#### 11. Review of Performance

For the first quarter ended 30 June 2022, the Bank recorded an operating profit of RM52.1 million, a decrease of 16.8% compared to the previous comparative period (Q1 June 2021: RM62.6 million). The Bank registered a 31.0% decrease of profit before taxation to RM54.8 million for the first quarter ended 30 June 2022 (Q1 June 2021: RM79.4 million). Consequentially, profit after taxation decreased by 31.5% to RM42.1 million in the first quarter ended 30 June 2022 (Q1 June 2021: RM61.5 million).

The decrease was mainly attributed to the decrease in writeback of impairment on loans, advances and financing of RM11.1 million to RM2.6 million (Q1 June 2021: RM13.7 million) and decrease in other operating income of 16.0% amounting to RM33.0 million (Q1 June 2021: RM39.3 million).

Total assets recorded an increase of 11.2% to RM23,173 million as at 30 June 2022 (31 March 2022: RM20,845 million). This was mainly attributed to the 8.7% increase in net loans, advances and financing amounting to RM15,686 million (31 March 2022: RM14,437 million), 165% increase in deposits and placements with banks and other financial institutions amounting to RM1,446 million (31 March 2022: RM546 million) and 53% increase in derivative financial assets amounting to RM606 million (31 March 2022: RM396 million).

The total liabilities recorded an increase of 13.3% to RM19,448 million as at 30 June 2022 (31 March 2022: RM17,160 million). This was largely due to the higher deposits from customers of 10.4% amounting to RM17,359 million (31 March 2022: RM15,729 million), higher deposits and placements of banks and other financial institutions of 41.9% amounting to RM1,340 million (31 March 2022: RM944 million) and higher derivative financial liabilities of 64.3% amounting to RM567 million (31 March 2022: RM345 million).

# NOTES TO THE UNAUDITED CONDENSED INTERIM FINANCIAL STATEMENTS FOR THE FINANCIAL PERIOD ENDED 30 JUNE 2022

#### 12. Current Year Prospects

Malaysia's Gross Domestic Product ("GDP") in the first quarter of 2022 grew by 5.0 per cent (4Q 2021: 3.6 per cent). The economic growth was supported by firm domestic demand and the improvement in the labour market conditions as the country is transitioning to endemicity.

Domestic demand continue to gain traction forward with the reopening of international borders since 1 April 2022 which would facilitate the recovery in tourism-related sectors. Furthermore, the investment activities and prospects continue with the realisation of multi-year projects and targeted policy measures will provide further support to economic activity and aggregate demand.

Nevertheless, challenges surrounding the outlook continue to persist due to external and domestic factors, such as consecutive waves of Covid-19, the resulting supply bottlenecks, disruptions to global markets for energy and food and the economic effects of the Russia-Ukraine war. The inflation outlook continues to be subject to global commodity prices, prolonged supply-related disruptions, on-going military conflict in Ukraine and domestic policy measures.

In view of the above evolving developments and its implications on the overall outlook to domestic inflation and the economy, BNM maintains an accommodative stance of monetary policy towards supporting a sustainable economic growth and financial stability. On 6 July 2022, Bank Negara Malaysia ("BNM") decided to increase the Overnight Policy Rate ("OPR") by 25 basis points to 2.25 percent (after the first increase in OPR announced on 11 May 2022).

With the country's economic recovery continue to remain in traction providing supportive environment for businesses, the Bank remains steadfast in building sustainable portfolio with inclusive growth and focus on strengthening its business resilience and to maintain its business agenda with both Japanese and Non-Japanese clients.

#### **Islamic Finance Outlook**

The recent increase in rate by US Federal Reserve, followed by revision of OPR locally by BNM may see some impact on the growth of Islamic Finance Financing Asset, as affordability reduces as well as more cautious approach being taken by the market. Nonetheless, despite all these, the outlook for Islamic Finance is still positive. Islamic Finance is expected to outperform its Conventional counter-part in the area of Financing growth.

Currently, the Bank is working its way towards the introduction of Islamic Green Financing, Islamic Social Financing and Islamic Sustainable Linked Financing, which offer among others discounted pricing to those who achieved their Key Performance Indicators.

While the discounted pricing could help Customer in cushioning the increase in overall Financing rate due to the increse of OPR, it is also helping the Bank and its Customers in making positive contributions to the environment, which is in line with BNM's Value Base Intermediation initiative.
