securitisations and asset management and other services. The Investment Banking Unit accesses customers needs and offers its products and services through the Middle Market Banking Unit, the Corporate Banking Unit and the International Banking Unit.

The Investment Banking Unit also offers the following products and services:

- *Asset management.* SMBC's asset management services are provided through Daiwa SB Investments and Sumitomo Mitsui Asset Management Company Limited. SMBC has been cooperating with these companies to develop and offer investment trust products and manage customer funds. As at March 31, 2003 these companies together had ¥14.1 trillion in assets under management.
- *Pensions.* In response to the introduction of "defined contribution" pension plans in Japan in October 2001, the Investment Banking Unit offers consulting, plan management services and employee investment education related to this new pension system through Japan Pension Navigator Co., Ltd. Established in September 2000, Japan Pension Navigator Co., Ltd. is capitalised by SMBC and five other financial services companies belonging to the Sumitomo group and the Mitsui group.
- *Corporate bond trust services.* SMBC serves as a trustee or co-trustee of corporate mortgage bonds and corporate general mortgage bonds. SMBC also serves as a commissioned company for bondholders and as a registrar, paying and fiscal agent for unsecured public bond offerings by domestic and foreign customers. In this role, SMBC advises the issuer of market conditions and undertakes certain procedural matters on behalf of the issuer.
- *Asset securitisation trust services.* From October 2002, SMBC began offering new trust services to its customers, including monetary claims trusts for asset securitisations.

### ***Asset Restructuring Unit***

The Asset Restructuring Unit was established on December 2, 2002 for a temporary three-year period to aid SMBC's corporate customers in revitalising their operations and restructuring their finances. SMBC expects this realignment of customers' finances to accelerate improvements in the quality of SMBC's loan portfolio in advance of the implementation of the new Basle Accord. On establishment the following departments were transferred from other business units and integrated into the Asset Restructuring Unit: the Credit Administration Department (transferred from the Corporate Service Unit), the Credit Supervision Departments I and II (transferred from the Middle Market Banking Unit) and the Credit Departments II and III (transferred from the Corporate Banking Unit). In addition, the Asset Restructuring Unit incorporates a Planning Department that is staffed by specialists who provide advice to corporate customers with respect to restructuring such as through securitisations, debt for equity swaps, management buyouts, leveraged buyouts, mergers, corporate splits, debtor-in-possession financing and bulk sales, as well as legal and accounting professionals.

### ***Community Banking Unit***

The Community Banking Unit is responsible for the operations that, prior to the merger with the Former-SMBC, were originally undertaken by Wakashio Bank. The Community Banking Unit succeeded to the branch network established by Wakashio Bank and will address the significant challenges of enhancing business for small and medium-sized enterprises and individuals through the combination of the Community Banking Unit's knowledge and the capabilities of SMBC for providing sophisticated financial services.

### ***Other Business Activities***

In addition to the activities of the business units described above, SMBC also engages in the following business activities:

- *Payment services.* SMBC handles money remittances for municipalities, public and private corporations and individuals both within Japan and overseas. Domestic remittance services are significant in Japan where checks are rarely used and money remittance is a major means of payment. SMBC also handles the presentation and collection for its customers of promissory notes, bills of exchange and checks.
- *Foreign exchange.* SMBC engages in a variety of foreign exchange transactions for its clients and for its own account, including foreign currency exchange, overseas transfers and trade finance for export and import activities.

### ***Other Business Activities through Subsidiaries and Joint Ventures***

SMBC conducts some of its operations through subsidiaries and joint ventures of both SMBC and SMFG. SMBC may need to provide capital and funding to these companies in the future. Many of SMBC's subsidiaries and joint ventures involve the contribution of significant equity capital and, in the case of the wholesale securities joint venture, the provision by SMBC of credit support to the joint venture to the extent necessary to enable the joint venture to fully participate in the derivatives markets. In addition, the wholesale securities joint venture agreements relating to Daiwa Securities SMBC provide that SMFG and Daiwa Securities will make such additional equity capital contributions through 2004 in proportion to their respective shareholdings as may be necessary to avoid the imposition of any restrictions on its businesses as a result of insufficient legal or regulatory capital.

SMBC is party to an alliance with the Mitsui and Sumitomo group insurance companies (Mitsui Mutual Life Insurance Company ("Mitsui Life"), Sumitomo Life Insurance Company ("Sumitomo Life"), and Mitsui Sumitomo Insurance Company, Limited ("Mitsui Sumitomo Insurance")) to bolster its insurance operations. It is intended that the alliance will include the following five specific areas of co-operation:

- mutual sharing of distribution channels among the Mitsui and Sumitomo group insurance companies;
- conducting joint research and development activities with Mitsui and Sumitomo group insurance companies relating to hybrid products that combine insurance and financial products;
- reorganising the asset management businesses of the alliance members;
- transferring the operations of Mitsui Life's non-life insurance subsidiary to Mitsui Sumitomo Insurance; and
- expanding the exchange of personnel among the alliance partners.

On December 1, 2002, SMBC, Mitsui Life, Sumitomo Life and Mitsui Sumitomo Insurance merged their five asset management subsidiaries to form Sumitomo Mitsui Asset Management Company, Limited, in which they hold 17.5 per cent., 30.0 per cent., 35.0 per cent. and 17.5 per cent., respectively. As at March 31, 2003, the new company had approximately ¥11.6 trillion in total assets under management. A committee to steer the alliance, made up of senior managing directors, managing directors and officers of a similar rank at the alliance partners, is in place to assure that actions are taken as quickly and effectively as possible to fulfil the objectives of the alliance.

### Revenues by Region

For the year ended March 31, 2003, 84 per cent. of SMBC's ordinary income was derived from Japan based operations, while the remaining 16 per cent. of SMBC's ordinary income was principally derived from operations based in Europe, the Americas and Asia (excluding Japan). For the year ended March 31, 2002, SMBC's ordinary income derived from operations based in Japan amounted to 74 per cent. with approximately 26 per cent. being derived from overseas operations.

### Funding

SMBC derives funding for its operations from a variety of domestic and international sources. SMBC's domestic funding is primarily derived from retail deposits placed with SMBC by its corporate and individual customers, but also from call money (interbank), bills sold (interbank promissory notes) and negotiable certificates of deposit issued by SMBC to its domestic and international customers. SMBC's principal international sources of funds are inter-bank deposits, funds raised in the international capital markets and loan financing. In addition, positive cash flows generated by SMBC's operations provide a steady source of additional funding. SMBC closely monitors maturity gaps and foreign exchange exposure with a view towards managing its risk profile.

The following table illustrates the composition of SMBC's funding (interest-bearing liabilities) by average balances and related interest and average interest rates as at March 31, 2002 and 2003. Average balances are based on a daily average.

|                                       | Year ended March 31,                  |          |                 |                    |          |                 |

SMBC reduced the interest rates it paid on deposits from 0.54 per cent. during the year ended March 31, 2002 to 0.24 per cent. during the year ended March 31, 2003. This was mainly due to a decline in the average interest rate on domestic deposits from 0.23 per cent. to 0.11 per cent. year over year, reflecting the current low market rates and the maturity of high-interest time deposits established in the past.

## Deposits

A complete range of standard banking accounts, including current deposits, ordinary deposits, savings deposits, deposits on notice, time deposits and negotiable certificates of deposit are offered through SMBC's branches in Japan and are the principal source of funding for SMBC's domestic operations. SMBC's domestic deposits are principally from private individuals and corporations with the balance coming from government bodies (including municipal authorities) and financial institutions. SMBC's total amount of domestic yen deposits of ¥64,436 billion was one of the largest among Japanese city banks as at March 31, 2003. Domestic deposits in currencies other than yen are not material.

SMBC's overseas branches accept deposits mainly in U.S. dollars but also in yen and other foreign currencies and are active participants in the Euro-currency market as well as the United States domestic money market. In addition, the New York, Singapore and Hong Kong branches of SMBC and Sumitomo Mitsui Banking Corporation Europe Limited, a subsidiary of SMBC, regularly issue U.S. dollar certificates of deposit. Sumitomo Mitsui Banking Corporation Europe Limited and other overseas branches of SMBC also issues certificates of deposit denominated in U.S. dollars and in other currencies. At March 31, 2003, overseas deposits amounted to ¥3,450 billion, representing approximately 5.1 per cent. of total deposits.

The following tables show a breakdown of domestic and international deposits of SMBC as at the dates indicated:

|  | As at March 31,    |                    |
|--|--------------------|--------------------|
|  | 2002               | 2003               |
| (millions of yen)                        |                    |                    |
| <b>Domestic Deposits</b>                 |                    |                    |
| Liquid deposits .....                    | ¥32,824,002        | ¥34,812,728        |
| Time deposits .....                      | 22,837,970         | 20,588,487         |
| Other deposits .....                     | 4,099,619          | 4,258,026          |
| Subtotal .....                           | 59,761,592         | 59,659,242         |
| Negotiable certificates of deposit ..... | 6,283,136          | 4,776,264          |
| Total domestic deposits .....            | <u>¥66,044,728</u> | <u>¥64,435,507</u> |
| <b>Overseas Deposits</b>                 |                    |                    |
| Liquid deposits .....                    | ¥ 4,579,035        | ¥ 2,733,493        |
| Time deposits .....                      | 634,673            | 593,179            |
| Other deposits .....                     | 10,674             | 10,089             |
| Subtotal .....                           | 5,224,383          | 3,336,761          |
| Negotiable certificates of deposit ..... | 378,960            | 112,753            |
| Total overseas deposits .....            | <u>¥ 5,603,344</u> | <u>¥ 3,449,515</u> |

For the year ended March 31, 2003, total domestic deposits decreased mainly due to the decrease in negotiable certificates of deposit reflecting the decrease in funding needs. Domestic deposits, excluding negotiable certificates of deposit, slightly decreased by ¥102,350 million (0.2%) due to the increase in domestic liquid deposits and the decrease in domestic time deposits.

Changes in the level of international deposits were primarily the result of changes in the level of interbank deposits, reflecting a decrease in SMBC's funding needs due to a decrease in assets. In addition, the reduction of assets reflects SMBC's policy to improve its capital adequacy ratios. As a result of reduction in assets for international business operations, SMBC needs less international funding and consequently the aggregate amount of its international deposits has also declined.

The majority of domestic deposits with SMBC are liquid deposits in yen. Such deposits pay interest at rates established by SMBC and based principally on prevailing market rates. Most overseas deposits with SMBC are inter-bank deposits at notice denominated in dollars or other foreign currencies. Such deposits typically pay interest at rates determined by reference to market rates for deposits in London with major money-centre banks.

The following tables set forth the composition of SMBC's time deposits by types and maturity (on a non-consolidated basis) as at the dates indicated:

|  | Maturity as at March 31, 2003 |  |  |                                       |  |                         | Total              |

| Total time deposits .....                                    | <u>¥9,331,860</u>             | <u>¥2,391,469</u>                          | <u>¥3,964,513</u>                      | <u>¥1,397,409</u>                     | <u>¥1,320,298</u>                        | <u>¥545,563</u>         | <u>¥18,951,114</u> |

(1) For purposes of this table, time deposits outstanding do not include instalment time deposits, which have no stated maturity.

(2) Includes off-shore account deposits.

### ***Euro Medium Term Note Programmes***

SMBC has a Euro Medium Term Note Programme which permits SMBC and certain of its subsidiaries to have outstanding not more than ¥1 trillion aggregate nominal amount of notes at any given time. The Euro Medium Term Note Programme allows for the issuance of senior and subordinated notes. SMBC also succeeded Sakura Bank to two Euro Medium Term Note Programmes which permit certain of its subsidiaries to issue subordinated notes (although no new issues of notes through such subsidiaries are made under these former Sakura Bank programmes). As at March 31, 2003, there were ¥961.2 billion aggregate nominal amount of notes outstanding under these three programmes, of which ¥186.2 billion were senior notes, ¥604.5 billion were dated subordinated notes and ¥170.5 billion were perpetual subordinated debt.

### ***Public Funding***

As part of a government-funded bank recapitalisation programme designed to strengthen Japan's financial system, on March 31, 1999 Sumitomo Bank issued ¥501 billion of preferred stock and on March 31, 1999 Sakura Bank issued ¥800 billion of preferred stock to RCC, an entity established pursuant to the Law Concerning Emergency Measures for Early Strengthening of Functions of the Financial System. The preferred stock issued by Sumitomo Bank were issued at a price of ¥3,000 per share (¥1,500 of which was accounted for as stated capital). The preferred stock issued by Sakura Bank were issued at a price of ¥1,000 per share (¥500 of which was accounted for as stated capital). In the process of establishing SMFG through a statutory share transfer (*kabushiki iten*) which took effect as of December 2, 2002, these preferred stocks were transferred from RCC to SMFG in exchange for preferred stocks of SMFG (Type 1, Type 2 and Type 3) newly issued with effectively the same terms and conditions as those of the corresponding preferred stocks of the Former-SMBC held by RCC. ¥201 billion of the preferred stock (Type 1) are convertible into common stock of SMFG at any time from December 2, 2002 until February 26, 2009, ¥300 billion of the preferred stock (Type 2) are convertible into common stock of SMFG at any time from August 1, 2005 until February 26, 2009, and ¥800 billion of the preferred stock (Type 3) are convertible into common stock of SMFG at any time from December 2, 2002 until September 30, 2009, in each case subject to certain adjustments to the conversion period.

As a condition to the application for these public funds, Sakura Bank and Sumitomo Bank were required to submit rationalisation plans to the Financial Reconstruction Commission (the "FRC") (integrated into the FSA as of January 2001) in March 1999. These plans are updated in semiannual reports to the FSA, as required by Article 5.4 of the Financial Function Early Strengthening Law, which state the progress achieved toward the goals of the rationalisation plans. On April 4, 2003, the FSA announced its decision to tighten the application of supervisory action and clarify the criteria governing the conversion of government-held preferred stock in order to improve corporate governance of those banks and bank holding companies that have received public funds (including SMFG). Where a bank or bank holding company's earning conditions worsen, firstly, the FSA will take supervisory actions which include requiring reports to be submitted by a bank or bank holding company and taking business improvement administrative orders under the Banking Law. Where such bank and bank holding company becomes significantly undercapitalised, the FSA will consider converting preferred stock. See "Recent Events — Recent Regulatory Developments — Improvement of Governance".

### ***Other Sources of Funding***

SMBC's additional sources of funding include call loans and other interbank funding arrangements (other than inter-bank deposits), repurchase agreements using JGBs, both senior and subordinated loans from institutional investors on a worldwide basis and other sources.

SMBC also has access to funding through loans by the Bank of Japan. Borrowings from the Bank of Japan require SMBC to pledge collateral consisting of JGBs and certain other qualifying collateral.

SMBC's need for money market funding decreased substantially as a result of its increased deposits. Additionally, SMBC's loan originations decreased due to weak loan demand which further reduced SMBC's demand for money market funds.

## Assets

The following table shows SMBC's interest-earning assets according to average balances and related interest and average interest rates for the years ended March 31, 2002 and 2003. Average asset balances are based on a daily average.

|  | Year ended March 31,                  |                   |                 |                    |                   |                 |

## Loans

### General

SMBC's principal investing activity is its lending business. SMBC makes loans and extends other types of credit principally to corporate and individual customers in Japan, and to corporate and sovereign customers abroad.

The following tables set forth the composition of SMBC's loans and bills discounted by type of interest rate charged and maturity (on a non-consolidated basis) as at the dates indicated:

|                         | Maturity as at March 31, 2003 |                                   |                                     |                                     |                    |                   | Total              |
|-------------------------|-------------------------------|-----------------------------------|-------------------------------------|-------------------------------------|--------------------|-------------------|--------------------|
|                         | One Year or Less              | More than One Year to Three Years | More than Three Years to Five Years | More than Five Years to Seven Years | Over Seven Years   | Unspecified Term  |                    |
|                         | (millions of yen)             |                                   |                                     |                                     |                    |                   |                    |
| <b>Non-consolidated</b> |                               |                                   |                                     |                                     |                    |                   |                    |
| Floating interest rate  | ¥ —                           | ¥6,347,133                        | ¥3,973,971                          | ¥1,683,355                          | ¥14,629,478        | ¥8,399,298        | ¥ —                |
| Fixed interest rate     | —                             | 3,053,547                         | 1,902,314                           | 819,382                             | 863,046            | 5,084             | —                  |
| Total                   | <u>¥15,605,752</u>            | <u>¥9,400,680</u>                 | <u>¥5,876,286</u>                   | <u>¥2,502,737</u>                   | <u>¥15,492,524</u> | <u>¥8,404,383</u> | <u>¥57,282,365</u> |

As at March 31, 2003, ¥33,252 billion, or 58.0 per cent., of SMBC's loan portfolio consisted of secured or guaranteed loans. SMBC usually takes real estate collateral on its domestic corporate loans. SMBC extends collateralised housing loans and unsecured consumer finance loans to its retail customers. SMBC's housing loans are usually guaranteed by SMBC Guarantee Co. Ltd. ("SMBC Guarantee"), its guarantee subsidiary.

The following table sets forth SMBC's loans outstanding (including bills discounted) classified by class of collateral (on a non-consolidated basis) as at the dates indicated:

| Class of collateral:      | As at March 31,                       |                |                    |                |
|---------------------------|---------------------------------------|----------------|--------------------|----------------|

| Total                     | <u>¥59,928,368</u>                    | <u>100.00%</u> | <u>¥57,282,365</u> | <u>100.00%</u> |

(1) Including housing loans guaranteed by SMBC Guarantee. These are not categorised as guaranteed loans in SMBC's consolidated financial statements.

SMBC is subject to lending limits under the Banking Law. See "Supervision and Regulation — Japan — The Financial Services Agency — Credit Limit".

### Domestic Lending

SMBC makes loans to, and discounts bills of, a broad range of industrial, commercial and individual customers in Japan. SMBC's domestic lending business consists principally of the extension of small loans to individuals and small- and medium-sized enterprises. As at March 31, 2003, 23.7 per cent. of SMBC's domestic loans and bills discounted were to individuals, 48.7 per cent. were to small and medium-sized enterprises which are defined as companies with a capital stock of ¥300 million or less, or with less than 300 employees, subject to certain exceptions applicable to specific industries, and 27.6 per cent. were to large corporations. However, SMBC also has substantial lending relationships with larger businesses, including many of the leading companies of Japan.

The following tables show the outstanding loans (including bills discounted) of SMBC's domestic offices, before deduction of reserves for possible loan losses, as at the dates indicated. Classification of loans by industry is based on industry segment loan classifications as defined by the Bank of Japan for regulatory reporting purposes and is not necessarily based on use of loan proceeds.

|  | As at March 31,                       |                |                    |                |

| Total . . . . .  | <u>¥57,774,965</u>                    | <u>100.00%</u> | <u>¥56,569,948</u> | <u>100.00%</u> |

(1) The above figures exclude Tokyo offshore accounts for international financial transactions. The "Japan Standard Industrial Classification" was revised by a public notice No. 139 from the Ministry of Public Management, Home Affairs, Posts and Telecommunications, which was released on March 7, 2002 and took effect on October 1, 2002. Consequently, loans and bills discounted, classified by industry regarding "domestic offices excluding offshore banking accounts" before March 31, 2002 are based on the "Japan Standard Industrial Classification" before this revision, and those as of March 31, 2003 are based on "Japan Standard Industrial Classification" after this revision.

As part of its business operations, SMBC regularly lends funds to individuals and small and medium-sized enterprises.

The following tables show a breakdown of SMBC's domestic loan portfolio by type of borrower (on a non-consolidated basis) as at the dates indicated:

|  | As at March 31,                       |               |                  |               |
|--|---------------------------------------|---------------|------------------|---------------|
|  | 2002                                  |               | 2003             |               |
|  | (billions of yen, except percentages) |               |                  |               |
| <b><u>Non-consolidated</u></b>               |                                       |               |                  |               |
| Individuals . . . . .                        | ¥12,493.0                             | 22.9%         | ¥12,775.2        | 23.7%         |
| Small and medium-sized enterprises . . . . . | 26,287.3                              | 48.3          | 26,225.0         | 48.7          |
| Large corporations <sup>(1)</sup> . . . . .  | <u>15,709.1</u>                       | <u>28.8</u>   | <u>14,878.7</u>  | <u>27.6</u>   |
| Total . . . . .                              | <u>¥54,489.4</u>                      | <u>100.0%</u> | <u>¥53,878.9</u> | <u>100.0%</u> |

(1) Includes medium-sized enterprises with a capital stock of more than ¥300 million or with more than 300 employees.

SMBC is expanding its lending to individuals in Japan while simultaneously attempting to manage its risk/return profile. The outstanding balance at March 31, 2003 of SMBC's loans to individuals (almost all of them in Japan) was ¥12,775.2 billion. Most of SMBC's outstanding loans to individuals at March 31, 2003 consisted of housing-related loans.

The aggregate amount of loans to small and medium-sized enterprises reflected in SMBC's accounts remained stable to the year ended March 31, 2003. However, SMBC's long-term strategy includes increased lending to small and medium-sized enterprises. As a prerequisite to its receipt of public funding in 1999, SMBC submitted its rationalisation plan to the Japanese government, in which SMBC stated its intention to increase its lending to small-sized companies. Due to the weak economic conditions, SMBC has faced significant difficulties in expanding such loans. The FSA is reviewing SMBC's performance under its rationalisation plan and may require SMBC to prepare an action plan to increase its lending to small companies.

Housing loans to individuals are generated through SMBC's branch network. Consumer loans to individuals are provided by SMBC and its subsidiaries and affiliates, including its At-Loan Co., Ltd. subsidiary which operates its own distribution network principally through the am/pm convenience stores. Loans to small and medium-sized enterprises are generated through the Middle Market Banking Unit, which operates SMBC's corporate business offices. Loans to large corporations are generated by the Corporate Banking Unit. In the Corporate Banking Unit, individual account managers work with SMBC's corporate customers. Loans originated by corporate business offices can be approved by the general manager of SMBC's Corporate Banking Department up to a limit which varies depending upon the amount and duration of the loan, the type and amount of collateral and other factors. Loans above this limit require approval from either of SMBC's head offices in Tokyo or Osaka, and such head office approval entails review by two departments. Industry analysts in the Corporate Research Department review the market position and the industry characteristics of corporate customers, and evaluate (among other things) the strength of management, assets, financial performance, prospects and risks of such customers. In addition, SMBC uses a sophisticated tool, the Obligor Grading Model, to evaluate credit applications. Credit analysts within the Credit Department evaluate specific extensions of credit, analysing, among other things, the adequacy of collateral or other credit support, use of proceeds, leverage and interest and cash flow coverage. Larger loans require the approval of one or more directors of SMBC. SMBC also has a Credit Review Department to oversee the credit risk management system.

The majority of SMBC's domestic loans are secured by collateral or are supported by guarantees. Most domestic secured loans consist of loans to businesses secured by first liens on real estate collateral or housing loans to individuals guaranteed by SMBC Guarantee. Such guarantees are secured by first liens on apartments or houses. Real estate collateral is generally valued based on asset values rather than cash flow. In principal, real estate collateral is valued by an appraisal firm affiliated with SMBC. Most of the appraisal is valued based upon participation of licensed appraisers.

SMBC, like other banks in Japan, makes most domestic loans based on a short-term interest rate, the Tokyo Inter-Bank Offered Rate ("TIBOR") and a long-term prime rate, which are generally intended to reflect the cost of funds.

Most domestic short-term loans (being loans with a maturity of less than one year) made by SMBC bear interest at a rate based on a short-term interest rate or TIBOR. SMBC establishes a short-term rate based principally on its cost of short-term yen funding. SMBC's short-term prime rate is affected by changes in the Bank of Japan's official discount rate, the rate at which the Bank of Japan extends short-term secured loans to domestic banks.

Most domestic long-term loans (being loans with a maturity of one year or more) made by SMBC bear interest at a rate based on SMBC's new basis long-term prime rate, which is based on the short-term prime rate reflecting the fact that most of SMBC's funding is short-term. The old basis long-term prime rate is set at a rate equal to 90 basis points above the 5-year debenture rate of long-term credit banks. Currently, only a limited number of loans are based on the old basis long-term prime rate.

Unsecured loans in the domestic interbank market are mostly overnight loans priced at call market rates. Call market rates are negotiated rates based on the availability of, and the need for funds by Japanese banks.

Despite the relaxed monetary policy of the Bank of Japan after the "bubble" era, prime rates in Japan have been relatively stable since the year ended March 31, 2000. This is mainly because short-term interest rates, such as the six-month TIBOR, have declined to nearly zero and the prime rates, which will be adjusted according to the change in short-term interest rates, have little room for further decline.

The following table sets forth SMBC's short-term, long-term prime rate (old basis and new basis), five-year swap rate and six-month TIBOR as at the dates indicated:

|  | <u>As at March 31,</u> |             |
|--|------------------------|-------------|
|  | <u>2002</u>            | <u>2003</u> |
| Short-term prime rate . . . . .            | 1.375%                 | 1.375%      |
| Long-term prime rate (new basis) . . . . . | 1.875                  | 1.875       |
| Long-term prime rate (old basis) . . . . . | 2.300                  | 1.500       |
| Five-year swap rate . . . . .              | 0.58                   | 0.27        |
| Six-month TIBOR . . . . .                  | 0.12                   | 0.07        |

## Overseas Lending

SMBC's overseas branches and representative offices originate corporate, sovereign and quasi-sovereign loans. Most of these loans are unsecured and are denominated in currencies other than Japanese yen. While most of SMBC's international loans are to foreign credits, a significant portion of SMBC's international loans are to overseas branches, subsidiaries and affiliates of Japanese corporations, and many of such loans to such subsidiaries and affiliates are guaranteed or otherwise supported by the Japanese parent corporations.

Loans originated by a branch or representative office can be approved by the general manager up to a limit which varies depending upon the rank of the general manager and other factors. Loans above this limit require approval from regional headquarters or SMBC's head office in Tokyo. The roles of the Corporate Research Department and the International Credit Department are credit grading and credit supervision, respectively. Larger international loans require the approval of one or more directors of SMBC.

The overseas business of SMBC has been principally focused on lending to large, highly-rated corporations as well as to sovereign and quasi-sovereign credits. The following tables show the outstanding loans (including bills discounted) of SMBC's overseas offices, before deduction of reserves for possible loan losses, as at the dates indicated, classified according to type of borrower:

|                                   | As at March 31,                       |                |                   |                |
|-----------------------------------|---------------------------------------|----------------|-------------------|----------------|
|                                   | 2002                                  |                | 2003              |                |
|                                   | (millions of yen, except percentages) |                |                   |                |
| Overseas Offices <sup>(1)</sup> : |                                       |                |                   |                |
| Public sector .....               | ¥ 183,344                             | 3.12%          | ¥ 141,742         | 3.05%          |
| Financial institutions .....      | 355,561                               | 6.06           | 314,695           | 6.77           |
| Commerce and industry .....       | 5,119,312                             | 87.20          | 3,912,861         | 84.15          |
| Other .....                       | <u>212,401</u>                        | <u>3.62</u>    | <u>280,369</u>    | <u>6.03</u>    |
| Total .....                       | <u>¥5,870,621</u>                     | <u>100.00%</u> | <u>¥4,649,668</u> | <u>100.00%</u> |

(1) The above figures include Tokyo offshore accounts for international finance transactions.

Because most of SMBC's overseas loans are general-purpose credits to highly rated corporate, sovereign and quasi-sovereign credits, most of them are not secured by collateral. However, SMBC makes substantial secured loans overseas, including for project finance, equipment financing and margin lending for securities and commodities. SMBC's overseas loans are generally extended at floating rates based on the London Interbank Offered Rate ("LIBOR"). Spreads on such loans are negotiated with customers and reflect competition with other domestic and international banks as well as alternative funding sources available to customers.

Loans made by SMBC to customers outside Japan in highly leveraged corporate transactions (loans made in connection with recapitalisations, acquisition transactions or other corporate restructurings to customers whose debt to total asset ratio will exceed 75 per cent. or 50 per cent. under certain circumstances), except with respect to loans to customers located in Indonesia (discussed below), are not material relative to SMBC's total assets at March 31, 2003. SMBC intends to continue to participate in such loans to the extent that credit risks are deemed prudent and a satisfactory level of return is offered, although SMBC expects that the portion of SMBC's loan portfolio attributable to such loans will not materially increase.

## Loan Losses and Non-Performing Loans

### General

SMBC has experienced substantial loan losses in recent years. SMBC's financial results reflect actual loan losses as well as transfers to reserves for possible loan losses.

SMBC reviews its loans in the following ways. First, SMBC conducts semiannual self-assessments to calculate appropriate write-offs and reserves by classifying borrowers according to their financial soundness. Second, SMBC categorises the non-performing loans pursuant to, and provides disclosure under, the Law Concerning Emergency Measures for Financial Function Reconstruction Law (Law No. 132 of 1998) as amended (the "Financial Reconstruction Law"). Third, SMBC calculates and discloses the value of risk monitored loans based on the Banking Law (which excludes non-loan assets such as foreign exchange, accrued interest and advanced payments). SMBC also discloses loans to specific overseas countries.

The Japanese economy has suffered for more than a decade from stagnant or negative growth and severely limited availability of credit. As a consequence, and compounding the effect of declining real estate prices, large

numbers of businesses and individuals have become insolvent and have entered bankruptcy proceedings or have obtained partial forgiveness of their debts or other relief. Consequently, SMBC and other Japanese banks have suffered significant loan losses relating to loans to such businesses and individuals or relating to loans to financial institutions that extended credit to them. As a consequence of these trends, a number of Japanese banks, including SMBC, have for an extended period been faced with serious loan portfolio quality problems, as well as with the difficult issue of determining the realisable values of their non-performing assets and the amounts that should be reserved against them.

SMBC has in recent years recognised substantial loan losses as a result of these trends. In accordance with SMBC's self-assessment policy, the reserve for possible loan losses reflects an estimate of the amount of losses that SMBC may incur in connection with its loan portfolio. The reserve does not necessarily reflect the entire amount of loan losses that may ultimately be realised in respect of existing loans. SMBC seeks, through the restructuring of loans or collection efforts, to maximise the return on non-performing loans. SMBC's Credit Risk Management Department is dedicated to managing non-performing loans and maximising the level of recoveries on loans which have been written-off. However, such returns are frequently limited by economic and legal impediments to restructuring and collection, including adverse domestic economic conditions in Japan that limit the operating profitability of customers, the absence of a liquid domestic market for real estate and the prevalence of second and third mortgages on real estate over which SMBC holds first liens (which can delay the disposal of such collateral and decrease the recoverable amount).

### *Policies with Respect to Troubled Customers*

In the past, SMBC has provided direct and indirect support to troubled customers for a variety of reasons. For example, SMBC has provided support to customers where operating profitability or asset values indicate the likelihood of a successful restructuring. In addition, SMBC, like other banks in Japan, has provided support in the past to troubled customers under circumstances, and based upon considerations, that may differ in kind or degree from those relevant in other countries, including the United States and Europe. These include political and regulatory influences, relationships with members of the Sumitomo group and the Mitsui group, the lead bank system and perceived responsibility for obligations of affiliated and associated companies. While the importance of some of these considerations has been declining, these considerations nevertheless have significantly affected SMBC's actions on a number of occasions in recent years. SMBC has also been subject to political and regulatory influences that affect SMBC's willingness to support troubled customers. In some cases, SMBC has been induced by such considerations to extend credit or forgive indebtedness under circumstances where short-term economic considerations would have suggested other action.

SMBC may be influenced by its relationships with other members of the Sumitomo group and the Mitsui group to provide financial support. SMBC, like other Japanese banks, has provided financial support to affiliated or associated companies in the past. Third parties dealing with such companies frequently have an expectation, which may be implicitly or explicitly ratified by SMBC, that SMBC will provide financial assistance in the event that such affiliated or associated companies experience financial difficulties. SMBC has provided substantial support to SMBC Leasing, SMBC Finance Co., Ltd. (formerly known as Sumigin General Finance), SMBC Mortgage Co., Ltd. (formerly known as Sakura Mortgage), SMBC Guarantee (formerly known as Sakura Guarantee) and Sumigin Guarantee in recent years. Assistance to affiliated companies could consist of the forgiveness of loans by SMBC, the extension of loans by SMBC to facilitate the repayment of other indebtedness or equity investment. SMBC has provided financial assistance to certain financially distressed retail and construction companies in the form of debt forgiveness, debt for equity swaps and the acquisition of new shares.

SMBC has made a strategic decision to extend financial support to distressed customers only in situations where SMBC expects a positive return from such support. However, SMBC may face difficulties in implementing this strategy and there can be no assurance that SMBC's decision to provide financial support will not be influenced by the factors mentioned above.

Japanese real estate, wholesale and retail, service, finance and insurance and construction companies have been severely and adversely affected by the continuing economic weakness in Japan. The losses of companies in these industries can be partly traced to direct and indirect investment in real estate and to the decline of major public and private sector development projects initiated during the "bubble" era. SMBC has significant exposure to a number of companies in these industries. As at March 31, 2003, to the domestic industries, SMBC had an exposure of ¥9,015.4 billion to the real estate industry (15.94 per cent. of total domestic loans), ¥6,235.9 billion to the wholesale and retail industry (11.02 per cent. of total domestic loans), ¥6,172.7 billion to the service industry (10.91 per cent. of total domestic loans), ¥4,543.9 billion to finance and insurance companies (8.03 per

cent. of total domestic loans) and ¥2,630.1 billion to the construction industry (4.65 per cent. of total domestic loans).

On November 26, 2002, SMBC announced that it had decided to accept Towa Real Estate Development Co., Ltd.'s request for financial assistance in the form of debt forgiveness of ¥14.5 billion and a debt for equity swap of loans worth ¥2.2 billion. On November 29, 2002, SMBC announced that it had decided to accept Arai-Gumi Ltd.'s request for financial assistance in the form of debt forgiveness of ¥60.2 billion. On May 26, 2003 SMBC decided to accept Kumagai-Gumi Ltd.'s request for financial assistance in the form of debt forgiveness in the amount of ¥256.2 billion and an acquisition of new shares in the amount of ¥20.6 billion.

### *Credit Costs*

The following table shows an analysis of SMBC's credit costs for each of the periods indicated:

|   | <u>Year ended March 31,</u>           |                    |
|---|---------------------------------------|--------------------|
|   | <u>2002</u>                           | <u>2003</u>        |
|   | (millions of yen, except percentages) |                    |
| Write-off of loans . . . . .  | ¥ 391,923                             | ¥ 364,605          |
| Transfer to specific reserves . . . . .                                   | 681,457                               | 407,963            |
| Transfer to reserve for losses on loans sold . . . . .                    | 38,712                                | 16,672             |
| Losses on loans sold to CCPC . . . . .                                    | 9,842                                 | 17,088             |
| Losses on sale of delinquent loans . . . . .                              | 58,551                                | 147,825            |
| Transfer from loan loss reserve for specific overseas countries . . . . . | (4,567)                               | (3,888)            |
| Transfer to general reserve for possible loan losses . . . . .            | <u>527,445</u>                        | <u>251,413</u>     |
| Total . . . . .   | <u>¥ 1,703,363</u>                    | <u>¥ 1,201,681</u> |
| Loans and bills discounted (period end) . . . . .                         | ¥63,645,586                           | ¥61,219,617        |
| Ratio of total loan losses to loans and bills discounted . . . . .        | 2.68%                                 | 1.96%              |

During the year ended March 31, 2003 SMBC wrote off loans in the amount of ¥365 billion, a decrease of ¥27 billion from ¥392 billion for the year ended March 31, 2002.

Transfers to reserves for losses on loans sold have decreased over the two years ended March 31, 2003. Losses on loans sold to CCPC increased to ¥17 billion for the year ended March 31, 2003 from ¥10 billion for the year ended March 31, 2002.

SMBC makes the appropriate write-offs and reserves as a result of the self-assessments which are conducted in compliance with the financial inspection manual prepared by the FSA and the practical guidelines published by the Japan Institute of Certified Public Accountants. Total credit costs amounted to ¥1,201,681 million for the year ended March 31, 2003 compared to ¥1,703,363 million for the year ended March 31, 2002, including the amounts transferred to general reserves for possible loan losses. Credit costs are subject to changes to the category of borrowers under self-assessment, in particular the deterioration of borrowers' financial condition from normal or requiring caution to lower categories, costs associated with "off-balancing" transactions and costs relating to an increase of the reserve ratio by application of discount cash flow method and so on.

As at March 31, 2003, total reserves for possible loan losses were ¥2,201,830 million due to reserves for possible loan losses provided by subsidiaries such as bank subsidiaries and leasing and other companies.

### Accounting Principles and Self-Assessment Categories Relating to Reserves for Possible Loan Losses

The table set forth below provides an overview of the different methods of loan and asset categorisation as well as applicable amounts and percentages on a non-consolidated basis as at March 31, 2003:

| Category of Borrowers under Self-Assessment | Disclosed Assets under Financial Reconstruction Law   | Classification under Self-Assessment   |                   |                                      |                           | Reserve for Possible Loan Losses            |                 | Reserve Ratio |
|---|---|--|-------------------|--------------------------------------|---------------------------|---|-----------------|---------------|
|   |   | Classification I   | Classification II | Classification III                   | Classification IV         | Specific Reserve                            | General Reserve |               |
| Bankrupt Borrowers                          | Bankrupt and Quasi-Bankrupt Assets<br>524.9(i)<br>(Change from Mar. 31, 2002: +26.6)                          | Portion of claims secured by collateral or guarantees, etc.<br>507.8(a)              |                   | Fully reserved<br>17.1               | Direct Write-offs<br>(*1) | 23.8<br>(*2)                                | 100%<br>(*3)    |               |
| Effectively Bankrupt Borrowers              |   |  |                   |                                      |                           |   |                 |               |
| Potentially Bankrupt Borrowers              | Doubtful Assets<br>2,129.5(ii)<br>(Change from Mar. 31, 2002: -852.8)   | Portion of claims secured by collateral or guarantees, etc.<br>959.4(b)              |                   | Necessary amount reserved<br>1,170.1 |                           | 926.2<br>(*2)                               | 79.2%<br>(*3)   |               |
| Borrowers Requiring Caution                 | Substandard Loans<br>2,606.9(iii)<br>(Change from Mar. 31, 2002: +167.2)<br>(Claims to Substandard Borrowers) | Portion of Substandard Loans secured by collateral or guarantees, etc.<br>1,078.4(c) |                   |                                      |                           | General Reserve for Substandard Loans 540.9 | 33.7%<br>(*3)   |               |
|   | Normal Assets<br>57,313.4   | Claims to Borrowers Requiring Caution, excluding claims to Substandard Borrowers     |                   |                                      |                           | 6.0%<br>[12.8%]<br>(*4)                     | 21.4%<br>(*3)   |               |

|  |  |  |  |   |
|--|--|--|--|---|
| Total<br>62,574.7(iv)  |  |  | Loan Loss Reserve for Specific Overseas Countries<br>11.6                              |   |
| A: (i)+(ii)+(iii)<br>5,261.3(v)<br>(Change from Mar. 31, 2002: -659.0)<br><Problem asset ratio ((v)/(iv))8.4%> | B: Portion secured by collateral or guarantees, etc.<br>(a)+(b)+(c)<br>2,545.6 | C: Unsecured portion<br>(A - B)<br>2,715.7 | D: Specific Reserve + General Reserve for Substandard Loans <sup>(*)2</sup><br>1,490.9 | Reserve Ratio<br>(*5)<br>$\frac{D}{C}$<br>54.9% |
|  |  |  | Coverage Ratio = (B+D)/A   | 76.7%   |

(\*1) Includes amount of direct reduction totalling ¥954.0 billion.

(\*2) Includes reserves for assets which are not subject to disclosure under the Financial Reconstruction Law disclosure standards. (Bankrupt/ effectively bankrupt borrowers: ¥6.7 billion, potentially bankrupt borrowers: ¥9.2 billion).

(\*3) Reserve ratios to bankrupt borrowers, effectively bankrupt borrowers, potentially bankrupt borrowers, substandard borrowers and borrowers requiring caution including substandard borrowers are the proportion of the reserve to the respective claims of each category, excluding the portion secured by collateral or guarantees, etc.

(\*4) Reserve ratios to normal borrowers and borrowers requiring caution excluding substandard borrowers are the proportion of the reserve to the respective claims of each category. A figure in square brackets indicates the proportion of the reserve to the claims to borrowers requiring caution, excluding claims to substandard borrowers, excluding the portion secured by collateral or guarantees, etc.

(\*5) The proportion of the reserve to the claims, excluding the portion secured by collateral or guarantees, etc.

SMBC accounts for its non-performing loans, reserves and loan losses in accordance with the following policies and regulations.

### ***Borrower Categorisation***

Under the self-assessment process, SMBC classifies its customers into five different categories based on guidelines promulgated by the Japan Institute of Certified Public Accountants in April 1997, as amended. The five categories of customers are:

- “Normal Borrowers”. This category consists of borrowers in satisfactory financial condition who meet their payment obligations, and includes all borrowers not classified as “borrowers requiring caution”, “potentially bankrupt borrowers”, “effectively bankrupt borrowers” or “bankrupt borrowers”.
- “Borrowers Requiring Caution”. This category consists of borrowers (i) with “restructured” loans (see “Restructured Loans”); (ii) who are past-due on principal or interest payments for 3 months or more; (iii) whose business or financial condition is deteriorating or becoming unstable; or (iv) who are otherwise experiencing financial difficulties. Items listed under (i) and (ii) combined constitute “substandard loans” as defined under the Financial Reconstruction Law.
- “Potentially Bankrupt Borrowers”. This category consists of currently solvent borrowers that SMBC deems to have a high probability of becoming insolvent because of continuing, serious financial difficulties or because of a lack of expected progress in implementing restructuring plans. These borrowers have low prospects of future profitability and continued solvency because, among other reasons, they are nearly insolvent, their business and financial condition has significantly deteriorated, or some or all of their loans are past-due. SMBC classifies those borrowers as “potentially bankrupt” with whom SMBC decides to cease providing financial support and to adopt a passive approach with respect to, or withdraw from, its current relationship with such borrower.
- “Effectively Bankrupt Borrowers”. Even though not legally or formally insolvent, borrowers can be classified as “effectively bankrupt” if, among other reasons, they face extreme financial difficulties of a larger magnitude than customers classified as “potentially bankrupt” and there are no prospects for successful restructuring. A borrower that continues to operate its business may nevertheless be classified as “effectively bankrupt” because, among other reasons, there is no prospect of future profitability due to a large amount of problem assets, a large amount of debt compared to its ability to repay, or insolvency persisting for generally more than one year. A borrower may also be classified as “effectively bankrupt” if there are no prospects for successful restructuring because of substantial losses due to calamities, accidents, a sudden change in the economic conditions, or other similar events. In addition, the borrower is “effectively bankrupt” if it is practically insolvent as evidenced by its loans being past-due for six months or longer.
- “Bankrupt Borrowers”. This category consists of borrowers who have entered into bankruptcy (*hasan*), civil rehabilitation proceedings (*minji saisei*), corporate reorganisation proceedings (*kaisha kosei*), special liquidation proceedings (*tokubetsu seisan*) or similar proceedings, or whose discounted bills are subject to trading suspension at the bill clearing house.

### ***Loan Classification***

After categorising the borrower to which a loan was extended, SMBC categorises each loan by evaluating any collateral and guarantees associated with such loan. Collateral and guarantees are classified into two broad categories, (i) “superior” (e.g. cash deposits and high-quality securities) and (ii) “ordinary” (e.g., real estate). Sub-categories of “superior” and “ordinary” collateral are specified, and each sub-category is assigned a specific percentage ranging from 50 per cent. to 100 per cent. for the purpose of determining the portion of the value of collateral that will be considered “qualified” collateral. SMBC then classifies its loans as follows:

- “Classification I (Unclassified) Loans” includes (i) all loans to “normal” borrowers and (ii) the “qualified” portion of “superior” collateral and guarantees for loans to all other borrowers.
- “Classification II Loans” includes (i) all loans (other than Classification I Loans) to “borrowers requiring caution”, and (ii) the “qualified” portion of “ordinary” collateral and guarantees for loans to “potentially bankrupt borrowers”, “effectively bankrupt borrowers” and “bankrupt borrowers”.
- “Classification III Loans” includes (i) all loans (other than Classification I Loans and Classification II Loans) to “potentially bankrupt borrowers”, (ii) the non-“qualified” portion of collateral and guarantees for loans to “effectively bankrupt borrowers” and “bankrupt borrowers” and (iii) any additional amount SMBC expects to receive in bankruptcy proceedings on loans to “effectively bankrupt customers” and “bankrupt borrowers”.

- “Classification IV Loans” includes all loans (other than Classification I Loans and Classification II and III Loans) to “effectively bankrupt borrowers” and “bankrupt borrowers”.

### ***Direct Write-offs***

SMBC directly writes off (and does not charge off against its reserves) the portion of loans classified as “Classification IV”, to the extent such portion has not been previously specifically reserved. SMBC writes off such portions of loans to “bankrupt borrowers”, and such portions of loans to “effectively bankrupt borrowers” (to the extent not previously specifically reserved). SMBC then determines the appropriate amount of reserves to be established for loans in the remaining three categories according to the reserve policies described below.

### ***Reserves***

Reserves for possible loan losses represent allowances for estimated future credit losses. Credit losses arise primarily from the loan portfolio, but may also be derived from other sources including commitments to extend credit, guarantees and standby letters of credit. In this offering circular, the term “loan losses” includes losses derived from these other sources. Actual loan losses, net of recoveries, are generally deducted from reserves for possible loan losses. However, under SMBC’s self-assessment process, losses on loans are shown as direct write-offs (and not charged off against reserves) when the loan or a portion thereof is or becomes unsecured, and the customer is classified as “bankrupt” or “effectively bankrupt”, to the extent that specific reserves were not provided for such loans.

Reserves for possible loan losses are comprised of three parts: general reserves, specific reserves and reserves for specific overseas countries. Accounting principles relating to these are discussed below. SMBC also maintains reserves for loss on loans sold to CCPC. SMBC uses a self-assessment process to analyse the quality of its loans and thereby calculate its reserves.

The following tables show the changes in SMBC’s reserves for possible loan losses (on a non-consolidated basis) as at the dates indicated:

|  | <b>As at March 31,<br/>2003</b>                  |
|--|--|
|  | <b>(millions of yen,<br/>except percentages)</b> |
| <b><u>Non-consolidated</u></b>   |  |
| Reserves for possible loan losses at beginning of period . . . . .                 | ¥ 4,943  |
| Merger with Former-SMBC . . . . .  | 2,138,501  |
| Charge-offs to specific reserves for possible loan losses . . . . .                | (30,501)   |
| Aggregate additions to reserves . . . . .  | (38,145)   |
| Reserves for possible loan losses at end of period . . . . .                       | 2,074,797  |
| General reserves . . . . .   | 1,113,235  |
| Specific reserves . . . . .  | 949,996  |
| Reserves for specific overseas loan losses . . . . .                               | 11,566   |
| Loans and bills discounted . . . . .   | 57,282,365                                       |
| Reserves for possible loan losses as a percentage of loans and bills discounted    | 3.62%  |
| Specific reserve as a percentage of bankrupt loans and non-accrual loans . . . . . | 37.07%   |

As at March 31,  
2002

(millions of yen,  
except percentages)

**Non-consolidated**

|  |             |
|--|-------------|
| Reserves for possible loan losses at beginning of period . . . . .                 | ¥ 1,095,841 |
| Foreign currency translation adjustment . . . . .                                  | 6,239       |
| Charge-offs to specific reserves for possible loan losses . . . . .                | (289,180)   |
| Aggregate additions to reserves . . . . .  | 1,158,948   |
| Reserves for possible loan losses at end of period . . . . .                       | 1,971,849   |
| General reserves . . . . .   | 872,338     |
| Specific reserves . . . . .  | 1,084,065   |
| Reserves for specific overseas loan losses . . . . .                               | 15,445      |
| Loans and bills discounted . . . . .   | 59,928,368  |
| Reserves for possible loan losses as a percentage of loans and bills discounted    | 3.29%       |
| Specific reserve as a percentage of bankrupt loans and non-accrual loans . . . . . | 32.07%      |

*General Reserves.* General reserves are provided for the following categories of loans: (i) Classification II of substandard loans, (ii) loans to borrowers requiring caution other than substandard loans and (iii) Classification I of loans to normal borrowers. The reserve ratios for those three categories are based on the historical credit loss ratios for each group. During 2002 and 2003 SMBC raised the reserve ratios for the Classification II loans to borrowers requiring caution. The reserve ratio for the unsecured portion of the Classification II loans to borrowers requiring caution excluding substandard loans was increased to 9.4 per cent. in March 2002 and to 12.8 per cent. in March 2003. The reserve ratio for the unsecured portion of the substandard loans was increased to 33.7 per cent. in March 2003. With effect from March 31, 2003, SMBC now calculates loan loss reserves for substandard loans made to borrowers with large exposure by analysing the projected cash flows discounted to present value rather than basing reserves on historical loan loss data.

*Specific Reserves.* The specific reserves are based on SMBC's estimate of the probability of loan losses on the whole amount of each loan classified as "Category III", which is based on historical credit loss ratios. SMBC has transferred unusually large amounts to the specific reserves in recent fiscal years. Additions to the specific reserves are generally not fully deductible for Japanese tax purposes. SMBC in recent years has provided for transfers to the specific reserves in amounts that have substantially exceeded the corresponding amounts deductible for Japanese tax purposes; this difference accounts for most of the deferred income taxes reflected in SMBC's financial statements. In the second half of the financial year ended March 31, 2002 SMBC increased its reserve ratio applicable to category III loans from 60 per cent. to 65 per cent. This ratio is based upon historical credit loss ratios. Additionally, SMBC provides for higher specific reserves with respect to certain loans. As a result, the average specific reserve ratio applicable to loans for potentially bankrupt borrowers as at March 31, 2003 was 79.2 per cent.

*Reserves for Specific Overseas Countries.* SMBC maintains reserves for possible losses on specific overseas loans originated in countries considered to be more risky. The amount of the reserves is based on the amount of expected losses due to the political and economic situation of these countries. See "— Loans to Specific Overseas Countries".

*Reserves for Possible Losses on Loans Sold.* The reserves for possible losses on loans sold reflects SMBC's estimate of the amount of losses it will incur in the future in relation to loans previously sold by SMBC to CCPC. At the time of each sale by SMBC to CCPC of problem loans, SMBC recognises a loss to reflect the discounted sale price of such loans. However, SMBC is subject to the risk of further losses associated with loans sold to CCPC. Each sale to CCPC is financed by a loan by SMBC to CCPC. Under the contract for sale of loans, any losses incurred by CCPC on any subsequent disposition of the real estate collateral (and certain related expenses incurred by CCPC) are then reflected retroactively in the sale price at which CCPC purchased the loan and are charged to SMBC. Because the market value of real estate securing many of the loans sold by SMBC to CCPC has declined significantly since the respective times at which such loans were sold, SMBC expects that such losses will be charged to SMBC upon disposition of the relevant real estate collateral. Reserve for loss on loans sold provides for such contingent "secondary" losses expected to be charged to SMBC in the future. SMBC intends to provide for such reserve to reflect the material difference between current estimated market values for real estate collateral for such loans and the principal amount of loans extended by SMBC to CCPC to

finance the purchase of such loans by CCPC. Transfer to reserve for loss on loans sold is not deductible for Japanese tax purposes.

### *Disclosure of Problem Assets Under the Financial Reconstruction Law*

Under the Financial Reconstruction Law, assets are assessed and classified into four categories (i) bankrupt and quasi bankrupt assets, (ii) doubtful assets, (iii) substandard loans and (iv) normal assets. SMBC is required to categorise its assets according to the Financial Reconstruction Law and to disclose such information semi-annually. The categories are:

*Bankrupt and Quasi-Bankrupt Assets.* This category is defined as the sum of credits to bankrupt borrowers and effectively bankrupt borrowers as categorised by the self-assessment, minus fully written-off Classification IV credits. All Classification III credits are unsecured and fully covered by reserves. The remaining Classification I and II credits are considered to be collectible since they are secured by collateral or guarantees.

*Doubtful Assets.* This is the sum of credits extended to borrowers classified as potentially bankrupt under the self-assessment. Since the Classification I and II credits are secured by collateral or guarantees and are considered to be collectible, specific reserves are set aside only for the unsecured portions under Classification III.

*Substandard Loans.* This is the sum of the loans extended to borrowers requiring caution under the self-assessment. Loans that are 3 months or more past due and restructured loans are placed in this category.

*Normal Assets.* This is the sum of the credits not included in the other three categories. Normal assets thus represent the sum of credits to normal borrowers and that portion of credits identified through self-assessment as borrowers requiring caution, but not classified as substandard, and on which the risk of credit losses is deemed relatively small.

The following tables set forth SMBC's disclosure as to the quality of its loan portfolio and other extensions of credit, in the disclosure categories required under the Financial Reconstruction Law and the corresponding amount of specific reserves for each category on a non-consolidated basis, as at March 31, 2002 and 2003:

|  | <u>As at March 31,</u>                |                  |
|--|---------------------------------------|------------------|
|  | <u>2002</u>                           | <u>2003</u>      |
|  | (billions of yen)                     |                  |
| <b><u>Non-consolidated</u></b>                                       |                                       |                  |
| Bankrupt and quasi-bankrupt assets                                   |                                       |                  |
| <i>(Hasan kousei saiken oyobi korerani junzuru saiken)</i> . . . . . | ¥ 493.5                               | ¥ 524.9          |
| Doubtful assets ( <i>Kiken saiken</i> ) . . . . .                    | 2,970.2                               | 2,129.5          |
| Substandard loans ( <i>Youkanri saiken</i> ) . . . . .               | <u>2,436.3</u>                        | <u>2,606.9</u>   |
| Total problem assets . . . . .                                       | 5,900.0                               | 5,261.3          |
| Normal assets ( <i>Seijou saiken</i> ) . . . . .                     | <u>60,558.9</u>                       | <u>57,313.4</u>  |
| Total . . . . .  | <u>¥66,458.9</u>                      | <u>¥62,574.7</u> |
|  | <u>As at March 31,</u>                |                  |
|  | <u>2002</u>                           | <u>2003</u>      |
|  | (billions of yen, except percentages) |                  |
| <b><u>Non-consolidated</u></b>                                       |                                       |                  |
| Bankrupt and quasi-bankrupt assets:                                  |                                       |                  |
| Secured by collateral or guarantees . . . . .                        | ¥ 474.8                               | ¥ 507.8          |
| Fully reserved . . . . .   | 18.7                                  | 17.1             |
| Reserve for possible loan losses . . . . .                           | 22.4                                  | 23.8             |
| Reserve ratio . . . . .  | 100.0%                                | 100.0%           |
| Doubtful assets:   |                                       |                  |
| Secured by collateral or guarantees . . . . .                        | ¥1,572.1                              | ¥ 959.4          |
| Necessary amount to be reserved. . . . .                             | 1,398.1                               | 1,170.1          |
| Reserve for possible loan losses . . . . .                           | 1,061.7                               | 926.2            |
| Reserve ratio . . . . .  | 75.9%                                 | 79.2%            |

The following table sets forth the loan categories and corresponding guidelines for loan loss write offs and reserves issued by the FRC in 1999. SMBC has adopted reserve policies for loan loss write-offs and reserves in accordance with these guidelines:

|  | <b>FRC<br/>Reserve Guideline</b>   |
|--|--|
| Bankrupt and quasi-bankrupt assets<br>( <i>Hasan kousei saiken oyobi korerani junzuru saiken</i> ) . . . . . | Direct write-off of 100 per cent. of unsecured portion not covered by specific reserves.   |
| Doubtful assets ( <i>Kiken saiken</i> ) . . . . .  | Specific reserves of 70 per cent. or ratios based on each bank's historical credit loss experience against the unsecured portion of claims.                                |
| Substandard loans ( <i>Youkanri saiken</i> ) . . . . .   | 15 per cent. of general reserves against unsecured portion of claims to any "customer requiring caution", if any of such customer's loans are classified as "substandard". |
| Normal assets ( <i>Seijou saiken</i> ) . . . . .   | Historical credit loss ratio.  |

***Disclosure of Risk-Monitored Loans Under the Banking Law***

Under the Banking Law, SMBC is required to disclose certain of its non-performing loans (on both a consolidated and non-consolidated basis) as "risk-monitored loans". The Banking Law provides for the disclosure of four categories of risk monitored loans, (i) bankrupt loans, (ii) non-accrual loans, (iii) past due loans (three months or more) and (iv) restructured loans. These loans exclude non-loan assets such as foreign exchange, accrued interest and advanced payments.

The following table sets forth SMBC's risk monitored loans, on a consolidated basis, as at March 31, 2002 and 2003:

|   | <b>As at March 31,</b>   |                   |
|---|--------------------------|-------------------|
|   | <b>2002</b>              | <b>2003</b>       |
|   | <b>(millions of yen)</b> |                   |
| Bankrupt loans . . . . .                    | ¥ 227,484                | ¥ 199,794         |
| Non-accrual loans . . . . .                 | 3,599,750                | 2,665,675         |
| Past due loans (3 months or more) . . . . . | 102,762                  | 128,493           |
| Restructured loans . . . . .                | <u>2,554,371</u>         | <u>2,689,172</u>  |
| Total risk-monitored loans . . . . .        | <u>¥6,484,367</u>        | <u>¥5,683,134</u> |

*Bankrupt Loans.* Bankrupt loans are loans to borrowers that have been legally and formally declared bankrupt.

*Non-accrual loans.* Non-accrual loans are loans for which SMBC does not currently accrue interest income due to the nonpayment status of the loan or the condition of the borrower. Non-accrual loans also include all other loans to "bankrupt", "effectively bankrupt" and "potentially bankrupt" customers. Loans to customers (other than "bankrupt", "effectively bankrupt" and "potentially bankrupt" customers) are removed from non-accrual status if interest is received from the borrower, even if such interest is substantially less than the full amount due. SMBC's non-accrual loans are virtually all domestic loans. SMBC is taking active measures to reduce the balance of its non-accrual loans, principally by writing off such loans and, in the case of domestic loans secured by real estate, disposing of such loans and collateral through sales.

*Past due loans.* Past due loans include loans for which principal or interest is three months or more past due, but excludes risk-monitored loans.

*Restructured loans.* Restructured loans are loans to customers in financial difficulty to whom banks provide financial support by changing the lending terms so as to be more favourable to the borrower, including reduction of interest rates, provision of grace periods for repayment and debt forgiveness. Restructured loans do not include extensions of credit to the CCPC or to the Housing Loan Administration Corporation ("HLAC") or its successor, or investments in the *jusen* funds. See "— Jusen Restructuring". In some cases, SMBC provides support to customers whose loans are classified as "restructured". SMBC's approach in these instances is to provide support to these customers in an attempt to achieve a greater level of recovery. SMBC monitors the

customer's performance carefully, in some cases by seconding staff from SMBC, while maintaining the customer relationship. As at March 31, 2003, restructured loans were ¥2,689.2 billion, an increase of ¥134.8 billion from March 31, 2002. This increase of restructured loans in the year ended March 31, 2003 was primarily due to a broadening of SMBC's interpretation of "restructured loans".

#### *Loans to Specific Overseas Countries*

As at March 31, 2003, nine countries are categorised by SMBC as specific overseas countries that are considered to have an enhanced credit risk. As at March 31, 2003, SMBC had ¥108.1 billion of exposure to specific overseas countries almost all of which represented exposure to Indonesia.

The following table sets forth SMBC's exposure to specific overseas countries at the dates indicated:

|                           | As at March 31,   |                 |
|---------------------------|-------------------|-----------------|
|                           | 2002              | 2003            |
|                           | (millions of yen) |                 |
| Indonesia .....           | ¥138,508          | ¥104,744        |
| Other .....               | <u>13,882</u>     | <u>3,333</u>    |
|                           | <u>¥152,391</u>   | <u>¥108,077</u> |
| Number of countries ..... | 9                 | 9               |

#### *Jusen Restructuring*

Japanese housing loan companies, commonly known as "*jusen*", were rendered insolvent in the early 1990s by the rapid increase in non-performing loans and a decline in the value of Japanese real estate collateral underlying their loan portfolios. In 1996, the Ministry of Finance and leading Japanese financial institutions undertook coordinated action to resolve the problems of the *jusen*, including the use of public funds. The HLAC was formed to administer this restructuring. As part of this government sponsored restructuring, Sakura Bank and Sumitomo Bank invested in the special *jusen* funds.

SMBC's investments in the two *jusen* funds, which totaled ¥208.6 billion as at March 31, 2003 on a non-consolidated basis, are non-interest bearing investments included on SMBC's balance sheet (classified as other assets). These investments are reported at cost. There can be no assurance that SMBC's investments in these funds will be returned or that additional contributions from SMBC or further forgiveness of loans by SMBC will not be required in the event that HLAC's successor requires additional financial assistance in order to meet its financial obligations. In April 1999, HLAC merged with the Resolution and Collection Bank and became RCC.

### **Securities-Related Activities**

#### *Securities Portfolio*

On a non-consolidated basis, the book value of SMBC's investment securities portfolio amounted to ¥23,656 billion as at March 31, 2003. SMBC's bond portfolio had a book value amounting to ¥19,134 billion (on a non-consolidated basis) as at March 31, 2003. SMBC's bond portfolio is principally held for investment purposes with a small number of securities being held for inventory purposes for sales to customers. More than half of SMBC's bond portfolio is composed of fixed-rate long-term Japanese and local government bonds and high quality corporate bonds denominated in yen which SMBC intends to hold until maturity. The approximate average duration of SMBC's JGB portfolio as at March 31, 2003 was 3.5 years, compared to 2.7 years as at March 31, 2002. Bonds are also held to ensure liquidity and, when needed, they can be used as collateral for call money or other money market funding or short term borrowing from the Bank of Japan. Sales of such bonds are made from time to time in order to recognise discretionary gains. SMBC's treasury department actively monitors the interest rate and maturity profile of its bond portfolio as part of SMBC's overall risk management. The short-term bond trading operations of SMBC's former securities subsidiary have been transferred to the securities and derivatives joint venture.

SMBC's equity portfolio had a book value amounting to ¥4,434 billion as at March 31, 2003, on a non-consolidated basis, consisting largely of publicly-traded Japanese equities. SMBC's equity portfolio, like that of other Japanese banks, has historically included shares of certain of its customers who in turn hold shares of SMFG. SMBC continues to reduce its equity holdings to comply with the FSA requirement that the equity portfolio of a bank shall amount to no more than SMBC's Tier I capital. SMBC completed sales of a significant amount of cross shareholdings during the year ended March 31, 2003. Together with the impairment of ¥526 billion and write-off of unrealised losses of ¥673 billion at the time of the merger between the Former-

SMBC and Wakashio Bank, the balance of SMBC's consolidated equity portfolio as at March 31, 2003 decreased to ¥3.4 trillion, from ¥5.5 trillion as at March 31, 2002. As a result, as at March 31, 2003 the market value of SMBC's equity portfolio classified as other securities with market value was lower than SMBC's consolidated Tier I capital.

SMBC recognises the risks associated with its equity portfolio due to its volatility as well as its relatively poor yield. Accordingly, SMBC has been actively looking to minimise the negative effect of holding a large equity portfolio through hedging and derivative transactions and at the same time maintain existing client relationships. While the portfolio is under review, SMBC continues to look at equity investments with the potential for meaningful returns.

The following table sets forth the closing values of the Nikkei 225 Index and the TOPIX at March 31, 1999, 2000, 2001, 2002 and 2003:

|        | As at March 31, |            |            |            |           |
|--------|-----------------|------------|------------|------------|-----------|
|        | 1999            | 2000       | 2001       | 2002       | 2003      |
| Nikkei | ¥15,836.59      | ¥20,337.32 | ¥12,999.70 | ¥11,024.94 | ¥7,972.71 |
| TOPIX  | 1,267.22        | 1,705.94   | 1,277.27   | 1,060.19   | 788.00    |

As of July 24, 2003 the Nikkei was ¥9,671 and the TOPIX was 945.27.

The following tables show the total composition and maturity of SMBC's investment securities portfolio (on a non-consolidated basis) as at the dates indicated:

|  | As at March 31, 2003 |                                   |                                     |                                     |                                    |                |                  |             |        |

- (1) Many of the corporate bonds and some of the Japanese local government bonds held by SMBC are not listed on an established market and are, therefore, recorded at cost.
- (2) Includes, in addition to corporate bonds, bonds guaranteed by the government of Japan and bank debenture.
- (3) Includes foreign securities such as non-yen denominated securities, yen denominated securities issued outside Japan and yen denominated securities of non-Japanese issuers issued in Japan.

The following tables show the book value and market value of, and the unrealised gain or loss on, SMBC's investment securities portfolio as at the dates indicated. Unlisted securities without market values are not reflected in these tables.

| Japanese local government bonds . . . . . | 468,707              | 476,721              | 8,013                         | 9,887            | 1,873             |
| Japanese corporate bonds . . . . .        | 877,088              | 868,875              | (8,212)                       | 7,638            | 15,851            |
| Other . . . . .                           | 3,039,987            | 3,017,326            | (22,661)                      | 8,610            | 31,271            |
| Total . . . . .                           | ¥19,669,991          | ¥19,174,483          | ¥(495,507)                    | ¥260,042         | ¥755,549          |

The high level of unrealised losses as at March 31, 2002 is primarily attributable to the general decline in securities values, particularly in the values of Japanese equities.

### ***Trading Portfolio***

SMBC uses mark-to-market accounting for its trading portfolio pursuant to the Banking Law. SMBC's trading portfolio includes securities, derivatives and other trading assets and liabilities. Net trading income for the years ended March 31, 2003 and March 31, 2002 were ¥205,770 million and ¥129,432 million, respectively, principally consisting of gains on trading-related financial derivatives transactions.

### **Risk Management**

SMFG manages risk on a "group-wide" basis by establishing basic policies for risk management applicable to the entire group, monitoring its subsidiaries' compliance with such basic policies and organising relevant subsidiaries and departments in anticipation of the introduction of new rules with respect to minimum capital requirements announced by the Basle Committee on Banking Supervision and scheduled to take effect in December 2006.

In addition to the role of SMFG, SMBC manages risks resulting from its and its subsidiaries operations. Risks are classified into the following categories for control purposes: (i) credit risk, (ii) market risk, (iii) liquidity risk, (iv) processing risk, (v) systems risk and (vi) other risks (settlement risk, legal risk, reputational risk and others). Each department is charged with control of risks at an appropriate level within its own business line. To manage the risks included in the items (i-v) above as well as settlement risk, SMBC has designated certain departments as Risk Management Departments to oversee specific risk control measures within each risk category. In addition, SMBC has established the Corporate Risk Management Department completely independent of the business units to manage these risks on a bank-wide basis. The Corporate Risk Management Department works with the Corporate Planning Department to comprehensively and systematically manage risk.

The system works as follows: Each Risk Management Department supervising a particular risk category drafts "basic principles for risk management" for that category, which are then presented for approval at the Management Committee and considered by the Board's Risk Management Committee before being finalised by the Board. According to the basic principles for risk management, the Management Committee, board members and Risk Management Department heads perform risk management and this process is coordinated by the Risk Management Departments concerned.

The Risk Management Departments revise the basic risk management principles for each risk category on a regular basis, and whenever necessary, to ensure timely and appropriate risk management. Furthermore, in order to maintain a balance between risk and return as well as ensure the soundness of SMBC from an overall perspective, SMBC uses the "risk capital-based management" method which allocates capital to each department according to its role in SMBC's business strategies in order to keep the total exposure to credit, market, processing and systems risk within the scope of its management resources, *i.e.*, capital. In the credit and market risk categories in particular, the maximum risk capital that can be allocated during a period is predetermined and risk capital guidelines are set within this limit to manage these risks. Liquidity risk is managed within a framework that includes plans for money gap and treasury funding. The other risk categories are managed with procedures closely attuned to the nature of the risk as described below.

### ***Market Risk***

Market risk is the chance that fluctuations in interest rates, foreign exchange rates or stock prices will change the value of financial products, leading to a loss. Market risk can be divided into various factors: foreign exchange rate, interest rate, equity price and option risk. SMBC uses both the value at risk (VaR) method and other indicators actually used in daily operations, such as the basis point value (BPV) indicator (to measure the change in earnings for every 0.01 per cent. change in interest rates), to manage risk in each risk category. The VaR method predicts the maximum potential loss for a given probability. SMBC strives to set the total VaR guidelines to conservative levels relative to capital in line with its business strategies.

Market risk attributable to SMBC's strategic holding of equity when held by units not in charge of market-related activities and the market risk taken by its major subsidiaries are included in the integrated risk management performed by the Corporate Risk Management Department. The VaR is regularly calculated and reported to the Board of Directors and Management Committee.

The market occasionally undergoes extreme fluctuations that exceed expectations. To manage market risk, therefore, it is important to run simulations (stress tests) of situations that may occur only once in many years.

SMBC runs periodic stress tests to prepare for unforeseeable swings in market conditions. SMBC also establishes loss cut guidelines and limits for its operations, depending on its financial situation and business strategy, in order to manage its market risk.

The internal model used by SMBC (SMBC VaR) has been evaluated by an independent audit firm and certified to be appropriate. To further verify the reliability of the model, SMBC performs back testing on the relationship between the VaR calculated with the model and the actual profit and loss data. SMBC calculates VaR based on a one-day holding period and a 99.0 per cent. confidence level.

To manage SMBC's risk in the yen-denominated banking account, it uses gap analysis employing maturity ladders and the earnings at risk (EaR) model in addition to the VaR model. If an external factor, such as interest rates, moves in an unfavourable direction, the EaR model can indicate the largest estimated change in earnings (interest rate spread) for a set period at a given probability. Since strategy and budgetary planning is based on the earnings for a period, SMBC uses the EaR model to supplement the VaR model. Using Monte Carlo simulations to generate 1,000 scenarios, SMBC tests the magnitude of the effect that new deposits and loans will have on the period's earnings.

In the interests of bolstering asset soundness, SMBC recognises that maintaining strategic equity holdings at the levels appropriate to its fiscal strength and managing the price risk of these stocks is an important issue for SMBC's management. Therefore, SMBC actively manages these risks by treating the entire holding of strategic equity as a portfolio and keeping the maximum potential loss amount derived from the VaR model and the earnings for the period within the risk capital allocations, and maintaining them at an appropriate level vis-a-vis capital.

As at March 31, 2003, the market risk exposure of SMBC was approximately ¥38 billion based on the VaR method. The greater portion of the exposure arises from assets in the banking account intended for long-term holding. The exposure related to short-term trading account holdings is relatively small compared to the total. Moreover, the primary component of the exposure is interest rate risk arising from fluctuations in market rates, rather than "non-linear" risk arising from derivative products.

### ***Credit Risk***

Credit risk is the chance of a loss arising from a credit event, such as deterioration in the financial condition of a borrower, that causes an asset (including off-balance sheet transactions) to lose value or become worthless. Overseas credits also include an element of country risk, which is closely related to credit risk. This is the risk that changes in currency values or political or economic situations result in a loss.

The purpose of credit risk management is to avoid these credit events, to keep credit risk exposure within SMBC's capital, maintain the soundness of SMBC's assets and ensure returns commensurate with risk. SMBC's current credit policy clarifies the universal and basic operating concepts, code of conduct and standards for credit operations. By giving SMBC's employees extensive credit training, it aims to achieve the global standards of credit risk management contemplated by the Bank for International Settlements (BIS) in its January 2001 consultative papers and by the FSA in its inspection manuals, and create a better credit management culture within SMBC.

SMBC assesses the credit risk posed by each borrower and loan with SMBC's internal rating system and quantifies that risk for control purposes. The internal rating system consists of two indicators: (i) the obligor's grading which indicates the creditworthiness of a borrower, and (ii) the facility grading which shows the probability of collecting for each facility. Facility gradings are assigned based on the borrower's obligor's grading in consideration of transaction terms such as guarantee, tenor and collateral. Overseas credits are further subjected to analysis with the country ranking, an indicator derived from analysis of the political and economic situations, international balance of payments and the external debt burden of each country. In order to maintain the consistency of the grading system as a whole, self-assessment is the prerequisite step to the obligor's grading process.

Quantifying credit risk reflects the concentrating of risk toward a specific customer or industry and fluctuations in the values of real estate, securities and other types of collateral. This range of data must be analysed to quantify the risk of an entire portfolio or an individual loan. To calculate credit risk, historical data for the obligor and facility is entered into a database, the parameters are set — such as the probability of a ratings change and the recovery rate — and then the probability distribution of losses for the entire portfolio (amount of loss for what probability) is computed to determine the maximum potential loss in the future. The quantified credit risk results are then used to formulate business plans and provide a standard against which individual credit applications are assessed.

Credit assessments involve a variety of financial analyses, including cash flow analysis, to predict an enterprise's ability to repay the loan and its growth prospects. These quantitative measures are then combined with qualitative analyses of industry trends, research and development capabilities, the competitiveness of the company and its products or services, and its management capabilities. The loan application is also analysed in terms of the intended uses of the funds, the repayment schedule and the state of its collateral. As part of SMBC's measures to enhance efficiency and speed up approvals, it has digitised and standardised the loan evaluation and approval processes to run on SMBC's information technology network as the Credit Application System. In addition to analysing loans at the application stage, a Credit Monitoring System is implemented in order to reassess the obligor's grading and review self-assessment so that problems can be detected at an early stage and quick and adequate action can be taken. The system includes Periodic Monitoring with receipt of the annual report, as well as Continuous Monitoring performed when the credit conditions change.

In addition to managing individual loans, SMBC applies the following basic policies to the management of its entire portfolio to maintain and improve SMBC's soundness and profitability over the medium to long-term:

- *Risk-Taking within the Scope of Capital.* To control credit risk within the scope of its capital, SMBC calculates the required credit risk capital through regular quantification of credit risk, and then sets credit risk capital limits and manages risk-taking activities within these limits.
- *Controlling Concentration Risk.* Since the concentration of credit in an industry or corporate group has the potential to severely impact a bank's capital, credit control on industries with concentration risk and loan reviews of large borrowers and their groups are implemented. SMBC also sets credit limits for each country based on its creditworthiness to manage country risk.
- *Balancing Risk and Return.* SMBC operates on the basic principle of seeking returns commensurate with the credit risk. Loan pricing, therefore, uses its credit risk quantification calculations and the Sumitomo Mitsui Value Added (SMVA) indicator to ensure that adequate profit is generated after deducting credit cost, cost of capital and expenses.
- *Reduction of Non-Performing Loans.* In order to counter concerns of increasing losses from the deterioration of existing problem loans or the appearance of new problem loans, SMBC is striving to quickly reduce non-performing loans, by conducting loan reviews to set new responses and clarify action plans, and by strengthening its recovery and asset value maintenance strategies.
- *Toward Active Portfolio Management.* In addition to controlling the individual loan approval process, SMBC also actively manages its loan portfolio on an aggregate basis. SMBC's Portfolio Management Department spearheads SMBC's use of credit derivatives and loan securitisation in the markets to proactively manage its portfolio.

The Credit Risk Management Department within the Corporate Staff Unit is responsible for the comprehensive management of credit risk. This department determines the credit policies, establishes the internal rating system, develops credit risk quantification methods, sets credit limits and approval limits, and manages problem loans and other aspects of the loan portfolio administration.

The Corporate Research Department within the Corporate Staff Unit performs the basic research on industries and subsectors, and investigates individual companies to monitor early signs of problems or growth potential.

The credit departments within each business unit conduct the credit judgement for the loans handled by their business units and manage the business units' portfolios. The credit limits SMBC uses are based on the baseline amounts established for each rating category and SMBC pays particular attention to evaluating and managing customers or loans perceived to have particularly high credit risk.

Bankrupt or virtually bankrupt companies are generally handled by the Credit Administration Department, which works to recover non-performing loans as quickly as possible. The Credit Review Department, the Audit Department for the Americas, and the Audit Department for Europe operate independently of the business units, the Corporate Staff Unit and the Corporate Services Unit. These departments principally audit the soundness of assets, accuracy of gradings, self-assessments and the state of credit operations, and report audit results directly to the Board of Directors and the Management Committee.

### ***Liquidity Risk***

Liquidity risk is the chance of encountering an obstacle to raising the funds required for settlement due either to a mismatch between the use and procurement of funds or to an unexpected outflow of funds, or being

forced to borrow at higher interest rates than usual. SMBC considers liquidity risk to be one of its major risks. SMBC manages liquidity risk so that it is not overly dependent on market-based funding to cover short-term cash outflows. SMBC's liquidity risk management is based on a framework consisting of setting limits and guidelines for the funding gap, maintaining a system of highly liquid supplementary funding sources and establishing contingency plans.

In daily risk management operations, SMBC avoids a gradual increase in liquidity risk by adjusting the funding gap limits and guidelines. For an emergency situation, SMBC has contingency plans in place to reduce the funding gap limits and guidelines and take other measures. To prevent the chance of market crises interfering with funding, SMBC carries highly liquid assets, such as U.S. treasury bonds, and has emergency borrowing facilities in place, which also facilitates foreign currency-denominated liquidity management.

### ***Processing Risk***

Processing risk is the chance of losses arising from negligent administration by employees, from accidents or from unauthorised activities. In SMBC's administrative regulations, the basic administrative policies are summarised as "comprehending the risks and costs of administration and transaction processing, and managing them accordingly" and "seeking to raise the quality of administration to deliver high-quality service to customers". SMBC aims to organise its systems to achieve these goals.

In its operating regulations, SMBC has also defined specific rules for processing risk management. The rules divide processing risk management tasks among six types of departments: (i) Operations Planning Departments, (ii) compliance departments, (iii) operations departments, (iv) transaction execution departments (primarily the front office departments and branches), (v) the Internal Audit Department and (vi) the Customer Relations Department. The Board of Directors also reviews administrative conditions annually and sets new management policies as required. In addition, SMBC has set up a specialised group within the Operations Planning Department to strengthen administrative procedures throughout the SMBC Group.

SMBC includes processing risk in its calculation of risk capital requirements and has allocated a certain percentage of risk capital to cover it, based on the quantification of the risk for a financial year.

### ***Settlement Risk***

Settlement risk is the chance of a loss arising from a transaction that cannot be settled as planned. Since this risk comprises elements of several types of risk — such as credit risk, liquidity risk, processing risk and systems risk — it requires interdisciplinary management. The Operations Planning Department is charged with coordinating the management of this risk with the Credit Risk Management Department, which oversees credit risk, and the Corporate Risk Management Department, which oversees liquidity risk. SMBC is continuing to upgrade settlement risk management through such measures as participation in the Continuous Linked Settlement system, which will reduce the risk inherent in settlement of foreign exchange transactions.

### ***Systems Risk***

Systems risk is the chance of a loss arising from the failure, malfunction or unauthorised use of a computer system. SMBC has instituted a number of basic policies to manage systems risk, including a security policy, usage regulations and specific management procedures. SMBC is further strengthening safety measures based on a needs assessment drawing on such references as the Financial Inspection Manual, approved by the FSA, and the Security Guidelines published by the Financial Information Systems Centre.

Since computer-related trouble at financial institutions now has greater potential to impact the public, and systems risk has increased with the information technology revolution and the concomitant use of networks and personal computers, SMBC has taken the necessary steps to ensure the smooth, secure operation of its information systems. SMBC placed its main system and infrastructure in Tokyo and its back-up system in Kansai. To maintain the privacy of customer information and prevent information leaks, SMBC is encrypting sensitive information, blocking unauthorised external access and implementing all known countermeasures to secure its data. SMBC has also established contingency plans and conducted training as required to ensure it is fully prepared in the event of an emergency. SMBC will continue to revise its countermeasures as new technologies and usage patterns emerge to maintain its security.

SMBC includes systems risk in its calculation of risk capital requirements and has allocated a certain percentage of risk capital to cover it, based on the risk quantification results for a financial year.

## Derivatives

The main risks associated with derivative transactions are market risk (change in market prices), credit risk (non-fulfilment of obligations), and liquidity risk (lack of marketability at prices in line with recent sales). SMBC uses VaR to manage its exposure to a variety of market risks (for example, interest rate risk and foreign exchange risk) and mark to market its exposure to credit risk periodically. To mitigate liquidity risk, SMBC establishes “dealing” restrictions on amount, currency, instrument and term and sets limits on outstanding contracts of futures transactions. The Treasury Unit, which conducts derivative transactions, is divided into the front office and the middle/back office (administration) to strictly control the entering into and execution of transactions, exposure and profitability.

### *Information of Derivative Transactions to Which Mark-to-Market Accounting is Applied*

Mark-to-market accounting is applied mainly to dealing transactions using derivatives to obtain gains from short-term changes in interest rates, currency rates and other factors. Departments in Tokyo, New York, London, Singapore and other markets proactively deal in derivatives within proscribed limits.

The transactions set forth in the tables below are valued at market value and the resulting gains (losses) are accounted for in the statement of income. Derivative transactions to which hedge accounting method is applied are not included in the amounts below.

#### (1) Interest Rate Derivatives

Market value of interest rate derivatives transactions listed on an exchange is calculated mainly using the closing prices on the Tokyo International Financial Futures Exchange and others. Market value of Over-the-Counter (OTC) transactions is calculated mainly using discounted present value and option pricing models. The following table shows calculations for SMBC’s interest rate derivative transactions listed on an exchange and for OTC transactions for the periods indicated:

|                                  | As at March 31, 2002 |               |                |                    | As at March 31, 2003 |               |                 |                    |
|----------------------------------|----------------------|---------------|----------------|--------------------|----------------------|---------------|-----------------|--------------------|
|                                  | Contract amount      | (Over 1 year) | Market value   | Net gains/(losses) | Contract amount      | (Over 1 year) | Market value    | Net gains/(losses) |
|                                  | (millions of yen)    |               |                |                    |                      |               |                 |                    |
| Transactions Listed on Exchange: |                      |               |                |                    |                      |               |                 |                    |
| Interest rate futures . . . . .  | ¥ 15,871,971         | ¥ 884,187     | ¥ 238          | ¥ 238              | ¥117,383,087         | ¥ 10,224,613  | ¥ 5,850         | ¥ 5,850            |
| Interest rate options . . . . .  | 1,276,246            | —             | 26             | 26                 | 1,831,703            | 205,802       | (23)            | (23)               |
| Over-the-Counter Transactions:   |                      |               |                |                    |                      |               |                 |                    |
| Forward rate agreements          | 12,198,597           | 1,360,000     | (234)          | (234)              | 16,859,086           | 1,045,000     | 575             | 575                |
| Interest rate swaps . . . . .    | 268,046,524          | 169,004,153   | 37,188         | 37,188             | 305,031,482          | 214,079,553   | 250,498         | 250,498            |
| Others . . . . .                 | 13,363,627           | 9,658,918     | (2,882)        | (2,882)            | 13,174,468           | 8,305,659     | (5,433)         | (5,433)            |
| Total . . . . .                  |                      |               | <u>¥34,335</u> | <u>¥34,335</u>     |                      |               | <u>¥251,467</u> | <u>¥251,467</u>    |

#### (2) Currency Derivatives

Market value of currency derivative transactions is calculated mainly using the discounted present value method. Forward foreign exchange and currency options which are of the following types are not included in the figures below:

- (i) those that are revalued at year end. The resulting gain (loss) is accounted for in the statement of income; and

(ii) those that are allotted to financial assets/liabilities by foreign currency and whose market values are already reflected in the amount of the financial assets/liabilities on the balance sheet. The following table shows calculations for SMBC's currency derivative OTC transactions for the periods indicated:

|                                | As at March 31, 2002 |               |              |                     | As at March 31, 2003 |               |              |                     |
|--------------------------------|----------------------|---------------|--------------|---------------------|----------------------|---------------|--------------|---------------------|
|                                | Contract amount      | (Over 1 year) | Market value | Net gains/ (losses) | Contract amount      | (Over 1 year) | Market value | Net gains/ (losses) |
|                                | (millions of yen)    |               |              |                     |                      |               |              |                     |
| Over-the-Counter Transactions: |                      |               |              |                     |                      |               |              |                     |
| Currency swaps                 | ¥15,732,720          | ¥8,809,028    | ¥(46,698)    | ¥(46,698)           | ¥16,433,656          | ¥8,831,238    | ¥(39,389)    | (39,389)            |
| Others                         | 2,093,436            | 1,094,267     | 596          | 596                 | 4,263,429            | 1,780,541     | 12,432       | 12,432              |
| Total                          |                      |               | ¥(46,102)    | ¥(46,102)           |                      |               | ¥(26,956)    | ¥(26,956)           |

The contract amounts of currency swaps which are valued at the balance sheet dates are as follows:

|                                | As at March 31, 2002 | As at March 31, 2003 |
|--------------------------------|----------------------|----------------------|
|                                | (millions of yen)    |                      |
| Over-the-Counter Transactions: |                      |                      |
| Forward foreign exchange       | ¥42,123,544          | ¥37,271,679          |
| Currency options               | 6,898,055            | 6,197,358            |

### (3) Equity Derivatives

Market value of OTC transactions is calculated mainly using discounted present value and option pricing models. The following table shows calculations for SMBC's equity derivative OTC transactions for the periods indicated:

|                                  | As at March 31, 2002 |               |              |                     | As at March 31, 2003 |               |              |                     |
|----------------------------------|----------------------|---------------|--------------|---------------------|----------------------|---------------|--------------|---------------------|
|                                  | Contract amount      | (Over 1 year) | Market value | Net gains/ (losses) | Contract amount      | (Over 1 year) | Market value | Net gains/ (losses) |
|                                  | (millions of yen)    |               |              |                     |                      |               |              |                     |
| Transactions Listed on Exchange: |                      |               |              |                     |                      |               |              |                     |
| Stock price index futures:       |                      |               |              |                     |                      |               |              |                     |
| Sold                             | ¥ 55                 | ¥ —           | ¥ 0          | ¥ 0                 | —                    | —             | —            | —                   |
| Bought                           | 211                  | —             | 0            | 0                   | —                    | —             | —            | —                   |
| Over-the-Counter Transactions:   |                      |               |              |                     |                      |               |              |                     |
| Equity options                   | —                    | —             | —            | —                   | ¥ 0                  | —             | ¥ 0          | ¥ 0                 |
| Equity price index swaps         | 11,664               | —             | 25           | 25                  | —                    | —             | —            | —                   |

| Total                            |                      |               | ¥(3,709)     | ¥(3,709)            |                      |               | ¥ 0          | ¥ 0                 |

### (4) Bond Derivatives

Market value of bond derivative transactions listed on an exchange is calculated mainly using the closing prices on the Tokyo Stock Exchange. Market value of OTC transactions is calculated mainly using discounted present value and option pricing models. The following table shows calculations for SMBC's bond derivative transactions listed on an exchange and for OTC transactions for the periods indicated:

|                                  | As at March 31, 2002 |               |              |                     | As at March 31, 2003 |               |              |                     |
|----------------------------------|----------------------|---------------|--------------|---------------------|----------------------|---------------|--------------|---------------------|
|                                  | Contract amount      | (Over 1 year) | Market value | Net gains/ (losses) | Contract amount      | (Over 1 year) | Market value | Net gains/ (losses) |
|                                  | (millions of yen)    |               |              |                     |                      |               |              |                     |
| Transactions Listed on Exchange: |                      |               |              |                     |                      |               |              |                     |
| Bond futures                     | ¥26,600              | —             | ¥ 12         | ¥ 12                | ¥248,745             | ¥ —           | ¥(455)       | ¥(455)              |
| Bond options                     | 5,000                | —             | 11           | 11                  | 4,000                | —             | (8)          | (8)                 |
| Over-the-Counter Transactions:   |                      |               |              |                     |                      |               |              |                     |
| Bond options                     | 51,220               | 22,337        | (11)         | (11)                | 20,729               | 18,743        | 0            | 0                   |
| Total                            |                      |               | ¥ 11         | ¥ 11                |                      |               | ¥(463)       | ¥(463)              |

(5) Commodity Derivatives

Market value of commodity derivative transactions is calculated based on factors such as price of the relevant commodity and contract term. The following table shows calculations for SMBC's commodity derivative OTC transactions for the periods indicated:

|                                | As at March 31, 2002 |               |              |                    | As at March 31, 2003 |               |              |                    |
|--------------------------------|----------------------|---------------|--------------|--------------------|----------------------|---------------|--------------|--------------------|
|                                | Contract amount      | (Over 1 year) | Market value | Net gains/(losses) | Contract amount      | (Over 1 year) | Market value | Net gains/(losses) |
| (millions of yen)              |                      |               |              |                    |                      |               |              |                    |
| Over-the-Counter Transactions: |                      |               |              |                    |                      |               |              |                    |
| Commodity Swaps                | ¥ 3,837              | ¥3,593        | ¥142         | ¥142               | ¥62,099              | ¥54,717       | ¥769         | ¥769               |
| Commodity options              | 10,052               | 8,938         | 37           | 37                 | 12,738               | 8,126         | 28           | 28                 |
| Total                          |                      |               | <u>¥180</u>  | <u>¥180</u>        |                      |               | <u>¥797</u>  | <u>¥797</u>        |

(6) Credit Derivatives

Market value of credit derivative transactions is calculated based on factors such as price of reference credit and contract terms. The following table shows calculations for SMBC's credit derivative OTC transactions for the periods indicated:

|                                | As at March 31, 2002 |               |                |                    | As at March 31, 2003 |               |               |                    |
|--------------------------------|----------------------|---------------|----------------|--------------------|----------------------|---------------|---------------|--------------------|
|                                | Contract amount      | (Over 1 year) | Market value   | Net gains/(losses) | Contract amount      | (Over 1 year) | Market value  | Net gains/(losses) |
| (millions of yen)              |                      |               |                |                    |                      |               |               |                    |
| Over-the-Counter Transactions: |                      |               |                |                    |                      |               |               |                    |
| Credit Default Options         | ¥100,850             | ¥81,710       | ¥ 653          | ¥ 653              | ¥75,448              | ¥41,382       | ¥1,386        | ¥1,386             |
| Other                          | 239,399              | 95,011        | 12,311         | 12,311             | 92,290               | 80,646        | 5,191         | 5,191              |
| Total                          |                      |               | <u>¥12,965</u> | <u>¥12,965</u>     |                      |               | <u>¥6,578</u> | <u>¥6,578</u>      |

**Information on derivative transactions to which hedge accounting is applied**

SMBC applies hedge accounting to certain derivative transactions that are entered into to manage SMBC's market risk that arises from its banking businesses, such as deposits and loans. Generally, SMBC applies the risk-adjusted approach to derivatives transactions that SMBC entered into to manage the volatility of interest rates on various financial assets and liabilities, such as deposits and loans. SMBC applies the short-cut method for certain interest rate swaps and other accounting methods to other derivative transactions pursuant to guidelines issued by the Japan Institute of Certified Public Accountants.

The risk-adjusted approach is applied to the following transactions.

|                         | As at March 31, 2003  |                            |  |                         |
|-------------------------|-----------------------|----------------------------|--|-------------------------|
|                         | Assets <sup>(1)</sup> | Liabilities <sup>(2)</sup> | Net valuation gains/(losses) <sup>(1)(2)</sup> | Deferred gains/(losses) |
| (billions of yen)       |                       |                            |  |                         |
| <b>Non-consolidated</b> |                       |                            |  |                         |
| Interest rate swaps     | ¥398.5                | ¥175.2                     | ¥223.3   | ¥117.3                  |
| Currency swaps          | 419.5                 | 408.0                      | 11.5   | 9.6                     |
| Other                   | 58.9                  | 31.5                       | 27.4   | 28.9                    |
| Total <sup>(2)</sup>    | <u>¥876.9</u>         | <u>¥614.7</u>              | <u>¥262.2</u>                                  | <u>¥155.8</u>           |

(1) Derivative transactions are carried at fair value in the balance sheet (including hedging purpose derivatives appearing in (1) and (2) in the above table), except those to which the short-cut method is applied.

(2) Gains and losses on derivative transactions are treated as follows:

- Deferred hedge accounting defers gains and losses (as determined based on fair value accounting) on hedging purpose derivatives that do not match the gains and losses realised on the hedged items (as determined based on accrual accounting).
- Hedging purpose swap transactions that meet certain requirements regarding contract amount, receivable/payable condition, contract term and other conditions are recorded on a cost basis using the short-cut method for interest rate swaps, in accordance with the accounting standard for financial instruments.

The following table sets forth (on a non-consolidated basis) the contract amount of interest rate swaps to which deferred hedge accounting is applied, classified by maturity.

|  | As at March 31, 2003 |                   |                  | Total            |
|--|----------------------|-------------------|------------------|------------------|
|  | 1 year or less       | 1-5 years         | Over 5 years     |                  |
|  |                      | (billions of yen) |                  |                  |
| <b>Non-consolidated</b>                                  |                      |                   |                  |                  |
| Receivable fixed rate/payable floating rate . . . . .    | ¥20,063.1            | ¥22,188.0         | ¥6,588.7         | ¥48,839.8        |
| Receivable floating rate/payable fixed rate . . . . .    | 12,075.6             | 14,597.6          | 3,509.8          | 30,183.0         |
| Receivable floating rate/payable floating rate . . . . . | 5.2                  | 866.6             | 84.5             | 956.3            |
| Total contract amount . . . . .                          | <u>¥32,143.9</u>     | <u>¥37,652.2</u>  | <u>¥10,183.0</u> | <u>¥79,979.1</u> |

### Capital Adequacy

Japan's capital guidelines are based on the risk-adjusted approach proposed by the Basle Committee on Banking Supervision for uniform application to all international banks in industrialised countries.

Set forth below is a schedule of risk-adjusted assets and details of qualifying capital of SMBC determined on a consolidated basis:

|   | As at March 31,                       |                    |
|---|---------------------------------------|--------------------|
|   | 2002                                  | 2003               |
|   | (millions of yen, except percentages) |                    |
| Tier I capital . . . . .  | ¥ 3,719,366                           | ¥ 3,066,351        |
| Tier II capital:  |                                       |                    |
| Reserves for possible loan losses (excluding specific reserves) . . . . . | 929,461                               | 1,149,150          |
| Subordinated debt . . . . .   | 2,577,490                             | 2,150,334          |
| Land revaluation excess after 55 per cent. discount . . . . .             | 82,931                                | 71,699             |
| Total Tier II capital . . . . .   | 3,589,883                             | 3,371,184          |
| Tier II capital included as qualifying capital . . . . .                  | 3,504,772                             | 2,887,170          |
| Deduction . . . . .   | (163,331)                             | (25,684)           |
| Total capital . . . . .   | <u>¥ 7,060,807</u>                    | <u>¥ 5,927,837</u> |
| Risk-adjusted assets:   |                                       |                    |
| On-balance sheet items . . . . .  | ¥62,532,180                           | ¥53,313,337        |
| Off-balance sheet items . . . . .   | 4,803,181                             | 3,523,317          |
| Market risk items . . . . .   | 212,650                               | 221,156            |
| Total risk-adjusted assets . . . . .                                      | <u>¥67,548,012</u>                    | <u>¥57,057,811</u> |
| Tier I risk-adjusted capital ratio . . . . .                              | 5.50%                                 | 5.37%              |
| Total risk-adjusted capital ratio . . . . .                               | 10.45%                                | 10.38%             |

SMBC's risk-adjusted capital ratios as at March 31, 2003 were 5.37 per cent. (in the case of consolidated unaudited Tier I capital) and 10.38 per cent. (in the case of consolidated unaudited total capital). The decreases in the risk-adjusted capital ratios from March 31, 2002 reflected mainly a decrease in the amount of SMBC's risk-adjusted assets, the amount of dividends to shareholders in respect of the period, the amount of SMBC's loss for the period, an increase in the reserves for possible loan losses (excluding specific reserves), increases in the unrealised losses on listed securities and the amount of additional capital raised through the issuance of subordinated notes and the borrowing of subordinated loans.

As at March 31, 2003, SMBC recognised ¥1,842 billion of net deferred tax assets, which is realised based on future projected taxable income for five years, multiplied by the effective tax rates applicable to SMBC. As at March 31, 2003, deferred tax assets constituted 31.1 per cent. of SMBC's consolidated total capital.

The calculation of net deferred tax assets by SMBC is based on taxable income projections for five years. These projections are based on the reasonable tax planning strategy as authorised by the management of SMBC, which is reviewed by SMBC's independent auditors in the process of their audit performed in accordance with generally accepted auditing standards in Japan. These calculations require SMBC to make estimates and certain assumptions and the results of these calculations may also differ from corresponding calculations made under

U.S. or European regulations. SMBC's ability to realise benefits from its deferred tax assets would be adversely affected to the extent that SMBC's actual taxable income is lower than the projected taxable income used to determine the amount of its deferred tax asset.

The capital of SMBC is also partially comprised of capital contributions from insurance and other companies in which SMBC has made capital contributions. SMBC's capital ratio would be negatively affected if these cross-capitalisation arrangements were restricted or prohibited in the future.

SMBC's capital also depends in part on the fair market value of its securities portfolio since unrealised losses reduce stockholders' equity. Approximately 14 per cent. of SMBC's securities portfolio consists of equity securities, which are primarily common stocks of publicly traded Japanese companies. The common stocks of publicly traded Japanese companies are generally volatile and have declined substantially in recent years. As at March 31, 2003, SMBC's securities (including money held in trust) with a readily ascertainable market value contained ¥27.6 billion in unrealised losses, of which ¥21.6 billion appeared in its stockholders' equity. Although it would depend on the particular securities involved, a substantial decline in the Tokyo stock market would likely reduce SMBC's capital substantially.

If the impact of the changes in risk-adjusted assets or loan losses or other relevant factors would otherwise decrease SMBC's capital ratios below 4 per cent. (in the case of Tier I capital) or 8 per cent. (in the case of total capital) in the future, SMBC intends to take actions to seek to maintain its risk-adjusted capital ratios above such levels. Such actions might include additional sales of equity or debt securities and the sale of loans or other assets in order to reduce the amount of risk-adjusted assets. Sales of assets such as equity securities in substantial amounts by SMBC and other financial institutions similarly situated might have adverse effects on the market values for assets of the types sold, which would reduce the amounts realised on such sales. Current adverse conditions in the markets for securities of companies in the Japanese financial sector may limit SMBC's ability to improve its capital ratios through the issuance of securities in favourable terms. Consequently, there can be no assurance that SMBC will be able to maintain its Tier I and total capital ratios at or above 4 per cent. and 8 per cent., respectively, in the future.

## **Competition**

In recent years in Japan, both weak demand for loan financing and deregulation of interest rates has intensified competition for SMBC, primarily from the other city banks (a group of six banks that are considered to be the largest and most influential group of banks in Japan). At the same time, large Japanese corporations have increasingly raised funds through the capital markets and, as a consequence, have relied to a lesser extent on city banks, such as SMBC, as sources of finance. Internationally, SMBC faces intense competition from major commercial banks.

Additionally, the deregulation of banking activities in Japan, and more generally the Japanese financial system, has accelerated over the past several years. This deregulation is altering two structural features of Japan's financial system: (i) the separation of banking and securities businesses and (ii) distinctions among the permissible activities of Japan's three principal types of private banking institutions: ordinary banks (including both city banks, of which SMBC is one of six, and regional banks), trust banks and long-term credit banks. Additionally, SMBC faces competition from certain government entities, including Japan Post, the Japan Finance Corporation for Small Businesses and the Government Housing Loan Corporation.

Article 65 of the Securities and Exchange Law separates banking business and securities businesses. However, banks in Japan (including SMBC), like their counterparts in the United States, have been seeking authorisation to combine traditional commercial and investment banking activities in order to offer customers a wider range of services. Conversely, securities firms are seeking the authority to engage in activities that have been considered banking activities and have been prohibited. The present policy of the Japanese government is to reduce the barriers between banking and securities businesses in Japan, and SMBC expects increased competition among financial institutions in new areas of permissible activities. The Financial System Reform Law (Law No. 87 of 1992) and the subsequent amendment to the Banking Law now permit banks to establish, or otherwise own domestic and overseas subsidiary securities companies (with the approval of the FSA) to engage in securities business.

As a result of the deregulation of the banking sector, companies without prior banking operations have formed new banks. For example, in 2001 the banking subsidiaries of Sony Corporation (an electronics manufacturer) and Ito-Yokado Co., Ltd. (a supermarket operator) commenced operations to offer banking services to consumers. Sony Bank is an Internet based bank focusing on fund-management services. IY Bank

uses automated teller machines installed in convenience stores operated by Seven-Eleven Japan Co., Ltd. as its main service access point.

Within the Japanese consumer banking sector, the continuing deregulation of interest rates on yen deposits has enabled banks to offer customers an increasingly attractive and diversified range of new products. SMBC faces competition in this sector from the other city and regional banks as well as from Japan Post, a Japanese public corporation (formerly the Postal Saving Bank, a Japanese government entity) (and the world's largest holder of deposits), that traditionally has had significant competitive advantages over Japanese banks due in large part to its ability to offer fixed interest rates on deposits for terms of up to ten years while allowing depositors to withdraw their funds after only six months. Recently, Japanese banks have started competing with one another by developing innovative proprietary computer technologies that allow them to deliver basic banking services in a more efficient manner and to create sophisticated new products in response to customer demand. In connection with a significant restructuring of its domestic network, SMBC is implementing a plan to replace many of its retail branch offices with specialised distribution facilities and to incorporate advanced technologies to offer new services to its retail customers, such as telephone banking and Internet banking.

In international markets, SMBC faces competition from other commercial banks and similar financial institutions, particularly major international banks and the leading domestic banks in those financial markets outside Japan in which SMBC conducts business.

### Property

SMBC owns or leases the land and buildings in which it conducts its business. Most of the property in which SMBC operates in Japan is owned by SMBC. In contrast, SMBC's international operations are conducted out of leased premises.

As at March 31, 2003, the property owned by SMBC was as follows:

|                        | <u>Land</u><br><u>(square metres)</u> |
|------------------------|---------------------------------------|
| Branch network .....   | 235,557                               |
| Other facilities ..... | <u>746,309</u>                        |
| Total .....            | <u><u>981,866</u></u>                 |

### Legal Matters

SMBC is a party to litigation concerning regional bank taxes.

On March 30, 2000, the Tokyo Metropolitan Government legislated an ordinance to introduce regional bank taxes based on banks' gross banking profit for five years. SMBC has incurred ¥55.0 billion (subject to adjustment) in expenses relating to the Tokyo regional bank tax since its inception. On March 26, 2002, the Tokyo District Court adjudicated that the regional bank tax ordinance of the Tokyo Metropolitan Government was founded on a misapplication of local tax law and is therefore invalid. On March 29, 2002 the metropolitan government lodged an appeal with the Tokyo High Court against the decision, and on April 9, 2002 the plaintiff banks at the first trial including SMBC also lodged an appeal. SMBC won the second-trial case eventually on January 30, 2003 with a decision of the Tokyo High Court in SMBC's favour, on the grounds that the metropolitan ordinance was illegal. The High Court ordered the metropolitan government to return to SMBC its advance tax payments of ¥36,175 million. On February 10, 2003 the metropolitan government lodged a final appeal with the Supreme Court against the decision, and on February 13, 2003 the plaintiff banks at the first trial including SMBC also lodged a final appeal.

The Osaka Prefecture has also introduced a similar bank tax effective as of June 9, 2000 which, if determined to be valid and if enforced, would adversely affect the profitability and financial health of SMBC. On April 4, 2002 SMBC filed a lawsuit with the Osaka District Court against the Osaka municipal government and the Governor of Osaka seeking to avoid the municipal ordinance. SMBC has not incurred any expenses relating to the Osaka regional bank tax yet because revised municipal ordinances which took effect in May 30, 2002 and March 25, 2003 deferred the application of special treatment regarding tax basis to the fiscal year starting April 1, 2003. The introduction of other regional bank taxes similar to those introduced in Tokyo and Osaka, if

determined to be valid and if enforced, would adversely affect SMBC (see Note 24 of the Notes to the Consolidated Financial Statements as of and for the year ended March 31, 2003).

SMBC is party to other routine litigation incidental to its business, none of which is currently expected to have a material adverse effect on SMBC's financial condition or results of operations.

## MANAGEMENT AND EMPLOYEES

### SMFG's Management

Under SMFG's corporate governance system, its Board of Directors is in charge of supervising the business operations of the SMFG group as a whole, and has established three board committees to assist SMFG's Board of Directors in exercising its management responsibilities. Those committees are the risk management committee, the compensation committee and the nominating committee. SMFG's Board of Directors is comprised of eight directors, two of whom are outside directors as defined under the Commercial Code, and its Board of Corporate Auditors is comprised of five corporate auditors, three of whom are outside corporate auditors as defined under current Japanese law.

The following persons occupy the indicated positions at SMFG:

| <u>Name</u>                               | <u>Title</u>                          |
|---|---------------------------------------|
| Akishige Okada <sup>(1)</sup> .....       | Chairman of the Board                 |
| Yoshifumi Nishikawa <sup>(1)</sup> .....  | President and Chief Executive Officer |
| Hideharu Kadowaki <sup>(2)</sup> .....    | Deputy President                      |
| Koji Ishida <sup>(2)</sup> .....          | Managing Director                     |
| Masahide Hirasawa <sup>(1)</sup> .....    | Director                              |
| Mitsuaki Yahagi <sup>(1)</sup> .....      | Director                              |
| Yoshiaki Yamauchi <sup>(2)(3)</sup> ..... | Director                              |
| Yoichiro Yamakawa <sup>(2)(3)</sup> ..... | Director                              |
| Toyosaburo Hirano <sup>(1)</sup> .....    | Corporate Auditor                     |
| Sadao Kobayashi <sup>(1)</sup> .....      | Corporate Auditor                     |
| Shoh Nasu <sup>(2)</sup> .....            | Corporate Auditor                     |
| Katsuya Onishi <sup>(1)</sup> .....       | Corporate Auditor                     |
| Josei Itoh <sup>(2)</sup> .....           | Corporate Auditor                     |

(1) Holds positions both at SMFG and at SMBC.

(2) Holds a position at SMFG only.

(3) Outside director as defined under the Commercial Code.

SMFG's Board of Directors has ultimate responsibility for the administration of SMFG's affairs. The Corporate Auditors (who are not required to be and are not certified public accountants) have the statutory duty to examine the financial statements and business reports submitted by the Board of Directors to the shareholders and also to supervise the administration by the Directors of SMFG's affairs in accordance with the auditing policy and rules relating to the execution of Corporate Auditors' duties as prescribed by resolutions of the Board of Auditors. All Directors and Corporate Auditors are elected by the shareholders of SMFG at general meetings. The normal term of office for Directors is two years and the normal term of office for Corporate Auditors is four years (and three years with respect to Corporate Auditors elected prior to June 27, 2003), but Directors and Corporate Auditors may serve any number of consecutive terms.

Three subcommittees of SMFG's Board of Directors were created to enhance the ability of the Board of Directors to oversee the operations of SMFG: the risk management committee, the compensation committee and the nominating committee. The risk management committee supervises and reports to SMFG's Board of Directors on overall risk management policies, market and liquidity risk management policies, credit risk management policies, related risk management systems and other issues with a potential material impact on operations. The compensation committee supervises and reports to SMFG's Board of Directors on the remuneration of the members of the Board of Directors and other key personnel of both SMFG and its subsidiaries, and other issues related to remuneration, salaries and incentive plans. The nominating committee supervises and reports to SMFG's Board of Directors on the selection of directors, the selection of representative directors, and issues related to the appointment of the President and other key personnel of both SMFG and its subsidiaries.

### SMBC's Management

SMBC's Board of Directors has ultimate responsibility for the administration of SMBC's affairs and provides effective oversight of operations. In order to distinguish between operational management and oversight functions, SMBC operates a Management Committee that is a decision-making institution responsible for operational matters. The President chairs the Management Committee and appoints executive officers to it. In

addition, SMBC operates an Internal Audit Unit that has responsibility for conducting internal audits on an objective basis in a process that is separate from the oversight provided by the Board of Directors. The Internal Audit Unit also acts independently from the business units. As a consultative body to the Chairman of the Board and the President, SMBC also operates the Advisory Board, described below. The Chairman of the Board of Directors is prohibited from assuming direct responsibility for operational duties and his primary duty is to oversee and control.

The Corporate Auditors (who are not required to be and are not certified public accountants) have the statutory duty to examine the financial statements and business reports submitted by the Board of Directors to the shareholders and also to supervise the administration by the Directors of SMBC's affairs in accordance with the auditing policy and rules relating to the execution of Corporate Auditors' duties as prescribed by resolutions of the Board of Auditors. All Directors and Corporate Auditors are elected by the shareholders of SMBC at general meetings. The normal term of office for Directors is two years and the normal term of office for Corporate Auditors is four years (and three years with respect to Corporate Auditors elected prior to June 27, 2003), but Directors and Corporate Auditors may serve any number of consecutive terms.

SMBC is required to appoint independent certified public accountants, who are elected at a general meeting of shareholders and who have as their primary statutory duties the examination of the financial statements prepared in accordance with the Commercial Code and approved by the Board of Directors, and the reporting of their opinion thereon to the Board of Auditors and to the Representative Directors for notification to the shareholders. Examination by independent certified public accountants of the financial statements of SMBC is also required for the purpose of the securities report filed through the Kanto Local Finance Bureau to the Prime Minister for public inspection in accordance with the Securities and Exchange Law. SMBC's independent certified public accountants for such purposes are Asahi & Co.

The names and titles of the Directors and Auditors of SMBC as at the date of this Offering Circular are as follows:

| <u>Name</u>                    | <u>Title</u>                          |
|--------------------------------|---------------------------------------|
| Akishige Okada . . . . .       | Chairman of the Board                 |
| Yoshifumi Nishikawa* . . . . . | President and Chief Executive Officer |
| Takeharu Nagata* . . . . .     | Deputy President                      |
| Masayuki Oku* . . . . .        | Deputy President                      |
| Hiroyasu Ichikawa* . . . . .   | Senior Managing Director              |
| Teisuke Kitayama* . . . . .    | Senior Managing Director              |
| Shigetada Takahashi* . . . . . | Senior Managing Director              |
| Mutsuhiko Matsumoto* . . . . . | Senior Managing Director              |
| Toichiro Mizushima* . . . . .  | Senior Managing Director              |
| Morio Kusunoki* . . . . .      | Managing Director                     |
| Koichi Tsukihara* . . . . .    | Managing Director                     |
| Masahide Hirasawa* . . . . .   | Managing Director                     |
| Mitsuaki Yahagi* . . . . .     | Managing Director                     |
| Kazutoshi Katsumata . . . . .  | Corporate Auditor                     |
| Tetsuro Taniguchi . . . . .    | Corporate Auditor                     |
| Katsuya Onishi . . . . .       | Corporate Auditor                     |
| Toyosaburo Hirano . . . . .    | Corporate Auditor                     |
| Sadao Kobayashi . . . . .      | Corporate Auditor                     |

\* Also acting as an Executive Officer.

All of the above Directors are engaged in the business of SMBC on a full-time basis. The business address of the Directors of SMBC is 1-2, Yurakucho 1-chome, Chiyoda-ku, Tokyo 100-0006.

SMFG has issued to various Directors and members of senior management of both SMFG and SMBC stock options, representing the right to purchase an aggregate of 1,620 of SMFG's common stock.

In July 2001, SMBC established an Advisory Board composed of individuals from the business and academic communities who are independent of the SMBC Group. The board serves as an advisory body to the Chairman of the Board and the President and Chief Executive Officer. As such, the Advisory Board provides a broad range of advice to management issues and strategies as well as insights on trends and issues in the financial

services industry for consideration when making top management decisions. As at the date of this Offering Circular, the following individuals were members of the Advisory Board:

| <u>Name</u>             | <u>Title</u>  |
|-------------------------|---|
| Shoichiro Toyoda .....  | Honorary Chairman and Member of the Board, Toyota Motor Corporation |
| Naohiko Kumagai .....   | Senior Advisor to the Board, Mitsui & Co., Ltd.                     |
| Tetsuro Kawakami .....  | Senior Advisor, Sumitomo Electric Industries, Ltd.                  |
| Toshiomi Uragami .....  | Senior Advisor, Sumitomo Life Insurance Company                     |
| Yoshinori Yokoyama..... | Former Director, McKinsey & Company, Inc. Japan                     |

### **Employees**

As at March 31, 2003, SMBC had 24,024 employees (excluding temporary, part-time and overseas local staff). SMBC reduced the number of its employees in excess of its original projections.

Most of the employees of SMBC are members of the Sumitomo Mitsui Banking Corporation Workers' Union, which negotiates with SMBC concerning remuneration and working conditions. The Union is affiliated with the Federation of City Bank Workers' Unions. SMBC considers its labour relations to be excellent.

SMBC considers its level of remuneration, fringe benefits (including an employee share ownership programme), working conditions and other allowances, which include lump-sum payments and annuities to employees upon retirement, to be generally competitive with those offered in Japan by other large enterprises.

## SUBSIDIARIES, AFFILIATES AND ASSOCIATED COMPANIES

SMBC offers many of its banking and related services through subsidiaries and affiliates. At March 31, 2003, SMBC had 81 subsidiaries and 9 affiliates in Japan and 40 subsidiaries and 13 affiliates outside of Japan. In total, the accounts of 114 of SMBC's subsidiaries were consolidated with those of SMBC and 4 subsidiaries and 12 affiliates were accounted for by the equity method. The consolidated accounts of SMBC do not include the accounts of other subsidiaries or affiliates which would not have a material impact on such consolidated accounts.

The following table sets forth certain information with respect to certain of SMBC's subsidiaries, affiliates and associated companies as at the date of March 31, 2003:

### Domestic

| Company Name  | Issued<br>Capital<br>(Millions<br>of yen) | Percentage<br>of Voting<br>Rights* | Established        | Main Business   |

## THE JAPANESE BANKING SYSTEM

The Japanese banking system is broadly divided into three groups: a central bank, public financial institutions, and private-sector banking institutions. The Bank of Japan is the Japanese central bank and has responsibility for the regulation of currency, the control and facilitation of credit and finance and the maintenance and development of the credit system. See “Supervision and Regulation — Japan — The Bank of Japan”. There are a number of public financial institutions, such as the Development Bank of Japan and the Japan Bank for International Cooperation, which have been organised in order to provide funding for specific matters, and to supplement the activities of the private-sector banking institutions. Their funds are provided mainly from government sources.

Private banking institutions in Japan are classified into three categories as at March 31, 2003: (i) ordinary banks, of which there are 122, not including 73 foreign commercial banks with banking operations in Japan; (ii) trust banks, of which there are 27, including 23 Japanese subsidiaries of foreign financial institutions and subsidiaries of Japanese financial institutions; and (iii) long-term credit banks, of which there are 2. Ordinary banks in turn are classified as city banks, of which there are 6, including SMBC, and regional banks, of which there are 116, including member banks of the second association of regional banks that were originally mutual loan and savings (*sogo*) banks.

In general, the operations of ordinary banks correspond to commercial banking operations in the United States or Europe. Their main sources of funds are deposits from the public. City banks and regional banks are distinguished on the basis of head office location as well as the size and scope of their operations.

The city banks are generally considered to be the largest and most influential group of banks in Japan. These banks are based in either Tokyo, Osaka or Nagoya, and operate domestically on a nationwide scale through networks of branch offices. City banks, unlike regional banks, have strong links with large corporate clients, including the major industrial companies in Japan; however, in light of deregulation and other competitive factors, many of these banks (including SMBC) have placed increasing emphasis on other markets, including small to medium-sized companies, retail banking, international operations and, more recently, investment banking and related services.

With some exceptions, the regional banks tend to be much smaller in terms of total assets than the city banks. Each of the regional banks is based in one of the Japanese prefectures and may extend its operations into neighbouring prefectures. Their clients are mostly regional enterprises and local public utilities, although the regional banks also lend to large corporations.

Both long-term credit banks and trust banks have been engaged primarily in providing long-term loans to Japanese industry, principally with funds obtained from the issue of debentures in the case of the long-term credit banks and beneficiary certificates in the case of the trust banks. Other banks also make long-term loans.

There are 73 foreign banks operating banking businesses in Japan. They are subject to a statutory framework similar to the regulation of Japanese domestic banks. Their principal sources of funds come from their overseas head offices or other branches.

Certain other private-sector financial institutions in Japan, including agricultural and marine cooperative financial institutions, credit associations and credit unions, are mainly engaged in making loans to small businesses and individuals.

Another distinctive element of the Japanese banking system is the role of the postal savings system. Postal savings deposits are gathered through the network of post offices throughout Japan. The Japan Post Law and three other related laws were promulgated on July 31, 2002, and as a result, Japan Post took over postal services, including postal savings, as at April 1, 2003. The postal savings system offers a variety of types of deposits, at interest rates that are set by Japan Post in accordance with the policy of determination of interest rates approved by the Minister of Public Management, Home Affairs, Posts and Telecommunications with some reference to the market-based interest rates of the private-sector banks. The funds are used to finance various government activities and investments in the public sector. As at March 31, 2003, the balance of deposits with the postal savings system was approximately ¥233.2 trillion, representing approximately one-third of all household deposits in Japan.

The present banking system evolved from measures adopted as part of the reconstruction of the Japanese economy after World War II. Such reconstruction, as it applied to financial markets, was initially guided by such principles as the separation between long-term and short-term financing, the separation of trust banking from other types of banking, and the separation of banking from the securities business. However, in 1992, the Financial System Reform Law was passed and removed many of the legal barriers between various segments of

the financial services industry. As a result of this legislation and the subsequent modifications to the relevant laws and regulations (including those which enabled city banks themselves to engage in the trust business, effective February 2002), ordinary banks, trust banks and long-term credit banks, directly or through subsidiaries, may now engage in securities activities, and ordinary banks and long-term credit banks may engage in certain trust banking business without restrictions. In turn, securities companies may perform a full range of banking and certain trust banking functions through subsidiaries. In addition, the prohibition on bank holding companies was lifted in March 1998, and the prohibition on issuances by an ordinary bank of corporate bonds was completely lifted in October 1999.

Commencing December 1998, the barrier between banking and insurance businesses has also been gradually lifted, and now banks and insurance companies can engage in the other business through subsidiaries. Also, since April 2001, banks themselves have been permitted to sell certain insurance products, and the scope of such insurance products permitted to be sold by banks were expanded in October 2002.

In addition, the recent injection of significant public funding into many Japanese banks has substantially increased the overall level of the national government's ownership in the banking sector, which may produce unforeseen effects on competitive conditions, economic health and further deregulation in the industry.

## SUPERVISION AND REGULATION

### Japan

Pursuant to the Banking Law, the FSA is given authority to supervise banks, bank holding companies and bank's principal shareholders (being shareholders of a bank having 20 per cent. (or 15 per cent. in certain cases) or more of the voting rights of a bank) in Japan. The Bank of Japan also has supervisory authority over banks in Japan based primarily on its contractual agreements and transactions with Japanese banks. Only companies licenced by the Prime Minister are defined as banks under the Banking Law, and only a *kabushiki kaisha* (a stock corporation) with paid-up capital of ¥2 billion or more may be licenced as such.

#### *The Financial Services Agency*

*Scope of Supervision.* The FSA has had supervisory control over the banks and bank holding companies in Japan since July 1, 2000. The FSA was established on July 1, 2000 through the integration of the Financial Supervisory Agency (which had supervisory control over banks and exercised the power of control delegated from the FRC) and the Financial System Planning Bureau of the Ministry of Finance (which had the function of planning and drafting related bills) pursuant to the Central Government Reform Fundamental Law which was enacted in June 1998. The FRC, which had controlled the Financial Supervisory Agency, was abolished in January 2001 and the authority of the FRC was transferred to the Prime Minister, who, under the Banking Law, transferred such authority to the FSA. As a result, all the functions of supervision of financial institutions were unified in the FSA, except that in cases in which systemic risk is anticipated, the Prime Minister retains the authority to take necessary measures after consulting with the Conference for Financial Crisis Countermeasures. Under the Banking Law, the FSA's supervisory control over banks, bank holding companies and bank's principal shareholders in Japan extends to various areas, including approval of applications for licences to operate a bank or bank holding company, approval of becoming a principal shareholder, approval of reductions in capital, approval of changes of corporate name, approval of the establishment or closure of overseas offices, approval of establishment or acquisition of certain subsidiaries and acquisition of more than 5 per cent. of the voting rights in Japanese companies other than subsidiaries, approval of mergers, corporate splits or business transfers, and approval of dissolutions or discontinuations of business by existing banks. The FSA also has the authority to revoke banking licence or to instruct Japanese banks to suspend their business or to remove directors if such banks violate laws, other regulations or their articles of incorporation or commit acts contrary to public policy and, in the case of Japanese banks which are in financial difficulty, to direct such banks to hold certain property in Japan for the protection of depositors and to issue such other orders as it may deem necessary. Under the "prompt corrective action" system, the FSA may take certain corrective actions in the case of capital deterioration of financial institutions. These actions include (i) requiring a financial institution to formulate and implement reform measures, (ii) requiring it to reduce its assets or take other specific actions and (iii) issuing an order suspending all or part of its business operations.

The Ministry of Finance and the FSA have, in the past several years, introduced a number of deregulatory measures into the banking sector in Japan, as well as measures to increase the transparency of the regulatory process, including the following:

*Credit Limit.* The Banking Law restricts the aggregate amount of loans, guarantees and capital investments to any single customer for the purposes of avoiding excessive concentration of credit risks and promoting a fair and extensive utilisation of bank credit. The limit applicable to an ordinary bank in respect of aggregate exposure by such bank to any single customer is established by a cabinet order and by the Banking Law, and is currently 40 per cent. (or 25 per cent. if such customer is a principal shareholder of the bank) of such bank's total qualifying capital in respect to aggregate exposure to any single customer including certain of such customer's affiliates or 25 per cent. (or 15 per cent. if such customer is a principal shareholder of the bank) of such bank's total qualifying capital in respect to aggregate exposures to any single customer not including such customer's affiliates. The same restriction applies to a bank group on a consolidated basis. The aggregate exposure by a bank group (the bank, its subsidiaries and certain affiliates) to a single customer and a customer including certain of such customer's affiliates is 25 per cent. and 40 per cent., respectively (or 15 per cent. or 25 per cent., respectively, if such customer is a principal shareholder of the bank), of the total qualifying capital of such group companies.

*Disclosure.* Under the Banking Law, banks and bank holding companies are required to disclose their non- and under-performing loans (consolidated and non-consolidated) as "risk-monitored loans". Risk-monitored loans are classified under the Banking Law into four categories: (i) bankrupt loans, (ii) non-accrual loans, (iii) past due loans (three months or more) and (iv) restructured loans. Banks and bank holding companies are required to submit annual and semi-annual reports to the FSA on their business including the amount of such

loans. Also, as to the corporate disclosure as a whole, banks and bank holding companies are required to disclose their financial statements consisting of the balance sheet and income statement, and the explanatory documents regarding their business and asset conditions, each prepared under the Banking Law both on a non-consolidated and consolidated basis. The requirement of consolidated financial disclosure was made applicable commencing the year ended March 31, 1999. In addition, independent of the Banking Law disclosure regulations, the Financial Reconstruction Law requires banks to disclose their problem assets. Under the Financial Reconstruction Law, assets are classified into four categories: (i) bankrupt and quasi-bankrupt assets, (ii) doubtful assets, (iii) substandard loans and (iv) normal assets. Generally, bankrupt and quasi-bankrupt assets correspond to the total of bankrupt loans and the lower tier of the non-accrual loans (the borrowers of which are effectively bankrupt) under the Banking Law disclosure. Doubtful assets generally correspond to the higher tier portion of the non-accrual loans (the borrowers of which are not, but have the potential to become, bankrupt). The substandard loans generally correspond to the total of the restructured loans and past due loans (three months or more). Bankrupt and quasi-bankrupt assets and doubtful assets also include non-loan assets, such as securities lending, foreign exchange, accrued interest, advanced payments and customers' liabilities for acceptances and guarantees.

In addition, the FSA has announced that it will provide for more rigorous assessment of assets. See "Recent Events — Recent Regulatory Developments — Tightening of Assessment of Assets".

*Reserves.* Based on the Accounting Standards for Banks issued by the Japanese Bankers Association, SMBC, for statutory purposes, establishes three categories of reserves: (i) general reserve, (ii) specific reserves and (iii) reserves for specific overseas loan losses.

The general reserve is established to account for an amount at a certain rate of the aggregate amount of certain outstanding loans of SMBC at each balance-sheet date. For Japanese taxation purposes until March 31, 1998, SMBC was able to choose as a tax-deductible reserve, either the fixed rate of 0.3 per cent. of the aggregate outstanding amount of certain loans as specified by Japanese tax regulations at each balance sheet date or any rate not exceeding the average loan loss ratio of SMBC for the previous three fiscal years. As a consequence of amendments to Japanese tax law effective April 1, 1998, the fixed rate of 0.3 per cent. applicable to tax-deductible reserves has been abolished subject to limited exceptions. Up until March 2003, SMBC was able to select a fixed rate subject to the gradual reduction of such rate until its elimination after March 2003. Specific reserves are established for specific loans, the repayment of which is considered materially doubtful, in the same amounts as the amount of the expected losses on such loans. Reserves for specific overseas loan losses are maintained to provide for possible losses on loans to certain countries which are classified as restructuring countries.

Due to the introduction of the new self-assessment rule of the credit quality of the assets of financial institutions, including SMBC, as well as the "prompt corrective actions" system, SMBC may establish such amount of any reserves for its loan portfolio as may be considered adequate by SMBC at a balance sheet date.

In January 1999, the FRC announced its guidelines concerning write-offs and reserves in respect of problem loans required of the large banks, which applied for capital injection pursuant to the Financial Function Early Strengthening Law and Financial Reconstruction Law. Thereafter, the FSA issued operating guidelines, the Financial Inspection Manual, on inspection of financial institutions including credit-risk management and the standards concerning write-offs and reserves. Although the Financial Inspection Manual itself does not have the force of law, the FSA inspection of banks is based on the Manual. As a result of such inspection, the FSA may exercise its authority over banks under the Banking Law to suspend or terminate their banking business.

The FSA also issued non-binding guidelines to clarify their interpretation and enforcement policies of the Banking Law and related regulations. It also discloses the results of its investigations of banks and other financial companies.

*Examination of Banks.* The Banking Law authorises the FSA to inspect banks and bank holding companies in Japan at any time with any frequency but in practice inspections occur once a year, conducted by officials from the Inspection Department of the FSA. From January through March of 2002, the FSA conducted a special inspection of the major 13 banks (7 city banks, including SMBC, 5 trust banks and a long-term credit bank), as to how banks should properly classify their borrowers according to the credit risks. As a result, ¥7.5 trillion out of ¥12.9 trillion of all credit receivables subject to the inspection were downgraded from the classifications given by such banks as at September 2001. The FSA conducted a further special round of inspections for the year ended March 31, 2003 focusing on 11 major Japanese banks, including SMBC. The inspection covered 167 borrowers across 11 banks. As a result of the further special round of inspections, the FSA downgraded a total of

27 borrowers (compared to the classifications given by such banks as at September 2002) and reclassified a total of 7 borrowers as “potentially bankrupt borrowers”.

In addition, the Ministry of Finance conducts examinations of banks in relation to foreign exchange transactions under the Foreign Exchange and Foreign Trade Law. Such examinations are conducted normally once every few years.

Furthermore, the Bank of Japan conducts examinations of banks similar to those undertaken by the FSA. Such examinations are normally conducted once every few years. Notice is served prior to the examiner’s visit. The inspection is conducted for the purposes of checking day-to-day operations and giving pertinent advice.

### ***Deposit Insurance System***

In 1971, the Deposit Insurance Law was enacted in order to protect depositors in cases where financial institutions fail to meet their obligations. The Deposit Insurance Corporation (“DIC”) was established to implement the law. The DIC was reformed, as part of the Japanese government’s plan to liquidate the *jusen* in accordance with legislation enacted in June 1996, by the creation of a special fund amounting to ¥1 trillion and the increase of its paid-up capital of ¥455 million to ¥5.45 billion. Currently the DIC is supervised by the FSA.

In April 2002, the Japanese government ceased to ensure time deposits over ¥10 million. As from April 2002, the DIC receives annual insurance premiums from ensured banks equivalent to 0.094 per cent. (as from April 2003, 0.09 per cent.) of the deposits held with current, savings and sundry accounts and 0.08 per cent. of the other deposits. A special insurance premium of 0.036 per cent. of deposits required for the years ended March 31, 1997 through 2002 to cover the costs for the insurance exceeding the otherwise applicable ¥10 million cut-off amount is no longer required upon discontinuation of the full coverage of the deposits. Premiums held by the DIC may be either deposited at financial institutions or used to purchase marketable securities. The insurance money may be paid out in case of suspension of repayments of deposits, banking licence revocations, dissolution or bankruptcy of a bank, to a maximum of ¥10 million of principal amount together with any interest accrued with respect to each depositor. Until March 31, 2005, however, the full amount of deposit exceeding the maximum of ¥10 million will be repaid only with respect to the current, savings and sundry accounts. Even after March 2005, non-interest bearing deposits that are redeemable upon demand and used by depositors primarily for payment and settlement functions will be protected in full. See “Recent Events — Recent Regulatory Developments — Extension of Deposit Guarantee”.

City banks (including SMBC), regional banks including member banks of the second association of regional banks, long-term credit banks, trust banks, credit associations, credit cooperatives and labour banks participate in the deposit insurance system on a compulsory basis.

### ***The Bank of Japan***

The Bank of Japan is the central bank of Japan and serves as the principal instrument for the execution of Japan’s monetary policy. The principal measures by which the Bank of Japan implements monetary policy are the adjustment of its discount rate, its operations in the open market and the imposition of deposit reserve requirements. All ordinary banks in Japan maintain deposits with the Bank of Japan and rely substantially upon obtaining borrowings from, and rediscounting bills with, the Bank of Japan. Moreover, all banks in Japan maintain current accounts under agreements with the Bank of Japan pursuant to which the Bank of Japan is entitled to supervise, examine and audit the banks. The supervisory functions of the Bank of Japan enable it to seek to execute monetary policy effectively, while the FSA’s supervisory practices have the purpose of maintaining the sound operations of banks in Japan and of promoting the security of depositors.

In June 1997, the law establishing the Bank of Japan was amended with the intention of granting greater independence to the Bank of Japan with respect to, *inter alia*, the setting of interest rates and giving additional power to aid financial institutions with liquidity problems. The amendment came into effect on April 1, 1998. Under the amended law, the Bank of Japan’s examination of banks is given a more transparent statutory basis.

### ***The Securities and Exchange Law***

Article 65 of the Securities and Exchange Law was intended to clearly separate the commercial banking and securities business in Japan. Under this law, banks, including SMBC, may not engage in any securities business except for certain approved activities. The Securities and Exchange Law now allows banks to underwrite and deal in JGBs, Japanese local government bonds, Japanese government guaranteed bonds, commercial paper and certain bonds issued by special purpose companies; to sell beneficiary certificates of security investment trusts and investment securities in a security investment company; and to engage in listed or over-the-counter securities

derivatives transactions subject to the registration with or the approval of the FSA. The securities business is defined to include dealing, brokerage, underwriting and distribution of securities.

The Financial System Reform Law (which came into effect in April 1993) permits financial institutions and securities firms to compete through subsidiaries. Banks and other depository institutions are now allowed to set up securities subsidiaries and, within limits, compete in the securities industry. The Financial System Reform Act (the "Reform Act") in June of 1998, effective October 1999, made further substantial amendments to the Securities and Exchange Law, the Banking Law and related laws and abolished the provision in the Financial System Reform Law which had prohibited bank-owned securities subsidiaries from engaging in the securities business involving equity securities. In addition, as at April 1, 1999, some of the restrictions on the activities of a bank-owned securities subsidiary and its parent bank, so-called "fire wall restrictions" which were aimed at preventing such subsidiary's unfair use of its parent bank's business relationship with, and information of, its customers, were lifted or relaxed. The new "fire wall restrictions" include (i) a restriction preventing a bank-owned securities subsidiary from becoming a lead manager for the offering of corporate bonds where its parent bank is involved, (ii) prohibitions against joint visits to customers without disclosing the fact that a bank-owned securities company is an entity separate from its parent bank and (iii) the prohibition against the joint use of computer information processing systems by a bank-owned securities company and its parent bank.

SMBC, as well as SMFG which is a listed company, is required to file an annual "Securities Report" for each fiscal period with the Kanto Local Finance Bureau (authorised by the FSA). Such annual "Securities Reports" are supplemented by semi-annual and extraordinary reports, which must be prepared on a consolidated basis, pursuant to the Securities and Exchange Law.

#### ***Other Deregulation***

In connection with the so-called Japanese "Big Bang" proposals announced in November 1996 by the then current prime minister of Japan, various proposals have been made by the government and other bodies for the further deregulation of the Japanese financial market and the improvement of the soundness of Japanese financial institutions. Recent deregulations include:

(i) Effective October 1999, city banks were allowed to issue straight senior bonds following the abolishment of Ministry of Finance's operational regulations, which had prohibited city banks from issuing such bonds. Also, effective as of June 30, 1997, ordinary banks are able to issue subordinated bonds.

(ii) Effective as of April 1, 1998, the restrictions were lifted on the maximum maturities of floating rate time deposits and on maturities of negotiable certificates of deposit.

(iii) Beginning in February 2002, the restrictions were relaxed on the business of trust banking subsidiaries and the trust business of banks so that banks and trust banking subsidiaries could engage in almost all aspects of the trust business except for brokerage/agency of sales/lease of real estate, certain other real estate-related businesses, estate administration and certain investment advisory businesses.

(iv) With the May 2000 amendment of the Insurance Business Law as from April 2001, banks became able to deal with several insurance products related to housing loans etc. as over-the-counter transactions. In addition, the scope of such over-the-counter transactions has been expanded to private pensions as of October 2002.

(v) From September 2002, banks and their securities subsidiaries were permitted to jointly use the same premises.

#### ***Bank Holding Company***

While the Anti-Monopoly Law provision which prohibits a bank from holding more than 5 per cent. of another company's voting rights does not apply to a bank holding company which is, however, subject to general shareholding restrictions under the Anti-Monopoly Law, the Banking Law prohibits a bank holding company and its subsidiary, on aggregated basis, from holding more than 15 per cent. of the voting rights of certain types of companies which are not permitted to become subsidiaries of bank holding companies.

#### ***Prompt Corrective Action and Self-Assessment***

Pursuant to amendments to the banking laws enacted in June 1996, the Prompt Corrective Action ("PCA") system has been effective as from April 1, 1998. Under such banking laws, as so amended, and regulations recently issued thereunder, the FSA may, depending upon the extent of the capital deterioration of a financial institution, take certain corrective actions such as requiring a financial institution to formulate and implement

reform measures, or requiring it to reduce assets or take other specific actions or suspend all or part of its business operations. The PCA system also requires financial institutions to establish “self-assessment” programmes. Financial institutions, including SMBC, are required to analyse their assets giving due consideration to accounting principles and other applicable rules and to classify their assets into various categories taking into account the likelihood of repayment and the risk of impairment to the value of the assets. These classifications will determine whether an addition to or reduction in reserves or write-offs is necessary.

Based on the amendments to the banking laws referred to above, the Japan Institute of Certified Public Accountants issued new guidelines for the accounting practices for Japanese banks in April 1997. Pursuant to such guidelines based on the outcome of each financial institution’s self-assessment, substantially all of a bank’s loans and other claims on customers are to be analysed by classifying obligors into five categories: normal borrowers, borrowers requiring caution, potentially bankrupt borrowers, effectively bankrupt borrowers and bankrupt borrowers. The reserves for possible loan losses are then calculated based on such obligor categories. Also in 1997, in connection with the PCA system, the Ministry of Finance issued guidelines on the Ministry of Finance’s examination of bank assets. Such guidelines require banks to classify their assets not only by the five categories of obligor described above but also by four categories of quality relevant assets. SMBC has adopted its own internal guidelines for self-assessment which conform to such guidelines currently in effect and comply with the requirements of the PCA system.

Under the PCA system, if the capital ratio of a bank or a bank holding company with international operations becomes less than 8 per cent. but not less than 4 per cent., the FSA may require such bank or a bank holding company to submit and implement a capital reform plan.

If the capital ratio of a bank with international operations declines to less than 4 per cent. but not less than 2 per cent., the FSA may order such bank to (i) submit and implement a plan for improving its capital; (ii) prohibit or restrict the payment of dividends to shareholders or bonuses to officers; (iii) reduce its assets or restrict the increase of its assets; (iv) prohibit or restrict the acceptance of deposits under terms less advantageous than ordinary terms; (v) reduce the business of some offices; (vi) eliminate some offices other than the head office or (vii) take certain other actions. If the capital ratio of a bank with international operations declines to less than 2 per cent. but not less than 0 per cent. the FSA may order such bank to conduct any one of the following: (i) an increase of its capital; (ii) a substantial reduction in its business; (iii) a merger; or (iv) abolishment of its banking business. If the capital ratio of a bank with international operations declines to less than 0 per cent., the FSA may order such bank to suspend all or part of its business.

If the capital ratio of a bank holding company that holds a bank with international operations declines to less than 4 per cent., the FSA may take actions similar to the foregoing.

In May 2003, Resona Holdings, the bank holding company for Resona Bank, a bank only with Japanese domestic operations, received orders from the FSA to submit and implement a plan for improving its capital based on the reason that the capital ratio of Resona Bank declined to less than 4 per cent. which is the minimum capital ratio standard for a bank only with Japanese domestic operations. On June 10, 2003, the FSA announced that Resona Bank had made an application for recapitalisation and submitted a plan to regain soundness in its management under the amended Deposit Insurance Law and that the FSA had decided to subscribe for the shares of Resona Bank (subsequently to be converted into shares of Resona Holdings) in an aggregated amount of ¥1.96 trillion (see “— Amended Deposit Insurance Law”).

### ***Prompt Warning System***

A prompt warning system was introduced on December 10, 2002 to enable the FSA to take precautionary measures to maintain and promote the sound operations of financial institutions even before those financial institutions become subject to the prompt corrective action system. These measures require a financial institution to reform: (i) profitability, if deemed necessary to improve profitability based upon a fundamental profit index; (ii) credit risk, if deemed necessary to reform management of credit risk based upon the degree of large credits’ concentration and other situations, (iii) stability, if deemed necessary to reform management of market and other risks based upon the effect of securities price fluctuations and other fluctuations; and (iv) cash flow, if deemed necessary to reform management of liquidity risks based upon a deposit trend and level of reserve for liquidity.

### ***Accounting Changes for Investment Securities and Financial Products***

In January 1999, the Business Accounting Deliberation Council announced “Accounting Standards for Financial Instruments” which stipulated the scope of financial instruments, recognition and deletion of financial instruments, valuation methods, accounting for hedge transactions and accounting for composite financial

instruments. It was incorporated into the corporate disclosure regulations under the Securities and Exchange Law that are applicable to public companies as a “generally fair and acceptable accounting rule”. Under these standards, all the derivative financial instruments are basically valued at market value except for those qualifying as a hedge. Securities are classified into four categories: trading securities, held-to-maturity securities, investments in subsidiaries and affiliates and other securities. Trading securities shall be stated at market value and the unrealised gain or loss shall be recorded in the income statements. Held-to-maturity securities shall be stated at amortised cost. Investments in subsidiaries and affiliates shall be stated at cost. Other securities shall be stated at market value and the unrealised gain or loss shall be recorded as a separate component of stockholders’ equity. These new accounting standards have applied to SMBC since April 1, 2000, except the accounting standard with respect to other securities, which became effective as at April 1, 2001.

#### ***Accounting for the Impairment of Fixed Assets***

On August 9, 2002, the FSA provided a draft opinion from its advisory committee with respect to accounting for the impairment of fixed assets, including investment in real property (but excluding financial products and deferred tax assets). According to the draft opinion, an extraordinary loss must be recognised if the book value of the asset exceeds the expected aggregate undiscounted future cash flow from such asset. The amount to be recognised is the difference between the book value of the asset and the greater of: (i) the expected aggregate discounted cash flow from such asset; and (ii) the expected resale price for such asset. The draft opinion suggests that Japanese corporations will, at their option, be able to adopt this accounting method for the fiscal year commencing on or after April 1, 2004 and will be obliged to adopt it for all fiscal years commencing on or after April 1, 2005.

#### ***System for Resolving Failed Financial Institutions After April 2001***

In order to construct a permanent system for resolving failed financial institutions after April 2001, the Amendment Bill of the Deposit Insurance Law, as described hereinafter, was enacted as at May 24, 2000. Prior to such legislation, the system under the Financial Function Early Strengthening Law, (which provided for capital injection by the Japanese government to financial institutions), and the Financial Reconstruction Law, (which set forth the treatment of the failed financial institutions) had been in effect. The capital injection under the Financial Function Early Strengthening Law is no longer available and has been replaced with the relevant provisions of the amended Deposit Insurance Law, except for cases in which application was made prior to March 31, 2001. The Financial Reconstruction Law’s provisions for the treatment of failed financial institutions, including the nationalisation scheme and the Financial Reorganisation Administrator’s operation scheme, have been replaced with new schemes by the relevant provisions of the amended Deposit Insurance Law.

#### ***Amended Deposit Insurance Law***

- (i) General framework of resolution procedure.

The basic method of resolution for a failed financial institution under the Deposit Insurance Law is cessation of the business by paying insurance money to the depositors up to the principal amount of ¥10 million plus accrued interest (“pay-off”) per depositor or transfer of the business to another financial institution with financial aid provided within the cost of pay-off. Under the amended Deposit Insurance Law, transfer of business is regarded as the primary method. In order to effect a prompt transfer of business, the following framework has been introduced:

(1) The Financial Reorganisation Administrator will take control of the management and assets of a failed financial institution. Such administrator is expected to efficiently search for a financial institution which will succeed the business of such failed institution.

(2) In the case where no such successor financial institution can be immediately found, a “bridge bank” (a subsidiary of the DIC), will conduct the business of the failed bank for a certain period. As one of such bridge banks, the Japan Succession Bank was established and licenced by the FSA on March 19, 2002. On March 28, 2002, the Japan Succession Bank obtained the approval and order from the FSA with respect to its first succession of businesses from two failed financial institutions.

(3) In order to facilitate or encourage a financial institution to succeed a failed business, financial aid may be provided to the successor financial institution to enhance its capital after succession or to indemnify the loss incurred by such succession.

(ii) Addressing the possible financial crisis.

Where it is anticipated that the failure of a financial institution may cause an extremely grave problem in maintaining the financial function's order in the area where such financial institution is operating, the following exceptional measures may be taken after consulting with the Conference for Financial Crisis Countermeasures:

(1) The DIC may subscribe to the shares or other instruments issued by the relevant financial institution and require such institution to submit a plan to regain soundness in its management to the DIC.

(2) Once such financial institution fails, financial aid exceeding the cost for pay-off may be available to such institution.

(3) In the case where the failed institution is a bank and systemic risk cannot be avoided by the measure mentioned in (2) above, the DIC may acquire all of the shares of such bank.

In order to fund the above-mentioned activities, the DIC may make borrowings from financial institutions or issue bonds which may be guaranteed by the government.

(iii) Postponement of pay-off.

The temporary special measures to protect the full amount of time deposits (exceeding ¥10 million) were terminated at the end of March 2002. Pay-off commenced in April 2002.

The deposits with current, savings and sundry accounts will be fully protected until the end of March 2005. Non-interest bearing deposits that are redeemable upon demand and used by depositors primarily for payment and settlement functions will be protected in full even after March 2005.

#### ***Resolution and Collection Corporation***

The RCC was established in April 2001 as a wholly owned subsidiary of the DIC by merging the Housing Loan Administration Corporation ("HLAC"), which had engaged in the management of mortgages assigned from the *jusen*, and the Resolution and Collection Bank, which had engaged in the collection of loan receivables assigned from failed financial institutions. The RCC can now purchase under-performing loan receivables from not only the failed financial institutions but also healthy ones to increase the credibility of the Japanese financial system. The RCC is also specialised in the purchase and collection of under-performing loan receivables, and therefore is expected to collect them swiftly to compensate and effectively. The DIC will provide guarantees to the RCC to finance such business and the RCC for losses it incurred.

#### ***Restriction on Bank's Stockholding, the Bank-held Stock Acquisition Organisation and Direct Purchase by the Bank of Japan***

Effective September 30, 2004, banks and certain of their qualified subsidiaries and affiliates, on an aggregate basis, will not be able to hold stocks in an amount exceeding their Tier I capital amount (legislation to extend the effective date to September 30, 2006 is currently being deliberated by the Japanese parliament). Therefore, banks, including SMBC, will have to dispose of a considerable amount of stock, including cross-held stocks, by such date. In order to prevent a decline in stock prices resulting from the inflow of a large volume of such stocks into the market, the Bank-held Stock Acquisition Organisation ("Stock Purchasing Agency") was established on January 30, 2002 with the contribution of more than ¥10 billion from 128 financial institutions. The Stock Purchasing Agency commenced its operations in mid-February. Primarily, the Stock Purchasing Agency intends to purchase stocks that can be readily resold to third parties based upon demand. These transactions are booked in its "General Account." Other transactions are booked in the "Special Account," to which the following special rules will apply: the Stock Purchasing Agency's Special Account operations will be funded through loans from private banks or issue of debentures, both of which are government guaranteed; the Stock Purchasing Agency may only buy stock of issuers with a credit rating of BBB- (from Standard and Poor's Corporation, or an equivalent rating assigned by a rating agency designated by the FSA and the Ministry of Finance) or higher for its Special Account and the banks that sell their shares to the Stock Purchasing Agency must contribute 8 per cent. of the sale proceeds (legislation to abolish this requirement is currently being deliberated by the Japanese parliament), which will be applied to the losses suffered by the Stock Purchasing Agency as a result of the resale of such stocks. The purchase of stock by the Stock Purchasing Agency may be made until September 30, 2006. The Stock Purchasing Agency is scheduled to be liquidated within 10 years (legislation to extend the liquidation date to March 31, 2015 is currently being deliberated by the Japanese parliament).

In addition, in order to further facilitate the disposition of shares by banks holding large volume of shares, the Bank of Japan has commenced as at November 29, 2002 direct purchases of certain shares held by 15 large

banks, including SMBC. Such shares should be, in principle, listed shares of companies with a long-term debt rating of BBB– (from Standard and Poor’s Corporation, or an equivalent rating assigned by a rating agency designated by the Bank of Japan) or higher. The Bank of Japan is scheduled to continue direct purchases until the end of September 2003. If less than ¥3.0 trillion worth of shares has been purchased by the end of September 2003, then the deadline will be extended to the end of September 2004. The aggregate purchase amount will be up to ¥3 trillion. As of June 30, 2003, the Bank of Japan had purchased ¥1,486 billion worth of shares. As an additional condition, the Bank of Japan will only engage in direct purchases of shares where the selling bank’s equity holding exceeds such bank’s Tier I Capital. As at March 31, 2003 the market value of SMBC’s equity portfolio was lower than SMBC’s consolidated Tier I capital and as such, SMBC is not currently eligible for the direct purchase scheme. See “Recent Events — Recent Regulatory Developments — New Framework for Corporate Revival — Bank of Japan to Acquire Shares from Banks”.

#### *Certain Amendments to Commercial Code*

In June 2001, the Commercial Code was amended to relax the restrictions on liquidation of statutory reserve (consisting of, among others, proceeds of issued shares not included in the capital amount). Before the amendment, such statutory reserve could only be liquidated to remedy the impaired capital, or only transferred to the capital amount. The amendment enabled a corporation to dissolve such statutory reserve in excess of one fourth of the amount of the capital (in the case of a bank, under the Banking Law, this amount is increased to the amount equal to the capital amount), subject to the shareholders’ approval and the protective measures for the corporate creditors. The amount equal to the dissolved statutory reserve will be classified as a surplus and may be used in various ways, including for dividends. Such amendment took effect on October 1, 2001 and SMBC realised the benefit of this amendment by transferring ¥599 billion of its statutory reserve to retained earnings as of March 9, 2002.

#### *Capital Adequacy*

In 1988, the Basle Committee on Banking Supervision (the “Committee”), comprised of representatives of the Group of Ten (“G-10”) countries (including Japan) and Luxembourg, issued the Basle Accord. The Basle Accord, which was endorsed by the G-10 Central Bank Governors, also established a risk asset ratio as the principal measure of capital adequacy. This ratio compares a bank’s capital base, which is divided into two tiers, to its assets and off-balance sheet exposures adjusted according to broad categories of relative credit risk. The Basle Accord sets minimum international risk asset ratios, but national banking regulators are permitted to set additional ratios.

The capital adequacy guidelines currently supervised by the FSA and applicable to Japanese banks with international operations (the “Guidelines”) closely follow the risk-adjusted approach proposed by the Committee and are intended to further strengthen the soundness and stability of Japanese banks. Under the risk-based capital framework of the Guidelines, balance sheet assets and off-balance sheet exposures are assessed according to broad categories of relative risk, based primarily on the credit risk of the counterparty, country transfer risk and the risk regarding the category of transactions. Five categories of risk weights (0 per cent., 10 per cent., 20 per cent., 50 per cent. and 100 per cent.) are applied to the different types of balance sheet assets. Off-balance sheet exposures are taken into account by applying different categories of “credit conversion factors” to arrive at credit-equivalent amounts, which are then adjusted in the same manner as balance sheet assets involving similar counterparties (except that the maximum risk weight is 50 per cent. for exposures relating to derivatives, such as foreign exchange and interest rate swap or option contracts). In April 2003, the Committee announced the third draft of amended rules with respect to minimum capital requirements, including the risk weight calculations, the inclusion of operational risk, and the introduction of the internal rating systems, the supervisory review and the market discipline through effective disclosure. This draft proposes to adopt variable risk weights according to the credit rating given to the obligor of the risk assets. The better the credit rating of an obligor, the less the risk weight applicable to the risk assets owed by it would be. Also, the new rule requires financial institutions to establish an internal risk management system, to make thorough disclosure of relevant information and to set an appropriate reserve against the operational risk based upon fair evaluation thereof. Currently this new rule is scheduled to take effect from 2006. This draft does not propose to change the minimum capital adequacy ratio of 8 per cent. applicable to banks with international operations (including SMBC).

With regard to capital, the Guidelines are in accord with the standards of the Basle Accord for a target minimum standard risk-adjusted capital ratio of 8 per cent. (at least half of which must consist of core capital (Tier I), or a risk adjusted core capital ratio of 4 per cent.) on both a consolidated and non-consolidated basis. The Guidelines place considerable emphasis on tangible common stockholders’ equity as the core element of the capital base, with appropriate recognition of other components of capital.

Capital is classified into three tiers, referred to as core capital (Tier I), supplementary capital (Tier II) and junior supplementary capital (Tier III). Core capital generally consists of stockholders' equity less any recorded goodwill and amortisation of consolidation difference. Supplementary capital generally consists of (i) general reserves for possible loan losses (subject to a limit of 1.25 per cent. of total risk-adjusted assets and off-balance sheet exposures), (ii) 45 per cent. of (a) the unrealised gains on investments in "other securities" (*i.e.*, securities that are not those held for trading purpose, held-to-maturity bonds or shares in subsidiaries or certain affiliates) and (b) the unrealised appreciation on land, (iii) the balance of subordinated perpetual debt and (iv) the balance of subordinated term debt with original maturity of over five years and limited life preferred equity (up to a maximum of 50 per cent. of core capital). Junior supplementary capital consists of the balance of subordinated term debt with original maturity of at least two years. Junior supplementary capital may be counted, subject to certain conditions, according to the amount of market risk or the amount of core capital.

Supplementary capital may be counted up to the amount equivalent to core capital (less junior supplementary in case market risk is counted in the capital ratio calculation).

If a Japanese financial institution, including a bank and a bank holding company, fails to maintain the required capital ratios, under the PCA system, the FSA may, depending upon the extent of capital deterioration of such institution, take certain corrective action such as requiring it to formulate and implement reform measures, or requiring it to reduce assets or take other specific actions or suspend all or part of its business operations.

From and after March 31, 1998, banks and bank holding companies are required to measure and apply capital charges in respect of their market risks in addition to their credit risks. Market risk is defined as the risk of losses in on- and off- balance-sheet positions arising from movements in market prices. The risks subject to this requirement are:

- The risks pertaining to interest rate related instruments and equities in the trading book; and
- Foreign exchange risk and commodities risk throughout the bank.

Additionally, following the FSA's Programme, the FSA announced in April 2003 that it required all major Japanese banks and bank holding companies to have internal controls relating to the calculation of capital adequacy ratios reviewed by external auditors as from the end of March 2003.

### ***Public Money Injection and Rationalisation Plan***

The Law Concerning Emergency Measures for Stabilisation of Financial Functions (Law No. 5 of 1998) and its successor, the Law Concerning Emergency Measures for Early Rehabilitation of Financial Functions (Law No. 143 of 1998, as amended) were enacted in February and October of 1998, respectively. The purpose of the laws was to prevent the failure of financial institutions by promoting prompt dispositions of bad debts and to provide measures for strengthening the capital structure of financial institutions. To achieve those targets, both laws provided that, in addition to its normal operations, the Resolution and Collection Bank (which has been merged into the RCC) could purchase preferred stock or subordinated debts issued by, or extend a subordinated loan to, financial institutions. Such actions are subject to governmental approval of a rationalisation plan submitted by each financial institution applying for such a public money injection. In the rationalisation plan, the financial institution sets forth specific remedial action to restructure its management. A report verifying the result of the undertakings pursuant to the rationalisation plan must be submitted to the supervisory authority semi-annually until such securities or loans have been fully redeemed or repaid. If there is considerable discrepancy between the rationalisation plan and actual performance, the FSA may take administrative action, including the imposition of a partial business suspension order under the Banking Law. To date, such public money injection to the financial institutions, including the former Sakura Bank and Sumitomo Bank have occurred twice, in March of 1998 and 1999.

### ***Law Concerning Sales, Etc. of Financial Products***

As a result of the various above-mentioned deregulations, more financial products, including highly structured and complicated products, can now be more freely marketed to various types of customers. In response to this, the Law Concerning Sales Etc. of Financial Products was enacted in May 2000, taking effect as from April 2001, to better protect customers from incurring unexpected damages as a result of purchasing such financial products. Under this law, sellers of financial products have the duty of explanation with respect to the "important matters" (*i.e.* the risk involved and its nature) of such products. If such sellers fail to do so, they will face strict liability regarding the resulting damages, with the decrease in the product's value refutably presumed to be the amount of damages.

### *Special Measures Law Concerning Facilitation of Reorganisation by Financial Institutions, Etc.*

The Special Measures Law Concerning Facilitation of Reorganisation by Financial Institutions, Etc. came into force, in part, as at January 1, 2003, and in full, as at April 1, 2003. Under the law: (i) if a financial institution (e.g., a bank or bank holding company) prepares and submits to the relevant authority a plan to enhance the basis of its management by means of certain forms of reorganisation such as a statutory merger, statutory share transfer, statutory share exchange, statutory corporate split, business transfer, stock sale and purchase, commencement of profitable business and abandonment of unprofitable business, and if such plan is accredited by the relevant authority, the RCC may make a capital contribution to the financial institution; (ii) in the case of a merger or transfer of the entire business of a financial institution, for one year after such merger or business transfer, the maximum amount to be covered by the deposit insurance (see “— Deposit Insurance System”) will be ¥10 million multiplied by the number of parties to the merger or business transfer; and (iii) a financial institution will be entitled to enjoy the benefit of certain simplified procedures for the forms of reorganisation described above.

### *Law Concerning Identification, Etc. by Financial Institutions*

To address money laundering and terrorism, the Law Concerning Identification, Etc. by Financial Institutions, Etc. of their Customers, Etc. came into force as at January 6, 2003. Under the law, when a financial institution enters into a transaction with a customer, such financial institution is required to identify the customer and prepare and keep records of the customer and the transaction as prescribed by ministerial order.

### *Examination and Reporting Applicable to Shareholders*

By evaluating banks’ systems of self-assessment, auditing their accounts and reviewing their compliance with laws and regulations, the FSA monitors the financial soundness of banks, including the status and performance of their control systems for business activities. The inspection of banks is performed pursuant to a Financial Examination Manual published by the FSA which emphasises the need for: (i) each bank’s self-assessment rather than assessment based on the advice of the government authority; and (ii) risk management made by each bank instead of a mere assessment of its assets.

If necessary in order to secure the sound and appropriate operation of the business of a bank, the FSA may request reports or submission of materials from the bank and/or the bank holding company, or inspect the bank and/or the bank holding company, if relevant.

The amendments to the Banking Law, which include rules concerning entry into the banking business, became effective as at April 1, 2002. Under these amendments, a person who desires to hold 20 per cent. (in certain exceptional cases, 15 per cent.) or more of the voting rights of a bank is required to obtain advance approval of the Commissioner of the FSA. In addition, the FSA may request reports or submission of materials from, or inspect any principal shareholder who holds 20 per cent. (in certain exceptional cases, 15 per cent.) or more of the voting rights of a bank if necessary in order to secure the sound and appropriate operation of the business of such bank. Under limited circumstances, the FSA may order such principal shareholder to take such measures as the FSA deems necessary.

Furthermore, any person who becomes a holder of more than five per cent. of the voting rights of a bank holding company or bank must report its ownership of voting rights to the Director of the relevant local bureau within five business days. In addition, a similar report must be made in respect of any subsequent change of 1 per cent. or more in any previously reported holding or any change in material matters set out in reports previously filed, with some exceptions. If the description of such report is inappropriate in any material respect, the FSA may request reports or submission of materials from, or inspect such holder of the voting rights.

### **Other**

Elsewhere in the world SMBC’s operations are subject to regulation and control by local central banks and monetary authorities.

## TAXATION

The comments below are of a general nature based on current law and practice in the relevant jurisdiction. They do not necessarily apply where the income is deemed for tax purposes to be the income of any other person. They relate only to the position of persons who are the absolute beneficial owners of their Bonds and Coupons and may not apply to certain classes of persons such as dealers or certain professional investors. Any Bondholders who are in doubt as to their own tax position should consult their professional advisers.

### United Kingdom

Persons in the United Kingdom (a) paying interest to or receiving interest on behalf of another person, or (b) paying amounts due on redemption of the Bonds to or receiving such amounts on behalf of another person, may be required to provide certain information to the United Kingdom Inland Revenue regarding the identity of the payee or person entitled to the interest and, in certain circumstances, such information may be exchanged with tax authorities in other countries.

Bondholders within the charge to United Kingdom corporation tax will be subject to tax as income on all profits and gains arising from, and from fluctuations in the value of, the Bonds broadly in accordance with their statutory accounting treatment. Such Bondholders will generally be charged in each accounting period by reference to interest and any profit or loss which in accordance with such Bondholder's authorised accounting method, is applicable to that period. Fluctuations in value relating to foreign exchange gains and losses in respect of the Bonds will be brought into account as income.

A disposal of a Bond by a Bondholder resident or ordinarily resident for tax purposes in the United Kingdom or who carries on a trade, profession or vocation in the United Kingdom through a branch or agency to which the Bond is attributable may give rise to a chargeable gain or allowable loss for the purposes of taxation of capital gains. In calculating any gain or loss on disposal of a Bond, sterling values are compared at acquisition and transfer. Accordingly, a taxable profit can arise even where the foreign currency amount received on a disposal is less than or the same as the amount paid for the Bond. Any accrued interest at the date of disposal will be taxed under the provisions of the Accrued Income Scheme.

A transfer of a Bond by a holder resident or ordinarily resident for tax purposes in the United Kingdom or who carries on a trade in the United Kingdom through a branch or agency to which the Bond is attributable may give rise to a charge to tax on income in respect of an amount representing interest on the Bond which has accrued since the preceding interest payment date.

Bondholders who are either individuals or trustees and are resident for tax purposes in the United Kingdom or who carry on a trade in the United Kingdom through a branch or agency to which the Bonds are attributable will generally be liable to United Kingdom tax on the amount of any interest received in respect of the Bonds.

No United Kingdom Stamp Duty or Stamp Duty Reserve Tax is payable on the issue or transfer by delivery of a Bond or on its redemption.

### Japan

*The following description of Japanese taxation (limited to national taxes) applies to interest and the difference between the issue price of the Bonds and the amount which the holder receives upon the redemption of such Bonds (the "issue differential") with respect to the Bonds issued by SMBC outside Japan and payable outside Japan as well as certain aspects of capital gains, inheritance and gift taxes. It is not intended to be exhaustive and Bondholders and/or Couponholder are recommended to consult their tax advisers as to their exact tax position.*

#### ***Interest and issue differential***

1 If the recipient of interest on the Bonds is a non-resident of Japan or a non-Japanese corporation with no permanent establishment within Japan or with a permanent establishment within Japan but where the receipt of interest under the Bond is not attributable to the business carried on within Japan by the recipient through such permanent establishment, no Japanese income tax or corporate tax is payable with respect to such interest whether by way of withholding or otherwise, if such recipient complies with certain requirements, *inter alia*:

- (a) if the relevant Bonds or Coupons are held through a certain participant in an international clearing organisation such as Euroclear and Clearstream, Luxembourg or a certain financial intermediary prescribed by the Special Taxation Measures Law of Japan (Law No. 26 of 1957) (as amended) (the

“Special Taxation Measures Law”) and the relevant cabinet order thereunder (together with the ministerial ordinance and other regulation thereunder, the “Law”) (each, a “Participant”), the requirement to provide certain information prescribed by the Law to enable the Participant to establish that the recipient is exempt from the requirement for Japanese tax to be withheld or deducted (the “Exemption Information”); and

- (b) if the relevant Bonds or Coupons are not held by a Participant, the requirement to submit to the relevant Paying Agent a claim for exemption from withholding tax (*Hikazei Tekiyo Shinkokusho*) (the “Claim for Exemption”), together with certain documentary evidence.

Failure to comply with the requirements described above will result in the withholding by SMBC of income tax at the rate of 15 per cent., unless any lower rate is applicable under the relevant tax treaty between Japan and another country. Japan has income treaties, conventions or agreements whereby the above-mentioned withholding tax rate is reduced, generally to 10 per cent. with, *inter alia*, Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Ireland, Italy, Luxembourg, the Netherlands, Norway, Singapore, Spain, Sweden, Switzerland, the United Kingdom and the United States of America. In order to avail themselves of such reduced rate of withholding tax, non-residents of Japan or non-Japanese corporations who are entitled to a reduced rate of Japanese withholding tax on payment of interest by SMBC are required to submit an Application Form for Income Tax Convention regarding Relief from Japanese Income Tax on Interest in advance through SMBC to the relevant tax authority before payment of interest.

If the recipient of interest on the Bonds is a Japanese bank, Japanese insurance company, Japanese securities company or other Japanese financial institution falling under certain categories prescribed by the relevant Cabinet Order under Article 6, Paragraph 8 of the Special Taxation Measures Law (each a “Designated Financial Institution”) and such recipient complies with the requirement, *inter alia*, to provide the Exemption Information or to submit the Claim for Exemption, as the case may be, no income tax will be imposed, either by way of withholding or otherwise, but the recipient will be subject to regular corporate tax with respect to such interest.

- 2 If the recipient of interest on the Bonds is a non-resident of Japan or a non-Japanese corporation with a permanent establishment within Japan and the receipt of interest is attributable to the business of such non-resident or non-Japanese corporation carried on within Japan through such permanent establishment, such interest will not be subject to a 15 per cent. withholding tax by SMBC provided that the recipient complies with the requirement, *inter-alia*, to provide the Exemption Information or to submit the Claim for Exemption as set out in paragraph 1 above. Failure to do so may result in the withholding by SMBC of income tax at the rate of 15 per cent. The amount of such interest will then be aggregated with the recipient’s other Japanese source income which is subject to Japanese taxation and will be subject to regular income tax or corporate tax, as appropriate.
- 3 If any recipient of interest on the Bonds who is a resident of Japan or a Japanese corporation (other than Japanese banks, Japanese insurance companies, Japanese securities companies or other Japanese financial institutions falling under certain categories prescribed by the relevant Cabinet Order under Article 3-3, Paragraph 6 of the Special Taxation Measures Law (each a “Specified Financial Institution”) or Japanese public corporations (a “Public Corporation”) designated by the relevant law who comply with the requirement as referred to in the next paragraph) receives payment of interest through certain Japanese payment handling agents (each, a “Japanese Payment Handling Agent”), income tax at the rate of 15 per cent. will be withheld by the Japanese Payment Handling Agent rather than SMBC. As SMBC is not in a position to know in advance the recipient’s status, the recipient of interest falling within this category should inform SMBC through a Paying Agent of its status in a timely manner. Individual Noteholders or Couponholders being residents of Japan who receive interest under the Bonds through a Japanese Payment Handling Agent will be taxed in Japan on such interest separately from his/her other income and only by way of withholding of the foregoing withholding tax, as far as the national level income taxes are concerned. In the case of other recipients who are individual residents of Japan (other than those referred to in the immediately preceding sentence) or Japanese corporations referred to in the beginning of this paragraph, the amount of interest received by any such recipient will be included in such recipient’s gross income and subject to normal income tax or corporate tax, as appropriate.

If the recipient of interest on the Bonds is a Public Corporation or a Specified Financial Institution that keeps its Bonds deposited with, and receives the interests through, a Japanese Payment Handling Agent with custody of the Bonds (the “Japanese Custodian”) and such recipient submits through the Japanese Custodian, to the competent tax authority, the report prescribed by the Law, no income tax will be levied by way of withholding or otherwise on such portion of interest as is prescribed by the relevant Cabinet Order as

that which is corresponding to the period the Bonds were held by such recipient. However, since SMBC is not in a position to know in advance the recipient's tax exemption status, the recipient of interest falling within this category should inform SMBC through a Paying Agent of its status in a timely manner. Failure to so notify SMBC may result in the withholding by SMBC of 15 per cent. income tax. Any amount of interest received by such Public Corporation or Specified Financial Institution in excess of the non-taxable portion described above is subject to a 15 per cent. income tax to be withheld by the Japanese Custodian.

If the recipient of interest who is a resident of Japan or a Japanese corporation receives interest not through a Japanese Payment Handling Agent, income tax at the rate of 15 per cent. will be withheld by SMBC.

- 4 If the recipient of the issue differential of the Bonds is a resident of Japan or a Japanese corporation, such issue differential will not be subject to any withholding tax but will be included in the recipient's gross income and subject to normal income tax or corporate tax as appropriate.

If the recipient of the issue differential of the Bonds is a non-resident of Japan or a non-Japanese corporation having no permanent establishment within Japan or having a permanent establishment within Japan but the receipt of such issue differential is not attributable to the business carried on within Japan by such non-resident or non-Japanese corporation through such permanent establishment, no income tax or corporate tax is payable with respect to such issue differential. If the receipt of such issue differential is attributable to the business of any such non-resident or non-Japanese corporation carried on within Japan through a permanent establishment maintained by it within Japan, such issue differential will not be subject to any withholding tax but will be included in the recipient's other Japanese source income which is subject to Japanese taxation and subject to normal income tax or corporate tax, as appropriate.

#### ***Capital gains, inheritance, gift, stamp and certain other taxes***

Gains derived from the sale of the Bonds by a non-resident of Japan or a non-Japanese corporation not having a permanent establishment in Japan are in general not subject to Japanese income or corporate tax.

Japanese inheritance or gift tax at progressive rates may be payable by an individual, wherever resident, who has acquired the Bonds as legatee, heir or donee.

No stamp, issue, registration or similar taxes or duties will, under present Japanese law, be payable by Bondholders in connection with the issue of the Bonds.

#### **Proposed EU Directive on the Taxation of Savings Income**

The Council of the European Union has adopted proposals for a new directive to ensure effective taxation of savings income within the European Community. It is proposed that, from January 1, 2005 and subject to a number of important conditions being met, Member States will be required to provide to the tax authorities of another Member State details of payments of interest (or other similar income) paid by a person within its jurisdiction to or for the benefit of an individual resident in that other Member State, except that Belgium, Luxembourg and Austria will instead operate a withholding system for a transitional period in relation to such payments. The proposed directive is not yet final, and may be subject to further amendment and/or clarification.

## SUBSCRIPTION AND SALE

Pursuant to a Subscription Agreement dated July 25, 2003 (the “Subscription Agreement”), Goldman Sachs International, J.P. Morgan Securities Ltd., Daiwa Securities SMBC Europe Limited, Citigroup Global Markets Limited, Morgan Stanley & Co. International Limited and UBS Limited (the “Managers”) have agreed, severally, but not jointly, with SMBC, subject to the satisfaction of certain conditions, to subscribe the Bonds at 100 per cent. of their nominal amount as set forth below:

| <u>Name of Manager</u>                               | <u>Principal Amount of Bonds (U.S.\$)</u> |
|--|---|
| Goldman Sachs International . . . . .                | 340,000,000                               |
| J.P. Morgan Securities Ltd. . . . .                  | 340,000,000                               |
| Daiwa Securities SMBC Europe Limited . . . . .       | 93,500,000                                |
| Citigroup Global Markets Limited . . . . .           | 25,500,000                                |
| Morgan Stanley & Co. International Limited . . . . . | 25,500,000                                |
| UBS Limited . . . . .                                | <u>25,500,000</u>                         |
| Total . . . . .                                      | <u><u>850,000,000</u></u>                 |

SMBC has agreed to pay to the Managers a combined management and underwriting commission of 0.5 per cent. and a selling concession of 1.5 per cent. of the nominal amount of the Bonds. The Managers are entitled to be released and discharged from their obligations under the Subscription Agreement or to terminate the Subscription Agreement in certain circumstances prior to payment being made to SMBC as set out therein in the event of which the issue may be cancelled at any time until the document of title is issued and the listing of the Bonds may not become effective. SMBC has agreed to indemnify the Managers against certain liabilities in connection with the offering of the Bonds.

The Bonds are subject to U.S. tax law requirements and may not be offered, sold or delivered within the United States or its possessions or to a United States person, except in certain transactions permitted by U.S. tax regulations. Terms used in this paragraph have the meanings given to them by the U.S. Internal Revenue Code of 1986 and regulations thereunder.

The Bonds have not been and will not be registered under the Securities Act and may not be offered or sold within the United States or to, or for the account or benefit of, U.S. persons except in certain transactions exempt from the registration requirements of the Securities Act. Terms used in this paragraph have the meanings given to them by Regulation S under the Securities Act (“Regulation S”).

Each Manager has agreed that, except as permitted by the Subscription Agreement, it will not offer, sell or deliver the Bonds, (i) as part of their distribution at any time or (ii) otherwise until 40 days after the later of the commencement of the offering and the Closing Date (as defined in the Subscription Agreement) within the United States or to, or for the account or benefit of, U.S. persons, and it will have sent to each dealer to which it sells Bonds during the distribution compliance period a confirmation or other notice setting forth the restrictions on offers and sales of the Bonds within the United States or to, or for the account or benefit of, U.S. persons. Terms used in this paragraph have the meanings given to them by Regulation S.

In addition, until 40 days after the commencement of the offering of the Bonds, an offer or sale of Bonds within the United States by a dealer that is not participating in the offering may violate the registration requirements of the Securities Act.

Each Manager has represented, warranted and agreed that (i) it has not offered or sold and will not offer or sell any Bonds to persons in the United Kingdom prior to admission of the Bonds to listing in accordance with Part VI of the FSMA, except to persons whose ordinary activities involve them in acquiring, holding, managing or disposing of investments (as principal or agent) for the purposes of their businesses or otherwise in circumstances which have not resulted and will not result in an offer to the public in the United Kingdom within the meaning of the Public Offers of Securities Regulations 1995 or the FSMA, (ii) it has only communicated or caused to be communicated and will only communicate or cause to be communicated any invitation or inducement to engage in investment activity (within the meaning of section 21 of the FSMA) received by it in connection with the issue or sale of any Bonds in circumstances in which section 21(1) of the FSMA would not, if SMBC was not an authorised person, apply to SMBC and (iii) it has complied and will comply with all applicable provisions of the FSMA with respect to anything done by it in relation to the Bonds in, from or otherwise involving the United Kingdom.

The Bonds have not been and will not be registered under the Securities and Exchange Law of Japan (Law No. 25 of 1948) (as amended) (the “Securities and Exchange Law”) and will be subject to the Special Taxation Measures Law of Japan (Law No. 26 of 1957) (as amended) (the “Special Taxation Measures Law”). Accordingly, each of the Managers has represented and agreed that (i) it has not, directly or indirectly, offered or sold and will not, directly or indirectly, offer or sell any Bonds in Japan or to, or for the benefit of, any person resident in Japan (which term as used in this item (i) means any person resident in Japan, including any corporation or other entity organised under the laws of Japan) or to others for re-offering or re-sale, directly or indirectly, in Japan or to a resident of Japan, except pursuant to an exemption from the registration requirements of, and otherwise in compliance with, the Securities and Exchange Law and any other applicable laws, regulations and ministerial guidelines of Japan and (ii) it has not, directly or indirectly, offered or sold and will not, (a) as part of its distribution at any time and (b) otherwise until forty days after the date of issue of the Bonds, directly or indirectly, offer or sell Bonds in Japan or to, or for the benefit of, any resident of Japan (which term as used in this item (ii) means any person resident in Japan, including any corporation or other entity organised under the laws of Japan but excluding certain financial institutions defined in Article 6, paragraph 8 of the Special Taxation Measures Law and any other excluded category of persons, corporations or other entities under the Special Taxation Measures Law) or to other for re-offering or re-sale, directly or indirectly, in Japan or to a resident of Japan, so as to satisfy the requirements for the tax exemption as provided for in Article 6 of the Special Taxation Measures Law and any other applicable laws, regulations and ministerial guidelines of Japan.

This Offering Circular has not been registered as a prospectus with the Monetary Authority of Singapore. Accordingly, each Manager has represented, warranted and agreed that it has not circulated or distributed nor will it circulate or distribute this Offering Circular and any other document or material in connection with the offer or sale, or invitation for subscription or purchase, of any Bonds nor has it offered or sold and will not offer or sell such Bonds or cause such Bonds to be made the subject of an invitation for subscription or purchase, whether directly or indirectly, to persons in Singapore other than (i) to an institutional investor or other person specified in Section 274 of the Securities and Futures Act, Chapter 289 of Singapore (the “SFA”), (ii) to a sophisticated investor, and in accordance with the conditions, specified in Section 275 of the SFA, or (iii) otherwise pursuant to, and in accordance with the conditions of, any other applicable provision of the SFA.

Each Manager has represented and agreed that the Bonds may not be offered, sold, transferred or delivered in or from the Netherlands as part of the initial distribution or at any time thereafter and neither the Offering Circular nor any other documents in respect of the offering may be distributed in or from the Netherlands other than to persons who trade or invest in securities in the conduct of their profession or trade (which includes banks, securities intermediaries (including dealers and brokers), insurance companies, pension funds, other institutional investors and commercial enterprises which as an ancillary activity regularly invest in securities), and the offer and each announcement of the offer state that the offer is exclusively made to persons who trade or invest in securities in the conduct of their profession or trade. Pursuant to a recent amendment under Netherlands law, it is no longer required to file a copy of the Offering Circular to the Authority of the Financial Markets.

No action has been or will be taken in any jurisdiction by the Managers or SMBC that would permit a public offering of the Bonds, or possession or distribution of this Offering Circular (in preliminary or final form) or any other offering or publicity material relating to the Bonds, in any country or jurisdiction where action for that purpose is required. Each Manager will comply with all applicable laws and regulations in each jurisdiction in which it acquires, offers, sells or delivers Bonds or has in its possession or distributes this Offering Circular (in preliminary or final form) or any such other material, in all cases at its own expense. It will also ensure that no obligations are imposed on SMBC or any other Manager in any such jurisdiction as a result of any of the foregoing actions. SMBC and the other Managers will have no responsibility for, and each Manager will obtain any consent, approval or permission required by it for, the acquisition, offer, sale or delivery by it of Bonds under the laws and regulations in force in any jurisdiction to which it is subject or in or from which it makes any acquisition, offer, sale or delivery. No Manager is authorised to make any representation or use any information in connection with the issue, subscription and sale of the Bonds other than as contained in this Offering Circular (in final form) or any amendment or supplement to it.

## GENERAL INFORMATION

1. The Bonds have been accepted for clearance through the Clearstream, Luxembourg and Euroclear systems with a Common Code of 017380036. The International Securities Identification Number (ISIN) for the Bonds is XS0173800367.
2. The listing of the Bonds on the Official List will be expressed as a percentage of their nominal amount (exclusive of accrued interest). It is expected that listing of the Bonds on the Official List and admission of the Bonds to trading on the London Stock Exchange's market for listed securities will be granted on or before July 31, 2003, subject only to the issue of the Temporary Global Bond. Prior to official listing and admission to trading, however, dealings will be permitted by the London Stock Exchange in accordance with its rules. Transactions will normally be effected for settlement in U.S. dollars and for delivery on the third working day after the day of the transaction.
3. SMBC has obtained all necessary consents, approvals and authorisations in Japan in connection with the issue and performance of the Bonds. The issue of the Bonds was authorised by resolution of the Board of Directors of SMBC passed on June 27, 2003.
4. Except as disclosed in this document there has been no significant change in the financial or trading position of SMBC or of the SMBC Group since March 31, 2003 (being the date to which the most recent audited or unaudited financial information has been published) and no material adverse change in the financial position or prospects of SMBC or of the SMBC Group since March 31, 2003.
5. Except as disclosed on page 78, neither SMBC nor any of its subsidiaries is involved in any legal or arbitration proceedings (including any such proceedings which are pending or threatened of which SMBC is aware) which may have, or have had during the 12 months preceding the date of this document, a significant effect on the financial position of the SMBC Group.
6. The Bonds and Coupons will bear the following legends:

“Any United States person who holds this obligation will be subject to limitations under the United States income tax laws, including the limitations provided in Sections 165(j) and 1287(a) of the Internal Revenue Code.

Interest payments on this Bond will be subject to Japanese withholding tax unless the holder establishes that this Bond is held by or for the account of a holder that is not an individual resident of Japan or a Japanese corporation for Japanese tax purposes or is a designated Japanese financial institution described in Article 6 of the Special Taxation Measures Law of Japan.

Interest payments on this Bond to an individual resident of Japan or a Japanese corporation not described in the preceding paragraph will be subject to deduction of Japanese income tax at a rate of 15 per cent. of the amount specified in subparagraph (A) or (B) below, as applicable:

(A) if interest is paid to an individual resident of Japan or to a Japanese corporation (except as provided in subparagraph (B) below), the amount of such interest; and

(B) if interest is paid to a public corporation, a financial institution or a securities company through a Japanese payment handling agent as provided in Article 3-3, Paragraph 6 of the Special Taxation Measures Law of Japan, the amount of such interest minus the amount provided in the Cabinet Order relating to said Paragraph 6.”

7. Copies of the latest annual report and consolidated accounts of SMBC may be obtained, and copies of the Trust Deed and Agency Agreement will be available for inspection, at the specified offices of the Principal Paying Agent during normal business hours, so long as any of the Bonds is outstanding.
8. Asahi & Co., Independent Auditors have audited, and rendered unqualified audit reports on, the accounts of SMBC respectively for the years ended March 31, 2002 and March 31, 2003 and have given and have not withdrawn their consent to the issue of this document with the inclusion in it of their reports in the form and context in which they are respectively it is included and have authorised the report for the purposes of Article 6(1)(e) of the Financial Services and Markets Act 2000 (Official Listing of Securities) Regulations 2001.

Asahi & Co., certified public accountants, have audited the consolidated accounts of Sumitomo Bank without qualification for the year ended March 31, 2001 and Century Ota Showa & Co. and Tohmatsu & Co., certified public accountants, have audited the consolidated accounts of Sakura Bank without qualification for the year ended March 31, 2001.

9. Copies (and certified English translations where the documents in question are not in English) of the following documents may be inspected at the offices of Linklaters, One Silk Street, London EC2Y 8HQ during usual business hours on any weekday (Saturdays and public holidays excepted) for 14 days from the date of this document:
- (a) the Articles of Incorporation and the Regulations of the Board of Directors of SMBC;
  - (b) the audited consolidated annual accounts of SMBC for the two years ended March 31, 2003;
  - (c) the Subscription Agreement referred to above;
  - (d) drafts (subject to modification) of the Trust Deed to constitute the Bonds and the form of the Temporary Global Bond, the Global Bond and the definitive Bonds and Coupons; and
  - (e) a draft (subject to modification) of the Agency Agreement.

#### **NOTE REGARDING FINANCIAL INFORMATION**

On February 3, 2003, Japan Research Institute, Sumitomo Mitsui Card and SMBC Leasing became wholly owned subsidiaries of SMFG, at the same time, Daiwa Securities SMBC and Daiwa SB Investments became directly invested companies of SMFG. The financial results of these entities were consolidated with the financial results of the Former-SMBC for the year ended March 31, 2002. Operating results and cash flows of these entities for the year ended March 31, 2003 were consolidated with the consolidated statement of operations and consolidated statement of cash flows of SMBC for the year ended March 31, 2003. The financial position of these entities as at March 31, 2003 were not consolidated with the consolidated balance sheet of SMBC as at March 31, 2003 but were consolidated with the consolidated balance sheet of SMFG as at March 31, 2003. Japanese GAAP does not require a restatement of prior years' financial statements in these circumstances and no such restatement is presented in this Offering Circular.

On March 17, 2003 the Former-SMBC merged with Wakashio Bank. Wakashio Bank was the surviving entity. On January 17, 2003, Wakashio Bank became a subsidiary of SMFG in preparation for the merger. Prior to that date, Wakashio Bank had been a subsidiary of the Former-SMBC.

In this Offering Circular, financial information presented for the year ended March 31, 2002 represents that of the Former-SMBC (which, at the time, included Wakashio Bank as a subsidiary of the Former-SMBC), while the financial information presented for the year ended March 31, 2003 represents that of SMBC. Unless otherwise stated, all information in this Offering Circular is presented on a consolidated basis. The non-consolidated statement of income for the year ended March 31, 2003 does not include the profits and losses for the Former-SMBC from April 1, 2002 to March 16, 2003.

## **SUMMARY OF SIGNIFICANT DIFFERENCES BETWEEN JAPANESE GAAP AND U.S. GAAP**

The consolidated financial statements of SMBC and its subsidiaries presented in this offering circular conform with Japanese GAAP. Such principles vary from U.S. GAAP and significant differences between Japanese GAAP and U.S. GAAP are summarised below. These differences are not necessarily the only differences and other differences may exist:

### **Japanese GAAP**

#### **Consolidated Subsidiaries**

The consolidated financial statements include all enterprises that are controlled by the parent, irrespective of the percentage of the voting shares owned.

Control is defined as the power to govern the decision making body of an enterprise.

#### **Equity Method of Accounting**

Affiliates are enterprises over which SMBC has material influence with respect to their financial and operating policies.

Investments in non-consolidated subsidiaries or affiliates are accounted for by the equity method in the consolidated financial statements.

#### **Business Combinations**

Currently, there are no established accounting principles for business combinations.

Accounting treatment that is similar to the pooling-of-interest method is normally used for business combinations in accordance with the Commercial Code of Japan. Under the accounting treatment, the balance sheet items of the acquired company are combined with those of the acquiring company at their carrying amount or fair value, and the effect of such pooling shall not be reflected in prior years' financial statements.

### **U.S. GAAP**

#### **Consolidated Subsidiaries**

Statement of Financial Accounting Standards ("SFAS") No. 94 requires a parent company to consolidate all of its majority-owned subsidiaries with more than 50% of outstanding voting shares, subject to certain exceptions related to temporary control or the parent company's inability to exercise control over the subsidiary.

In January 2003, The Financial Accounting Standards Board (FASB) issued Interpretation No. 46, "Consolidation of Variable Interest Entities", which applies immediately to variable interest entities created after January 31, 2003 and in the first fiscal year or interim period beginning after June 15, 2003 to older entities. An entity is considered a variable interest entity that is subject to consolidation under the Interpretation if the entity's total equity at risk is insufficient to permit the entity to finance its activities without additional subordinated financial support or if equity investors lack one or three characteristics of a controlling financial interest.

#### **Equity Method of Accounting**

Investments representing ownership of 20% to 50% of the outstanding voting shares are accounted for by the equity method. In addition, investments representing ownership of less than 20% are accounted for by the equity method if the investor has the ability to exercise significant influence over the entity in which it invests.

#### **Business Combinations**

SFAS No. 141, Accounting for Business Combinations, prescribes the purchase method for all business combinations. The purchase method requires the valuation of the acquired assets and liabilities based on fair market values at the time of combination. The difference between the fair market values of the net assets and the consideration given represents goodwill.

## Securities

Debt securities that SMBC has the intent and ability to hold to maturity (held-to-maturity securities) are carried at amortised cost. Trading securities are carried at market value with gains or losses included in the current period income. Other securities (available-for-sale securities) are carried at fair value with unrealised gains or losses recorded directly to equity, net of taxes.

## Accounting for Derivatives and Hedging Activities

Derivative instruments are carried at fair value with changes included in the current period income unless certain hedge accounting criteria are met. In general, if derivative instruments are used as hedges and meet certain hedging criteria, a company defers recognition of gains or losses resulting from changes in fair value of derivative instruments as either an asset or liability until the related losses or gains on the hedged items are recognised.

A bank is permitted to adopt “Macro Hedge Accounting” as hedge accounting method, under which the bank manages the total interest rate risk arising from various financial assets and liabilities as a whole by using financial derivative transactions.

## Securities

Investments in marketable equity and all debt securities are classified at acquisition according to management’s intent, into one of the following categories: trading, available-for-sale, or held-to-maturity. Trading securities are marked to fair value, with the resulting unrealised gain or loss recognised in income. Available-for-sale securities should be marked to fair value, with the resulting unrealised gain or loss recorded in other comprehensive income. Held-to-maturity securities are carried at amortised cost. Other than temporary declines in value are charged to earnings when incurred.

## Accounting for Derivatives and Hedging Activities

SFAS No. 133, Accounting for Derivative Instruments and Hedging Activities requires the recognition of all derivatives as assets or liabilities in the balance sheet measured at fair value. Changes in the fair values of derivatives are included in earnings unless the derivative qualifies for hedge accounting criteria. The changes in the fair value of derivatives qualifying for hedge accounting criteria depends on the intended use.

- For derivatives designated as hedging the exposure to changes in the fair value of an asset or liability or a firm commitment, the gain or loss is recognised in earnings in the period of change together with the offsetting fair value loss or gain on the hedged item.
- For derivatives designated as hedging the exposure to variable cash flows of a forecasted transaction, the effective portion of the derivative’s gain or loss is initially reported as a component of other comprehensive income. Gains and losses of cash flow hedges included in other comprehensive income are reclassified into earnings in the same period or periods during which the related asset or liability affects earnings.
- For derivatives designated as hedging the foreign currency exposure of a net investment in a foreign operation, the gain or loss is reported in other comprehensive income as part of the cumulative translation adjustment.

### **Accounting for Sales of Loans with Recourse**

Certain loan participations which meet specified criteria are allowed to be accounted for as sales, even though the loans are not legally isolated from the transferor.

### **Restructured Loans**

Discounted present value had not been historically used to measure impairment of a loan. Reserves for restructured loans were computed based on historical loss experience.

From the fiscal year ended at March 31, 2003, pursuant to "Audit considerations with respect to the discounted cash flow method used to determine allowance for credit losses by banks and other financial institutions" (issued by JICPA on February 24, 2003), major banks are required to provide reserves for possible loan losses using the Discounted Cash Flows method as follows for loans to large borrowers classified as "Past due loans (3 months or more)" or "Restructured loans":

(a) A bank rationally estimates the cash flows of principal and interest, and measures their present values by discounting the cash flows using the initial contractual interest rate.

(b) A bank recognises the difference between the present value and its book value as estimated losses and provides reserve for possible loan losses.

### **Accrued Interest on Non-Performing Loans**

SMBC places into the nonaccrual status loans which management assesses as "Bankrupt", "Effectively Bankrupt" or "Potentially Bankrupt". Accrued interest related to such loans is written-off.

### **Accounting for Sales of Loans with Recourse**

Under U.S. GAAP, pursuant to SFAS 140, financial assets are generally recorded as sold and removed from the balance sheet only when the following conditions have been met: legal title has passed; the financial assets are beyond the reach of the transferor's creditors, even in bankruptcy or receivership; the purchaser obtains the asset free of conditions that constrain it from taking advantage of the right to pledge or sell the asset; and the transferor does not maintain effective control over the assets as defined. Sales that are not free of such constraints are recorded as a financing. A transfer of assets qualifying as a sale under U.S. GAAP but in connection with which the seller has assumed a limited recourse obligation would result in the recording of a liability for the estimated recourse.

### **Restructured Loans**

SFAS No. 114 requires that impairment of a loan, including a troubled debt restructuring, be measured based on the present value of expected future cash flows discounted at the loan's effective interest rate or, as practicably expedient, at the loan's observable market price or the fair value of the collateral if the loan is collateral-dependent.

### **Accrued Interest on Non-Performing Loans**

Loans are placed on nonaccrual status when they are deemed uncollectible based on management's assessment. Accrued interest related to such loans is reversed against interest income.

Income is generally recognised on such loans using either a cost-recovery method, cash-basis method or some combination of those methods.

### **Impairment of Long-Lived Assets**

Currently, there is no requirement to consider the impairment of long-lived assets.

In August 2002, the Business Accounting Council issued "Opinion Concerning Establishment of Accounting Standard for Impairment of Fixed Assets." The opinion set forth basic ideas about (a) assets subject to impairment consideration, (b) recognition and measurement of impairment loss, (c) accounting after recognition of impairment loss and (d) treatment of finance lease transactions. The opinion proposes that the Accounting Standards Board of Japan develop practical guidelines by the summer of 2003 and that the standard become effective for fiscal years beginning after March 31, 2005. Earlier adoption is permitted under certain conditions.

### **Goodwill**

Goodwill that is the excess of investment cost over the parent's share of the underlying equity in net assets of the subsidiary at the date of acquisition and that is created in consolidation procedures shall be amortised within 20 years.

### **Employee Pension and Post-Retirement Benefits**

Reserve for employee retirement benefit is recorded based on an actuarial computation, which uses the present value of the projected benefit obligation and pension assets, based on an employee's credited years of services at the balance sheet date.

### **Accounting for the transfer of the Substitutional Portion of Employee Pension Fund Liabilities**

In general, accounting for any gain on transfer to the Japanese Government of the Substitutional Portion of Employee Pension Fund Liabilities is recognised when the obligation is settled and actually transferred. As an alternative, the gain on the return of the entrusted portion of the employee pension fund is allowed if the transfer is resolved by board of delegates and there are plan assets equivalent to the amount that should be transferred to the Japanese Government. This treatment is allowed within 30 months from June 15, 2001.

### **Impairment of Long-Lived Assets**

SFAS No. 144 requires the recognition of an impairment loss only if the carrying amount of a long-lived asset to be held and used is not recoverable from its undiscounted cash flows and exceeds its fair value. Impairment loss is measured by calculating the difference between the carrying amount and fair value of the long-lived assets. The impairment loss shall be included in the current period income.

A long-lived asset that meets the criteria to be classified as held for sale should be measured at the lower of its carrying amount or fair value less cost to sell.

### **Goodwill**

Prior to the effective date of SFAS No. 142, goodwill was amortised over its estimated economic life, not to exceed 40 years.

Under SFAS No. 142, effective from the fiscal year beginning after December 15, 2001, goodwill shall not be amortised but rather shall be tested at least annually for impairment.

### **Employee Pension and Post-Retirement Benefits**

U.S. GAAP generally requires the use of actuarial methods for measuring annual employee benefit costs, including the use of assumptions such as the rate of salary progression, discount rate, rate of return on plan assets, etc., the amortisation of prior service costs over the remaining service period of active employees and the immediate recognition of a liability when the accumulated benefit obligation exceeds the fair market value of pension plan assets.

### **Accounting for the transfer of the Substitutional Portion of Employee Pension Fund Liabilities**

In accordance with Emerging Issues Task Force Issue No. 03-02 "Accounting for the Transfer to the Japanese Government of the Substitutional Portion of Employee Pension Fund Liabilities", the entire separation process and transfer will be accounted for at the time the transfer of the benefit obligation and related plan assets is completed. The ultimate determination of any gain or loss will be made as of the date the transfer has been completed in accordance with Statement of Financial Accounting Standards No. 88 "Employers' Accounting for Settlements and Curtailments of Defined Benefit Pension Plans and for Termination Benefits".

**Earned Surplus Reserve**

Under the Banking Law of Japan, an amount equivalent to at least 20% of cash disbursements paid was appropriated and was set aside as earned surplus reserve in the retained earnings up to the amount of common stock.

Effective October 1, 2001, such earned surplus reserve is recorded until total of both earned surplus reserve and capital surplus equals the amount of common stock. The excess of the total amount over the amount of common stock may be transferred to retained earnings by resolution of stockholders.

**Land Revaluation Excess**

Land which had been recorded at acquired cost was allowed to be revalued at fair value at one time during a fiscal year from March 31, 1998 to March 31, 2002. The resulting gains were recorded in land revaluation excess as a separate component in the stockholders' equity, net of tax.

The land shall not be revaluated after the initial revaluation even if the fair value declined.

**Guarantees**

Notional amounts of guarantees, including standby letters of credit and the related reimbursement obligations of customers, are presented on the balance sheet with assets of equal amounts.

**Loan Fees**

Loan origination fees and costs are recognised when income is received and costs are incurred.

**Earned Surplus Reserve**

Such earned surplus reserve is not provided for under U.S. GAAP.

**Land Revaluation Excess**

Such land revaluation excess is not permissible.

**Guarantees**

In November 2002, the Financial Accounting Board (FASB) issued interpretation No. 45, "Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others", which, among other provisions, applies to guarantees issued or modified after December 31, 2002. The issuer of a guarantee is required to recognize, at the inception of the guarantee, an initial liability for fair value of its obligations under the guarantee basically. The above-mentioned treatment is required for letters, such as financial standby letters of credit and contracts that contingently require the guarantor to make payments to the guaranteed party.

**Loan Fees**

Loan origination fees are deferred and recognised over the life of the related loan as an adjustment of yield based on the effective interest method.

Certain direct loan origination costs are also deferred and recognised over the life of the related loan as a reduction of the loan's yield based on the effective interest method.

**Directors' Bonuses**

Directors' bonuses are charged directly to retained earnings by resolution of shareholders.

**Leases**

Unless transfer of ownership occurs, financing leases may be accounted for as operating leases accompanied with sufficient footnote disclosure.

**Comprehensive Income**

There are no specific accounting principles for reporting comprehensive income.

**Directors' Bonuses**

Directors' compensation is expensed on an accrual basis as earned.

**Leases**

Leases are classified as either capital or operating, based on specified criteria. A lease which transfers substantially all of the benefits and risks of ownership to the lessee is reported as a capital lease. Other leases are accounted for as operating leases.

**Comprehensive Income**

U.S. GAAP requires that all items that are required to be recognized under accounting standards as components of comprehensive income be reported in a financial statement that is displayed with the same prominence as other financial statements. Comprehensive income includes all changes in shareholders' equity during an accounting period except those resulting from investments by or distributions to owners, including certain items not included in the current results of operations.

## INDEPENDENT AUDITORS' REPORT

To The Board of Directors of  
Sumitomo Mitsui Banking Corporation

We have audited the accompanying consolidated balance sheet of Sumitomo Mitsui Banking Corporation ("SMBC") and subsidiaries as of March 31, 2003, and the related consolidated statements of operations, stockholders' equity and cash flows for the year then ended, expressed in Japanese yen. These consolidated financial statements are the responsibility of SMBC's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in Japan. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of SMBC and subsidiaries as of March 31, 2003, and the consolidated results of their operations and their cash flows for the year then ended, in conformity with accounting principles generally accepted in Japan as described in Note 1 to the consolidated financial statements.

The consolidated financial statements as of and for the year ended March 31, 2003 have been translated into United States dollars solely for the convenience of the reader. We have recomputed the translation and, in our opinion, the consolidated financial statements expressed in Japanese yen have been translated into United States dollars on the basis set forth in Note 1 to the consolidated financial statements.

## SUMITOMO MITSUI BANKING CORPORATION AND SUBSIDIARIES

### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS AS OF AND FOR THE YEAR ENDED MARCH 31, 2003

#### 1. Basis of Financial Statements

On March 17, 2003, Sumitomo Mitsui Banking Corporation (the “Bank”) was merged with its subsidiary, THE WAKASHIO BANK, LTD. (“Wakashio”). Wakashio succeeded the Bank’s assets, liabilities, all the claims, obligations and employees, and changed its corporate name to Sumitomo Mitsui Banking Corporation (“SMBC”).

SMBC and its consolidated domestic subsidiaries maintain their official accounting records in Japanese yen, and in accordance with the provisions set forth in the Japanese Commercial Code and accounting principles and practices generally accepted in Japan (“Japanese GAAP”).

The accounts of overseas consolidated subsidiaries are based on their accounting records maintained in conformity with generally accepted accounting principles and practices prevailing in the respective countries of domicile.

Certain accounting principles and practices generally accepted in Japan are different from International Accounting Standards and standards in other countries in certain respects as to application and disclosure requirements. Accordingly, the accompanying consolidated financial statements are intended for use by those who are informed about Japanese accounting principles and practices.

The accompanying consolidated financial statements have been restructured and translated into English (with some expanded descriptions and the inclusion of consolidated statements of stockholders’ equity) from the consolidated financial statements of SMBC prepared in accordance with Japanese GAAP.

Some supplementary information included in the statutory Japanese language consolidated financial statements, but not required for fair presentation, is not presented in the accompanying consolidated financial statements.

Amounts less than one million yen have been omitted. As a result, the totals in Japanese yen shown in the financial statements do not necessarily agree with the sum of the individual amounts.

For the convenience of the readers, the accompanying U.S. dollar financial statements have been translated from Japanese yen, as a matter of arithmetical computation only, at the rate of ¥120.20 to US\$1, the exchange rate prevailing at March 31, 2003. The translations should not be construed as a representation that Japanese yen have been, could have been, or could in the future be, converted into U.S. dollars at that rate.

#### 2. Significant Accounting Policies

##### *(1) Consolidation and Equity Method*

###### *(a) Scope of consolidation*

Japanese accounting standards on consolidated financial statements require a company to consolidate any subsidiaries of which the company substantially controls the operations, even if it is not a majority owned subsidiary. Control is defined as the power to govern the decision making body of an enterprise.

###### *(i) Consolidated subsidiaries*

SMBC has 114 consolidated subsidiaries and principal subsidiaries are as follows:

THE MINATO BANK, LTD.  
The Bank of Kansai, Ltd.  
Sumitomo Mitsui Banking Corporation Europe Limited  
Manufacturers Bank  
SMBC Capital Co., Ltd.  
SMBC Finance Co., Ltd.  
Sakura Friend Securities Co., Ltd.  
Meiko National Securities Co., Ltd.  
SMBC Capital Markets, Inc.

**SUMITOMO MITSUI BANKING CORPORATION AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**  
**AS OF AND FOR THE YEAR ENDED MARCH 31, 2003 — (Continued)**

Three companies including Meiko National Securities Co., Ltd. and eight companies including Sumitomo Mitsui Banking Corporation Europe Limited are consolidated from this fiscal year due to acquisition of shares and establishment, respectively.

Twenty-nine companies including SMBC Leasing Company, Limited, Sumitomo Mitsui Card Company, Limited and The Japan Research Institute, Limited are excluded from consolidation from this fiscal year mainly due to corporate split. Also, five companies including SAKURA INVESTMENT MANAGEMENT CO., LTD. and seven companies including Sumitomo Mitsui Finance Australia (Securities) Limited are excluded from consolidation from this fiscal year due to merger and liquidation, respectively.

(ii) Nonconsolidated subsidiaries

Principal company  
SBCS Co., Ltd.

Nonconsolidated subsidiaries' total assets, ordinary income, net income and retained earnings have no significant impact on the consolidated financial statements.

*(b) Application of the equity method*

Japanese accounting standards also require any nonconsolidated subsidiaries and affiliates on which SMBC is able to exercise material influence over their financial and operating policies are to be accounted for by the equity method.

(i) Nonconsolidated subsidiaries accounted for by the equity method — 4 companies

Principal company  
SBCS Co., Ltd.

Bangkok SMBC Systems Ltd. was excluded from nonconsolidated subsidiaries accounted for by the equity method due to liquidation.

(ii) Affiliates accounted for by the equity method — 12 companies

Principal companies  
Sumitomo Mitsui Asset Management Company, Limited  
QUOQ Inc.

Sumitomo Mitsui Asset Management Company, Limited became an affiliated company accounted for by the equity method from this fiscal year because of the acquisition of shares due to merger with SAKURA INVESTMENT MANAGEMENT CO., LTD.

Twenty companies including Daiwa Securities SMBC Co. Ltd. and Daiwa SB Investments Ltd. are excluded from affiliated companies accounted for by the equity method from this fiscal year due to corporate split. China United International Leasing Co., Ltd. was excluded from affiliated companies because it was sold. Also, Meiko National Securities Co., Ltd. was excluded from affiliated companies accounted for by the equity method because it became SMBC's consolidated subsidiary due to acquisition of shares.

(iii) Nonconsolidated subsidiaries and affiliates that are not accounted for by the equity method.

Principal company  
Sumitomo Mitsui Asset Management Company (New York) Inc.

Net income and retained earnings of nonconsolidated subsidiaries and affiliates that are not accounted for by the equity method have no significant impact on the consolidated financial statements.

**SUMITOMO MITSUI BANKING CORPORATION AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**  
**AS OF AND FOR THE YEAR ENDED MARCH 31, 2003 — (Continued)**

(c) *The balance sheet dates of consolidated subsidiaries*

(i) The dates of year-end account closing of consolidated subsidiaries are as follows:

|                    |              |
|--------------------|--------------|
| September 30 ..... | 5 Companies  |
| October 31 .....   | 1 Company    |
| December 31 .....  | 44 Companies |
| January 31 .....   | 1 Company    |
| March 31 .....     | 63 Companies |

(ii) As for the companies whose balance sheet dates are September 30 and October 31, the accounts were provisionally closed as of March 31 and January 31 for the purpose of consolidation, respectively. The other companies are consolidated on the basis of their respective balance sheet dates.

As for the consolidated overseas subsidiary that was established in February 2003 and whose balance sheet date is December 31, the accounts were provisionally closed as of March 31 for the purpose of consolidation.

Appropriate adjustments were made for significant transactions during the periods from their respective balance sheet dates to the consolidated closing dates.

(d) *Valuation of consolidated subsidiaries' assets and liabilities*

In the elimination of investments in subsidiaries, the assets and liabilities of the subsidiaries, including the portion attributable to the minority stockholders, are evaluated using the fair value at the time SMBC acquired control of the respective subsidiaries.

(e) *Amortization of goodwill*

Goodwill on Sumitomo Mitsui Card Company, Limited is amortized using the straight-line method over five years and goodwill on other companies is charged or credited to income directly when incurred.

(2) *Statement of cash flows*

For the purposes of the consolidated statement of cash flows, cash and cash equivalents represent cash and due from banks.

Reconciliation of the opening balance at the time of consolidation with respect to acquisition of the five companies including Meiko National Securities Co., Ltd. and MITSUI AUTO LEASING, LTD were as follows:

|  | <u>Millions of yen</u> | <u>Millions of U.S.dollars</u> |
|--|------------------------|--------------------------------|
| Assets .....   | ¥ 191,318              | \$ 1,592                       |
| Lease assets .....   | 82,346                 | 685                            |
| Liabilities .....  | ¥(150,698)             | \$(1,254)                      |
| Borrowed money .....   | (96,817)               | (805)                          |
| Minority interests .....   | (26,881)               | (224)                          |
| Goodwill .....   | 5,013                  | 42                             |
| Acquisition costs for the five companies' stocks (a) .....             | 18,751                 | 156                            |
| Cash and due from banks of the five companies (b) .....                | (3,306)                | (28)                           |
| (a) – (b) Cash expenditure for acquisition of the five companies ..... | <u>¥ 15,444</u>        | <u>\$ 128</u>                  |

Significant non-cash transactions (twenty-nine companies' assets and liabilities that were excluded from consolidation due mainly to corporate split) were as follows:

|                      | <u>Millions of yen</u> | <u>Millions of U.S.dollars</u> |
|----------------------|------------------------|--------------------------------|
| Assets .....         | ¥2,865,787             | \$23,842                       |
| Lease assets .....   | 996,596                | 8,291                          |
| Liabilities .....    | ¥2,596,322             | \$21,600                       |
| Borrowed money ..... | 1,433,305              | 11,924                         |

**SUMITOMO MITSUI BANKING CORPORATION AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**  
**AS OF AND FOR THE YEAR ENDED MARCH 31, 2003 — (Continued)**

**(3) *Trading assets and liabilities***

Financial instruments, such as derivatives and trading securities, which are held for the short term in anticipation of market gains, are recorded at fair value. Such gains and losses are included in trading profits or losses on the consolidated statement of operations. Trading assets and liabilities are recorded at trade date.

**(4) *Securities***

As for securities other than trading purposes, debt securities that SMBC and consolidated subsidiaries have the intent and ability to hold to maturity (held-to-maturity securities) are carried at amortized cost (straight-line method) using the moving-average method.

Investments in nonconsolidated subsidiaries and affiliates that are not accounted for by the equity method are carried at cost using the moving-average method.

Securities other than trading purpose securities, held-to-maturity debt securities and investments in subsidiaries and affiliates are classified as “other securities” (available-for-sale securities). Stocks in other securities that have market value are carried at the average market prices during the final month of the fiscal year, and bonds and others that have market prices are carried at their fiscal year-end market prices (cost of securities sold is calculated using primarily the moving-average method). Other securities with no market prices are carried at cost or amortized cost using the moving-average method. Net unrealized gains (losses) on other securities, net of income taxes, are included in “Stockholders’ equity.”

Securities included in money held in trust account are carried in the same manner as for securities mentioned above.

**(5) *Derivative transactions***

Derivative transactions, excluding those classified as trading derivatives, are carried at fair value, though some consolidated overseas subsidiaries account for derivative transactions in accordance with local accounting standards.

**(6) *Hedge accounting***

Pursuant to the temporary treatment regulated by “Treatment for Accounting and Auditing of Application of Accounting Standard for Financial Instruments in Banking Industry” (JICPA Industry Audit Committee Report No. 24), SMBC applies “the risk adjustment approach” to hedging (Macro hedge) in accordance with the Industry Audit Committee Report No. 15 “Temporary Treatment for Accounting and Auditing of Application of Accounting Standard for Financial Instruments in Banking Industry” issued by JICPA, abiding by the following requirements:

(a) Loans, deposits and other interest-earning assets and interest-bearing liabilities as a whole shall be recognized as the hedged portfolio.

(b) Derivatives as the hedging instruments shall effectively reduce the interest rate exposure of the hedged portfolio.

(c) Effectiveness of hedging activities shall be evaluated on a quarterly basis.

SMBC applies deferred hedge accounting.

In order to hedge risk arising from volatility of exchange rates for stocks of subsidiaries and affiliates, and other securities (excluding bonds) denominated in foreign currency, SMBC applies deferred hedge accounting or fair value hedge accounting, on the conditions that the hedged security is specified in advance and that enough on-balance (actual) or off-balance (forward) liability exposure exists to cover the cost of the hedged security in foreign currency base.

Certain interest swaps for the purpose of hedging are recorded on an accrual basis using the short-cut method (exceptional treatment for interest rate swaps) in view of consistency with the risk management policy.

**SUMITOMO MITSUI BANKING CORPORATION AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**  
**AS OF AND FOR THE YEAR ENDED MARCH 31, 2003 — (Continued)**

Certain consolidated subsidiaries use the deferred hedge accounting or the short-cut method. A consolidated domestic subsidiary (a leasing company) applies the accounting method that is permitted by the Industry Audit Committee Report No. 19 “Temporary Treatment for Accounting and Auditing of Application of Accounting Standard for Financial Instruments in Leasing Industry” issued by JICPA.

Net amount of deferred unrealized gains on hedging instruments to which hedge accounting is applied is recognized as deferred profit on hedge and is included in Other liabilities. Gross deferred unrealized losses and gross deferred unrealized gains on hedging instruments at March 31, 2003, were ¥944,797 million (\$7,860 million) and ¥1,094,799 million (\$9,108 million), respectively.

**(7) Non-accrual loans**

Loans are generally placed on non-accrual status when such loans are classified as Bankrupt, Effectively Bankrupt or Potentially Bankrupt by the self-assessment rule (see (10) Reserve for possible loan losses).

**(8) Premises and equipment**

Premises and equipment are generally stated at cost less accumulated depreciation. SMBC computes depreciation for premises using the straight-line method over the estimated useful lives of the respective assets. The depreciation for equipment is computed using the declining-balance method over the estimated useful lives of the respective assets. The estimated useful lives of major items are as follows:

Buildings: 7 to 50 years  
Equipment: 2 to 20 years

Depreciation of premises and equipment owned by consolidated subsidiaries is mainly computed using the straight-line method over the estimated useful lives of respective assets.

**(9) Software costs**

Capitalized software for internal use is depreciated using the straight-line method over its estimated useful life (mainly five years) at SMBC and consolidated domestic subsidiaries, and is included in Other assets.

**(10) Reserve for possible loan losses**

Reserve for possible loan losses of SMBC and major consolidated subsidiaries is provided as detailed below in accordance with the internal standards for write-offs and reserves.

For claims on borrowers who have entered into bankruptcy, special liquidation proceedings or similar legal proceedings (“bankrupt borrowers”) or borrowers that are not legally or formally insolvent but are regarded as substantially in the same situation (“effectively bankrupt borrowers”), a reserve is provided based on the amount of claims, after the charge-off stated below, net of the expected amount of recoveries from collateral and guarantees.

For claims on borrowers that are not currently bankrupt but are likely to become bankrupt in the future, a reserve is provided in the amount deemed necessary based on an overall solvency assessment of the claims, net of the expected amount of recoveries from collateral and guarantees.

Pursuant to “Audit considerations with respect to the discounted cash flow method used to determine allowance for credit losses by banks and other financial institutions” (issued by JICPA on February 24, 2003), SMBC provides reserve for possible loan losses using the Discounted Cash Flows method as follows for claims to large borrowers of “Past due loans (3 months or more)” or “Restructured loans”:

(a) SMBC rationally estimates the cash flows of principal and interest, and measures their present values by discounting the cash flows using the initial contractual interest rate.

(b) SMBC recognizes the difference between the present value and its book value as estimated losses and provides reserve for possible loan losses.

For other claims, a reserve is provided based on the historical loan-loss ratio.

**SUMITOMO MITSUI BANKING CORPORATION AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**  
**AS OF AND FOR THE YEAR ENDED MARCH 31, 2003 — (Continued)**

For claims originated in specific countries, an additional reserve is provided for by the amount deemed necessary based on the assessment of political and economic conditions.

Branches and credit supervision departments assess all claims in accordance with the internal rule for self-assessment of assets, and the Credit Review Department, independent from these operating sections, audits their assessment. The reserves are provided based on the results of these assessments.

Reserve for possible loan losses of other consolidated subsidiaries for general claims is provided in the amount deemed necessary based on the historical loan-loss ratio, and for doubtful claims in the amount deemed uncollectible based on assessment of each claim.

For collateralized or guaranteed claims on bankrupt borrowers and effectively bankrupt borrowers, the amount exceeding the estimated value of collateral and guarantees is deemed to be uncollectible and charged off against the total outstanding amount of the claims. The amount of charge-off was ¥1,251,553 million (\$10,412 million).

**(11) Reserve for possible losses on loans sold**

Reserve for possible losses on loans sold is provided for contingent losses arising from decline of market value of underlying collateral for loans sold to the Cooperative Credit Purchasing Company, Limited.

**(12) Reserve for employee bonuses**

Reserve for employee bonuses is provided, in provision for payment of bonuses to employees, by the amount of estimated bonuses, which are attributable to the respective fiscal year.

**(13) Reserve for employee retirement benefits**

Under the terms of SMBC's retirement plan, substantially all employees are entitled to a lump sum payment at the time of retirement. The amount of the lump-sum payment is, in general, calculated based on length of service, basic salary at the time of retirement and reason for retirement. In addition, SMBC has defined benefit pension plans which cover substantially all employees.

Reserve for employee retirement benefits is recorded based on an actuarial computation, which uses the present value of the projected benefit obligation and pension assets, due to employee's credited years of services at the balance sheet date. Prior service costs are amortized using the straight-line method over certain years (mainly 10 years) within the average remaining service period of active employees. Unrecognized net actuarial gain or loss is amortized from the next fiscal year using the straight-line method over certain years (mainly 10 years) within the average remaining service period of active employees. Unrecognized net obligation from initial application of the new accounting standard for employee retirement benefits is amortized using the straight-line method over five years.

Some domestic consolidated subsidiaries received an approval from Minister of Health, Labor and Welfare for exemption from future retirement benefit obligations with respect to the entrusted portion of the employee pension fund, in accordance with the implementation of the "Defined benefit enterprise pension plan law." They apply the temporary treatment that is regulated by Article 47-2 of "Practical Guidelines of Accounting for Retirement Benefits (Interim Report)" (JICPA's Accounting Committee Report No. 13), and derecognize retirement benefit liabilities on the entrusted portion and plan assets equivalent to the amount to be returned. The equivalent amount of return of plan assets was ¥23,906 million (\$199 million) as of the fiscal year-end.

**(14) Other reserves**

Other reserves required by special laws are reserve for contingent liabilities from financial futures transaction of ¥18 million (\$0 million) in accordance with Article 82 of the Financial Futures Transaction Law, and reserve for contingent liabilities from securities transaction of ¥631 million (\$5 million) in accordance with Article 51 of the Securities Exchange Law.

**SUMITOMO MITSUI BANKING CORPORATION AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**  
**AS OF AND FOR THE YEAR ENDED MARCH 31, 2003 — (Continued)**

**(15) Translation of foreign currencies**

SMBC's assets and liabilities denominated in foreign currencies and overseas branches' accounts are translated into Japanese yen mainly at the exchange rate prevailing at the consolidated balance sheet date, with the exception of stocks of subsidiaries and affiliates translated at rates prevailing at the time of acquisition.

Consolidated subsidiaries' assets and liabilities denominated in foreign currencies are translated into Japanese yen at the exchange rate prevailing at their respective balance sheet dates.

**(16) Lease transactions**

Financing leases where the ownership of the property is deemed to be transferred to the lessee are capitalized, while other financing leases are allowed to be accounted for in the same manner as operating leases.

Lease assets are depreciated using the straight-line method over the lease term with estimated salvage value.

Lease-related income is recognized on a straight-line basis over the full term of the lease, based on the contractual amount of lease fees per month.

**(17) Appropriation of retained earnings**

The consolidated statement of stockholders' equity reflects the appropriation of retained earnings approved by the board of directors and/or the general meeting of shareholders.

**(18) Amounts per share**

Net income (loss) per share is computed by deducting dividends for preferred stock from net income (loss), divided by the weighted average number of shares of common stock, excluding treasury stock outstanding during each fiscal year.

Declared dividends represent the cash dividends declared applicable to respective years, including dividends to be paid after the end of the year.

From this fiscal year, SMBC applies "Accounting Standard for Earnings Per Share" (Financial Accounting Standards No. 2) and "Implementation Guidance for Accounting Standard for Earnings Per Share" (Financial Accounting Standards Implementation Guidance No. 4). Net loss per share calculated using the former manner is ¥10,433.31 (\$86.80).

**(19) Adoption of new accounting standards**

(a) In accordance with the amendment of the consolidated financial statements regulation and the Ordinance of Banking Law, presentation of financial statements was changed as follows:

(i) Consolidated balance sheet

Before March 31, 2002, "Pledged money for securities borrowing transactions" was included in "Other assets." From this fiscal year, it is separately reported as "Receivables under securities borrowing transactions." Consequently, "Other assets" decreased by ¥1,981,243 million (\$16,483 million) and "Receivables under securities borrowing transactions" increased by the same amount as compared with the former manner.

Also, from this fiscal year, "Pledged money for securities lending transactions" that was formerly reported as "Other liabilities" on the consolidated balance sheet is reported as "Payables under securities lending transactions."

(ii) Consolidated Statement of operations

Before March 31, 2002, interest related to securities borrowing or lending transactions guaranteed by cash were included in "Other interest income" or "Other interest expenses". From this fiscal year, they are reported as "Interest on receivables under securities borrowing transactions" and "Interest on payables under securities lending transactions," respectively.

**SUMITOMO MITSUI BANKING CORPORATION AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**  
**AS OF AND FOR THE YEAR ENDED MARCH 31, 2003 — (Continued)**

From this fiscal year, “Interest on bonds and convertible bonds” are reported as “Interest on bonds and bonds with subscription rights for shares”.

(iii) Consolidated statement of cash flows

From this fiscal year, “Net change in pledged money for securities borrowing transactions” and “Net change in pledged money for securities lending transactions” are reported as “Net change in receivables under securities borrowing transactions” and “Net change in payables under securities lending transactions,” respectively.

From this fiscal year, “Proceeds from issuance of subordinated bonds, convertible bonds and notes” and “Repayment of subordinated bonds, convertible bonds and notes” are reported as “Proceeds from issuance of subordinated bonds, bonds with subscription rights for shares” and “Repayment of subordinated bonds, bonds with subscription rights for shares” respectively.

(b) From this fiscal year, SMBC applies “Accounting Standard for Treasury Stock and Reversal of Legal Reserves” (Financial Accounting Standards No 1). This new accounting standard does not have a material impact on the consolidated financial statements.

Also, other capital surplus that was formerly included in “Retained earnings” is reported in “Capital surplus” from this fiscal year.

As for the consolidated statement of cash flows, “Proceeds from the sale of parent bank stock held by subsidiaries” of ¥8,479 million (\$71 million) that was separately reported is included in “Proceeds from sale of treasury stock” from this fiscal year.

### 3. Trading Assets

Trading assets at March 31, 2003 consisted of the following:

| <u>March 31, 2003</u>   | <u>Millions of yen</u> | <u>Millions of U.S. dollars</u> |
|---|------------------------|---------------------------------|
| Trading securities . . . . .  | ¥ 225,610              | \$ 1,877                        |
| Derivatives on trading securities . . . . .                         | 81                     | 1                               |
| Derivatives on securities related to trading transactions . . . . . | 121                    | 1                               |
| Trading-related financial derivatives . . . . .                     | 3,060,803              | 25,464                          |
| Other trading assets . . . . .                                      | <u>1,208,779</u>       | <u>10,056</u>                   |
|   | <u>¥4,495,396</u>      | <u>\$37,399</u>                 |

### 4. Securities

Securities at March 31, 2003 consisted of the following:

| <u>March 31, 2003</u>                     | <u>Millions of yen</u> | <u>Millions of U.S. dollars</u> |
|---|------------------------|---------------------------------|
| Japanese government bonds* . . . . .      | ¥12,901,636            | \$107,335                       |
| Japanese local government bonds . . . . . | 375,204                | 3,121                           |
| Japanese corporate bonds . . . . .        | 2,370,553              | 19,722                          |
| Japanese stocks** . . . . .               | 3,326,510              | 27,675                          |
| Other** . . . . .                         | <u>4,984,616</u>       | <u>41,469</u>                   |
|   | <u>¥23,958,521</u>     | <u>\$199,322</u>                |

\* Includes ¥999 million (\$8 million) of unsecured loaned securities for which borrowers have the rights to sell or pledge and loaned securities of ¥140 million (\$1 million) for which borrowers only have the rights to pledge and not to sell.

As for the unsecured borrowed securities for which SMBC has the rights to sell or pledge and the securities which SMBC purchased under resale agreements, that are permitted to sell or pledge without restrictions, ¥2,084,632 million (\$17,343 million) of securities are pledged, ¥99,624 million (\$829 million) of securities are held in hand as of the consolidated balance sheet date. SMBC may pledge the borrowed securities as well.

\*\* Japanese stocks and other include investments in nonconsolidated subsidiaries and affiliates of ¥23,010 million (\$191 million).

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**  
**AS OF AND FOR THE YEAR ENDED MARCH 31, 2003 — (Continued)**

**5. Loans and Bills Discounted**

Loans and bills discounted at March 31, 2003 consisted of the following:

| <u>March 31, 2003</u>      | <u>Millions of yen</u> | <u>Millions of U.S. dollars</u> |
|----------------------------|------------------------|---------------------------------|
| Bills discounted . . . . . | ¥ 735,614              | \$ 6,120                        |
| Loans on notes . . . . .   | 7,709,991              | 64,143                          |
| Loans on deeds . . . . .   | 44,777,340             | 372,524                         |
| Overdrafts . . . . .       | <u>7,996,669</u>       | <u>66,528</u>                   |
|                            | <u>¥61,219,617</u>     | <u>\$509,315</u>                |

The following summarizes the non-accrual loans at March 31, 2003:

| <u>March 31, 2003</u>             | <u>Millions of yen</u> | <u>Millions of U.S. dollars</u> |
|-----------------------------------|------------------------|---------------------------------|
| Bankrupt loans . . . . .          | ¥ 199,794              | \$ 1,662                        |
| Non-accrual loans . . . . .       | <u>2,665,675</u>       | <u>22,177</u>                   |
| Total non-accrual loans . . . . . | <u>¥2,865,469</u>      | <u>\$23,839</u>                 |

The amounts above include the trusted amount with the Resolution and Collection Corporation of ¥40,811 million (\$340 million), which will be treated as off-balancing.

In addition to the non-accrual loans, SMBC also classifies past due loans (3 months or more) as substandard loans, and such loan balances at March 31, 2003 were ¥128,493 million (\$1,069 million).

Restructured loans are loans for which SMBC has adjusted the terms of the loans in favor of borrowers as a means of financial assistance. These restructured loans are also classified as substandard and amounted to ¥2,689,172 million (\$22,372 million) at March 31, 2003.

**6. Other Assets**

Other assets at March 31, 2003 consisted of the following:

| <u>March 31, 2003</u>           | <u>Millions of yen</u> | <u>Millions of U.S. dollars</u> |
|---------------------------------|------------------------|---------------------------------|
| Accrued income . . . . .        | ¥ 180,332              | \$ 1,500                        |
| Deferred assets . . . . .       | 7,336                  | 61                              |
| Financial derivatives . . . . . | 996,130                | 8,288                           |
| Other . . . . .                 | <u>974,086</u>         | <u>8,104</u>                    |
|                                 | <u>¥2,157,885</u>      | <u>\$17,953</u>                 |

**7. Premises and Equipment**

Premises and equipment at March 31, 2003 consisted of the following:

| <u>March 31, 2003</u>              | <u>Millions of yen</u> | <u>Millions of U.S. dollars</u> |
|------------------------------------|------------------------|---------------------------------|
| Land(*) . . . . .                  | ¥ 480,749              | \$ 4,000                        |
| Buildings . . . . .                | 512,632                | 4,265                           |
| Equipment and others . . . . .     | <u>499,227</u>         | <u>4,153</u>                    |
| Total . . . . .                    | ¥1,492,609             | \$12,418                        |
| Accumulated depreciation . . . . . | <u>(572,532)</u>       | <u>(4,763)</u>                  |
|                                    | <u>¥ 920,076</u>       | <u>\$ 7,655</u>                 |

(\*) Includes land revaluation excess for land referred to in Note 15.

**15. Land Revaluation Excess**

SMBC revaluated its own land for business activities in accordance with the “Law Concerning Land Revaluation” (the “Law”) effective March 31, 1998 and the law concerning amendment of the Law effective March 31, 2001. The income taxes corresponding to the net unrealized gains are deferred and reported in “Liabilities” as “Deferred tax liabilities for land revaluation,” and the net unrealized gains, net of deferred taxes, are reported as “Land revaluation excess” in “Stockholders’ equity”.

Certain consolidated subsidiaries revaluated their own land for business activities in accordance with the Law. The income taxes corresponding to the net unrealized gains (losses) are deferred and reported in “Liabilities” or “Assets” as “Deferred tax liabilities for land revaluation” or “Deferred tax assets for land revaluation” and the net unrealized gains (losses), net of deferred taxes, are reported as “Land revaluation excess” in “Stockholders’ equity”.

Date of the revaluation

SMBC: March 31, 1998 and March 31, 2002

Certain consolidated subsidiaries: March 31, 1999 and March 31, 2002.

Method of revaluation (provided in Article 3-3 of the Law)

SMBC: Fair values were determined by applying appropriate adjustments for land shape and timing of appraisal to the values specified in Article 2-3, 2-4 or 2-5 of the Enforcement Ordinance of the Law concerning Land Revaluation (the Enforcement Ordinance No. 119) effective March 31, 1998.

Certain consolidated subsidiaries: Fair values were determined based on the values specified in Article 2-3 and 2-5 of the Enforcement Ordinance No. 119.

**16. Minority Interests**

SB Treasury Company, L.L.C., a subsidiary of SMBC, issued floating noncumulative preferred securities, totaling \$1,800 million in February 1998. SB Equity Securities (Cayman), Limited, a subsidiary of SMBC, issued floating noncumulative preferred securities, totaling ¥340,000 million in February and March 1999. Sakura Preferred Capital (Cayman) Limited, a subsidiary of SMBC, issued noncumulative preferred securities, totaling ¥283,750 million in December 1998 and March 1999. These subsidiaries are consolidated and the preferred securities are accounted for as minority interests.

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**  
**AS OF AND FOR THE YEAR ENDED MARCH 31, 2003 — (Continued)**

**17. Stockholders' Equity**

Capital stock consists of common stock and preferred stock. Common stock and preferred stock at March 31, 2003 are as follows:

| <u>Number of shares</u>            | <u>Authorized</u>  | <u>Issued and<br/>outstanding</u> |
|------------------------------------|--------------------|-----------------------------------|
| Common stock . . . . .             | 100,000,000        | 54,811,805                        |
| Preferred stock (Type 1) . . . . . | 67,000             | 67,000                            |
| Preferred stock (Type 2) . . . . . | 100,000            | 100,000                           |
| Preferred stock (Type 3) . . . . . | 800,000            | 800,000                           |
| Preferred stock (Type 4) . . . . . | 250,000            | —                                 |
| Preferred stock (Type 5) . . . . . | 250,000            | —                                 |
| Preferred stock (Type 6) . . . . . | 300,000            | —                                 |
| Total . . . . .                    | <u>101,767,000</u> | <u>55,778,805</u>                 |

At the merger on March 31, 2003, SMBC issued 67,000 shares of Preferred stock (Type 1), 100,000 shares of Preferred stock (Type 2), 800,000 shares of Preferred stock (Type 3) and 52,070,185 shares of Common stock.

All of the preferred stock is noncumulative and nonparticipating for dividend payments, and shareholders of the preferred stock are not entitled to vote at a general meeting of shareholders except when the bill to pay the prescribed dividends to shareholders is not submitted to the general meeting of shareholders or the bill to pay the prescribed dividends to shareholders is rejected at the general meeting of shareholders. Annual dividends per share of preferred stock (Type 1, 2, 3) are paid to shareholders by ¥10,500, ¥28,500 and ¥13,700, respectively.

As for liquidation distribution, shareholders of preferred stock (Type 1, 2, 3) receive ¥3,000 thousand, ¥3,000 thousand and ¥1,000 thousand per share, respectively, and do not have the right to participate in any further liquidation distribution.

SMBC may, at any time, purchase and retire them out of earnings available for distribution to the shareholders.

Shareholders of preferred stock (Type 1, 2, 3) may convert the preferred stock into common stock at any time excluding certain periods, from the issuance date to February 26, 2009, from August 1, 2005 to February 26, 2009 and from the issuance date to September 30, 2009, respectively, in each case subject to certain adjustments. The preferred stock (Type 1, 2) outstanding on February 26, 2009 will be mandatorily converted into common stock at the conversion ratio of ¥3,000 thousand divided by the higher of ¥500 thousand and the average market price of Sumitomo Mitsui Financial Group, Inc.'s common stock for a certain period preceding February 26, 2009. The preferred stock (Type 3) outstanding on September 30, 2009 will be mandatorily converted into common stock at the conversion ratio of ¥1,000 thousand divided by the higher of ¥258,330 and the average market price of Sumitomo Mitsui Financial Group, Inc.'s common stock for a certain period preceding September 30, 2009.

(2) A reconciliation of the effective income tax rate reflected in the accompanying consolidated statement of operations to the statutory tax rate for the year ended March 31, 2003 was as follows:

|   |          |
|---|----------|
| Statutory tax rate .....  | 38.62%   |
| Valuation allowance .....   | (24.23)% |
| Change of the effective statutory tax rate due to the revision of the local tax law ..... | 11.51%   |
| Other .....   | 1.79%    |
| Effective income tax rate .....   | 27.70%   |

(3) With the implementation of the “Metropolitan ordinance regarding the imposition of enterprise taxes through external standards taxation on banks in Tokyo” (Tokyo Metropolitan Ordinance No. 145, April 1, 2000) (“the metropolitan ordinance”), enterprise taxes that were hitherto levied on taxable income are now levied on gross banking profit.

On October 18, 2000, Sakura Bank and Sumitomo Bank filed a lawsuit with the Tokyo District Court against the Tokyo metropolitan government and the Governor of Tokyo seeking to void the metropolitan ordinance. They won the case eventually entirely on March 26, 2002 with a decision of the Tokyo District Court in the Bank’s favor, on the grounds that the metropolitan ordinance was illegal. The District Court ordered the metropolitan government to return to the Banks advance tax payments of ¥16,633 million (\$138 million) and also awarded to the Banks damages of ¥200 million (\$2 million). On March 29, 2002, the metropolitan government lodged an appeal with the Tokyo High Court against the decision, and on April 9, 2002, the plaintiff banks at the first trial including the Bank also lodged an appeal. The Bank won the second-trial case eventually on January 30, 2003 with a decision of the Tokyo High Court in SMBC’s favor, on the grounds that the metropolitan ordinance was illegal. The High Court ordered the metropolitan government to return to SMBC advance tax payments of ¥36,175 million (\$301 million). On February 10, 2003, the metropolitan government lodged a final appeal with the Supreme Court against the decision, and on February 13, 2003, the plaintiff banks at the first trial including SMBC also lodged a final appeal.

**SUMITOMO MITSUI BANKING CORPORATION AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**  
**AS OF AND FOR THE YEAR ENDED MARCH 31, 2003 — (Continued)**

It is the opinion of SMBC that the metropolitan ordinance is both unconstitutional and illegal. SMBC has asserted this opinion in the courts and the matter is still in litigation. The fact that during this fiscal year SMBC has applied the same treatment as in the previous year, accounting for enterprise taxes through external standards taxation on banks in Tokyo in accordance with the metropolitan ordinance, is because SMBC has deemed it appropriate at this stage to continue with the same accounting treatment as before. This accounting treatment does not constitute in any way an admission on the part of SMBC either of the constitutionality or of the legality of the metropolitan ordinance.

With the implementation of the metropolitan ordinance, enterprise taxes relating to banks in Tokyo were recorded in "Other expenses" in the amounts of ¥16,833 million (\$140 million) for the year ended March 31, 2001 (sum of Sakura Bank and Sumitomo Bank), ¥19,862 million (\$165 million) for the year ended March 31, 2002 and ¥18,269 million (\$152 million) for the year ended March 31, 2003. As a result, "Income (loss) before income taxes" for the each fiscal year decreased (increased) by the corresponding amount as compared with the previous standards under which enterprise taxes were levied on taxable income. There is no impact on "Income taxes, current" as compared with the previous standards under which enterprise taxes were levied on taxable income. Consequently, stockholders' equity decreased by ¥32,495 million (\$270 million). Since the enterprise taxes in question are not included in the calculations for accounting for tax effects, there was a decrease in "Deferred tax assets" of ¥98,703 million (\$821 million) as compared with the amount that would have been included if the enterprise taxes had been levied on taxable income instead of gross profits. There was also a decrease in "Deferred tax liabilities for land revaluation" of ¥3,236 million (\$27 million), and consequently stockholders' equity decreased by ¥95,467 million (\$794 million).

With the implementation of the "Municipal Ordinance regarding the imposition of enterprise taxes through external standards taxation on banks in Osaka" (Osaka Municipal Ordinance No. 131, June 9, 2000) ("the municipal ordinance"), enterprise taxes which were hitherto levied on taxable income are now levied on gross banking profit.

On April 4, 2002, the Bank filed a lawsuit with the Osaka District Court against the Osaka municipal government and the Governor of Osaka seeking to void the municipal ordinance. With the implementation of the "Revision of Municipal Ordinance regarding the imposition of enterprise taxes through external standards taxation on banks in Osaka" (Osaka Municipal Ordinance No. 77, 2002) ("the revised municipal ordinance 2002") on May 30, 2002, and the implementation of the "Revision of Municipal Ordinance regarding the imposition of enterprise taxes through external standards taxation on banks in Osaka" (Osaka Municipal Ordinance No. 14, 2003) ("the revised municipal ordinance 2003") on April 1, 2003, the special treatment regarding the tax basis is to be applicable from the fiscal year starting on April 1, 2003. The enterprise taxes which the banks should pay to Osaka municipal government this term are subject to the supplementary provision 2 of the revised municipal ordinance 2003, which provides the banks shall pay the enterprise taxes based on the lesser of gross banking profit or taxable income. SMBC, therefore, is planning to file and pay the enterprise taxes based on taxable income. The fact that SMBC is planning to file and pay the enterprise taxes according to the revised municipal ordinance does not constitute in any way an admission on the part of SMBC either of the constitutionality or of the legality of the revised municipal ordinance 2002 and 2003 as well as the municipal ordinance. Since the enterprise taxes in question are not included in the calculations for accounting for tax effects, there was a decrease in "Deferred tax assets" of ¥48,699 million (\$405 million) as compared with the amount that would have been included if the enterprise taxes had been levied on taxable income instead of gross profits. There was also a decrease in "Deferred tax liabilities for land revaluation" of ¥1,575 million (\$13 million), and consequently stockholders' equity decreased by ¥47,124 million (\$392 million).

(4) With the implementation of the "Revision of the Local Tax Law" (Legislation No. 9, 2003) on March 31, 2003, the tax basis of enterprise taxes, which was stipulated as "taxable income and liquidation income" by the 12th paragraph of Article 72 of the Local Tax Law before the revision, is to be a combination of "amount of added value," "amount of capital" and "taxable income and liquidation income" from the fiscal year starting April 1, 2004. The enterprise taxes that have tax bases of the "amount of added value" and the "amount of capital" are not pertinent to the enterprise taxes that have tax bases of income-related amounts. The "Revision of the Local Tax Law" also stipulates that the metropolitan ordinance and the municipal ordinance are to be abolished from the fiscal year starting April 1, 2004.

**SUMITOMO MITSUI BANKING CORPORATION AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**  
**AS OF AND FOR THE YEAR ENDED MARCH 31, 2003 — (Continued)**

In connection with the “Revision of the Local Tax Law,” the effective statutory tax rate that SMBC and its domestic consolidated subsidiaries use in the calculations of deferred tax assets and liabilities from the fiscal year starting April 1, 2004 was changed, and thus, there was an increase in “Deferred tax assets” of ¥65,124 million (\$542 million) and a decrease in “Income taxes, deferred” of ¥65,278 million (\$543 million). There was also an increase in “Deferred tax liabilities for land revaluation” of ¥2,609 million (\$22 million) and a decrease in “Land revaluation excess” of ¥2,621 million (\$22 million).

As for SMBC, the effective statutory tax rate used in the calculations of deferred tax assets and liabilities was changed from 38.62% to 40.46%. As a result, there was an increase in “Deferred tax assets” of ¥67,657 million (\$563 million) and a decrease in “Income taxes, deferred” of the same amount. There was also an increase in “Deferred tax liabilities for land revaluation” of ¥2,634 million (\$22 million) and a decrease in “Land revaluation excess” of the same amount.

**25. Employee Retirement Benefits**

*(1) Outline of employee retirement benefits*

SMBC and consolidated subsidiaries in Japan have contributory funded defined benefit pension plans such as contributory pension plans, qualified pension plans and lump-sum severance indemnity plans. They may grant additional benefits in cases where certain requirements are met when employees retire. SMBC and some consolidated subsidiaries in Japan contributed certain marketable equity securities to an employee retirement benefit trust. Some domestic consolidated subsidiaries received an approval from Minister of Health, Labor and Welfare for exemption from future retirement benefit obligations with respect to the entrusted portion of employee pension fund.

| Total .....  | <u>¥ 75,237</u>        | <u>\$ 626</u>                   |

**(4) Assumptions**

The principal assumptions used in determining benefit obligation and pension expenses at or for the year ended March 31, 2003 were as follows:

- (a) Discount rate: 1.7% to 3.0%
- (b) Expected rate of return on plan assets: 0.0% to 5.0%
- (c) Allocation of estimated amount of retirement benefits:  
Allocated to each period by the straight-line method
- (d) Term to amortize prior service costs: Mainly 10 years
- (e) Term to amortize unrecognized net actuarial gain or loss: Mainly 10 years
- (f) Term to amortize unrecognized net obligation from initial application of new accounting standard:  
Mainly 5 years

**26. Lease Transactions**

**(1) Financing leases**

**(a) Lessee side**

A summary of assumed amounts of acquisition cost, accumulated depreciation and net book value for financing leases without transfer of ownership at March 31, 2003 was as follows:

| <u>March 31, 2003</u>          | <u>Millions of yen</u> |               |                |
|--------------------------------|------------------------|---------------|----------------|
|                                | <u>Equipment</u>       | <u>Other</u>  | <u>Total</u>   |
| Acquisition cost .....         | ¥55,751                | ¥9,420        | ¥65,171        |
| Accumulated depreciation ..... | <u>27,163</u>          | <u>4,413</u>  | <u>31,577</u>  |
| Net book value .....           | <u>¥28,587</u>         | <u>¥5,007</u> | <u>¥33,594</u> |

| <u>March 31, 2003</u>          | <u>Millions of U.S. dollars</u> |              |              |
|--------------------------------|---------------------------------|--------------|--------------|
|                                | <u>Equipment</u>                | <u>Other</u> | <u>Total</u> |

| Accumulated depreciation ..... | <u>226</u>                      | <u>37</u>    | <u>263</u>   |
| Net book value .....           | <u>\$238</u>                    | <u>\$41</u>  | <u>\$279</u> |

**SUMITOMO MITSUI BANKING CORPORATION AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**  
**AS OF AND FOR THE YEAR ENDED MARCH 31, 2003 — (Continued)**

Future minimum lease payments excluding interests at March 31, 2003 were as follows:

| <u>March 31, 2003</u>     | <u>Millions of yen</u> | <u>Millions of U.S. dollars</u> |
|---------------------------|------------------------|---------------------------------|
| Due within one year ..... | ¥10,536                | \$ 88                           |
| Due after one year .....  | <u>24,178</u>          | <u>201</u>                      |
|                           | <u>¥34,714</u>         | <u>\$289</u>                    |

Total lease expenses for the year ended March 31, 2003 were ¥3,738 million (\$31 million). Assumed depreciation charges for the year ended March 31, 2003 amounted to ¥3,440 million (\$29 million). Assumed depreciation charges is calculated using the straight-line method over the lease term of the respective assets without salvage values. The difference between the minimum lease payments and the acquisition costs of the lease assets represents interest expenses. The allocation of such interest expenses over the lease term is computed using the effective interest method. Interest expenses for the year ended March 31, 2003 amounted to ¥279 million (\$2 million).

|--------------------------------|---------------------------------|--------------|--------------|
|                                | <u>Equipment</u>                | <u>Other</u> | <u>Total</u> |
| Acquisition cost .....         | \$318                           | \$16         | \$334        |
| Accumulated depreciation ..... | <u>186</u>                      | <u>8</u>     | <u>194</u>   |
| Net book value .....           | <u>\$132</u>                    | <u>\$ 8</u>  | <u>\$140</u> |

Future lease payments receivable excluding interests at March 31, 2003 were as follows:

| <u>March 31, 2003</u>     | <u>Millions of yen</u> | <u>Millions of U.S. dollars</u> |
|---------------------------|------------------------|---------------------------------|
| Due within one year ..... | ¥ 6,043                | \$ 50                           |
| Due after one year .....  | <u>11,550</u>          | <u>96</u>                       |
|                           | <u>¥17,594</u>         | <u>\$146</u>                    |

Total lease income for the year ended March 31, 2003 was ¥374,816 million (\$3,118 million). Depreciation charges for the year ended March 31, 2003 amounted to ¥306,999 million (\$2,554 million). Interest income represents the difference between the additional amount of the lease payments receivable and estimated salvage values, and the acquisition costs of the lease assets. The allocation of such interest income over the lease term is computed using the effective interest method. Interest income for the year ended March 31, 2003 amounted to ¥70,330 million (\$585 million).

**AS OF AND FOR THE YEAR ENDED MARCH 31, 2003 — (Continued)**

**(2) Operating leases**

*(a) Lessee side*

Future minimum lease payments at March 31, 2003 were as follows:

| <u>March 31, 2003</u>     | <u>Millions of yen</u> | <u>Millions of U.S. dollars</u> |
|---------------------------|------------------------|---------------------------------|
| Due within one year ..... | ¥ 16,530               | \$137                           |
| Due after one year .....  | <u>93,241</u>          | <u>776</u>                      |
|                           | <u>¥109,772</u>        | <u>\$913</u>                    |

*(b) Lessor side*

Future lease payments receivable at March 31, 2003 were as follows:

| <u>March 31, 2003</u>     | <u>Millions of yen</u> | <u>Millions of U.S. dollars</u> |
|---------------------------|------------------------|---------------------------------|
| Due within one year ..... | ¥172                   | \$ 1                            |
| Due after one year .....  | <u>436</u>             | <u>4</u>                        |
|                           | <u>¥609</u>            | <u>\$ 5</u>                     |

Future lease payments receivable of ¥3,162 million (\$26 million) on the lessor side referred to in (1) and (2) above were pledged as collateral for borrowings at March 31, 2003.

**27. Loan Commitments**

Commitment line contracts on overdrafts and loans are agreements to lend to customers when they apply for borrowing, to a prescribed amount, as long as there is no violation of any condition established in the contracts. The amount of unused commitments was ¥28,977,879 million (\$241,081 million), and the amount of unused commitments whose original contract terms are within one year or unconditionally cancelable at any time was ¥26,272,078 million (\$218,570 million) at March 31, 2003.

Since many of these commitments are expected to expire without being drawn upon, the total amount of unused commitments does not necessarily represent actual future cash flow requirements. Many of these commitments have clauses that SMBC and consolidated subsidiaries can reject an application from customers or reduce the contract amounts in case economic conditions are changed, SMBC and consolidated subsidiaries need to secure claims or other events occur. In addition, SMBC and consolidated subsidiaries request the customers to pledge collateral such as premises and securities at the conclusion of the contracts, and take necessary measures such as grasping customers' financial positions, revising contracts when need arises and securing claims after the conclusion of the contracts.

Notes: 1. Market value is calculated as follows:

|                 |  |
|-----------------|--|
| Stocks          | Average market price during one month before the fiscal year-end |
| Bonds and other | Market price at the fiscal year-end                              |

2. Other securities with market value are considered as impaired if the market value decreases significantly below the acquisition cost and such decline is not considered as recoverable. The market value is recognized as the consolidated balance sheet amount and the amount of write-down is accounted for as valuation loss (impaired) for the current fiscal year. Valuation loss for this fiscal year was ¥496,396 million (\$4,130 million). The rule for determining "significant decline" is as follows and is based on the classification of issuing company under self-assessment of assets.

|  |  |
|--|--|
| Bankrupt/Effectively bankrupt/Potentially bankrupt issuers | : Market value is lower than acquisition cost.             |
| Issuers requiring caution                                  | : Market value is 30% or more lower than acquisition cost. |
| Normal issuers   | : Market value is 50% or more lower than acquisition cost. |

Bankrupt issuers: Issuers that are legally bankrupt or formally declared bankrupt.

Effectively bankrupt issuers: Issuers that are not legally bankrupt but regarded as substantially bankrupt.

Potentially bankrupt issuers: Issuers that are perceived to have a high risk of falling into bankruptcy.

Issuers requiring caution; Issuers that are identified for close monitoring.

Normal issuers: Issuers other than the above four categories of issuers.

Notes: 1. The above transactions are valued at market value and the valuation gains (losses) are accounted for in the consolidated statement of operations.

Derivative transactions to which hedge accounting method is applied are not included in the amounts above. Some consolidated overseas subsidiaries account for interest rate derivatives in accordance with local accounting standards. Such transactions are not included in the amounts above, of which their net unrealized gains amount to ¥827 million (\$7 million).

2. Market value of transactions listed on exchange is calculated mainly using the closing prices on the Tokyo International Financial Futures Exchange and others.

Market value of OTC transactions is calculated mainly using discounted present value and option pricing models.

Notes: 1. The above transactions are valued at market value and the valuation gains (losses) are accounted for in the consolidated statement of operations.

The derivative transactions to which the hedge accounting method is applied and the transaction shown in Note 3 below, are not included in the amounts above. Some consolidated overseas subsidiaries account for currency derivatives in accordance with local accounting standards. Such transactions are not included in the amounts above, of which their net unrealized losses amount to ¥293 million (\$2 million).

2. Market value is calculated mainly using discounted present value.

3. Forward foreign exchange and currency options which are of the following types are not included in the amounts above:

- (a) Those that are revaluated at fiscal year-end and the revaluation gains (losses) are accounted for in the consolidated statement of operations.
- (b) Those that are allotted to financial assets/liabilities denominated in foreign currency and whose market values are already reflected in the amount of the financial assets/liabilities on the consolidated balance sheet.
- (c) Those that are allotted to financial assets/liabilities denominated in foreign currency and the financial assets/liabilities are eliminated in the process of consolidation.

- Notes: 1. The business segmentation is classified based on SMBC's internal administrative purpose.
2. "Other" includes securities, credit card, investment banking, loans, factoring, mortgage securities, venture capital, system development and information processing.
3. Ordinary income represents total income excluding gains on disposition of premises and equipment, collection of written-off claims, gain on sale of business operation and reversals of other reserves. Ordinary expenses represent total expenses excluding losses on disposition of premises and equipment, amortized cost of unrecognized net transition obligation for employee retirement benefits and other extraordinary expenses.
4. As mentioned in Note 24 "Income Taxes", the effective tax rate was changed with the implementation of the "Revision of the Local Tax Law" (Legislation No. 9, 2003) on March 31, 2003. As a result, Assets of "Banking business" increased by ¥65,768 million (\$547 million) and Assets of "Other" decreased by ¥643 million (\$5 million) as compared with the assets that were calculated using the former effective tax rate.

- Notes: 1. The geographic segmentation is decided based on the degrees of following factors: geographic proximity, similarity of economic activities and relationship of business activities among regions.
2. The Americas includes the United States, Brazil and others; Europe includes the United Kingdom, France and others; Asia and Oceania includes Hong Kong, Singapore and others except Japan.
3. Ordinary income represents total income excluding gains on disposition of premises and equipment, recoveries of written-off claims, gain on sale of business operation and reversals of other reserves. Ordinary expenses represent total expenses excluding

losses on disposition of premises and equipment, amortized cost of unrecognized net transition obligation for employee retirement benefits and other extraordinary expenses.

4. As mentioned in Note 24 "Income Taxes", the effective tax rate was changed with the implementation of the "Revision of the Local Tax Law" (Legislation No. 9, 2003) on March 31, 2003. As a result, Assets of "Japan" increased by ¥65,124 million (\$542 million) as compared with assets that were calculated using the former effective tax rate.

**(3) Ordinary income from overseas operations**

Note: Nonconsolidated statement of income for the year ended March 31, 2003 does not include the Bank's profit/loss from April 1, 2002 to March 16, 2003.

## REPORT OF INDEPENDENT PUBLIC ACCOUNTANTS

To The Board of Directors of  
Sumitomo Mitsui Banking Corporation

We have audited the accompanying consolidated balance sheet of Sumitomo Mitsui Banking Corporation and subsidiaries as of March 31, 2002, and the related consolidated statements of operations, stockholders' equity and cash flows for the year then ended, expressed in Japanese yen. Our audit was made in accordance with generally accepted auditing standards in Japan and, accordingly, included such tests of the accounting records and such other auditing procedures as we considered necessary in the circumstances.

In our opinion, the consolidated financial statements referred to above present fairly the consolidated financial position of Sumitomo Mitsui Banking Corporation and subsidiaries as of March 31, 2002, and the consolidated results of their operations and their cash flows for the year then ended in conformity with accounting principles generally accepted in Japan (Note 1) applied on a basis consistent with that of the preceding year, except as noted in the following paragraph.

As explained in Note 2, effective April 1, 2001, Sumitomo Mitsui Banking Corporation and subsidiaries prospectively adopted the Japanese accounting standard for financial instruments on Other securities.

Also, in our opinion, the U.S. dollar amounts in the accompanying consolidated financial statements have been translated from Japanese yen on the basis set forth in Note 1.

Asahi & Co.

## SUMITOMO MITSUI BANKING CORPORATION AND SUBSIDIARIES

### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS AS OF AND FOR THE YEAR ENDED MARCH 31, 2002

#### 1. Basis of Financial Statements

On April 1, 2001, The Sumitomo Bank, Limited merged with The Sakura Bank, Limited and succeeded its assets, liabilities, all the claims, obligations and employees, and changed its corporate name to Sumitomo Mitsui Banking Corporation (the "Bank").

The Bank and its consolidated domestic subsidiaries maintain their official accounting records in Japanese yen and in accordance with the provisions set forth in the Japanese Commercial Code and accounting principles and practices generally accepted in Japan ("Japanese GAAP").

The accounts of overseas consolidated subsidiaries are based on their accounting records maintained in conformity with generally accepted accounting principles and practices prevailing in the respective countries of domicile.

Certain accounting principles and practices generally accepted in Japan are different from International Accounting Standards and standards in other countries in certain respects as to application and disclosure requirements. Accordingly, the accompanying financial statements are intended for use by those who are informed about Japanese accounting principles and practices.

The accompanying consolidated financial statements have been restructured and translated into English (with some expanded descriptions and the inclusion of consolidated statements of stockholders' equity) from the consolidated financial statements of the Bank prepared in accordance with Japanese GAAP.

Some supplementary information included in the statutory Japanese language consolidated financial statements, but not required for fair presentation is not presented in the accompanying consolidated financial statements.

Amounts less than one million yen have been omitted. As a result, the totals in Japanese yen shown in the financial statements do not necessarily agree with the sum of the individual amounts.

For the convenience of the readers, the accompanying U.S. dollar financial statements have been translated from Japanese yen, as a matter of arithmetical computation only, at the rate of ¥133.25 to US\$1, the exchange rate prevailing at March 31, 2002. The translations should not be construed as a representation that Japanese yen have been or could have been converted into U.S. dollars at that rate.

#### 2. Significant Accounting Policies

##### (1) Consolidation

The consolidated financial statements include the accounts of the Bank and its significant subsidiaries. All significant inter-company balances and transactions have been eliminated.

Japanese accounting standards on consolidated financial statements require a company to consolidate any subsidiaries of which the company substantially controls the operations, even if it is not a majority owned subsidiary. Control is defined as the power to govern the decision making body of an enterprise.

The consolidated financial statements include the accounts of consolidated subsidiaries, of which the fiscal year ends on or after December 31. In case that these subsidiaries have a significant transaction during the period from their fiscal year-end to March 31, the Bank makes certain adjustments to the consolidated financial statements to be comprehensive.

In the elimination of investments in subsidiaries, the assets and liabilities of the subsidiaries, including the portion attributable to minority stockholders, are evaluated using the fair value at the time the Bank acquired control of the respective subsidiaries.

Goodwill on Sumitomo Mitsui Card Company, Limited, is amortized using the straight-line method over five years. Goodwill on the other entities is charged or credited to income directly.

Japanese accounting standards also require any non-consolidated subsidiaries and affiliates on which the Bank is able to exercise material influence over their financial and operating policies are to be accounted for by the equity method. Equity in earnings of affiliates was ¥2,964 million (\$22 million) recorded as other income for the year ended March 31, 2002.

**SUMITOMO MITSUI BANKING CORPORATION AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**  
**AS OF AND FOR THE YEAR ENDED MARCH 31, 2002 — (Continued)**

**(2) Statement of cash flows**

For the purposes of the consolidated statement of cash flows, cash and cash equivalents represent cash and due from banks.

“Depreciation of premises and equipment” and “Depreciation of other assets” in “Other” in operating activities were separately presented for the year ended March 31, 2001, but are included in “Depreciation of premises, equipment and others” from this fiscal year. Depreciation of premises and equipment was ¥59,459 million (\$446 million) and Depreciation of other assets was ¥36,914 million (\$277 million) for the year ended March 31, 2002.

Significant non-money transactions consisted of the following:

(i) Merger with The Sakura Bank, Limited

Assets and liabilities that were succeeded due to the merger with The Sakura Bank, Limited, consisted of the following:

|                                      | <u>Millions of yen</u> | <u>Millions of U.S. dollars</u> |
|--------------------------------------|------------------------|---------------------------------|
| Assets . . . . .                     | ¥48,245,020            | \$362,064                       |
| Securities . . . . .                 | 9,743,394              | 73,121                          |
| Loans and bills discounted . . . . . | 30,575,498             | 229,460                         |
| Liabilities . . . . .                | ¥46,390,838            | \$348,149                       |
| Deposits . . . . .                   | 33,534,079             | 251,663                         |

(ii) Conversion of convertible bonds

|  | <u>Millions of yen</u> | <u>Millions of U.S. dollars</u> |
|--|------------------------|---------------------------------|
| Increase of capital stock due to conversion of convertible bonds . . . . .   | ¥ 50,045               | \$376                           |
| Increase of capital surplus due to conversion of convertible bonds . . . . . | 49,954                 | 375                             |
| Decrease of convertible bonds due to conversion . . . . .                    | <u>¥100,000</u>        | <u>\$751</u>                    |

(iii) As mentioned in Note 18, the Bank transferred Capital surplus of ¥357,614 million (\$2,684 million) to Retained earnings during the year ended March 31, 2002.

**(3) Trading assets and liabilities**

Financial instruments, such as derivatives and trading securities, which are held for the short term in anticipation of market gains, are recorded at fair value. Such gains and losses are included in trading profits or losses on the consolidated statement of operations. Trading assets and liabilities are recorded at trade date.

**(4) Securities**

As for securities other than those in the trading portfolio, debt securities that the Bank and consolidated subsidiaries have the intent and ability to hold to maturity (held-to-maturity securities) are carried at amortized cost using the moving-average method.

Investments in nonconsolidated subsidiaries and affiliates that are not accounted for by the equity method are carried at cost using the moving-average method.

Securities excluding those classified as trading securities, held-to-maturity or investments in nonconsolidated subsidiaries and affiliates are defined as other securities. Prior to April 1, 2001, debt securities in other securities were carried at amortized cost using the moving-average method and equity securities classified as other securities were carried at cost using the moving-average method.

Effective April 1, 2001, the accounting standard for financial instruments was adopted on other securities. Stocks classified as other securities that have market value are carried at the average market value during the final month of the fiscal year, and other securities excluding such marketable stocks that have market value are carried

**SUMITOMO MITSUI BANKING CORPORATION AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**  
**AS OF AND FOR THE YEAR ENDED MARCH 31, 2002 — (Continued)**

at market value at the balance sheet date. Other securities that do not have market value are carried at cost or amortized cost, using the moving-average method. Net unrealized gains (losses) on other securities are recognized, net of applicable income taxes, as a separate component of stockholders' equity.

Securities included in money held in trust account are carried in the same manner as for securities mentioned above.

As a result of the adoption of the accounting standard for financial instruments on other securities, the total amount of Securities and Money held in trust decreased by ¥499,332 million (\$3,747 million) and Net unrealized losses on other securities of ¥304,837 million (\$2,288 million) is reported on the consolidated balance sheet. Declines in the fair value of other securities are charged to earnings when declines are determined to be other than temporary.

**(5) Derivative transactions**

Derivative transactions, excluding those classified as trading derivatives, are carried at fair value, though some consolidated overseas subsidiaries account for derivative transactions in accordance with local accounting standards.

**(6) Hedge accounting**

In accordance with the Industry Audit Committee Report No. 15 "Temporary Treatment for Accounting and Auditing of Application of Accounting Standard for Financial Instruments in Banking Industry," issued by JICPA in 2000, the Bank applies hedge accounting, abiding by the following requirements:

- (i) Loans, deposits and other interest-bearing assets and liabilities as a whole shall be recognized as the hedged portfolio.
- (ii) Derivatives as hedging instruments shall effectively reduce the interest rate exposure of the hedged portfolio.
- (iii) Effectiveness of hedging activities shall be evaluated on a quarterly basis.

Certain derivatives for the purpose of hedging are recorded on an accrual basis using the short-cut method (exceptional treatment for interest rate swaps) in view of consistency with the risk management policy.

In accordance with the Industry Audit Committee Report No. 19 "Temporary Treatment for Accounting and Auditing of Application of Accounting Standard for Financial Instruments in Leasing Industry," issued by JICPA in 2000, one of the consolidated domestic subsidiaries in the leasing industry applies a deferred hedge accounting related to portfolio hedge on liabilities.

Other domestic subsidiaries use the deferred hedge accounting or the short-cut method for interest rate swaps.

Net amount of deferred unrealized gains on hedging instruments to which hedge accounting is applied is reported in Other liabilities. Gross deferred unrealized losses and gross deferred unrealized gains on hedging instruments at March 31, 2002, were ¥1,071,749 million (\$8,043 million) and ¥1,156,384 million (\$8,678 million), respectively.

**(7) Non-accrual loans**

Loans are generally placed on non-accrual status when such loans are classified as Bankrupt, Effectively Bankrupt or Potentially Bankrupt by the self-assessment rule (see (10) Reserve for possible loan losses).

**(8) Premises and equipment**

Premises and equipment are generally stated at cost less accumulated depreciation. The Bank computes depreciation for premises using the straight-line method over the estimated useful lives of the respective assets.

**SUMITOMO MITSUI BANKING CORPORATION AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**  
**AS OF AND FOR THE YEAR ENDED MARCH 31, 2002 — (Continued)**

The depreciation for equipment is computed using the declining-balance method over the estimated useful lives of the respective assets. The estimated useful lives of major items are as follows:

Buildings 7 to 50 years  
Equipment 3 to 20 years

Depreciation of premises and equipment owned by consolidated domestic subsidiaries is mainly computed using the declining-balance method, while depreciation of those owned by consolidated overseas subsidiaries is mainly computed using the straight-line method over the estimated useful lives of respective assets.

**(9) Software costs**

Capitalized software for internal use is depreciated using the straight-line method over its estimated useful life (mainly five years) at the Bank and consolidated domestic subsidiaries, and is included in other assets.

**(10) Reserve for possible loan losses**

Reserve for possible loan losses of the Bank and its major consolidated subsidiaries is provided based on the internal rules for write-offs and reserves for loans.

Based on the self-assessment rule for the credit quality of the assets (“self-assessment rule”), the Bank and its major consolidated subsidiaries classify a borrower into one of the following five risk categories according to the borrower’s credit risk: Bankrupt Borrowers who are legally bankrupt, Effectively Bankrupt Borrowers who are regarded as substantially in the same situation as legally bankrupt borrowers, Potentially Bankrupt Borrowers who are not currently in the status of bankrupt but are likely to become bankrupt in future, Borrowers Requiring Caution or Normal Borrowers.

For collateral and/or guaranteed loans to Bankrupt Borrowers and Effectively Bankrupt Borrowers, the Bank recognizes a portion exceeding the appraised value of collateral and/or the amount deemed collectible from guarantees of those loans as irrecoverable, and writes off the portion. For the year ended March 31, 2002, the Bank and the consolidated subsidiaries made such write-offs of ¥1,824,274 million (\$13,691 million).

For loans to Bankrupt Borrowers and Effectively Bankrupt Borrowers, the Bank provides specific reserves. The amounts of the specific reserves are calculated by deducting the estimated disposal value of collateral and/or the amount deemed collectible from guarantees, from the book balances of those loans which remain after the write-offs.

The Bank also provides specific reserves for loans to Potentially Bankrupt Borrowers based on the estimated amount of recoveries from the collateral and/or guarantees and other pertinent indicators specific to the borrowers.

The Bank also provides general reserves for loans to Borrowers Requiring Caution and Normal Borrowers. The ratio of the general reserves is determined based on the Bank’s loan loss experiences and economic conditions.

The Bank provides additional reserve for the loans originated in certain countries based on management’s assessment of economic or political conditions of such countries.

Reserve for possible loan losses of other consolidated subsidiaries is provided for general claims by the amount deemed necessary based on the historical loan-loss ratio, and for doubtful claims by the amount deemed uncollectible based on respective assessments.

**(11) Reserve for possible losses on loans sold**

Reserve for possible losses on loans sold is provided for contingent losses arising from decline of market value of underlying collateral for loans sold to the Cooperative Credit Purchasing Company, Limited.

**(12) Reserve for employee bonuses**

Reserve for employee bonuses is provided, in provision for payment of bonuses to employees, by the amount of estimated bonuses, which are attributable to respective fiscal year. Prior to April 1, 2001, accrued

**SUMITOMO MITSUI BANKING CORPORATION AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**  
**AS OF AND FOR THE YEAR ENDED MARCH 31, 2002 — (Continued)**

bonuses to employees were included in Other liabilities, but effective April 1, 2001, Reserve for employee bonuses is reported in accordance with “Concerning Financial Statement Titles to Be Used for Accrued Bonuses for Employees” (Research Center Review Information No. 15 issued by JICPA). Consequently, Other liabilities decreased by ¥21,606 million (\$162 million) and Reserve for employee bonuses increased by the same amount at March 31, 2002 as compared with the former manner.

Prior to April 1, 2001, change of accrued bonuses to employees was included in “Other” in the consolidated statement of cash flows, but effective April 1, 2001, Net change in reserve for employee bonuses is reported. Consequently, Other decreased by ¥21,606 million (\$162 million) and Net change in reserve for employee bonuses increased by the same amount for the year ended March 31, 2002 as compared with the former manner.

***(13) Reserve for employee retirement benefits***

Under the terms of the Bank’s retirement plan, substantially all employees are entitled to a lump sum payment at the time of retirement. The amount of the lump-sum payment is, in general, calculated based on length of service, basic salary at the time of retirement and reason for retirement. In addition, the Bank has defined benefit pension plans which cover substantially all employees.

Reserve for employee retirement benefits and prepaid pension cost are recorded based on an actuarial computation, which uses the present value of the projected benefit obligation and pension assets, due to employee’s credited years of services at the balance sheet date. Prior service costs are amortized using the straight-line method over certain years (mainly 10 years) within the average remaining service period of active employees. Unrecognized net actuarial gain or loss is amortized from the next fiscal year using the straight-line method over certain years (mainly 10 years) within the average remaining service period of active employees. Unrecognized net obligation from initial application of the new accounting standard for employee retirement benefits is amortized using the straight-line method over five years.

***(14) Translation of foreign currencies***

The Bank’s assets and liabilities denominated in foreign currencies and overseas branches’ accounts are translated into Japanese yen mainly at the exchange rate prevailing at the consolidated balance sheet date, with the exception of stocks of subsidiaries and affiliates translated at rates prevailing at the time of acquisition.

Consolidated subsidiaries’ assets and liabilities denominated in foreign currencies are translated into Japanese yen at the exchange rate prevailing at their respective balance sheet dates.

***(15) Lease transactions***

Financing leases where the ownership of the property is deemed to be transferred to the lessee are capitalized, while other financing leases are allowed to be accounted for in the same manner as operating leases.

Lease assets are depreciated using the straight-line method over the lease term with estimated salvage value.

Lease-related income is recognized on a straight-line basis over the full term of the lease, based on the contractual amount of lease fees per month.

***(16) Amounts per share***

Net income (loss) per share is computed by deducting dividends for preferred stock from net income (loss), divided by the weighted average number of shares of common stock, excluding treasury stock and parent bank stock held by subsidiaries, outstanding during each fiscal year.

Declared dividends represent the cash dividends declared applicable to respective years, including dividends to be paid after the end of the year.

***(17) Adoption of new accounting standards***

Prior to April 1, 2001, unsecured borrowed securities and securities under resale agreements were reported on the consolidated balance sheet as Securities in custody in Other assets and Trading account securities borrowed or Securities borrowed in Other liabilities by the same amounts. Effective April 1, 2001, they are not

**SUMITOMO MITSUI BANKING CORPORATION AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**  
**AS OF AND FOR THE YEAR ENDED MARCH 31, 2002 — (Continued)**

reported on the consolidated balance sheet in accordance with the revision of the accounting standards for financial instruments. Consequently, Other assets and Other liabilities decreased by ¥3,098,200 million (\$23,251 million) at March 31, 2002, as compared with the former manner.

**3. Trading Assets**

Trading assets at March 31, 2002 consisted of the following:

| <u>March 31, 2002</u>   | <u>Millions of yen</u> | <u>Millions of U.S. dollars</u> |
|---|------------------------|---------------------------------|
| Trading securities . . . . .  | ¥ 122,808              | \$ 922                          |
| Derivatives on trading securities . . . . .                         | 91                     | 1                               |
| Derivatives on securities related to trading transactions . . . . . | 12                     | 0                               |
| Trading-related financial derivatives . . . . .                     | 2,291,438              | 17,196                          |
| Other trading assets . . . . .                                      | <u>863,755</u>         | <u>6,482</u>                    |
|   | <u>¥3,278,105</u>      | <u>\$24,601</u>                 |

**4. Securities**

Securities at March 31, 2002 consisted of the following:

| <u>March 31, 2002</u>                     | <u>Millions of yen</u> | <u>Millions of U.S. dollars</u> |
|---|------------------------|---------------------------------|
| Japanese government bonds* . . . . .      | ¥10,113,872            | \$ 75,901                       |
| Japanese local government bonds . . . . . | 500,052                | 3,753                           |
| Japanese corporate bonds . . . . .        | 1,430,388              | 10,735                          |
| Japanese stocks** . . . . .               | 5,223,394              | 39,200                          |
| Other** . . . . .                         | <u>3,426,924</u>       | <u>25,718</u>                   |
|   | <u>¥20,694,632</u>     | <u>\$155,307</u>                |

\* Includes ¥999 million (\$7 million) of unsecured loaned securities for which borrowers have rights to sell or pledge and loaned securities of ¥827 million (\$6 million) for which borrowers have rights to pledge but no rights to sell.

As for the unsecured borrowed securities for which the Bank has rights to sell or pledge and the securities which the Bank purchased under resale agreements, that are permitted to sell or pledge without restrictions, ¥3,534,532 million (\$26,526 million) of securities are pledged, ¥533,241 million (\$4,002 million) of securities are held in hand as of the consolidated balance sheet date. The Bank may pledge the borrowed securities as well.

\*\* Japanese stocks and other include investments in non consolidated subsidiaries and affiliates of ¥187,937 million (\$1,410 million).

**5. Loans and Bills Discounted**

Loans and bills discounted at March 31, 2002 consisted of the following:

| <u>March 31, 2002</u>      | <u>Millions of yen</u> | <u>Millions of U.S. dollars</u> |
|----------------------------|------------------------|---------------------------------|
| Bills discounted . . . . . | ¥ 940,422              | \$ 7,057                        |
| Loans on notes . . . . .   | 8,408,524              | 63,103                          |
| Loans on deeds . . . . .   | 42,655,561             | 320,117                         |
| Overdrafts . . . . .       | <u>11,641,078</u>      | <u>87,363</u>                   |
|                            | <u>¥63,645,586</u>     | <u>\$477,640</u>                |

**SUMITOMO MITSUI BANKING CORPORATION AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**  
**AS OF AND FOR THE YEAR ENDED MARCH 31, 2002 — (Continued)**

The following summarizes the non-accrual loans at March 31, 2002:

| <u>March 31, 2002</u>             | <u>Millions of yen</u> | <u>Millions of U.S. dollars</u> |
|-----------------------------------|------------------------|---------------------------------|
| Bankrupt loans . . . . .          | ¥ 227,484              | \$ 1,707                        |
| Non-accrual loans . . . . .       | <u>3,599,750</u>       | <u>27,015</u>                   |
| Total non-accrual loans . . . . . | <u>¥3,827,234</u>      | <u>\$28,722</u>                 |

In addition to the non-accrual loans, the Bank also classifies loans overdue by three months or longer as substandard loans, and such loan balances at March 31, 2002 were ¥102,762 million (\$771 million).

Restructured loans are loans for which the Bank has adjusted the terms of the loans in favor of borrowers as a means of financial assistance. These restructured loans are also classified as substandard and amounted to ¥2,554,371 million (\$19,170 million) at March 31, 2002.

**6. Other Assets**

Other assets at March 31, 2002 consisted of the following:

| <u>March 31, 2002</u>   | <u>Millions of yen</u> | <u>Millions of U.S. dollars</u> |
|---|------------------------|---------------------------------|
| Accrued income . . . . .                                      | ¥ 316,826              | \$ 2,378                        |
| Deferred assets . . . . .                                     | 453,059                | 3,400                           |
| Financial derivatives . . . . .                               | 1,397,056              | 10,485                          |
| Pledged money for securities borrowing transactions . . . . . | 3,020,519              | 22,668                          |
| Other . . . . .   | <u>1,260,182</u>       | <u>9,457</u>                    |
|   | <u>¥6,447,644</u>      | <u>\$48,388</u>                 |

**7. Premises and Equipment**

Premises and equipment at March 31, 2002 consisted of the following:

| <u>March 31, 2002</u>              | <u>Millions of yen</u> | <u>Millions of U.S. dollars</u> |
|------------------------------------|------------------------|---------------------------------|
| Land(*) . . . . .                  | ¥ 674,355              | \$ 5,061                        |
| Buildings . . . . .                | 558,503                | 4,192                           |
| Equipment and others . . . . .     | <u>635,777</u>         | <u>4,771</u>                    |
| Total . . . . .                    | ¥1,868,636             | \$14,024                        |
| Accumulated depreciation . . . . . | <u>(661,047)</u>       | <u>(4,961)</u>                  |
|                                    | <u>¥1,207,589</u>      | <u>\$ 9,063</u>                 |

(\*) Includes land revaluation excess for land referred to in Note 16.

**8. Lease Assets**

Lease assets at March 31, 2002 were as follows:

| <u>March 31, 2002</u>              | <u>Millions of yen</u> | <u>Millions of U.S. dollars</u> |
|------------------------------------|------------------------|---------------------------------|
| Equipment and others . . . . .     | ¥ 2,330,602            | \$ 17,491                       |
| Accumulated depreciation . . . . . | <u>(1,403,481)</u>     | <u>(10,533)</u>                 |
|                                    | <u>¥ 927,120</u>       | <u>\$ 6,958</u>                 |

**SUMITOMO MITSUI BANKING CORPORATION AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**  
**AS OF AND FOR THE YEAR ENDED MARCH 31, 2002 — (Continued)**

**9. Assets Pledged as Collateral**

Assets pledged as collateral at March 31, 2002 consisted of the following:

| <u>March 31, 2002</u>                                       | <u>Millions of yen</u> | <u>Millions of U.S. dollars</u> |
|---|------------------------|---------------------------------|
| Assets pledged as collateral                                |                        |                                 |
| Cash and due from banks and Deposits with banks . . . . .   | ¥ 63,325               | \$ 475                          |
| Trading assets . . . . .                                    | 621,047                | 4,661                           |
| Securities . . . . .  | 9,062,227              | 68,009                          |
| Loans and bills discounted . . . . .                        | 3,239,033              | 24,308                          |
| Other assets . . . . .                                      | 1,311                  | 10                              |
| Premises and equipment . . . . .                            | 547                    | 4                               |
| Liabilities corresponding to assets pledged as collateral   |                        |                                 |
| Deposits . . . . .  | 9,621                  | 72                              |
| Call money and bills sold . . . . .                         | 8,394,800              | 63,000                          |
| Payables under repurchase agreements . . . . .              | 1,118,531              | 8,394                           |
| Trading liabilities . . . . .                               | 39,986                 | 300                             |
| Borrowed money . . . . .                                    | 117,463                | 882                             |
| Pledged money for securities lending transactions . . . . . | 2,517,123              | 18,890                          |
| Other liabilities . . . . .                                 | 10,888                 | 82                              |
| Acceptances and guarantees . . . . .                        | 45,571                 | 342                             |

In addition to the assets presented above, the following assets were pledged as collateral for exchange settlements, initial margins of futures markets and certain other purposes at March 31, 2002:

| <u>March 31, 2002</u>                                     | <u>Millions of yen</u> | <u>Millions of U.S. dollars</u> |
|---|------------------------|---------------------------------|
| Cash and due from banks and Deposits with banks . . . . . | ¥ 101,722              | \$ 763                          |
| Trading assets . . . . .                                  | 296                    | 2                               |
| Securities . . . . .                                      | 2,880,100              | 21,614                          |
| Loans and bills discounted . . . . .                      | 58,095                 | 436                             |

Premises and equipment included surety deposits and intangibles of ¥125,258 million (\$940 million) at March 31, 2002. Other assets included initial margins of futures markets of ¥20,984 million (\$157 million).

**10. Deposits**

Deposits at March 31, 2002 consisted of the following:

| <u>March 31, 2002</u>                        | <u>Millions of yen</u> | <u>Millions of U.S. dollars</u> |
|--|------------------------|---------------------------------|
| Current deposits . . . . .                   | ¥ 4,765,722            | \$ 35,765                       |
| Ordinary deposits . . . . .                  | 25,150,251             | 188,745                         |
| Savings deposits . . . . .                   | 1,412,372              | 10,599                          |
| Deposits at notice . . . . .                 | 6,074,691              | 45,589                          |
| Time deposits . . . . .                      | 23,472,643             | 176,155                         |
| Negotiable certificates of deposit . . . . . | 6,662,097              | 49,997                          |

|                             | <u>¥2,861,669</u>      | <u>\$21,476</u>                 |

**16. Land Revaluation Excess**

Pursuant to the Enforcement Ordinance for the Law Concerning Land Revaluation (the "Law") effective March 31, 1998, the Bank and its domestic subsidiary recorded their own land for business activities at fair value at March 31, 1998 and March 31, 1999, respectively. According to the Law, net unrealized gains are reported in a separate component of stockholders' equity net of applicable income taxes as Land revaluation excess, and the related deferred tax liabilities are reported in liabilities as Deferred tax liabilities for land revaluation. The unrecorded revaluation losses at March 31, 2002 were ¥91,507 million (\$687 million).

Pursuant to the Law, as amended, effective March 31, 2001, the Bank revalued the land for business activities that was succeeded from SMBC Property Management Service Co., Ltd. at March 31, 2002 due to the merger with it. The net unrealized losses on the land, net of applicable income taxes, was deducted from Land revaluation excess, and the related deferred tax assets were deducted from Deferred tax liabilities for land revaluation. The book value of the land of ¥248,659 million (\$1,866 million) before the revaluation was reevaluated at ¥169,520 million (\$1,272 million) at March 31, 2002.

In addition, a consolidated subsidiary revaluated its land for business activities and the income taxes corresponding to the revaluated losses is recognized as Deferred tax assets for land revaluation and the revaluated losses, net of the corresponding taxes, are deducted from Land revaluation excess. The book value of the land of ¥4,280 million (\$32 million) before the revaluation was revaluated at ¥2,541 million (\$19 million) at March 31, 2002.

**17. Minority Interests**

SB Treasury Company, L.L.C., a subsidiary of the Bank, issued floating noncumulative preferred securities, totaling \$1,800 million in February 1998. SB Equity Securities (Cayman), Limited, a subsidiary of the Bank, issued floating noncumulative preferred securities, totaling ¥340,000 million in February and March 1999. Sakura Preferred Capital (Cayman) Limited, a subsidiary of the Bank, issued non cumulative preferred securities, totaling ¥283,750 million in December 1998 and March 1999. These subsidiaries are consolidated and the preferred securities are accounted for as minority interests.

**SUMITOMO MITSUI BANKING CORPORATION AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**  
**AS OF AND FOR THE YEAR ENDED MARCH 31, 2002 — (Continued)**

**18. Stockholders' Equity**

Prior to October 1, 2001, under the Banking Law of Japan, the Bank was required to appropriate as an earned surplus reserve an amount equal to at least 20 percent of cash disbursements in each period until the earned surplus reserve equaled 100 percent of the amount of capital (total amount of preferred stock and common stock). Capital surplus and earned surplus reserve were not available for distribution as dividends but may be used to reduce a deficit by resolution of the stockholders or may be capitalized by resolution of the Board of Directors.

The Commercial Code of Japan provided that at least one-half of the proceeds from shares issued at prices in excess of par value be included in capital. In conformity therewith, the Bank has divided the paid-in amount of the stock issued upon conversion of bonds and notes into common stock equally between common stock and capital surplus.

Effective October 1, 2001, pursuant to the Article 289-2 of the amended Commercial Code and the Article 18-2 of the amended Banking Law, Earned surplus reserve is appropriated until the total amount of both Earned surplus reserve and Capital surplus equals to the amount of capital. The excess of the total amount over the amount of capital may be transferred to retained earnings by resolution of stockholders. The Bank transferred Capital surplus of ¥357,614 million (\$2,684 million) to retained earnings during the year ended March 31, 2002. As for the nonconsolidated balance sheet, the Bank transferred capital surplus of ¥357,614 million (\$2,684 million) and earned surplus reserve of ¥241,421 million (\$1,812 million) to retained earnings of ¥599,035 million (\$4,496 million) during the year ended March 31, 2002.

In accordance with the Law Concerning Emergency Measures for the Early Strengthening of the Functions of the Financial System, Sumitomo and Sakura issued non cumulative preferred stock in the aggregate amount of ¥1,301,000 million (the first issuance of 67 million shares at total amount of ¥201,000 million and the second issuance of 100 million shares at total amount of ¥300,000 million by Sumitomo and the issuance of 800 million shares at total amount of ¥800,000 million by Sakura). All of the preferred stock had been subscribed by The Resolution and Collection Corporation, Limited on March 30, 1999. The non cumulative preferred stocks are redeemable at the option of the Bank at any time. ¥201,000 million of the preferred stock are convertible into common stock of the Bank at any time from May 1, 2002 until February 26, 2009, ¥300,000 million of the preferred stock are convertible into common stock of the Bank at any time from August 1, 2005 until February 26, 2009 and ¥800,000 million of the preferred stock are convertible into common stock of the Bank at any time from October 1, 2002 until September 30, 2009, in each case subject to certain adjustments to the conversion period.

| Net deferred tax assets . . . . .   | <u>¥1,843,257</u>      | <u>\$13,833</u>                 |

(2) A reconciliation of the effective income tax rate reflected in the accompanying consolidated statement of operations to the statutory tax rate for the year ended March 31, 2002 was as follows:

|  |         |
|--|---------|
| Statutory tax rate . . . . .                   | 38.62%  |
| Valuation allowance . . . . .                  | (4.45)% |
| Dividends from overseas subsidiaries . . . . . | (4.11)% |
| Other . . . . .                                | 0.96%   |
| Effective income tax rate . . . . .            | 31.02%  |

(3) With the implementation of the “Metropolitan ordinance regarding the imposition of enterprise taxes through external standards taxation on banks in Tokyo” (Tokyo Metropolitan Ordinance No. 145, April 1, 2000) (“the metropolitan ordinance”), enterprise taxes relating to banks in Tokyo which had been hitherto levied on income were changed to be levied on gross banking profit.

The Bank recorded enterprise tax of ¥19,862 million (\$149 million) in Other expenses for the year ended March 31, 2002 as a result of the metropolitan ordinance. The implementation of the metropolitan ordinance resulted in a reduction of the effective statutory tax rate used by the Bank to calculate deferred tax assets and liabilities. Consequently, Deferred tax assets, Deferred tax liabilities for land revaluation and stockholders’ equity at March 31, 2002 decreased by ¥96,420 million (\$724 million), ¥3,694 million (\$28 million) and ¥92,726 million (\$696 million), respectively, as compared with the amount that would be if the metropolitan ordinance had not been implemented.

With the implementation of the “Municipal Ordinance regarding the imposition of enterprise taxes through external standards taxation on banks in Osaka” (Osaka Municipal Ordinance No. 131, June 9, 2000) (“the municipal ordinance”), enterprise taxes relating to banks in Osaka which had been hitherto levied on income were also changed to be levied on gross banking profit.

The Bank recorded enterprise tax of ¥10,137 million (\$76 million) in Other expenses for the year ended March 31, 2002 as a result of the municipal ordinance. The implementation of the municipal ordinance also

**SUMITOMO MITSUI BANKING CORPORATION AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**  
**AS OF AND FOR THE YEAR ENDED MARCH 31, 2002 — (Continued)**

resulted in a reduction of the effective statutory tax rate used by the Bank to calculate deferred tax assets and liabilities. Consequently, Deferred tax assets, Deferred tax liabilities for land revaluation and stockholders' equity at March 31, 2002 decreased by ¥46,396 million (\$348 million), ¥1,798 million (\$13 million) and ¥44,597 million (\$335 million), respectively, as compared with the amount that would be if the municipal ordinance had not been implemented.

**26. Employee Retirement Benefits**

*(1) Outline of employee retirement benefits*

The Bank and consolidated subsidiaries in Japan have contributory funded defined benefit pension plans such as contributory pension plans, qualified pension plans and lump-sum severance indemnity plans. They may grant additional benefits in cases where certain requirements are met when employees retire. The Bank and some consolidated subsidiaries in Japan contributed certain marketable equity securities to an employee retirement benefit trust.

*(2) Projected benefit obligation*

| <u>March 31, 2002</u>  | <u>Millions of yen</u> | <u>Millions of U.S. dollars</u> |
|--|------------------------|---------------------------------|
| Projected benefit obligation(A) . . . . .  | ¥(1,175,959)           | \$(8,825)                       |

*(4) Assumptions*

The principal assumptions used in determining benefit obligation and pension expenses at or for the year ended March 31, 2002 were as follows:

- (a) Discount rate: 2.5% to 3.5%
- (b) Expected rate of return on plan assets: 0.0% to 5.3%
- (c) Allocation of estimated amount of retirement benefits:  
Allocated to each period by the straight-line method

**SUMITOMO MITSUI BANKING CORPORATION AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**  
**AS OF AND FOR THE YEAR ENDED MARCH 31, 2002 — (Continued)**

- (d) Period of amortization of prior service costs: Mainly 10 years
- (e) Term to amortize unrecognized net actuarial gain or loss: Mainly 10 years
- (f) Term to amortize unrecognized net obligation from initial application of new accounting standard: Mainly 5 years

**27. Lease Transactions**

**(1) Financing leases**

A summary of assumed amounts of acquisition cost, accumulated depreciation and net book value for financing leases without transfer of ownership at March 31, 2002 was as follows:

*(a) Lessee side*

| <u>March 31, 2002</u>          | Millions of yen  |              |                |
|--------------------------------|------------------|--------------|----------------|

|--------------------------------|--------------------------|--------------|--------------|
|                                | <u>Equipment</u>         | <u>Other</u> | <u>Total</u> |
| Acquisition cost .....         | \$ 131                   | \$ 2         | \$ 133       |
| Accumulated depreciation ..... | 65                       | 1            | 66           |
| Net book value .....           | <u>\$ 66</u>             | <u>\$ 1</u>  | <u>\$ 67</u> |

Future minimum lease payments excluding interests at March 31, 2002 were as follows:

| <u>March 31, 2002</u>     | Millions of yen | Millions of U.S. dollars |
|---------------------------|-----------------|--------------------------|
| Due within one year ..... | ¥3,055          | \$23                     |
| Due after one year .....  | 6,130           | 46                       |
|                           | <u>¥9,185</u>   | <u>\$69</u>              |

Total lease expenses for the year ended March 31, 2002 were ¥4,210 million (\$32 million). Assumed depreciation charges for the year ended March 31, 2002 amounted to ¥3,848 million (\$29 million). Assumed depreciation charges is calculated using the straight-line method over the lease term of the respective assets. The difference between the minimum lease payments and the acquisition costs of the lease assets represents interest expenses. The allocation of such interest expenses over the lease term is computed using the effective interest method. Interest expenses for the year ended March 31, 2002 amounted to ¥325 million (\$2 million).

| Acquisition cost . . . . .         | \$ 15,156                | \$ 2,099        | \$ 17,255       |
| Accumulated depreciation . . . . . | 9,314                    | 1,091           | 10,405          |
| Net book value . . . . .           | <u>\$ 5,842</u>          | <u>\$ 1,008</u> | <u>\$ 6,850</u> |

Future lease payments receivable excluding interests at March 31, 2002 were as follows:

| <u>March 31, 2002</u>         | <u>Millions of yen</u> | <u>Millions of U.S. dollars</u> |
|-------------------------------|------------------------|---------------------------------|
| Due within one year . . . . . | ¥286,293               | \$2,148                         |
| Due after one year . . . . .  | 654,334                | 4,911                           |
|                               | <u>¥940,628</u>        | <u>\$7,059</u>                  |

Total lease income for the year ended March 31, 2002 was ¥368,795 million (\$2,768 million). Assumed depreciation charges for the year ended March 31, 2002 amounted to ¥305,584 million (\$2,293 million). Depreciation is calculated using the straight-line method over the lease term of the respective assets without salvage values. The difference between the lease payments receivable and the acquisition costs of the lease assets represents interest income. The allocation of such interest income over the lease term is computed using the effective interest method. Interest income for the year ended March 31, 2002 was ¥60,569 million (\$455 million).

**(2) Operating leases**

**(a) Lessee side**

Future minimum lease payments at March 31, 2002 were as follows:

| <u>March 31, 2002</u>         | <u>Millions of yen</u> | <u>Millions of U.S. dollars</u> |
|-------------------------------|------------------------|---------------------------------|
| Due within one year . . . . . | ¥ 20,698               | \$ 155                          |
| Due after one year . . . . .  | 126,186                | 947                             |
|                               | <u>¥146,885</u>        | <u>\$1,102</u>                  |

**(b) Lessor side**

Future lease payments receivable at March 31, 2002 were as follows:

| <u>March 31, 2002</u>         | <u>Millions of yen</u> | <u>Millions of U.S. dollars</u> |
|-------------------------------|------------------------|---------------------------------|
| Due within one year . . . . . | ¥ 366                  | \$ 3                            |
| Due after one year . . . . .  | 900                    | 7                               |
|                               | <u>¥1,266</u>          | <u>\$10</u>                     |

Future lease payments receivable of ¥117,699 million (\$883 million) on the lessor side referred to in (1) and (2) above were pledged as collateral for borrowings at March 31, 2002.

**28. Loan Commitments**

Commitment line contracts on overdrafts and loans are agreements to lend to customers when they apply for borrowing, to a prescribed amount, as long as there is no violation of any condition established in the contracts. The amount of unused commitments was ¥27,038,063 million (\$202,912 million), and the amount of unused commitments whose original contract terms are within one year or unconditionally cancelable at any time was ¥24,508,364 million (\$183,928 million) at March 31, 2002. Since many of these commitments are expected to expire without being drawn upon, the total amount of unused commitments does not necessarily represent actual future cash flow requirements. Many of these commitments have clauses that the Bank and consolidated

subsidiaries can reject an application from customers or reduce the contract amounts in case economic conditions are changed, the Bank and consolidated subsidiaries need to secure claims or other events occur. In addition, the Bank and consolidated subsidiaries request the customers to pledge collateral such as premises and securities at the conclusion of the contracts, and take necessary measures such as grasping customers' financial positions, revising contracts when need arises and securing claims after the conclusion of the contracts.

**29. Market Value of Marketable Securities**

*(1) Securities*

The market value of marketable securities at March 31, 2002 was as follows:

In addition to Securities in the consolidated balance sheet, trading securities, negotiable certificates of deposit and commercial paper in Trading assets, negotiable certificates of deposit in Deposits with banks, and commercial papers and claims on loan trust in Commercial paper and other debt purchased are included in the amounts of following tables.

*(i) Securities classified as trading*

- Notes: 1. The above transactions are valued at market value and the valuated gains (losses) are accounted for in the consolidated statement of operations. Derivative transactions to which the hedge accounting method is applied are not included in the amounts above. Some consolidated overseas subsidiaries account for interest rate derivatives in accordance with local accounting standards and such transactions are not included in the figures above, of which their net unrealized gains amount to ¥490 million (\$4 million).
2. Market value of transactions listed on exchange is calculated mainly using the closing prices on the Tokyo International Financial Futures Exchange and others. Market value of OTC transactions is calculated mainly using discounted present value and option pricing models.

Notes: 1. The above transactions are valued at market value and the valuated gains (losses) are accounted for in the consolidated statement of operations.

Derivative transactions to which the hedge accounting method is applied and the transaction referred to in Note 3 below, are not included in the amounts above. Some consolidated overseas subsidiaries account for currency derivatives in accordance with local accounting standards and such transactions are not included in the figures above, of which their net unrealized gains amount to ¥715 million (\$5 million).

2. Market value is calculated mainly using discounted present value.

3. Forward foreign exchange and currency options which are of the following types are not included in the figures above:

- (a) Those that are revaluated at fiscal year-end and the revaluated gains (losses) are accounted for in the consolidated statement of operations.
- (b) Those that are allotted to financial assets/liabilities denominated in foreign currency and whose market values are already reflected in the amount of the financial assets/liabilities on the consolidated balance sheet.
- (c) Those that are allotted to financial assets/liabilities denominated in foreign currency and the financial assets/liabilities are eliminated in the process of consolidation.

- Notes: 1. The business segmentation is determined based on the Bank's internal administrative purposes.
2. "Other" includes securities, credit card, investment banking, loans, factoring, mortgage securities, venture capital, system development and information processing.
3. As mentioned in Note 2 (17) "Adoption of new accounting standards," prior to April 1, 2001, unsecured loaned securities and securities under repurchase agreements were recognized as "Securities in custody" in Other assets and "Trading account securities borrowed" or "Securities borrowed" in Other liabilities by the same amounts. Effective April 1, 2001, they are not reported on the consolidated balance sheet in accordance with the revision of the accounting standards for financial instruments. Consequently, Assets of "Banking business" decreased by ¥3,098,200 million (\$23,251 million) at March 31, 2002, as compared with the former manner.
4. As mentioned in Note 2 (4) "Securities," effective April 1, 2001, the method of valuation on other securities and other money held in trust complied with the accounting standards for financial instruments. Consequently, Assets of "Banking business," "Leasing" and "Other" decreased by ¥301,413 million (\$2,262 million), ¥999 million (\$7 million) and ¥4,325 million (\$32 million) at March 31, 2002, as compared with the former manner, respectively.
5. Operating income represents total income excluding gains on disposition of premises and equipment, collection of written-off claims, gain on sale of business operation and reversals of other reserves. Operating expenses represent total expenses excluding losses on disposition of premises and equipment, amortized cost of unrecognized net transition obligation for employee retirement benefits and other extraordinary expenses.

**SUMITOMO MITSUI BANKING CORPORATION AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**  
**AS OF AND FOR THE YEAR ENDED MARCH 31, 2002 — (Continued)**

- Notes: 1. The geographic segmentation is decided based on the degrees of following factors: geographic proximity, similarity of economic activities and relationship of business activities among regions.
2. The Americas includes the United States, Brazil and others; Europe includes the United Kingdom, France and others; Asia and Oceania includes Hong Kong, Singapore and others except Japan.
3. As mentioned in Note 2 (17) "Adoption of new accounting standards," prior to April 1, 2001, unsecured loaned securities and securities under repurchase agreements were recognized as "Securities in custody" in Other assets and "Trading account securities borrowed" or "Securities borrowed" in Other liabilities by the same amounts. Effective April 1, 2001, they are not reported on the consolidated balance sheet in accordance with the revision of the accounting standards for financial instruments. Consequently, Assets of "Japan" decreased by ¥3,098,200 million (\$23,251 million) at March 31, 2002, as compared with the former manner.
4. As mentioned in Note 2 (4) "Securities," effective April 1, 2001, the method of valuation on other securities and other money held in trust complied with the accounting standards for financial instruments. Consequently, Assets of "Japan," "The Americas" and "Europe" decreased by ¥307,871 million (\$2,310 million), ¥562 million (\$4 million) and ¥696 million (\$5 million) at March 31, 2002 and "Asia and Oceania" increased by ¥2,391 million (\$18 million) at March 31, 2002, as compared with the former manner, respectively.
5. Operating income represents total income excluding gains on disposition of premises and equipment, recoveries of written-off claims, gain on sale of business operation and reversals of other reserves. Operating expenses represent total expenses excluding losses on disposition of premises and equipment, amortized cost of unrecognized net transition obligation for employee retirement benefits and other extraordinary expenses.

**(3) Operating income from overseas operations**

| <u>Year ended March 31, 2002</u>                        | <u>Millions of yen</u> | <u>Millions of U.S. dollars</u> |
|---|------------------------|---------------------------------|
| Operating income from overseas operations (A) . . . . . | ¥ 845,379              | \$ 6,344                        |
| Consolidated operating income (B) . . . . .             | 3,779,702              | 28,365                          |
| (A)/(B) . . . . .                                       | 22.4%                  | 22.4%                           |

Notes: The above table shows operating income from transactions of the Bank's overseas branches and overseas consolidated subsidiaries, excluding internal income.

**32. Subsequent Event**
